Do	(1) Silk Chinese tablecloth approx. 8' x 14' tan on tan flower design. (2) Jade peach tree, approx. 22" high incl. Cloissonne pot base (19 peaches). Recd July 25, 1985. Est. Value—Combined $400. Delivered to GSA for disposition Oct. 24, 1985.	H.E. Li Xiannian, Pres. of PR China, and Madame Lin.	Nonacceptance would have caused embarrassment to donors and U.S. Government.
Mrs. George P. Shultz, Wife of the Secretary of State.	Oval pendant 1 9/16" long, 1" wide, encasing Old Roman coin; gold surrounding coin in sort of fleur-de-lis pattern. Recd May 10, 1985. Est. Value—$250. Delivered to GSA for disposition Oct. 24, 1985.	Wife of the President of Israel	Nonacceptance would have caused embarrasement to donor and U.S. Government.
George P. Shultz, Secretary of State, and Mrs. Shultz.	(1) Roman glass fragment, approx. 3" wide (63 BCE 330 CE) on silver filigree base; presentation case of olive wood base; certificate of antiquity included. (2) Map of "Iudaea seu Terra Sancta quae Hebraeorum sive Israelitarum" framed; approx. 33" x 23"; outer frame approx. 40" x 30". (3) 12 bottles Israeli wine, Yarden Galil Sauvignon Blanc 1984. Recd October 17, 1985. Est. Value—Combined $300. Items (1) and (2) Delivered to GSA for disposition Jan. 30, 1986. Item (3) Approved for Department of State official use.	H.E. Shimon Peres, PM of Israel	Do.
George P. Shultz, Secretary of State.	(a) Leather briefcase; burgandy with gold-tone fittings; burgandy keycase; approx. 12" x 17½" x 3¼". (b) Lacquer box; black background w/hand painted winter scene: 2 troikas with passengers. Approx. 7¾" x 2¼" x 1¼". (c) Two books: "The Tretyakov Gallery"; "The Andrei Rubliov Museum of Early Russian Art." Recd November 20, 1985. Est. Value—Combined $300. Delivered to GSA for disposition Jan. 31, 1986.	H.E. Mikhail Gorbachev, Gen. Secretary of the Central Committee of the Communist Party of U.S.S.R.	Do.
George P. Shultz, Secretary of State, and Mrs. Shultz.	(a) 18K gold "Ebel" watch, Roman numerals, leather case; separate leather case for guarantee, black leather band—approx 1¼" across face. (b) Ballpoint pen and holder with quartz watch/calendar "Caran d'Ache", in shape of "C", gold plated; in beige suede presentation case. (c) Swiss music box—approx. 12½" x 6¾" x 4"—Model 5705; plays Rigoletto and Aida; brown lacquer with flor and musical design on top and sides. Recd November 20, 1985. Est. Value—Combined $4,000. Delivered to GSA for disposition Jan. 31, 1986.	H.E. Rene Emmenegger, Mayor of the City of Geneva.	Do.
Do	(a) 18K gold necklace, approx. 17¼" long with removable pendentil which opens to encase different stones for decoration; total of 8 stones. (b) Lithography "View of Geneva" No. 86; matted and framed; 19½" x 17¼" overall size. Recd November 20, 1985. Est. Value—Combined $3500. Delivered to GSA for disposition Jan. 31, 1986.	H.E. Jaques Vernet, President of the Council of States, Geneva, Switzerland.	Do.
Do	(a) One table runner, approx. 38½" x 12"; brown velvet with gold-trim; floral motif embroidered in center, approx. 7½" x 9". (b) Herend porcelain table lamp approx. 14½" high (without shade) butterflies and flowers; handpainted Herand lampshade for lamp; approx. 11¾" high, white background with handpainted flowers and butterflies, gold-rope trim. Recd December 18, 1985. Est. Value—Combined $500. (a) Delivered to GSA for disposition Jan. 31, 1986. (b) Approved for official use at Blair House.	H.E. Peter Varkonyi, Foreign Minister of Hungary, and Mrs. Varkonyi.	Nonacceptance would have caused embarrassement to donors and U.S. Government.
Allen Wallis, Under Secretary of State for Economic Affairs.	Wool/silk rug, approx. 52" x 78½", gold, beige and black. Recd November 18, 1985. Est. Value—$700. Approved for official display in office of donee.	H.E. Mahbub-ul-Haq, Minister of Finance of Pakistan.	Do.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Parts 24, 170, 231, and 240

[Notice No. 584; re: Notice No. 320]

Revision and Recodification of Wine Regulations

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: ATF is publishing for comment a proposed revision and recodification of all Internal Revenue Code (IRC) wine regulations. When viewed from current perspectives, many existing regulations inadequately reflect wine industry technological advances. Some present regulations may also be unclear or overly complex. The intent of the extensive revision is to simplify, modernize and, to the maximum extent possible under existing law, liberalize the wine regulations to achieve a reduced regulatory burden and a resource savings for the wine industry and the Government.

This proposal will also locate all the regulations pertaining to wine issued under the IRC into a new 27 CFR Part 24. Currently, wine regulations are dispersed among several different regulatory parts within Title 27, Chapter I of the Code of Federal Regulations (27 CFR Chapter I). This system of organization is inefficient and imposes a burden on a user who is without knowledge of the entire system.

DATE: Written comments must be received by July 7, 1986.

ADDRESS: Send written comments to Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044–0385 (Notice No. 584).

FOR FURTHER INFORMATION CONTACT: James A. Hunt, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco, and Firearms, Ariel Rios Federal Building, 1200 Pennsylvania Avenue, NW., Washington, DC 20226 (202) 566–7626.

SUPPLEMENTARY INFORMATION:

General

The wine regulations have remained essentially unchanged for over 30 years while the wine industry has changed dramatically, especially in the past few years. Because of technological advances, the wine regulations are in need of updating and many of the present regulatory requirements are unnecessary. A revision of the wine regulations was started in 1979 with an advance notice of proposed rulemaking, Notice No. 320. Information was received from the wine industry and other interested persons on how the wine regulations could be revised. Regulations on records and reports were determined to be in particular need of revision and this project was completed with the publication of Treasury Decision ATF–63 in the **Federal Register** on January 24, 1980.

In early 1982, the Wine Institute submitted a number of suggested wine regulation changes for ATF's consideration. About this time most of the regulatory research and drafting work for the distilled spirits all-in-bond project was done, the number of viticultural area petitions became manageable, and other major legislative project requirements eased so that attention could be given to analyzing the Wine Institute's proposals and the suggestions accumulated from the Notice No. 320 (44 FR 29691).

The first action was to delete Subpart XX from 27 CFR Part 240, thereby eliminating approximately 80 regulatory sections. At the same time, the complex and somewhat controversial subject of materials and processes authorized for treatment of wine was opened for public comment with the publication of Notice No. 413 (47 FR 26399). Significant progress was made on this subject with the publication of Treasury Decision ATF–182 (49 FR 37510). However, a few issues are still unresolved and are being aired under Notice No. 543 (49 FR 37527).

In this notice, a revision of all IRC wine regulations in 27 CFR parts 170, 231 and 240 and a consolidation of these regulations into a new 27 CFR Part 24 is proposed. The revision recognizes technological advances in production, deletes numerous outdated and repetitive regulations, simplifies and clarifies regulatory language, reduces many regulatory burdens placed on the wine industry and on the Government. Specifically, the revision reduces the number of regulatory subparts for 60 to 15, the number of regulatory sections from 450 to 225, and the regulatory verbiage by about 65 percent. In addition, over 90 ATF rulings and revenue rulings would be eliminated or incorporated into the new regulations and 8 of 14 winery forms are eliminated.

Because the revision is extensive, the preamble of this notice is divided into two parts: (1) A brief explanatory discussion of each new subpart and (2) an indexed (Derivation) table which shows the present law, regulation or ruling from which each new regulatory section is derived.

Discussion of 27 CFR Part 24 Subparts A–O

Subpart A–Scope is revised to conform to the part headings in Subpchapter F of 26 U.S.C. Chapter 51. Also, the status and operation of previously approved bonded winery, bonded wine cellar, or taxpaid wine bottling house premises after the effective date of these regulations is addressed.

Subpart B—Definitions contains numerous definitions which are revised to be closer conformity with applicable statutory provisions. A few new definitions which reflect advances in wine technology or which improve understanding of the wine regulations have been added such as chaptalization, Brix, and use of gram per liter instead of parts per thousand.

Subpart C—Administrative and Miscellaneous Provisions is a new subpart which consolidates many wine regulations which are currently widely dispersed among 27 CFR Parts 170, 231, and 240. Several provisions in this subpart are not repeated in other subpart sections but are referenced. Found in this subpart are the regulations pertaining to authorities of the Director, regional director (compliance), and ATF officers; facilities and assistance; employer identification number; occupational taxes; assessments; claims; tax exempt wine; formulas; essences; conveyance of wine and spirits on wine premises; and samples. Provisions of Treasury Decision AFT–149 (48 FR 46426) regarding samples submitted with formulas are incorporated. The notice requirement for samples of spirits is eliminated. Also, specific requirements relating to office facilities are deleted.

Subpart D—Establishment and Operations contains regulations relating to the establishment of wine premises. This includes the types of wine premises, application procedures, changes in existing wine premises, alternation of the wine premises, bonds and consents of surety, and discontinuance of wine operations. The new regulations provide for the establishment of a bonded winery, bonded wine cellar, or taxpaid wine bottling house which are operationally termed wine premises. Wine premises may include both bonded wine premises and taxpaid wine premises. Segregation and identification of untaxpaid wine or spirits, taxpaid wine or spirits, and other products on wine premises is required, but a physical barrier such as a partition, fence, or wall would rarely be required. The new sections on alternation reflect changes in the way wine premises are used in the wine industry. A taxpaid wine bottling house may be established if only operations involving taxpaid wine are desired. Application requirements are reduced. Many reguirements relating to information in making a decision on whether an application should be approved which ATF already has or which is determined to be unnecessary are eliminated. A single application form, ATF Form 5120.25 (698), is used to apply for the establishment of a bonded winery, bonded wine cellar or taxpaid wine bottling house. The requirement to submit a plat depicting the premises is deleted because, in most applications, a description of the premises is sufficient. Also, plats were usually prepared by an architect or engineer which put an added burden on the proprietor of a small winery. The provisions relating to the execution and filing of bonds and consents of surety are extensively revised. It is proposed that the obligation of the bonded wine cellar bond with respect to taxes which have been determined but not paid on wine removed from bonded wine premises be raised from $100 to $500. This will save most winery proprietors the expense and paperwork involved in obtaining a tax deferral bond. In addition, ATF is proposing that the obligation of the bond be broadened to cover volatile fruit-flavor concentrate or other commodities subject to tax under 26 U.S.C. Chapter 51 which are in transit to or on bonded wine premises. This change eliminates the need for a separate bond covering volatile fruit-flavor concentrate and for many of the currently required consents of surety. Further, ATF is proposing that a single form be used for both the bonded wine cellar bond and the tax deferral bond.

Subpart E—Construction and Equipment regulations are significantly reduced. The proposed requirements for construction and equipment allow for a greater degree of flexibility in establishing and operating a wine premises.

Subpart F—Production of Wine regulations are completely revised. The time of determining and reporting wine as produced is modified. The separate provisions which currently exist for grape and fruit wine production are consolidated, and, when appropriate, it is noted whether a provision is applicable to grape, fruit, or berry wine production. A new section allows for chaptalization, i.e., the addition of pure sugar to juice for the purpose of developing alcohol, so that wine may be produced from juice having both low sugar and low acid. The sections on amelioration and sweetening are completely revised and should be clearer and easier to understand. One provision on calculating the amount of ameliorating material allowed requires an acid level determination of juice before blending that juice with juice from another State. The sections on use of concentrated and unconcentrated fruit juice, sugar, acid, distillates containing aldehydes, and volatile fruit-flavor concentrate are revised and put into this new subpart.

Subpart G—Production of Effervescent Wine is revised to eliminate the requirement for filing a formula and statement of process. This is done because the processing methods and basic materials used for effervescent wine production are no longer considered unique. The subpart incorporates industry technological advances such as the bulk process and tank transfer methods of production in the section revisions.

Subpart H—Production of Special Natural Wine is reduced to the essentials by moving to another subpart the regulations on essences and procedures involved with obtaining formulas. This is done because the requirements for essences and formulas are also applicable to wine other than special natural wine.

Subpart I—Production of Agricultural Wine is also reduced in volume by combining a few of the sections and referencing the formula requirements.

Subpart J—Production of Other Than Standard Wine regulations are revised to be clearer and easier to understand. Added to this subpart is a provision which provides for the blending of wines made from different kinds of fruits. An increased interest in producing wine with sugar and water added beyond the limitations for standard wine resulted in an analysis and revision of the regulation covering these wines. The section on "Other wine", 24.218, will allow for the production of wine with sugar and water beyond the limitations prescribed for standard wine if the basic character is derived from the primary winemaking material. Also, the addition of wine spirits to "Other wine" is specifically provided for in § 24.218(b). Additionally, specifications for salted wine are incorporated in the section covering wine and wine products not for beverage use.

Subpart K—Spirits contains the provisions for use of wine spirits in beverage wine production and for use of spirits in nonbeverage wine production. Section 455 of the Deficit Reduction Act of 1984 (Pub. L. 98–369, 72 Stat. 1362, as amended), signed into law and effective on July 18, 1984, provides for the use of spirits other than wine spirits in the production of nonbeverage wine and wine products in the United States. Because the regulations implementing Section 455 were published as a final rule without public comment (T.D. ATF–186, 49 FR 42567), this is the first opportunity for public comment on these regulations. The application to withdraw wine spirits and the report of wine sprits added to wine are eliminated. The new regulations incorporate rulings allowing for the addition of spirits without Government supervision, which has proved to be an efficient method of operation for the wine industry and the Government for several years.

Subpart L—Storage, Treatment and Finishing of Wine contains, in sections 24.246 through 24.250, regulations relating to materials and processes authorized for the treatment of standard wine, juice and distilling material, the subject of Notice No. 413 (47 FR 26399) published on June 18, 1982, and Notice No. 543 (49 FR 37527) and Treasury Decision ATF–182 (49 FR 37510) published on September 24, 1984. These complex and somewhat controversial sections are again opened for review and comment by the issuance of this notice. Also, included in this new subpart are several sections which deal specifically with the bottling, packing, and labeling of wine. Due to the increased use of larger sized containers as consumer units in the marketing of wine and a need to achieve a uniform understanding of the terms "bottle" and "container" for regulatory purposes, the following definitions (also found in Subpart B) are under consideration for use in this part: a *bottle* is four liters (one gallon) or less; a *container* is larger than four liters; a *bulk container* is over 60 liters; a *case* is two or more bottles, or one or more containers enclosed in a box or fastened together; a *bottler* is a wine premises proprietor who fills wine into a bottle; and a *packer* is a wine premises proprietor who fills wine into a container. Additionally, a new section is proposed to cover the aging of wine after bottling or packing. Fill tolerances based on the sizes of bottles and containers and allowing for a level of overfill not to exceed 0.5 percent are proposed as well as requirements to determine bottle or container net contents and the alcohol content. Due to the advent to low alcohol wine not covered by the labeling provisions of the FAA Act, a label for any wine under 7 percent alcohol by volume will be required to show the actual alcohol percent by volume with a tolerance of

VOL 51 ISS 45 MR 7 1986 UMI

plus or minus 10 percent and be designated a wine.

Subpart M—Losses of Wine consolidates this important subject into one subpart to allow for an easy reference to the method of reporting and accounting for losses of wine.

Subpart N—Removal, Return and Receipt of Wine is divided into sections addressing taxpaid removals and payment by check, cash, money order or EFT, transfer of wine in bond, removals without payment of tax, return of taxpaid wine to bond, and taxpaid wine operations. One form, Excise Tax Return, ATF F 5000.24, will replace the Wine Tax Return, ATF F 5120.27, and Prepayment Return—Wine Tax, ATF F 5120.37, forms. Due to a significant increase in the past five years in the number of small wineries paying less than $500 in wine tax annually, ATF is proposing to allow these taxpayers to file returns annually rather than twice a month. In addition, it is proposed that proprietors who paid less than $5,000 the previous calendar year be allowed to file quarterly returns. These changes, if adopted, would eliminate the necessity of filing and processing over 12,000 tax returns which are currently being filed each year. ATF Form 703, Transfer of Wine in Bond, is eliminated, resulting in another significant reduction in paperwork burden. The new section on taxpaid wine operations incorporates much of what is now in 27 CFR Part 231—Taxpaid Wine Bottling Houses.

Subpart O—Records and Reports is updated and revised to make it easier to find the recordkeeping requirements. Even though the regulations on records and reports were the subject of a revision recently, several further reductions in recordkeeping and reporting requirements are proposed. Recordkeeping requirements on maintaining an audit trail to allow verification of label information is more clearly defined. A significant change for a winery with limited operations which are not difficult to audit would be allowing source records to be used as the daily record and use of an abbreviated monthly summary record of operations, such as use of an adding machine tape.

Outline of Derivation and Revision for 27 CFR Part 24

The following table is provided to aid in the understanding of the regulation changes proposed. The table provides the applicable statutory authority, the regulatory section, or the ruling from which the proposed regulation is derived. In addition, the extent to which a regulation is revised or whether it is a new regulatory section is indicated.

Action Legend:
C=Complete revision.
O=No revision.
P=Partial revision.
N=New section.

24.210	Classes of wine other than standard wine.	240 Subpart U/C
24.211	Formula required.	240 Subpart U/C
24.212	High fermentation wine.	240 Subpart U/C
24.213	Heavy bodied blending wine.	240 Subpart U/C
24.214	Spanish type blending sherry.	240 Subpart U/C
24.215	Wine or wine products not for beverage use.	240 Subpart U/C 170 Subpart Z/C
24.216	Distilling material.	240 Subpart U/C
24.217	Vinegar stock	240 Subpart U/C
24.218	Other wine	240 Subpart U/C
24.219	Spoiled wine	240 Subpart U/C

SUBPART K—SPIRITS

24.225	General	240.374, 240.820/C
24.226	Receipt or transfer of spirits.	240.822, 240.839/C
24.227	Transfer of spirits by pipeline for immediate use.	240.824/P
24.228	Transfer of spirits by pipeline to a spirits storage tank.	240.825/P

Sec		
24.229	Tank car and tank truck requirements.	240.826/P
24.230	Examination of tank car or tank truck.	240.827/P
24.231	Receipt of spirits in sealed bulk containers.	240.828/P
24.232	Gauge of spirits.	240.831/P
24.233	Addition of spirits to wine.	240.830, 240.832/P
24.234	Other use of spirits.	240.835/P
24.235	Taxpayment or destruction of spirits.	240.836, 240.838/C
24.236	Losses of spirits.	240 Subpart QQ/C
24.237	Spirits added to juice or concentrated fruit juice.	240.383/P

SUBPART L—STORAGE, TREATMENT AND FINISHING OF WINE

24.240	General	240.520, 240.524/C
24.241	Decolorizing wine.	240.527/P
24.242	Authority to use greater quantities of activated carbon in juice and in white wine.	240.527a/P
24.243	Filtering aids	240.528/P
24.244	Use of acid to stabilize standard wine.	240.526/P
24.245	Use of carbon dioxide in still wine.	240.531, 240.532, 240.533, 240.534, 240.535/C
24.246	Materials authorized for treatment of wine and juice.	240.1051, 240.1052/C
24.247	Materials authorized for treatment of distilling material.	240.1051, 240.1052/C
24.248	Processes authorized for treatment of wine, juice, and distilling material.	240.1051, 240.1052/C
24.249	Experimentation with a new treating material or process.	240.1051, 240.1052/C
24.250	Application for use of a new treating material or process.	240.1051, 240.1052/C

Bottling, Packing, and Labeling of Wine

24.255	Bottling or packing wine.	240.578/C
24.256	Bottle aging of wine.	240.579/C
24.257	Labeling wine bottles or containers.	240.579/C
24.258	Certificates of approval or exemption.	240.580/P
24.259	Marks	240.562/P
24.260	Serial numbers or filling date.	240.561/P

SUBPART M—LOSSES OF WINE

24.265	Losses by theft	240 Subpart NN/C
24.266	Inventory losses.	240 Subpart NN/C
24.267	Losses in transit.	240 Subpart NN/C
24.268	Losses by fire or other casualty.	240 Subpart NN/C

SUBPART N—REMOVAL, RETURN AND RECEIPT OF WINE

Taxpaid Removals

24.270	Determination of tax.	240 Subpart AA/P
24.271	Payment of tax by check, cash, or money order.	240 Subpart AA/P
24.272	Payment of tax by electronic fund transfer.	240 Subpart AA/P
24.273	Exception to filing semi-monthly tax returns.	240 Subpart AA/P
24.274	Failure to timely pay tax or file a return.	240 Subpart AA/P
24.275	Prepayment of tax.	240 Subpart AA/P
24.276	Prepayment of tax; proprietor in default.	240 Subpart AA/P
24.277	Date of mailing or delivering of returns.	240 Subpart AA/P

Transfer of Wine in Bond

24.280	General	240 Subpart BB/C
24.281	Consignor premises.	240 Subpart BB/C
24.282	Multiple transfers.	240 Subpart BB/C
24.283	Reconsignment	240 Subpart BB/C
24.284	Consignee premises.	240 Subpart BB/C

Removals Without Payment of Tax

24.290	Distilling material.	240.630, 240.631, 240.632/C
24.291	Vinegar	240.651, 240.653, 240.658, 240.659/P
24.292	Exported wine	240.670, 240.672/P
24.293	Wine for Government use.	240.720, 240.722/P
24.294	Destruction of wine.	240.750, 240.751, 240.753/C

Return of Taxpaid Wine to Bond

24.295	Return of taxpaid wine to bond.	240.800, 240.803, 240.805, 240.806, 240.807, 240.808, 240.809/C

Taxpaid Wine Operations

24.296	Taxpaid wine operations.	231.80, 231.81, 231.82, 231.83, 231.84/C

Public Participation

Although many specific changes are proposed to make the wine regulations as simple and clear as possible, it is recognized that other changes which have merit may not have been considered. Therefore, ATF invites comments on additional regulatory changes that consumers, industry members, and other interested parties feel should be made to the proposed wine regulations. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future agency action.

ATF will not recognize any material or comment as confidential. Comments may be disclosed to the public. Any material which the respondent considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The names of commenters are not exempt from disclosurre.

All comments received and copies of the proposed regulations will be available for public inspection during normal business hours at the:

ATF Reading Room, Office of Public Affairs and Disclosure, Ariel Rios Federal Building, Room 4406, 1200 Pennsylvania Avenue, NW., Washington, DC

Any person who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit a request, in writing, to the Director within the comment period. The Director, however, reserves the right to determine, in the light of all circumstances, whether a public hearing should be held.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal because this proposed rule, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities or to impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

It has been determined that this proposed rule is not a "major rule" within the meaning of Executive Order 12291 (46 FR 13193) of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The requirements to collect information proposed in this notice of proposed rulemaking have been submitted to the Office of Management and Budget under section 3504(h) of the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. Chapter 35. Comments relating to AFT's compliance with 5 CFR Part 1320—Controlling Paperwork Burdens on the Public should be submitted to: Office of Information and Regulatory Affairs, Attention: ATF Desk Officer, Office of Management and Budget, Washington, DC 20503.

List of Subjects in 27 CFR Part 24

Administrative practice and procedure, Authority delegations, Claims, Electronic fund transfers, Excise taxes, Exports, Food additives, Fruit juices, Labeling, Liquors, Packaging and containers, Reporting requirements, Research, Scientific equipment, Spices and flavorings, Surety bonds, Taxpaid wine bottling house, Transportation, Vinegar, Warehouses, Wine.

Obsolete Wine Rulings

The provisions of the following Revenue Rulings and ATF Rulings and Procedures are either incorporated into or are obsoleted by the proposed regulations: Revenue Rulings 54–351, 1954–2 C.B. 462; 54–375, 1954–2 C.B. 559; 54–495, 1954–2 C.B. 522; 55–213, 1955–1 C.B. 596; 55–214, 1955–1 C.B. 597; 55–215, 1955–1 C.B. 599; 55–322, 1955–1 C.B. 596; 55–344, 195–1 C.B. 597; 55–363, 1955–1 C.B. 595; 55–489, 1955–2 C.B. 499; 55–535, 1955–2 C.B. 707; 55–536, 1955–2 C.B. 710; 55–667, 1955–2 C.B. 710; 55–668, 1955–2 C.B. 711; 55–742, 1955–2 C.B. 706; 55–743, 1955–2 C.B. 705; 55–744, 1955–2 C.B. 706; 56–8, 1956–1 C.B. 749; 56–10, 1956–1 C.B. 748; 56–32, 1956–1 C.B. 750; 56–201, 1956–1 C.B. 748; 56–494, 1956–2 C.B. 1044; 56–535, 1956–2 C.B. 1032; 56–536, 1956–2 C.B. 1032; 56–550, 1956–2 C.B. 1042; 57–99, 1957–1 C.B. 609; 57–158, 1957–1 C.B. 561; 57–197, 1957–1 C.B. 607; 57–291, 1957–1 C.B. 608; 57–413, 1957–2 C.B. 965; 57–477, 1957–2 C.B. 966; 57–557, 1957 C.B. 965; 58–87, 1958–1 C.B. 598; 58–597, 1957–2 C.B. 1003; 59–353, 1959–2 C.B. 606; 59–413, 1959–2 C.B. 518; 60–94, 1960–1 C.B. 710; 61–125, 1961–2 C.B. 282; 62–25, 1962–1 C.B. 356; 63–31, 1963–1 C.B. 300; 63–71, 1963–1 C.B. 82; 63–192, 1963–2 C.B. 136; 64–299, 1964–2 C.B. 574; 66–166, 1966–1 C.B. 333; 66–361, 1966–2 C.B. 536; 67–83, 1967–1 C.B. 410; 67–84, 1967–1 C.B. 410; 69–521, 1969–2 C.B. 274; 70–113, 1970–1 C.B. 332; 70–210, 1970–1 C.B. 332; 71–54, 1971–1 C.B. 457; 71–500, 1971–2 C.B. 455; 72–204, 1972–1 C.B. 422; 72–272, 1972–1 C.B. 411; ATF Rulings 72–2, 1972–ATF C.B. 84; 73–4, 1973–ATF C.B. 83; 73–15, 1973–ATF C.B. 78; 74–10, 1974–ATF C.B. 40; 75–2, 1975–ATF C.B. 50; 75–8, 1975–AFT C.B. 38; 75–13, 1975–ATF C.B. 52; 75–19, 1975–ATF C.B. 51; 75–34, 1975–ATF C.B. 49; 76–21, 1976–ATF C.B. 90; 79–12, ATF Quarterly Bulletin 1979–2, 6; 80–14, ATF Quarterly Bulletin 1980–3, 19; 81–9, ATF Quarterly Bulletin 1981–4, 25; 82–1, ATF Quarterly Bulletin 1982–1, 16; and Revenue Procedures 62–34, 1962–2 C.B. 534; 72–30, 1972–1 C.B. 759; and ATF Procedure 74–2, 1974–ATF C.B. 69.

Authority and Issuance

Paragraph 1. 27 CFR PART 170—Miscellaneous Regulations Relating to Liquors authority citation is revised to read as follows:

Authority: 6 U.S.C. 6, 7; 18 U.S.C. 926; 22 U.S.C. 2778; 26 U.S.C. 5001, 5002, 5064, 5111, 5121, 5171, 5205, 5291, 5301, 5362, 7805; 26 U.S.C. 205; 44 U.S.C. 3504(h).

Par. 2. 27 CFR Part 170 is amended by reserving the heading for Subpart Z, Regulations Respecting Wine and Wine Products Rendered Unfit for Beverage Use, and removing both the table of sections and all the regulatory sections (170.681 through 170.691), and revising and incorporating these provisions, after revision, into a new 27 CFR Part 24—Wine

Par. 3. 27 CFR PART 231—TAXPAID WINE BOTTLING HOUSES is removed and the provisions revised and incorporated into a new 27 CFR PART 24—WINE.

Par. 4. 27 CFR PART 240—WINE is revised and redesignated as 27 CFR PART 24—WINE to read as follows:

PART 24—WINE

Subpart A—Scope

Sec.
24.1 General.
24.2 Territorial extent.
24.3 Status and operation of existing premises.
24.4 Related regulations.

Subpart B—Definitions

24.10 Meaning of terms.

Subpart C—Administrative and Miscellaneous Provisions

Authorities of the Director

24.20 Forms prescribed.
24.21 Modified forms.
24.22 Alternate method or procedure.

Authorities of the Regional Director (Compliance)

24.25 Emergency variations from requirements.
24.26 Authority to approve.
24.27 Segregation of operations.
24.28 Installation of meters, tanks, and other apparatus.
24.29 Claims.
24.30 Supervision.
24.31 Submission of forms and reports.
24.32 Records.

Authorities of ATF Officers

24.35 Right of entry and examination.
24.36 Instruments and measuring devices.
24.37 Samples for the United States.

Facilities and Assistance

24.40 Gauging and measuring.
24.41 Office facilities.

Employer Identification Number

24.45 Use on returns.
24.46 Application.
24.47 Execution of IRS Form SS–4.

Occupational Taxes

24.50 Payment of tax.
24.51 Exemption from occupational tax.
24.52 Wholesale dealer.
24.53 Filing of return.
24.54 Hand-carried returns.
24.55 Special tax stamp.

Assessments

24.60 General.
24.61 Assessment of tax.
24.62 Notice.

Claims

24.65 Claims for wine or spirits lost or destroyed in bond.
24.66 Claims on wine returned to bond.
24.67 Other claims.
24.68 Insurance coverage.

Sec.
24.69 Filing of claims.
24.70 Claims for credit of tax.

Tax Exempt Wine

24.75 Wine for personal or family use.
24.76 Cider.
24.77 Experimental wine.

Formulas

24.80 General.
24.81 Filing of formulas.
24.82 Samples.

Essences

24.85 Essences.
24.86 Essences produced on wine premises.
24.87 Essences made elsewhere.

Conveyance of Wine and Spirits on Wine Premises

24.90 Taxpaid products.
24.91 Conveyance of untaxpaid wine or spirits.
24.92 Products in customs custody.

Samples

24.95 General.
24.96 Use off premises.
24.97 Use on premises.

Subpart D—Establishment and Operations

24.100 General.

Premises and Operations

24.101 Bonded wine premises.
24.102 Taxpaid wine premises.
24.103 Other operations.

Application

24.105 General.
24.106 Basic permit requirements.
24.107 Designation as bonded winery.
24.108 Bonded wine warehouse application.
24.109 Data for application.
24.110 Organizational documents.
24.111 Description of premises.
24.112 Description of equipment.
24.113 Trade names.
24.114 Description of volatile fruit-flavor concentrate operations.
24.115 Registry of stills.
24.116 Registry number.
24.117 Powers of attorney.
24.118 Maintenance of application file.

Changes Subsequent to Original Establishment

24.120 Amended application.
24.121 Changes affecting permits.
24.122 Change in name of proprietor or trade name.
24.123 Change in stockholders.
24.124 Change in corporate officers.
24.125 Change in proprietorship.
24.126 Change in proprietorship involving a bonded wine warehouse.
24.127 Adoption of formulas.
24.128 Continuing partnerships.
24.129 Change in location.
24.130 Change in volatile fruit-flavor concentrate operations.
24.131 Change in construction and use of buildings and equipment.

Alternation

24.135 Wine premises alternation.
24.136 Procedure for alternating proprietors.

Sec.
24.137 Alternate use of the wine premises for customs purposes.

Permanent Discontinuance of Operations

24.140 Notice.
24.141 Bonded wine warehouse.

Bonds and Consents of Surety

24.145 General requirements.
24.146 Bonds.
24.147 Operations bond or unit bond.
24.148 Penal sums of bonds.
24.149 Corporate surety.
24.150 Powers of attorney.
24.151 Deposit of collateral security.
24.152 Consents of surety.
24.153 Strengthening bonds.
24.154 New or superseding bonds.
24.155 Disapproval and appeal from disapproval.
24.156 Termination of bonds.
24.157 Application by surety for relief from bond.
24.158 Extent of relief.
24.159 Release of collateral security.

Subpart E—Construction and Equipment

24.165 Premises.
24.166 Buildings and rooms.
24.167 Tanks.
24.168 Identification of tanks.
24.169 Pipelines.
24.170 Measuring devices and testing instruments.

Subpart F—Production of Wine

24.175 General.
24.176 Crushing and fermentation.
24.177 Chaptalization.
24.178 Amelioration.
24.179 Sweetening.
24.180 Use of concentrated and unconcentrated fruit juice.
24.181 Use of sugar.
24.182 Use of acid to correct natural deficiencies.
24.183 Use of distillates containing aldehydes.
24.184 Use of volatile fruit-flavor concentrate.

Subpart G—Production of Effervescent Wine

24.190 General.
24.191 Segregation of operations.
24.192 Process and materials.
24.193 Conversion into still wine.

Subpart H—Production of Special Natural Wine

24.195 General.
24.196 Formula required.
24.197 Production by fermentation.
24.198 Blending.

Subpart I—Production of Agricultural Wine

24.200 General.
24.201 Formula required.
24.202 Dried Fruit.
24.203 Honey wine.
24.204 Other agricultural products.

Subpart J—Production of Other Than Standard Wine

24.210 Classes of wine other than standard wine.

Subpart A—Scope

§ 24.1 General.

The regulations in this part relate to the establishment and operation (including incidental activities) of wine premises and to the treatment and classification of wine.

§ 24.2 Territorial extent.

This part applies to the several States of the United States and the District of Columbia.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1337, as amended (26 U.S.C. 5065))

§ 24.3 Status and operation of existing premises.

(a) *Qualification.* Proprietors of a previously approved bonded winery, bonded wine cellar, or taxpaid wine bottling house may continue to operate, pursuant to their prior qualification, after the effective date of this part. All wine premises hereafter established, and changes in existing premises, will be in conformity with the provisions of this part.

(b) *Continuing operations.* All operations at a bonded winery, bonded wine cellar, or taxpaid wine bottling house will be conducted pursuant to the provisions of this part. The proprietor will determine whether operation under any previous approved alternate method or procedure, emergency variation from requirements, or exceptions to construction and equipment requirements or methods of operation is consistent with the provisions of this part. The proprietor will immediately discontinue the conduct of any operation determined to be inconsistent with the provisions of this part. Each proprietor shall submit to the regional director (compliance), within 60 days after the effective date of this part, a list which describes and gives the original approval date of each authorization to be continued. Any prior authorization not listed by the proprietor will automatically terminate 60 days after the effective date of this part.

§ 24.4 Related regulations.

Regulations related to this part are listed below:

26 CFR Part 301—Procedure and Administration.
27 CFR Part 1—Basic Permit Requirements Under the Federal Alcohol Administration Act.
27 CFR Part 2—Nonindustrial Use of Distilled Spirits and Wine.
27 CFR Part 4—Labeling and Advertising of Wine.
27 CFR Part 13—Gauging Manual.

27 CFR Part 18—Production of Volatile Fruit-Flavor Concentrates.
27 CFR Part 19—Distilled Spirits Plants.
27 CFR Part 170—Miscellaneous Regulations Relating to Liquor.
27 CFR Part 194—Liquor Dealers.
27 CFR Part 200—Rules of Practice in Permit Proceedings.
27 CFR Part 250—Liquors and Articles from Puerto Rico and the Virgin Islands.
27 CFR Part 251—Importation of Distilled Spirits, Wines and Beer.
27 CFR Part 252—Exportation of Liquors.
31 CFR Part 225—Acceptance of Bonds, Notes, or Other Obligations Issued or Guaranteed by the United States as Security in Lieu of Surety or Sureties on Penal Bonds.

Subpart B—Definitions

§ 24.10 Meaning of terms.

When used in this part and in the forms prescribed under this part, terms will have the meanings ascribed in this section. Words in the plural form also include the singular, and *vice versa,* and words imparting the masculine gender also include the feminine. The terms "includes" and "including" do not exclude items not enumerated which are in the same general class. The definitions in this section do not supersede or affect the requirements of Part 4 of this chapter, relative to the labeling of wine under the provisions of the Federal Alcohol Administration Act (49 Stat. 981; 27 U.S.C. 205).

Affiliated persons or firms. When used in connection with "own production", one or more bonded wine premises proprietors associated as members of the same farm cooperative, or any one or more bonded wine premises proprietors affiliated within the meaning of section 17(a)(5) of the Federal Alcohol Administration Act, as amended (49 Stat. 989; 27 U.S.C. 211).

Agricultural wine. Wine made from suitable agricultural products other than the juice of grapes, berries, or other fruits.

Allied products. Commercial fruit products and by-products (including volatile fruit-flavor concentrate) not taxable as wine.

Amelioration. The addition to juice or natural wine before, during, or after fermentation, of either water or pure sugar, or a combination of water and pure sugar, or liquid sugar or invert sugar syrup, to adjust the acid level.

Area supervisor. The supervisory officer of a Bureau of Alcohol, Tobacco and Firearms area office.

Artificially carbonated wine. Effervescent wine artificially charged with carbon dioxide and containing more than 0.392 grams of carbon dioxide per 100 milliliters.

ATF officer. An officer or employee of the Bureau of Alcohol, Tobacco and Firearms (ATF) authorized to perform any functions relating to the administration or enforcement of this part.

Bank. Any commercial bank or other financial institution.

Banking day. Any day during which a bank or other financial institution is open to the public for carrying on substantially all its banking functions.

Bonded winery. The designation given to bonded wine premises established under the provisions of this part on which wine production operations are conducted and other authorized operations may be conducted.

Bonded wine cellar. The designation given to bonded wine premises established under the provisions of this part including premises designated as a bonded winery.

Bonded wine premises. Wine premises established under the provisions of this part on which operations in untaxpaid wine are authorized to be conducted.

Bonded wine warehouse. The designation given to warehouse facilities established under the provisions of this part on bonded wine premises by a warehouse company or other person for the storage of wine and allied products for credit purposes.

Bottle. A receptacle four liters or less in capacity, regardless of the material from which it is made, used to store wine or to remove wine from wine premises.

Bottler. A proprietor of wine premises established under the provisions of this part who fills wine into a bottle.

Brix. The quantity of dissolved solids expressed as grams of sucrose in 100 grams of solution at 60 degrees F. (Percent by weight of sugar).

Bulk container. Any container larger than 60 liters.

Business day. Any day, other than Saturday, Sunday, or a legal holiday. (The term "legal holiday" includes all holidays in the District of Columbia and statewide holidays in a particular State in which a claim, report, or return, as the case may be, is required to be filed, or the act is required to be performed.)

Calendar year. The period which begins January 1 and ends on the following December 31.

Case. Two or more bottles, or one or more containers, enclosed in a box or fastened together by some other method.

Chaptalization. The addition of pure sugar to juice before or during fermentation to develop alcohol by fermentation.

Concentrate plant. An establishment qualified under Part 18 of this chapter for the production of volatile fruit-flavor concentrate.

Container. A receptacle larger than four liters, regardless of the material from which it is made, used to store wine or to remove wine from wine premises. (Also see the definition of bulk container).

Director. The Director, Bureau of Alcohol, Tobacco and Firearms, the Department of the Treasury, Washington, D.C.

Director of the service center. A director of an internal revenue service center.

Distilled spirits plant. An establishment qualified under Part 19 of this chapter (excluding alcohol fuel plants) for the production, warehousing, or processing of distilled spirits (including denatured spirits), or the manufacture of articles.

Distilling material. Any fermented or other alcoholic substance capable of, or intended for use in, the original distillation or other original processing of spirits.

District director. A district director of internal revenue.

Effervescent wine. A wine containing more than 0.392 grams of carbon dioxide per 100 milliliters.

Electronic fund transfer (EFT). Any transfer of funds effected by a proprietor's financial institution, either directly or through a correspondent banking relationship, via the Federal Reserve Communications System (FRCS) or Fedwire to the Treasury Account at the Federal Reserve Bank of New York.

Executed under penalties of perjury. Signed with the prescribed declaration under the penalties of perjury as provided on or with respect to the return, claim, form, or other document or, where no form of declaration is prescribed, with the declaration: "I declare under the penalties of perjury that this ______ (insert type of document such as statement, report, certificate, application, claim, or other document), including the documents submitted in support thereof, has been examined by me and, to the best of my knowledge and belief, is true, correct, and complete."

Export or exportation. A severance of goods from the mass of things belonging to the United States with the intention of uniting them to the mass of things belonging to some foreign country and will include shipments to any possession of the United States. For the

VOL 51
ISS 45
MR 7
1986
UMI

purposes of this part, shipments to the Commonwealth of Puerto Rico and to the territories of the Virgin Islands, American Samoa, and Guam will also be treated as exportations.

Fiduciary. A guardian, trustee, executor, receiver, administrator, conservator, or any person acting in any fiduciary capacity for any person.

Financial institution. A bank or other financial institution, whether or not a member of the Federal Reserve System, which has access to the Federal Reserve Communications System (FRCS) or Fedwire. The "FRCS" or "Fedwire" is a communications network that allows Federal Reserve System member financial institutions to effect a transfer of funds for their customers (or other financial institutions) to the Treasury account at the Federal Reserve Bank of New York.

Fold. The ratio of the volume of the fruit must or juice to the volume of the volatile fruit-flavor concentrate produced from the fruit must or juice; for example, one gallon of volatile fruit-flavor concentrate of 100-fold would be the product from 100 gallons of fruit must or juice.

Foreign wine. Wine produced outside the United States.

Fruit must. Any unfermented mixture of juice, pulp, skins, and seeds prepared from fruit, berries, or grapes.

Fruit wine. Wine made from the juice of sound, ripe fruit (including wine made from berries or wine made from less than 100 percent grapes).

Gallon or wine gallon. A United States gallon of liquid measure equivalent to the volume of 231 cubic inches.

Grams per liter. For the purposes of this part, the unit of measure equivalent to the "parts per thousand" unit of measure prescribed in the Internal Revenue Code of 1954, as amended.

Grape wine. Wine made from the juice of sound, ripe grapes.

Heavy bodied blending wine. Wine made from fruit without added sugar, with or without added wine spirits, and conforming to the definition of natural wine in all respects except as to maximum total solids content.

High-proof concentrate. A volatile fruit-flavor concentrate (essence) that has an alcohol content of more than 24 percent by volume and is unfit for beverage use (nonpotable) because of its natural constituents, i.e., without the addition of other substances.

In bond. When used with respect to wine or spirits, "in bond" refers to wine or spirits possessed under bond to secure the payment of the taxes imposed by 26 U.S.C. Chapter 51, and on which such taxes have not been determined. The term includes any wine or spirits on the bonded premises of a bonded winery, bonded wine cellar or distilled spirits plant, or in transit between bonded premises (including in the case of wine, bonded wine premises). Additionally, the term refers to wine withdrawn without payment of tax under 26 U.S.C. 5362 and to spirits withdrawn without payment of tax under 26 U.S.C. 5214 (a)(5) or (a)(13) with respect to which relief from liability has not yet occurred.

Invert sugar syrup. A substantially colorless solution of invert sugar which has been prepared by recognized methods of inversion from pure sugar and contains not less than 60 percent sugar by weight (60 degrees Brix).

Juice. The unfermented juice (concentrated or unconcentrated) of fruit, berries, grapes, and authorized agricultural products exclusive of pulp, skins, or seeds.

Kind. Kind means the class and type of wine prescribed in this part and in 27 CFR Part 4.

Lees. The settlings of wine.

Liter. A metric unit of capacity equal to 1,000 cubic centimeters of alcoholic beverage, and equivalent to 33.814 U.S. fluid ounces.

Liquid sugar. A substantially colorless pure sugar and water solution containing not less than 60 percent pure sugar by weight (60 degrees brix).

Lot. Wine of the same type. When used with reference to a "lot of wine bottled", lot means the same type bottled or packed on the same date into bottles or containers of the same measure on the same bottling line.

Natural wine. The product of the juice of sound, ripe grapes or other sound, ripe fruit (including berries) made with any cellar treatment authorized by Subparts F and L of this part and containing not more than 21 percent by weight (21 degrees Brix) of total solids.

Nonbeverage wine. Wine, or wine products made from wine, rendered unfit for beverage use in accordance with § 24.215.

Own production. When used with reference to wine in a bonded winery, the term means wine produced by fermentation in the same bonded winery, whether or not produced by a predecessor in interest at the bonded winery. The term includes wine produced by fermentation in bonded wineries owned or controlled by the same or affiliated persons or firms when located within the same State.

Packer. A proprietor of wine premises established under the provisions of this part who fills wine into a container.

Person. An individual, trust, estate, partnership, association, company, or corporation. When used in connection with penalties, seizures, and forfeitures, the term includes an officer or employee of a corporation or a member or employee of a partnership, who as an officer, employee or member, is under a duty to perform the act in respect of which the violation occurs.

Proof. The ethyl alcohol content of a liquid at 60 degrees Fahrenheit, stated as twice the percent of ethyl alcohol by volume.

Proof gallon. A United States gallon of liquid at 60 degrees Fahrenheit which contains 50 percent by volume of ethyl alcohol having a specific gravity of 0.7939 at 60 degrees Fahrenheit referred to water at 60 degrees Fahrenheit as unity, or the alcoholic equivalent thereof.

Proprietor. The person qualified under this part to operate a wine premises, and includes the term "winemaker" when the context so requires.

Pure sugar. Pure refined dry sugar, suitable for human consumption, having a dextrose equivalent of not less than 95 percent on a dry basis, and produced from cane, beets, or fruit, or from grain or other sources of starch.

Reconditioning. The conduct of operations, after original bottling or packing, to restore wine to a resalable condition. The term includes the filtration, clarification, stablization, or reformulation of a product, and relabeling or recasing operations.

Region. A Bureau of Alcohol, Tobacco and Firearms region.

Regional director (compliance). The principal regional official responsible for administering regulations in this part.

Same kind of fruit. In the case of grapes, all of the species and varieties of grapes. In the case of fruits other than grapes, this term includes all of the several species and varieties of any given kind; except that this will not preclude a more precise identification of the composition of the product for the purpose of its designation.

Secretary. The Secretary of the Treasury or the Secretary's delegate.

Service center. An internal revenue service center.

Sparkling wine. An effervescent wine charged with carbon dioxide resulting solely from the secondary fermentation of the wine within a bottle or closed container.

Special natural wine. A product produced from a base of natural wine (or heavy bodied blending wine) to which natural flavorings are added, and made pursuant to an approved formula in accordance with Subpart H of this part.

Specially sweetened natural wine. A product made with a base of natural wine and having a total solids content in excess of 17 percent by weight (17 degrees Brix) and an alcoholic content of not more than 14 percent by volume.

Standard wine. Natural wine, specially sweetened natural wine, special natural wine, and agricultural wine, produced in accordance with Subparts F, H, and I of this part.

Still wine. Wine containing not more than 0.392 grams of carbon dioxide per 100 milliliters.

Sweetening. The addition of juice, concetrated juice or sugar to wine after the completion of fermentation and before taxpayment to correct natural sugar deficiencies.

Sugar. Pure sugar, liquid sugar, and invert sugar syrup.

Tax year. The period from July 1 of one calendar year through June 30 of the following year.

Taxpaid wine. Wine on which the tax imposed by law has been determined, regardless of whether the tax has actually been paid or the payment of tax has been deferred.

Taxpaid wine bottling house. The designation given to taxpaid wine premises, established under the provisions of this part, the operations of which are not integrated with the operations of an adjacent or contiguous wine premises.

Taxpaid wine premises. Wine premises established under the provisions of this part on which operations in taxpaid wine are authorized to be conducted.

This chapter. Title 27, Code of Federal Regulations, Chapter I (27 CFR Chapter I).

Total solids. The degrees Brix of unfermented juice or dealcoholized wine.

Treasury Account. The Department of Treasury's General Account at the Federal Reserve Bank of New York.

U.S.C. The United States Code.

United States or U.S. wine. Wine produced on bonded wine premises in the United States.

Volatile fruit-flavor concentrate. Any concentrate (essence) produced by any process which includes evaporations from any fruit mash or juice.

Wine. When used without qualification, the term includes every kind (class and type) of wine, excluding wine containing less than one-half percent of alcohol by volume or more than 24 percent of alcohol by volume, produced from fruit, berries, or other suitable agricultural products. The term includes all imitation, other than standard, or artificial wine and compounds sold as wine.

Wine premises. Premises established under the provisions of this part on which wine operations or other operations are authorized to be conducted.

Wine spirits. Brandy and other distilled spirits authorized under 26 U.S.C. 5373 for use in beverage wine production.

Subpart C—Administrative and Miscellaneous Provisions

Authorities of the Director

§ 24.24 Forms prescribed.

(a) The Director is authorized to prescribe all forms required by this part. All of the information called for in each form will be furnished as indicated by the headings on the form and the instructions on or pertaining to the form and as required by this part.

(b) "Public Use Forms" (ATF Publication 1322.1) is a numerical listing of forms issued or used by the Bureau of Alcohol, Tobacco and Firearms. This publication is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(c) Requests for forms may be mailed to the ATF Distribution Center, 7943 Angus Court, Springfield, Virginia 22153.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1395, as amended (26 U.S.C. 5367, 5555))

§ 24.21 Modified forms.

(a) *General.* The Director may approve the use of a modified form in lieu of the prescribed form required by this part, when in the judgment of the Director: (1) Good cause has been shown for the use of the modified form and (2) The use of the modified form will not result in a net increase in cost to the Government or hinder the effective administration of this part. Except to adapt tax returns for use with data processing equipment, no proposal for modification of a prescribed form relating to qualification, to the giving of any bond, or to the assessment, payment, or collection of tax will be approved under this section.

(b) *Application.* The proprietor who desires to modify a prescribed form shall submit a written application to the regional director (compliance). The application will state the reasons a modified form is necessary and be accompanied by a copy of the proposed form with typical entries.

(c) *Conditions.* A modified form may not be used until the application has been approved by the Director. Authorization for the use of a modified form is conditioned on compliance with the procedures, conditions, and limitations specified in the approval of the application. The use of a modified form does not relieve the proprietor from any requirement of this part. Authority for use of a modified form may be withdrawn whenever in the judgment of the Director the effective administration of this part is hindered by the continuation of the authority.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1395, as amended (26 U.S.C. 5367, 5555))

§ 24.22 Alternate method or procedure.

(a) *General.* The proprietor, on specific approval of the Director as provided in this section, may use an alternate method or procedure in lieu of a method or procedure specifically prescribed in this part. As used in this section, an alternate method or procedure also includes alternate construction or equipment. No alternate method or procedure relating to the giving of any bond or to the assessment, payment, or collection of tax, will be authorized under this section. The Director may approve an alternate method or procedure, subject to stated conditions, when in the judgment of the Director:

(1) Good cause has been shown for the use of the alternate method or procedure;

(2) The alternate method or procedure is within the purpose of, and consistent with the effect intended by, the specifically prescribed method or procedure, and affords equivalent security to the revenue; and

(3) The alternate method or procedure will not be contrary to any provision of law, will not result in an increase in cost to the Government, and will not hinder the effective adminstration of this part.

(b) *Application.* The proprietor who desires to employ an alternate method or procedure shall submit a written application to the regional director (compliance) for transmittal to the Director. The application will specifically describe the proposed alternate method or procedure, and will set forth the reasons therefor. Alternate methods or procedures will not be employed until the application is approved by the Director.

(c) *Conditions.* The proprietor shall, during the period of authorization for an alternate method or procedure, comply with the terms of the approved application. Authorization for any alternate method or procedure may be withdrawn whenever in the judgment of the regional director (compliance), or the Director, the revenue is jeopardized or the effective administration of this part

VOL 51
ISS 45
MR 7
1986
UMI

is hindered by the continuation of the authorization.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1395, as amended (26 U.S.C. 5556))

Authorities of the Regional Director (Compliance)

§ 24.25 Emergency variations from requirements.

(a) *General.* The regional director (compliance) may approve construction, equipment, and methods of operation other than as specified in this part, when in the judgment of the regional director (compliance) an emergency exists and the proposed variations from the specified requirements are necessary, and the proposed variations:

(1) Will afford the security and protection to the revenue intended by the prescribed specifications;

(2) Will not hinder the effective administration of this part; and

(3) Will not be contrary to any provisions of law.

(b) *Application.* The proprietor who desires to employ an emergency variation from requirements shall contact the area supervisor requesting approval until a written application is acted upon by the regional director (compliance). The application will be submitted within 24 hours of any approval by the area supervisor and describe the proposed variation and set forth the reasons. Where the emergency threatens life or property, the proprietor may take immediate action to correct the situation without prior notification; however, the proprietor shall promptly contact the area supervisor and file with the regional director (compliance) through the area supervisor a report concerning the emergency and the action taken to correct the situation.

(c) *Conditions.* Variations from requirements granted under this section are conditioned on compliance with the procedures, conditions, and limitations set forth in the approved application. A failure to comply in good faith with any procedures, conditions, and limitations will automatically terminate the authority for a variation and the proprietor thereupon shall fully comply with the prescribed requirements of regulations from which the variation was authorized. Authority for any variation may be withdrawn whenever in the judgment of the regional director (compliance) the revenue is jeopardized or the effective administration of this part is hindered by the continuation of the variation.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1395, as amended (26 U.S.C. 5556))

§ 24.26 Authority to approve.

The regional director (compliance) is authorized to approve, except as otherwise provided in this part, all applications, bonds, consents of surety, qualifying documents, claims, and any other documents required by or filed under this part, whether for original establishment, for changes subsequent to establishment, for discontinuance of business, for remission, abatement, credit, or refund of tax, or for any other purpose.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended (26 U.S.C. 5351))

§ 24.27 Segregation of operations.

The regional director (compliance) may require the proprietor to segregate operations within any wine premises established under this part, by partitions or otherwise, to the extent deemed necessary to prevent jeopardy to the revenue, to prevent confusion between operations, to prevent substitution with respect to the several methods of producing effervescent wine, and to prevent the commingling of standard wine with other than standard wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5365))

§ 24.28 Installation of meters, tanks, and other apparatus.

The regional director (compliance) is authorized to require the proprietor to install meters, tanks, pipes, or any other apparatus for the purpose of protecting the revenue. Any proprietor refusing or neglecting to install a required apparatus will not be permitted to conduct business.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1395, as amended (26 U.S.C. 5552))

§ 24.29 Claims.

The regional director (compliance) may require the proprietor or other person liable for the tax on wine or spirits to file a claim and to submit evidence of loss in any case where wine or spirits are lost or destroyed.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1323, as amended 1381, as amended (26 U.S.C. 5008, 5043, 5370))

§ 24.30 Supervision.

The regional director (compliance) may require that operations on wine premises be supervised by any number of ATF officers necessary for the protection of the revenue or for the enforcement of 26 U.S.C. Chapter 51 and applicable regulations.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1395, as amended (26 U.S.C. 5366, 5553))

§ 24.31 Submission of forms and reports.

The regional director (compliance) may require the proprietor to submit to a designated ATF officer copies of prescribed transaction forms, records, reports, or source records used to prepare records, reports or tax returns.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1396, as amended (26 U.S.C. 5555))

§ 24.32 Records.

The regional director (compliance) may require the proprietor to maintain any record required by this part in a prescribed format or arrangement or otherwise change the method of recordkeeping in any case where the required information is not clearly or accurately reflected.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1395, as amended (26 U.S.C. 5367, 5555))

Authorities of ATF Officers

§ 24.35 Right of entry and examination.

Under 26 U.S.C. 7601, 7602, and 7606, ATF officers have authority to inspect during normal business hours the records, stocks, and wine premises (including any portion designated as a bonded wine warehouse) of the proprietor to determine compliance with all provisions of the internal revenue laws and regulations. In addition, for the purposes prescribed in 27 CFR 70.22, AFT officers may examine financial records, books of account, and any other books, papers, records, and data relevant to an inquiry. ATF officers desiring to make inspections will show an official ATF identification. Any denial or interference with any inspection by the proprietor, or by agents or employees of the proprietor, is a violation of 26 U.S.C. 7342 and may be subject to an appropriate penalty.

(August 16, 1954, Ch. 736, 68A Stat. 872, as amended, 901, as amended, 903, as amended (26 U.S.C. 5367, 7342, 7601, 7602, 7606))

§ 24.36 Instruments and measuring devices.

All instruments and measuring devices required by this part to be furnished by the proprietor for the purpose of testing and measuring wine, spirits, volatile fruit-flavor concentrate, and materials will be maintained by the proprietor in accurate and readily usable condition. The area supervisor may disapprove the use of any equipment or means of measurement found to be unsuitable for the intended purpose, inaccurate or not in accordance with regulations. In this case, the proprietor shall promptly provide suitable and accurate equipment or measuring devices.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1381, as amended (26 U.S.C. 5357, 5366, 5368, 5552))

§ 24.37 Sample for the United States.

ATF officers are authorized to take samples of wine, spirits, volatile fruit-flavor concentrate, or any other material which may be added to wine products, for analysis, testing, etc., to determine compliance with the provisions of law and regulations.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1382, as amended, 1392 as amended, 1396, as amended (26 U.S.C. 5362, 5373, 5511))

Facilities and Assistance

§ 24.40 Gauging and measuring.

ATF officers may require the proprietor to furnish the necessary facilities and assistance to gauge or measure wine or spirits in any container or to examine any apparatus, equipment, container, or material on wine premises.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1381, as amended, 1395, as amended, 1396, as amended (26 U.S.C. 5357, 5366, 5368, 5555, 5557))

§ 24.41 Office facilities.

The regional director (compliance) may require the proprietor to furnish suitable office facilities for the exclusive use of ATF officers in performing Government duties. The facilities will be subject to approval by the regional director (compliance).

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1381, as amended, 1395, as amended (26 U.S.C. 5357, 5366, 5553))

Employer Indentification Number

§ 24.45 Use on returns.

The employer identification number (as defined at 26 CFR 301.7701–12) of the taxpayer who has been assigned a number will be shown on each return filed pursuant to the provisions of this part. Failure of the taxpayer to include the employer identification number on any return filed pursuant to the provisions of this part may result in the assertion and collection of the penalty prescribed in 26 CFR 301.6676–1.

(Pub. L. 87–397, 75 Stat. 828, as amended (26 U.S.C. 6109, 6676))

§ 24.46 Application.

(a) An employer identification number will be assigned pursuant to application on Internal Revenue Service (IRS) Form SS–4 filed by the taxpayer. IRS Form SS–4 may be obtained from the director of the service center or from any district director.

(b) An application on IRS Form SS–4 will be made by the taxpayer who has neither secured nor made application for an employer identification number prior to filing the first return. An application on IRS Form SS–4 will be filed on or before the seventh day after the date on which the first return is filed.

(c) Each taxpayer shall make application for and be assigned only one employer identification number, regardless of the number of places of business for which the taxpayer is required to file a tax return under the provisions of this part.

(Pub. L. 87–397, 75 Stat. 828, as amended (26 U.S.C. 6109))

§ 24.47 Execution of IRS Form SS–4.

(a) *Preparation.* The application on IRS Form SS–4, together with any supplementary statement, will be prepared in accordance with the form instructions and applicable regulations. The application will be filed with the director of the internal revenue service center with which the applicant is required to file a return.

(b) *Signature.* The application will be signed by:

(1) The individual, if the taxpayer is an individual; or,

(2) The president, vice president, other principal officer, or other person authorized to sign, if the taxpayer is a corporation; or,

(3) A responsible and duly authorized member or officer having knowledge of its affairs, if the taxpayer is a partnership or other unincorporated organization; or,

(4) The fiduciary, if the taxpayer is a trust or estate.

(Pub. L. 87–397, 75 Stat. 828, as amended (26 U.S.C. 6109))

Occupational Taxes

§ 24.50 Payment of tax.

Except as provided in §§ 24.51 and 24.52, the proprietor who sells wine shall file a return on Internal Revenue Service (IRS) Form 11, Special Tax Return, and pay occupational tax as a wholesale dealer or retail dealer, in accordance with 27 CFR Part 194.

(August 16, 1954, Ch. 736, 68A Stat. 846, as amended (26 U.S.C. 7011); sec. 201, Pub. L. 85–859, 72 Stat. 1340, as amended, 1343, as amended, 1346, as amended (26 U.S.C. 5111, 5112, 5121, 5122, 5142))

§ 24.51 Exemption from occupational tax.

(a) *General.* The proprietor of a bonded winery or bonded wine cellar will not be required to pay the occupational tax as a wholesale dealer or retail dealer on account of the sale, at the bonded winery or bonded wine cellar, or at the principal business office as designated in writing to the regional director (compliance), of wine or spirits which, at the time of sale, are stored at the bonded winery or bonded wine cellar, or have been removed from the bonded winery or bonded wine cellar to taxpaid wine premises, the operations of which are integrated with the operations of the bonded winery or bonded wine cellar and which is adjacent to or in the immediate vicinity of the bonded winery or bonded wine cellar. The proprietor may not have more than one place of sale, as to each bonded winery or bonded wine cellar, that will be exempt from occupational tax under this section.

•(b) *Place of exemption.* Unless the proprietor has claimed the exemption elsewhere, the exemption will be claimed at the bonded winery or bonded wine cellar where the wine or spirits are stored. If exemption from payment of occupational tax is to be claimed for sales at the principal business office rather than for sales at the bonded winery or bonded wine cellar, the proprietor shall, unless stated in the approved application, file a notice in letter form of this intention with the regional director (compliance) of the region in which the bonded winery or bonded wine cellar is located. Where the exemption is claimed for a place other than the bonded wine cellar, the occupational tax will be paid for any sales made at the bonded winery or bonded wine cellar.

(c) *Exception.* Where the proprietor of a bonded winery or bonded wine cellar has not paid occupational tax as a wholesale dealer and consummates sales of wine to another dealer at the purchaser's place of business through a delivery route salesman or otherwise, the proprietor of the bonded winery or bonded wine cellar is required to pay occupational tax as a wholesale dealer at each place the sale is consummated.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1340, as amended (26 U.S.C. 5113))

§ 24.52 Wholesale dealer.

The proprietor who has paid occupational tax as a wholesale dealer for the place at which sales are conducted will not again be required to pay occupational tax as a dealer because of sales of wine to wholesale or retail dealers, or to limited retail dealers, consummated at the purchaser's place of business.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1340, as amended (26 U.S.C. 5113))

VOL 51
ISS 45
MR 7
1986
UMI

§ 24.53 Filing of return.

(a) *Time.* The occupational tax year commences on July 1 of each year and ends on June 30 of the next succeeding year. All persons liable for occupational tax shall file IRS Form 11 and pay the occupational tax on or before July 1 of each tax year. Where business is commenced in any month except July, the tax will be prorated on a monthly basis from the first day of the month in which business was commenced to June 30 following. If the IRS Form 11, with remittance, is not actually delivered on or before July 1, or on or before the day on which business was commenced, the date of the postmark stamped on the cover of a return which is mailed will be the date of filing.

(b) *Place.* IRS Form 11 with remittance will be filed with the director of the internal revenue service center serving the internal revenue district in which the business is located or, in the case of a single return prepared under the provisions of 27 CFR Part 194 to cover liability at two or more locations, with the director of the service center serving the internal revenue district in which the taxpayer's principal place of business (or the principal office of a corporate taxpayer) is located.

(August 16, 1954, Ch. 736, 68A Stat. 846, as amended, 895, as amended (26 U.S.C. 7011, 7502); sec. 201, Pub. L. 85–859, 72 Stat. 1346, as amended, 1347, as amended (26 U.S.C. 5142, 5143))

§ 24.54 Hand-carried returns.

Notwithstanding the provisions of § 24.53, returns on IRS Form 11 for occupational tax which are hand-carried, will be filed with the district director of the internal revenue district in which the taxpayer's place of business is located or, in the case of a single return prepared under the provisions of 27 CFR Part 194 to cover liability at two or more locations, the return will be filed with the district director of the internal revenue district in which the taxpayer's principal place of business (or the principal office of a corporate taxpayer) is located.

(August 16, 1954, Ch. 736, 68A Stat. 752, as amended (26 U.S.C. 6091))

§ 24.55 Special tax stamp.

Upon filing a properly executed return on IRS Form 11, together with a remittance in the full amount due, the taxpayer will be issued an appropriately designated "special (occupational) tax stamp." This special tax stamp will be kept available at the taxpayer's place of business for inspection during normal business hours by ATF officers. If the special tax stamp is not timely received, a cancelled check showing payment of the occupational tax may be kept available for inspection until the special tax stamp is received.

(August 16, 1954, Ch. 736, 68A Stat. 831, as amended (26 U.S.C. 6806); sec. 201, Pub. L. 85–859, 72 Stat. 1346, as amended, 1346, as amended (26 U.S.C. 5142, 5143, 5146))

Assessments

§ 24.60 General.

Where the regional director (compliance) determines by examinatin of records, inventories, or otherwise that the proprietor has incurred liability for the tax on wine, distilled spirits, or occupational tax, and the proprietor does not pay the tax upon notification of the liability, the tax will be assessed.

(August 16, 1954, Ch. 736, 68A Stat. 767, as amended (26 U.S.C. 6201))

§ 24.61 Assessment of tax.

When wine or spirits in bond are lost or destroyed (except wine or spirits on which the tax is not collectible by reason of the provisions of 26 U.S.C. 5008 or 26 U.S.C. 5370, as applicable) and the proprietor or other person liable for the tax on the wine or spirits fails to file a claim as provided in this part or when the claim is denied, the tax will be assessed. In any case where wine is produced, imported, or received otherwise than as authorized by law, or where wine or spirits are removed, possessed, or knowingly used in violation of applicable law, or volatile fruit-flavor concentrate is sold, transported, or used in violation of law, the tax will be assessed.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1314, as amended, 1323, as amended, 1332, as amended, 1335, as amended, 1361, as amended, 1387, as amended, 1392, as amended (26 U.S.C. 5001, 5008, 5043, 5061, 5370, 5391, 5512))

§ 24.62 Notice.

If an investigation or an examination of records discloses that liability for the tax on wine or distilled spirits, or occupational tax has been incurred by the proprietor, the regional director (compliance) will notify the proprietor by letter of the basis and the amount of the proposed assessment in order to afford the proprietor an opportunity to submit a protest, with supporting evidence, within 45 days, or to request a conference with regard to the tax liability. However, if collection of the tax liability may be jeopardized by a delay, the regional director (compliance) may take immediate jeopardy assessment action pursuant to 26 U.S.C. 6861.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1323, as amended, 1361, as amended (26 U.S.C. 5008, 5370; 6861))

Claims

§ 24.65 Claims for wine or spirits lost or destroyed in bond.

(a) *Claim for remission of tax on spirits.* All claims for remission of tax required by this part, relating to the loss or destruction of spirits in bond, will be filed with the regional director (compliance) within 30 days of discovery of the loss. A claim filed under this paragraph will set forth the following information:

(1) The name, registry number, and location of the distilled spirits plant which produced the spirits;

(2) The serial numbers of the containers from which the spirits were lost, the quantity lost from each, and the total quantity of spirits covered by the claim;

(3) The total amount of tax for which claim is filed;

(4) The date of the loss or destruction (or, if not known, the date of discovery);

(5) The nature and cause (if known) of the loss will be stated specifically and in sufficient detail to disclose all material facts and circumstances surrounding the loss;

(6) If lost in transit, the name of the carrier and the points between which shipped; and

(7) If lost by theft, evidence establishing that the loss did not occur as the result of negligence, connivance, collusion, or fraud on the part of the proprietor, owner, consignor, consignee, bailee or carrier, or the agents or employees of any of them.

(b) *Claim for allowance of loss on wine.* A claim for allowance of loss required by this part, relating to the loss or destruction of wine in bond, will be filed with the regional director (compliance). A claim for allowance of loss for wine lost in transit, by fire or other casualty, or any other extraordinary or unusual losses, including a loss by theft, will be filed immediately. Any other claim for allowance of loss will be attached to and submitted with the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations, for June or, in the case of discontinuance of the premises or change in proprietorship, to the final monthly report filed. A claim filed under this paragraph will set forth the information required by paragraphs (a)(5) to (a)(7) of this section and, in addition, will set forth the following information:

(1) The original volume of wine which sustained the loss, the tax class, the quantity of wine lost, and the percentage of wine lost;

(2) Where the claim covers losses sustained at a bonded winery or bonded wine cellar during the tax year, the claimant shall state: (i) The quantities of wine on hand at the beginning of the tax year, received in bond, and produced during the tax year; (ii) where the percentage of loss is calculated separately by tax class, the volume of wine by tax class; and (iii) if effervescent wine is produced, the volume of wine produced by fermentation in bottles, by artificial carbonation, and by bulk processing; and

(3) Claims covering losses of wine during transit in bond will show the volume lost from each container, the serial number, if any, and the volume shipped.

(c) *Claim for abatement, credit or refund.* A claim for abatement of an assessment under § 24.61, or credit or refund of tax which has been paid or determined, will be filed with the regional director (compliance) in accordance with the provisions of this paragraph and the provisions of 27 CFR 170 Subpart E. A claim filed under this paragraph with respect to spirits, wine, or volatile fruit-flavor concentrate, will set forth the applicable information required by paragraphs (a), (b), or (a)(5) to (a)(7) of this section. In addition, any claim filed under this paragraph will set forth the following information:

(1) The date of the assessment for which abatement is claimed; and

(2) The name, registry number, and address of the premises where the tax was assessed (or name, address, and title of any other person who was assessed the tax, if the tax was not assessed against the proprietor).

(d) *Indemnification or recompense.* A claim filed under paragraph (a) or (b) of this section will specify whether the claimant has been or will be indemnified or recompensed for the spirits or wine lost and, if so, the amount and nature of indemnity or recompense and the actual value of the spirits or wine, less the tax.

(e) *Supporting documents.* A claim filed under paragraph (a), (b), or (c) of this section will be supported (whenever possible) by affidavits of persons having personal knowledge of the loss or destruction. If filed for tax on wine or spirits lost in transit, the claim will be supported by a copy of the carrier's bill of lading.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1323, as amended, 1361, as amended, 1362, as amended (26 U.S.C. 5008, 5370, 5373))

§ 24.66 Claims on wine returned to bond.

(a) *General.* A claim for credit or refund, or relief from liability, of tax on unmerchantable U.S. wine returned to bonded wine premises will be filed with the regional director (compliance) within six months after the date of the return of the wine to bond. A single claim may not be filed under this section for a quantity on which credit or refund of tax would be in an amount less than $25. This limitation does not apply with respect to any returned wine on which the six month period for filing a claim will expire.

(b) *Filing.* A claim filed under this section will set forth the following information:

(1) The kind, volume, and tax class of the wine;

(2) As to each tax class, the amount of tax previously paid or determined; and

(3) The date the wine was returned to bond.

(c) *Indemnification or recompense.* A claim filed under this section will specify whether the claimant has been or will be indemnified or recompensed for the wine returned to bond and if so, the amount and nature of indemnity or recompense and the actual value of the wine, less the tax.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1332, as amended, 1380, as amended (26 U.S.C. 5044, 5361, 5371))

§ 24.67 Other claims.

The requirements with respect to a claim for:

(a) Remission of tax on wine withdrawn without payment of tax under the provisions of § 24.292, and lost in transit to the port of export, vessel or aircraft, foreign-trade zone, customs bonded warehouse, or manufacturing bonded warehouse, as applicable, are contained in 27 CFR Part 252.

(b) Refund or credit of any tax imposed on wine or other liquors by 26 U.S.C. Chapter 51, Part I, Subchapter A, on the grounds that an amount of tax was assessed or collected erroneously, illegally, without authority, or in any manner wrongfully, or on the grounds that the amount was excessive, are contained in 27 CFR Part 170, Subpart E.

(c) Payment of an amount equal to the internal revenue tax paid or determined and customs duties paid on wine or other liquors previously withdrawn, which are lost, rendered unmarketable, or condemned by a duly authorized official as the result of (1) a major disaster, (2) fire, flood, casualty, or other disaster, or (3) breakage, destruction, or damage (excluding theft) resulting from vandalism or malicious mischief, are found in 27 CFR Part 170 Subpart O.

§ 24.68 Insurance coverage.

The remission, abatement, refund, credit, or other relief, of taxes on wine or spirits provided for under this part will be allowed only to the extent that the claimant does not have insurance coverage to indemnify or recompense for the tax.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1382, as amended (26 U.S.C. 5064, 5372))

§ 24.9 Filing of claims.

(a) *Claims.* All claims filed under this part for abatement or refund of tax will be filed on Internal Revenue Service (IRS) Form 843. All claims filed under this part for credit or remission of tax will be filed on ATF Form 5620.8 (2635). Each claim filed under this part will:

(1) Show the name, address, and title of the claimant;

(2) Be signed by the claimant or the duly authorized agent of the claimant; and

(3) Be executed under the penalties of perjury.

(b) *Supporting documents.* Forms, supporting statements, and any other documents required by this part to be submitted with a claim will be attached to the claim and be considered a part of the claim. The regional director (compliance) may require the submission of additional evidence in support of any claim filed under this part.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1361, as amended (26 U.S.C. 5064, 5370))

§ 24.70 Claims for credit of tax.

Claims for credit of tax, as provided in this part, may be filed after determination of the tax whether or not the tax has been paid. Where a claim for credit of tax is filed, the claimant shall, upon receipt of notification of allowance of credit from the regional director (compliance), make an adjusting entry on the next succeeding tax return (or returns) to the extent necessary to exhaust the credit. The claimant shall also make an explanatory statement on each tax return specifically identifying the notification of allowance of credit. The claimant may not anticipate allowance of a credit or make an adjusting entry in a tax return until ATF has acted on the claim.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1332, as amended, 1335, as amended, 1361, as amended, 1395, as amended (26 U.S.C. 5043, 5044, 5061, 5370, 5555))

Tax Exempt Wine

§ 24.75 Wine for personal or family use.

(a) *General.* Any adult may, without payment of tax, produce wine for personal or family use and not for sale.

(b) *Quantity.* The aggregate amount of wine that may be produced exempt from

VOL 51
ISS 45
MR 7
1986
UMI

tax with respect to any household may not exceed:

(1) 200 gallons per calendar year for a household in which two or more adults reside, or

(2) 100 gallons per calendar year if there is only one adult residing in the household.

(c) *Definition of an adult.* For the purposes of this section, an adult is any individual who is 18 years of age or older. However, if the locality in which the household is located has established by law a greater minimum age at which wine may be sold to individuals, the term "adult" will mean an individual who has attained that age.

(d) *Limitation.* This exemption should not in any manner be construed as authorizing the production of wine in violation of applicable State or local law. While this exemption is also applicable to bonded winery individual owners and partnerships, this exemption does not otherwise apply to partnerships, corporations, or associations.

(e) *Removal.* Wine produced under this section may be removed from the premises where made for personal or family use including use at organized affairs, exhibitions or competitions, such as homemaker's contests, tastings or judgings, but may not under any circumstances be sold or offered for sale. The proprietor of a bonded winery shall pay the tax on any wine removed for personal or family use in excess of the limitations provided in this section and shall also enter all quantities removed for personal or family use on ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1331, as amended (26 U.S.C. 5042))

§ 24.76 Cider.

Cider is the noneffervescent product of the normal alcoholic fermentation of apple juice only, produced without the use of any preservative method or material. When produced at a place other than a bonded winery and sold or offered for sale as cider, and not as wine or as a substitute for wine, cider will not be subject to tax as wine, nor to the provisions of this part.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1331, as amended (26 U.S.C. 5042))

§ 24.77 Experimental wine.

(a) *General.* Any scientific university, college of learning, or institution of scientific research may, without payment of tax, produce, receive, blend, treat, and store wine for experimental or research use, but not for consumption (other than organoleptic tests) or sale, and receive spirits in quantities as may be necessary for the production of wine.

(b) *Qualification.* An institution desiring to conduct experimental wine operations shall make application in letter form to the regional director (compliance). The application will show the name and address of the institution, the nature, extent, and purpose of the operations to be conducted, describe the operations and equipment and the location at which operations will be conducted (including identification of the building or buildings, or portions thereof, to be used), and the security measures to be provided. If spirits are to be used, that fact will be stated together with the estimated annual requirements in proof gallons. A secure place of storage under lock will be provided for spirits and will be described in the application. The applicant shall, when required by the regional director (compliance), furnish as part of the application, additional information as may be necessary to determine whether the application should be approved. Operations may not begin until authorized by the regional director (compliance).

(c) *Procurement of Spirits.* Where the approved application provides for the use of spirits in experimental wine operations, spirits may be procured to the extent stated in the approved qualifying application. However, an application will be filed with the regional director (compliance) and authorization obtained for each spirits procurement.

(d) *Records.* All approved qualifying documents and applications will be retained in the files of the institution and will be exhibited on request to ATF officers. No reports concerning wine or spirits need be filed unless required by the regional director (compliance), but records appropriate to the experiments to be conducted and records documenting the disposition of the wine and spirits will be retained and will be made available for inspection by ATF officers. If spirits are used, the records will show the quantities of spirits received and used each day.

(e) *Discontinuance.* When an institution discontinues experimental wine operations, all remaining wine or spirits will be disposed of either by destruction or shipment to premises authorized to receive wine or spirits. A letter application will be filed with the regional director (compliance) and authorization obtained prior to the destruction or shipment of the wine or spirits. When the authorized destruction or shipment has been completed, a letter notification will be sent to the regional director (compliance).

(Sec. 201, Pub. L. 85–859, 72 Stat. 1331, as amended (26 U.S.C. 5042))

Formulas

§ 24.80 General.

The proprietor shall, before production, obtain approval of the formula and process by which special natural wine, agricultural wine, and other than standard wine (except distilling material and vinegar stock) are to be made. The formula will be prepared and filed with the Director on ATF Form 5120.29 (698-Supplemental), Formula and Process for Wine, in accordance with the instructions on the form. A nonbeverage wine formula will show the intended use of the finished wine or wine product. Any formula approved under this section will remain in effect until revoked, superseded, or voluntarily surrendered. Except for research, development, and testing, no special natural wine, agricultural wine, or, if required to be covered by an approved formula, wine other than standard wine may be produced prior to approval by the Director of a formula covering each ingredient and process (if the process requires approval) used in the production of the product.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1381, as amended, 1386, as amended, 1395, as amended (26 U.S.C. 5361, 5367, 5386, 5387, 5555))

§24.81 Filing of formulas.

The proprietor shall on each formula filed designate all ingredients and, if required, describe each process used to produce the wine. The addition or elimination of ingredients, changes in quantities used, and changes in the process of production, or any other change in an approved formula, will require the filing of a new ATF Form 5120.29 (698-Supplemental). After a change in formula is approved, the original formula will be surrendered to the Director. The proprietor shall serially number each formula, commencing with "1" and continuing thereafter in numerical sequence. Nonbeverage wine formulas will be prefixed with the symbol "NB." The Director or the regional director (compliance) may at any time require the proprietor to file a statement of process in addition to that required by the ATF Form 5120.29 (698-Supplemental) or any other data to determine whether the formula should be approved or the approval continued.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1395, as amended (26 U.S.C. 5367, 5555))

§ 24.82 Samples.

Except for salted wine or salted wine products, the proprietor shall submit under separate cover at the time of filing any nonbeverage wine formula, a 750 ml sample of the base wine used and a 750 ml sample of the finished wine or wine product. The latter sample will be considered representative of the finished product. Any material change in the flavor or other characteristics of the finished product from that of the approved sample will require the filing of a new formula even though the ingredients may be the same. In addition, the Director or the regional director (compliance) may, at any time, require the proprietor to submit samples of any wine or wine product made in accordance with an approved formula or of any materials used in production.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended (26 U.S.C. 5362))

Essences

§ 24.85 Essences.

Essences or extracts (preparations of natural constituents extracted from fruit, herbs, berries, etc.) may be used in the production of any formula wine except agricultural wine. The essences may be produced on wine premises or elsewhere. Where an essence contains spirits, use of the essence may not increase the volume of the wine more than 10 percent nor its alcohol content more than four percent by volume.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5386))

§ 24.86 Essences produced on wine premises.

Wine, taxpaid spirits, or spirits withdrawn tax-free may be used in the production of essences on wine premises. The description of the process for producing the essence may be included as part of a formula for the production of a formula wine or a separate formula may be field on ATF Form 5120.29 (698-Supplemental). If a separate formula is filed for the essence, the serial number of the formula by which it is produced will be shown in the ATF Form 5120.29 (698-Supplemental) covering the formula wine in which it is to be used. If an essence is to be made in quantities greater than required for individual lots of formula wine, and stored on the premises, a separate formula will be filed for the essence. Essences made on wine premises with the use of tax-free spirits may only be used in the production of a formula wine and may not be removed from the premises where made. The ATF Form 5120.29 (698-Supplemental) for the production of an essence is filed in the same manner as for the production of formula wine and a sample of the essence produced will be at least four fluid ounces.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5386))

§ 24.87 Essences made elsewhere.

Before an essence not made on wine premises may be used in the production of formula wine, the manufacturer of the essence shall obtain approval from the Director. The request for approval will identify the essence by name or number and by the name of the manufacturer, and a sample of at least four fluid ounces of the essence will be submitted. However, a request for approval and submission of a sample is not required if the essence is made pursuant to approval of a formula on ATF Form 5530.5 (1678), Formula and Process for Nonbeverage Product. Essences made under an approved formula on ATF Form 5530.5 (1678) will be described on ATF Form 5120.29 (698-Supplemental) by showing the name of the manufacturer, the manufacturer's nonbeverage drawback formula number, and the date of approval by the Director.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5386))

Conveyance of Wine or Spirits on Wine Premises

§ 24.90 Taxpaid products.

Taxpaid wine or other taxpaid products may be conveyed across bonded wine premises, but may neither be stored nor allowed to remain on bonded wine premises and will be kept separate from untaxpaid wine or spirits. However, upon payment or determination of the tax bulk wine may remain on bonded wine premises until the close of the business day following the day the tax was paid or determined, or the bonded wine premises on which the tank is located may be alternated as taxpaid wine premises.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5365))

§ 24.91 Conveyance of untaxpaid wine or spirits.

Untaxpaid wine or spirits may be conveyed between different portions of the bonded wine premises of the same bonded winery or bonded wine cellar. Untaxpaid wine or spirits may also be conveyed by uninterrupted transportation over any public thoroughfare, or over a private roadway if the owner or lessee of the roadway agrees, in writing, to allow ATF officers access to the roadway to perform their official duty. The conveyance of wine or spirits as authorized in this section is subject to the following conditions:

(a) The untaxpaid wine or spirits are not stored or allowed to remain on any premises other than bonded wine premises;

(b) The untaxpaid wine or spirits are kept completely separate from taxpaid wine or spirits; and

(c) A description of the means and route of conveyance and of the portions of the bonded wine premises between which wine or spirits will be conveyed, as well as a copy of any agreement furnished by the owner or lessee of a private roadway, have been submitted to and approved by the regional director (compliance).

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1381, as amended (26 U.S.C. 5357, 5365))

§ 24.92 Products in customs custody.

Products in customs custody may be conveyed across bonded wine premises subject to the following conditions:

(a) The products are not stored or allowed to remain on bonded wine premises; and

(b) The products are kept separate from wine and spirits on bonded wine premises and are moved expeditiously.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1380, as amended, 1381, as amended (26 U.S.C. 5357, 5361, 5365))

Samples

§ 24.95 General.

Wine or spirits may be withdrawn free of tax from a bonded winery or bonded wine cellar for use by or for the account of the proprietor or the agents of the proprietor, for analysis or testing, or organoleptically or otherwise. Wine or spirits may be used for testing purposes, and wine may be used for tasting or sampling on bonded wine premises free of tax.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1382, as amended (26 U.S.C. 5362, 5372, 5373))

§ 24.96 Use off premises.

The proprietor may remove samples of wine or spirits free of tax for analysis or testing purposes.

(a) *Size.* The size of each sample may not be more than one liter for each lot of wine or spirits to be analyzed or tested unless the regional director (compliance) authorizes a larger quantity.

(b) *Statement.* The proprietor shall, prior to removing any samples, obtain a written statement of agreement that records of receipt, use, and disposition for all samples received will be maintained, and that the records and operations with respect to the samples

VOL 51
ISS 45
MR 7
1986
UMI

will be available during normal business hours for inspection by ATF officers.

(c) *Disposition of samples.* Remnants or residues of samples remaining after analysis or testing, and which are not retained as specimens, will be destroyed or returned to bonded wine premises. Free of tax samples or residues may not be consumed or sold.

(d) *Records.* The proprietor shall maintain records of all samples taken for analysis or testing, showing the size of each sample, the kind of wine or spirits, date, and the name and address to where sent. Entries in the records will be made prior to actual removal of the samples from bonded wine premises.

(e) *Labeling of samples.* Each sample taken for analysis or testing will be labeled "Sample for Analysis Only". The label will show the name, address, and registry number of the bonded winery or bonded wine cellar, date, and the kind of wine or spirits.

(f) *Limitation.* The proprietor may not take samples in excess of the amount necessary for the purpose intended. The tax will be collected on any wine or spirits found to have been used or disposed of in a manner not authorized by this section.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1381, as amended, 1382, as amended (26 U.S.C. 5362, 5367, 5368, 5373))

§ 24.97 Use on premises.

(a) *Analysis or testing.* The proprietor may take samples of wine or spirits free of tax for analysis or testing on bonded wine premises. The proprietor shall maintain records showing the size, kind of wine or spirits, date, and disposition of each sample. The label of each sample retained as a laboratory specimen will be marked "Sample for Analysis Only" and will show the kind of wine or spirits.

(b) *Tasting.* The proprietor may take samples of wine free of tax for organoleptic tasting on bonded wine premises. If a room or area is set aside for tasting purposes, a record will be maintained showing the date, quantity and kind of wine transferred to the room or area for tasting.

(c) *Limitation.* The tax will be collected on any wine or spirits withdrawn under this section which are used for purposes other than as authorized or when the quantity of wine or spirits withdrawn under this section exceeds the amount necessary for the purpose intended.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1382, as amended (26 U.S.C. 5372))

Subpart D—Establishment and Operations

§ 24.100 General.

Each person desiring to conduct operations in wine (other than the production of wine free of tax as provided in §§ 24.75 to 24.77) shall, prior to commencing operations, provide wine premises, make application to the regional director (compliance), file bond, and receive permission to operate wine premises as provided in this part. After approval, the wine premises will be designated a bonded winery, bonded wine cellar or taxpaid wine bottling house. As provided in § 24.107, the designation bonded winery will be used if production operations are to be conducted. In addition, wine premises may be used, in accordance with the provisions of this part, for the conduct of certain other operations.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended (26 U.S.C. 5351, 5352))

Premises and Operations

§ 24.101 Bonded wine premises.

(a) *General.* A person desiring to conduct operations involving untaxpaid wine, including the use of spirits in wine production, shall file an application and bond with the regional director (compliance). Further, a warehouse company or other person may, upon obtaining the consent of the proprietor and the surety on the bond and upon filing an application with the regional director (compliance) and receiving approval, establish on bonded wine premises a bonded wine warehouse for the storage of wine and allied products for credit purposes.

(b) *Authorized operations.* Except as provided in this part, no operation may be conducted on bonded wine premises other than those authorized. The following operations are authorized:

(1) The receipt, production, blending, cellar treatment, storage, and bottling or packing of untaxpaid wine;

(2) The use of wine spirits in beverage wine production and the use of spirits in nonbeverage wine production;

(3) The receipt, preparation, use, or removal of fruit, concentrated or unconcentrated fruit juice, or other materials to be used in the production or cellar treatment of wine; and

(4) The preparation, storage, or removal of commercial fruit products and by-products (including volatile fruit-flavor concentrate) not taxable as wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended, 1379 as amended, (26 U.S.C. 5351, 5353, 5361))

§ 24.102 Taxpaid wine premises.

A person desiring to conduct operations in taxpaid wine at a bonded winery or a bonded wine cellar, or a person desiring to conduct taxpaid wine operations at a taxpaid wine bottling house, shall file an application as provided in § 24.105 to establish taxpaid wine premises. The following operations may be conducted on taxpaid wine premises:

(a) The receipt, storage, bottling or packing, and removal of taxpaid wine;

(b) The mixing of taxpaid wine of the same kind, tax class, and country of origin to facilitate handling; and

(c) The treatment of taxpaid wine to preserve, filter, or clarify.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended, 1381, as amended (26 U.S.C. 5252, 5363))

§ 24.103 Other operations.

Upon the specific approval of the regional director (compliance), other operations not provided for in this part may be conducted on wine premises. Authority to conduct other operations may be obtained by submitting an application to the regional director (compliance). The application will specifically describe the operation to be conducted and the wine premises and equipment to be used. The regional director (compliance) may make any inquiry necessary to determine whether the conduct of other operations on wine premises would jeopardize the revenue, conflict with wine operations, or be contrary to law. Other operations may not be conducted on wine premises until the application has been approved by the regional director (compliance). Other operations authorized under this section will be conducted in accordance with the conditions, limitations, procedures, and terms stated in the approved application. Authority to conduct other operations may be withdrawn whenever the regional director (compliance) determines the conduct of the other operations on wine premises jeopardizes the revenue, conflicts with wine operations, or is contrary to law.

(Sec. 210, Pub. L. 85–859, 72 Stat. 1380, as amended, 1381, as amended (26 U.S.C. 5361, 5363))

Application

§ 24.105 General.

A person desiring to establish a bonded winery, bonded wine cellar or taxpaid wine bottling house shall file an application on ATF Form 5120.25 (698), Application to Establish and Operate Wine Premises. Approval of ATF Form 5120.25 (698) will constitute

authorization for the proprietor to operate. The premises may not be used for the conduct of operations under this part unless the proprietor has a valid approved application for the operations. The application will be executed under the penalties of perjury and all written statements, affidavits, and any document incorporated by reference will be considered a part of the application. In any instance where a bond is required to be given or a permit obtained to engage in an operation, the currently approved application will not be valid with respect to that operation if the bond or permit is no longer in effect. In this case, the proprietor shall again file an application and obtain approval before engaging in operations at the wine premises. A new application is not required when a strengthening bond is filed pursuant to § 24.153 or a new bond or superseding bond is filed pursuant to § 24.154. The regional director (compliance) may require the filing of a new or an amended application in any instance where the currently approved application is inadequate or incorrect in any respect. Within 60 days after receipt of a notice, the proprietor shall file the application.

(August 16, 1954, Ch. 736, 68A Stat. 749, as amended (26 U.S.C. 6065); sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1392, as amended (26 U.S.C. 5356, 5511))

§ 24.106 Basic permit requirements.

Any person intending to engage in the business of producing or blending wine or purchasing wine for resale at wholesale is required under the Federal Alcohol Administration Act (49 Stat. 978; U.S.C. 203) to obtain a basic permit. A State, a political subdivision of a State, or officers or employees of a State or political subdivision acting in their official capacity are exempted from this requirement. The issuance of a basic permit under the Act is governed by regulations in 27 CFR Part 1. Where a basic permit is required to engage in an operation, an application for a basic permit will be filed with the regional director (compliance) at the time of filing an original or amended application on ATF Form 5120.25 (698). Operations requiring a basic permit may not be conducted until the basic permit application is approved. No Wine Producer's and Blender's Basic Basic Permit or Wine Blender's Permit is required for a bonded wine cellar established only for the purpose of storing untaxpaid wine even though an approved application, ATF Form 5120.25 (698), and bond are required.

(Sec. 210, Pub. L. 85–859, 72 Stat. 1378, as amended (26 U.S.C. 5351))

§ 24.107 Designation as a bonded winery.

Bonded wine premises which will be used for the production of wine or for production processes involving the use of wine will be designated a bonded winery unless the proprietor applies for a bonded wine cellar designation. Prior to engaging in wine production operations the proprietor will obtain the basic permit required by the Federal Alcohol Administration Act. If the proprietor of a bonded wine premises designated as a bonded winery does not engage in wine production operations, the regional director (compliance) may change the designation of the premises from bonded winery to bonded wine cellar.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended (26 U.S.C. 5351))

§ 24.108 Bonded wine warehouse application.

A warehouse company or other person desiring to establish a bonded wine warehouse on bonded wine premises for storing wine or allied products for credit purposes shall file an application, in letter form, with the regional director (compliance). The name and address of the applicant and of the bonded winery or bonded wine cellar, and the approximate area and storage capacity (in gallons) of the bonded wine warehouse, will be stated in the application. The application will be accompanied by a signed statement from the proprietor of the bonded winery or bonded wine cellar requesting the establishment of the warehouse, and the consent of the surety of the bond for the bonded winery or bonded wine cellar.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5353))

§ 24.109 Data for application.

The ATF Form 5120.25 (698) is prepared in accordance with the instructions on the form and will include the following, as applicable:

(a) Serial number;

(b) Name and principal business address of the applicant and the address of the wine premises if different from the business address;

(c) Statement of the type of business organization and of each person having an interest in the business, supported by the items of information listed in § 24.110;

(d) Indicate whether the application is for the purpose of establishing a bonded winery, bonded wine cellar, or taxpaid wine bottling house. Also, indicate if taxpaid wine premises are to be established in the case an application for a bonded winery or bonded wine cellar;

(e) List of the offices, the incumbents of which are authorized by the articles of incorporation or the board of directors to act on behalf of the proprietor or to sign the applicant's name;

(f) Description of the premises (see § 24.111);

(g) List of equipment (see § 24.112);

(h) Trade names (see § 24.113);

(i) Description of spirits operations;

(j) With respect to wine premises for which the application relates, a list of the applicant's basic permits and bonds (including those filed with the application) showing the name of the surety for each bond;

(k) Description of volatile fruit-flavor concentrate operations (see § 24.114); and

(l) If other operations not specifically authorized by this part are to be conducted on wine premises, a description of the operations, a list of the premises and any major equipment to be used, and a statement as to the relationship, if any, of the operation to wine operations on wine premises.

If any of the information required by paragraph (c) of this section is on file with the regional director (compliance) of any ATF region in connection with any other premises operated by the applicant, that information, if accurate and complete, may be incorporated by reference and made a part of the application. In this case, the name, address, and if any, registry number of the premises where the information is filed will be stated in the application. The applicant shall, when required by the regional director (compliance), furnish as part of the application, additional information as may be necessary to determine whether the application should be approved.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1392, as amended (26 U.S.C. 5356, 5511))

§ 24.110 Organizational documents.

The supporting information required by paragraph (c) of § 24.109, includes, as applicable, copies of:

(a) *Corporate documents.* (1) Corporate charter or a certificate of corporate existence or incorporation.

(2) List of the directors and officer, showing their names and addresses.

(3) Certified extracts or digests of minutes of meetings of the board of directors, authorizing certain individuals to sign for the corporation.

(4) Statement showing the number of shares of each class of stock or other evidence of ownership, authorized and

VOL

MR
7
1986
UMI

outstanding, and the voting rights of the respective owners or holders of stock.

(b) *Articles of partnership.* True copies of the articles of partnership, if any, and of the certificate of partnership or association where required to be filed by any State, county, or municipality.

(c) *Statement of interest.* (1) Names and addresses of the 10 persons having the largest ownership or other interest in each of the classes of stock in the corporation, or other legal entity, and the nature and amount of the stockholding or other interest of each, whether the interest appears in the name of the interested party or in the name of another party. If a corporation is wholly-owned or controlled by another corporation, those persons of the parent corporation who meet the above standards are considered to be the persons interested in the business of the subsidiary, and the names thereof need to be furnished only upon the request of the regional director (compliance).

(2) In the case of an individual owner or partnership, the name and address of each person interested in the wine premises, whether the interest appears in the name of the interested party or in the name of another for that person.

(d) *Availability of additional corporate documents.* The originals of documents required to be submitted under this section and additional documents which may be required by the regional director (compliance) such as articles of incorporation, bylaws, and any certificate issued by a State authorizing operations will be made available to any ATF officer upon request.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.111 Description of premises.

The application will include a description of each tract of land comprising wine premises. The description will be by directions and distances, in feet and inches (or hundredths of feet), with sufficient particularity to enable ready determination of the bounds of the wine premises. When required by the regional director (compliance), a diagram of the wine premises, drawn to scale, will be furnished. The description will clearly indicate any area of the wine premises to be used as bonded wine premises, used as taxpaid wine premises, or alternated for use as bonded wine premises and taxpaid wine premises. The means employed to afford security and protect the revenue will be described. If required by the regional director (compliance) to segregate operations within the premises, the manner by which the operations are segregated will be described. Each building on wine premises will be described as to size, construction, and use. Buildings on wine premises which will not be used for wine operations will be described only as to size and use. If the wine premises consist of a part of a building, the rooms or floors will be separately described. The activities conducted in the adjoining portions of the building and the means of ingress and egress from the wine premises will be described.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1381, as amended (26 U.S.C. 5356, 5357, 5365))

§ 24.112 Description of equipment.

The following items of equipment, if on wine premises, will be described in the application:

(a) The approximate number and total capacity of tanks and other bulk containers of 100 gallons or more in volume used in the production, storage, cellar treatment, bottling or packing of wine, and the number and total volume of tanks used to measure or gauge wine and spirits. A statement of certification of accurate calibration will be included for any tank or other bulk container that will be used for taxpayment of wine or spirits, the storage of spirits, and the addition of spirits to wine. (A list of tanks and other bulk containers by serial number, designated use or uses, capacity, and method of measurement will be maintained by the proprietor at the wine premises);

(b) The total number of barrels or other readily movable containers used for the production or storage of wine of less than 100 gallons in volume;

(c) The number and approximate capacities of any crushers and presses;

(d) Description of any laboratory facility and a listing of any wine or spirits tests which will be done on wine premises; and

(e) Stills used in the production of volatile fruit-flavor concentrate (serial number and capacity). The capacity will be stated as the maximum quantity in wine gallons of volatile fruit-flavor concentrate capable of being produced in 24 hours.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1335, as amended, 1379, as amended, 1392, as amended (26 U.S.C. 5179, 5356, 5511))

§ 24.113 Trade names.

Except as provided in this section, the applicant shall list on the application each trade name to be used in connection with operations on wine premises. If State or local law requires registration of a trade name, the applicant shall certify that each trade name listed on the application is so registered. Where operations conducted on wine premises are required to be covered by a basic permit under the Federal Alcohol Administration Act (49 Stat. 978; 27 U.S.C. 203), the regulations issued in 27 CFR Part 1 govern the approval and use of a trade name in connection with these operations. If a trade name is approved for use under the labeling provisions of the Act (49 Stat. 981; 27 U.S.C. 205), the applicant may use the trade name in connection with any other operation conducted on wine premises without listing the trade name on the application. Operations under a trade name may not be conducted prior to approval of the application or issuance of a basic permit covering the use of the name.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.114 Description of volatile fruit-flavor concentrate operations.

Each applicant intending to produce volatile fruit-flavor concentrate shall include on the ATF Form 5120.25 ([illegible]) application a step-by-step description of the production procedure to be employed. The description will commence with the obtaining of juice from the fruit and continue through each step of the process to removal of volatile fruit-flavor concentrate from the system. If volatile fruit-flavor concentrate containing more than 24 percent alcohol (high-proof concentrates (essences)) is to be produced, indicate any step in the production procedure at which any spirits may be fit for beverage purposes. The maximum quantity in gallons of fruit most used and volatile fruit-flavor concentrate produced in 24 hours, the maximum and minimum fold, and the maximum percent of alcohol in the volatile fruit-flavor concentrate will be stated for each kind of fruit used.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1389, as amended, 1392, as amended (26 U.S.C. 5356, 5361, 5511))

§ 24.115 Registry of stills.

Any still intended for use in the production of volatile fruit-flavor concentrate will be set up on bonded wine premises. Each still is subject to the provisions of Subpart C of Part 170 of this chapter and will be registered with the regional director (compliance). The listing of a still in the application, and the approval of the application, will, as provided in 27 CFR 170.55, constitute registration with the regional director (compliance).

(Sec. 201, Pub. L. 85–859, 72 Stat. 1335, as amended, 1379, as amended, 1392, as amended (26 U.S.C. 5179, 5356, 5511))

§ 24.116 Registry number.

Upon approval of the application, the regional director (compliance) will assign a registry number to the bonded winery, bonded wine cellar, or taxpaid wine bottling house. The registry number will be used in all correspondence and on all documents filed subsequently in connection with the operation of the premises and will be shown where required on labels and markings of containers or cases filled at the wine premises.

§ 24.117 Powers of attorney.

The proprietor shall file with the regional director (compliance) ATF Form 5000.8 (1534), Power of Attorney, for each person authorized to sign or to act on behalf of the proprietor as an attorney-in-fact. A power of Attorney is not required for any person whose authority has been furnished in the application. The ATF Form 5000.8 (1534) will be prepared in accordance with the instructions on the form. If not limited in duration, the power of attorney will continue in effect until written notice of revocation is received by the regional director or operations are terminated.

§ 24.118 Maintenance of application file.

(a) The proprietor shall maintain an application file in looseleaf form in complete and current condition, readily available at the wine premises for inspection by ATF officers. The application file will be divided into three sections as follows: (1) A section consisting of the latest approved application and the current pages with the information required by paragraphs (e) through (l) of § 24.109; (2) a section consisting of the current pages with the information and documents or an incorporation by reference as required by paragraph (c) of § 24.109; and (3) a section consisting of the current pages with the additional information and/or documents the regional director (compliance) has requested.

(b) The proprietor shall file an amended application covering any change in, or addition to, items of information currently on file as provided in § 24.120.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356, 5367))

Changes Subsequent to Original Establishment

§ 24.120 Amended application.

Where there is a change in any of the information included in the current approved application, the proprietor shall, within 30 days of the change (except as otherwise provided in this part), submit an amended application to the regional director (compliance) and set forth the information necessary to make the application file accurate and current. Where the change affects only pages or parts of pages of the current application, as many complete pages as will enable the replacement of the pages affected and maintenance of the file as provided in § 24.118 will be submitted.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.121 Changes affecting permits.

The proprietor shall follow the provisions of 27 CFR Part 1 to effect any change pertaining to a permit issued under the Federal Alcohol Administration Act.

(49 Stat. 978; 27 U.S.C. 203)

§ 24.122 Change in name of proprietor or trade name.

Where there is to be a change in the name of the business, the proprietor shall file an amended application and, if a basic permit has been issued under the Federal Alcohol Administration Act (49 Stat. 978; 27 U.S.C. 203), an application for amendment of the basic permit. Where there is a change in or addition of a trade name, the proprietor shall file an amended application or, if a basic permit has been issued under the Federal Alcohol Administration Act (49 Stat. 978; 27 U.S.C. 203), an application for amendment of the basic permit. In either case, if the proprietor has filed bond, a new bond or consent of surety will not be required. Operations under the new name or trade name may not be conducted before approval of the amended application and/or issuance of an amended permit.

(Sec. 201, Pub. L. 85–859 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.123 Change in stockholders.

If there is a change in the list of stockholders furnished under the provisions of § 24.110(c)(1), the proprietor may, in lieu of submission within 30 days of the change under the provisions of § 24.120, submit a new list of stockholders annually on May 1, or any other approved date, to the regional director (compliance) which has on file the list of stockholders, provided the sale or transfer of capital stock does not result in a change in the control or management of the business.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.124 Change in corporate officers.

Where there is any change in the list of corporate officers furnished under the provisions of § 24.110(a)(2), the proprietor shall submit, within 30 days of the change, an amended application supported by a new list of corporate officers and a statement of the changes reflected in the new list. Where the proprietor has shown that certain corporate officers listed on the original application have no responsibilities in connection with the operations covered by the application, the regional director (compliance) may waive the requirement for submitting an amended application to cover a change in those corporate officers.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.125 Change in proprietorship.

(a) *General.* If there is a change in the proprietorship of wine premises qualified to operate under this part, the outgoing proprietor shall comply with the requirements of § 24.140, and the successor shall, before commencing operations, apply for and obtain any required permits, file any required bonds, and file an application for and receive permission to operate in the same manner as a person qualifying a new wine premises; however, the successor may, in the manner provided in § 24.127, adopt the approved formulas of the outgoing proprietor. Wine, spirits, and winemaking materials may be transferred from an outgoing proprietor to a successor in the manner provided in § 24.145.

(b) *Fiduciary.* A successor to the proprietorship of wine premises who is an administrator, executor, receiver, trustee, assignee, or other fiduciary shall, except as otherwise provided in this section, comply with the provisions of paragraph (a) of this section. However, in lieu of filing a new bond, if a bond is required, the fiduciary may furnish a consent of surety extending the terms of any bonds of the predecessor, and any pertinent information contained in the predecessor's application may be incorporated by reference. In addition, the fiduciary shall furnish a certified copy of the order of the court or other pertinent document showing appointment as such fiduciary. The effective date of the qualifying documents filed by a fiduciary will be the effective date of the court order, or the date specified for the fiduciary to assume control. If the fiduciary was not appointed by a court, the date of assuming control will coincide with the effective date of the qualifying documents filed by the fiduciary.

(c) *Exception.* A fiduciary intending to liquidate the business conducted on wine premises, i.e., disposition of any wine and spirits on hand, including use of any cellar treatment necessary to put the wine in merchantable condition,

VOL 51
ISS 45
MR 7
1986
UMI

who does not intend to produce wine, or use spirits, or receive wine in bond may be exempted from qualifying as the proprietor of the wine premises upon filing with the regional director (compliance) a statement to that effect, a copy of a foreclosure action, or a copy of the court order directing the liquidation of the business, and if the wine premises is covered by bond, a consent of surety wherein the surety and the fiduciary agrees to remain liable on the bond.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.126 Change in proprietorship involving a bonded wine warehouse.

Where a bonded wine warehouse has been established on wine premises and it is desired to continue the operation of the bonded wine warehouse subsequent to a change in the proprietorship of the bonded winery or bonded wine cellar, the proprietor of the bonded wine warehouse shall file a letter application, accompanied by an affirming statement from the new proprietor of the bonded winery or bonded wine cellar, requesting the continuation of the bonded wine warehouse and also file evidence of sufficient bond coverage.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5353))

§ 24.127 Adoption of formulas.

The adoption of approved formulas by a successor proprietor will be in the form of an application, filed with the Director. The application will list the formulas for adoption by formula number, name of product, and date of approval. The application will clearly show that the outgoing proprietor has authorized the successor proprietor's use of the approved formulas.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.128 Continuing partnerships.

If, under the laws of the particular State, the partnership is not terminated upon the death or insolvency of a partner but continues until the dissolution of the partnership is completed, and the surviving partner has the exclusive right to the control and possession of the partnership assets for the purpose of liquidation and settlement, the surviving partner may continue to operate the wine premises under the prior qualification of the partnership, provided a consent of surety is filed wherein the surety and the surviving partner agree to remain liable on any bond covering the bonded wine premises. A surviving partner who acquires the business on completion of the dissolution of the partnership shall qualify from the date of acquisition, as provided in § 24.125(a). The rule set forth in this section will also apply where there is more than one surviving partner.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.129 Change in location.

Where there is a change to the location of wine premises, the proprietor shall file an amended application and an application for amendment of the basic permit, if any, and if bond has been filed, either a new bond or a consent of surety. Operation of wine premises may not be commenced at the new location prior to approval of the amended application and issuance of any amended permit.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

§ 24.130 Change in volatile fruit-flavor concentrate operations.

If the proprietor desires to make any change in the process employed to produce volatile fruit-flavor concentrate and the change affects the accuracy of the description of process included in the application, the proprietor shall file an amended application to include the amended or new process. The new or changed process may not be used prior to approval of the amended application.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1392, as amended (26 U.S.C. 5356, 5511))

§ 24.131 Change in construction and use of buildings and equipment.

Where a material change is to be made to buildings or major equipment located on wine premises, or in the use of any portion of the wine premises, which affects the accuracy of the application, the proprietor shall, before making the change, submit a letterhead application to the regional director (compliance), through the area supervisor. The letterhead application will describe the proposed change in detail. Upon approval of the application, the proprietor may effect the proposed change. The proprietor shall include the change covered by the letterhead application in the next amended ATF Form 5120.25 (698) required to be filed.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5356))

Alternation

§ 24.135 Wine premises alternation.

(a) *General.* The proprietor of a bonded winery or bonded wine cellar may alternate all or a portion of wine premises for use as bonded wine premises or use as taxpaid wine premises. The proprietor may also alternate the use of adjacent or contiguous premises qualified under 26 U.S.C. Chapter 51 (distilled spirits plant, brewery, etc.) for use as wine premises or *vice versa.*

(b) *Qualifying documents.* Where the proprietor desires to alternate wine premises as bonded wine premises, or taxpaid wine premises, or other premises qualified under 26 U.S.C. Chapter 51, the following qualifying documents will be filed with the regional director (compliance):

(1) A statement on the application ATF Form 5120.25 (698) that an alternation of wine premises will occur;

(2) Evidence of existing bond, consent of surety, or a new bond covering the alternation;

(3) A description of how taxpaid wine or spirits, or untaxpaid wine or spirits will be identified and segregated; and

(4) Any other document or additional information the regional director (compliance) may require.

(c) *Alternation.* After the necessary qualifying documents have been approved by the regional director (compliance), the proprietor may alternate wine premises as described in the application. Any portion of wine premises on which taxpaid wine is located will be considered taxpaid wine premises and any portion of the premises on which wine not identified as taxpaid is located will be considered bonded wine premises. The proprietor shall, prior to the initial alternation of the premises, identify by portable signs or tags, or by any other method or manner satisfactory to the regional director (compliance), either all taxpaid wine on taxpaid wine premises or all untaxpaid wine on bonded wine premises.

(d) *Segregation.* The proprietor shall keep untaxpaid wine or spirits physically separated from taxpaid wine or spirits and on the designated premises. This separation will be by use of tanks, rooms, buildings, partitions, pallet stacks, or complete physical separation, or by any other method or manner which will clearly and readily distinguish untaxpaid wine or spirits from taxpaid wine or spirits and is satisfactory to the regional director (compliance). Where necessary for the protection of the revenue or enforcement of 26 U.S.C. Chapter 51, the regional director (compliance) may require that the portions of wine premises alternated under this section be separated by partitions or otherwise.

(e) *Conditions.* Authority for the alternation of bonded wine premises, taxpaid wine premises, or other premises qualified under 26 U.S.C. Chapter 51 is conditioned on compliance by the proprietor with the provisions of this section. Failure to comply in good faith with these provisions will automatically terminate this authority. Authority for the alternation of bonded wine premises, taxpaid wine premises, or other premises qualified under 26 U.S.C. Chapter 51 may be withdrawn whenever in the judgment of the regional director (compliance) the revenue is jeopardized or the effective administration of this part is hindered by the continuation of the authorization.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1380, as amended, 1381, as amended (26 U.S.C. 5356, 5357, 5361, 5363, 5365, 5367))

§ 24.136 Procedure for alternating proprietors.

(a) *General.* Wine premises, or parts thereof, may be operated alternately by proprietor who have each filed and received approval of the necessary applications and bonds and have qualified under the provisions of this part. Where operations by alternating proprietor are limited to parts of the wine premises, the application will describe areas, buildings, floors, or rooms which will be alternated and will be accompanied by a diagram delineating the parts of the wine premises to be alternated. A separate diagram will be submitted to depict each arrangement under which the wine premises will be operated. Once the qualifying documents have been approved, and operations initiated, the wine premises, or parts thereof, may be alternated. Any transfer of wine, spirits, or other accountable materials from one proprietor to the other proprietor will be indicated in the records and reports of each proprietor. Operation of a bonded winery engaged in the production of wine by an alternate proprietor will be at least one calendar day in length.

(b) *Alternation.* All operations in any area, building, floor, or room to be alternated will be completely finished and all wine, spirits, and other accountable materials will be removed from the alternated wine premises or transferred to the incoming proprietor. However, wine, spirits, and other accountable materials may be retained on wine premises to be alternated, if in locked tanks, the keys to which are in the custody of the outgoing proprietor.

(c) *Bonds.* The outgoing proprietor who has filed bond and intends to resume operation of the alternated areas, buildings, floors, or rooms following suspension of operations by an alternating proprietor shall execute a consent of surety to continue in effect all bonds. Where wine, spirits, or other accountable materials subject to tax under 26 U.S.C. Chapter 51 are to be retained in tanks on the wine premises to be alternated, the outgoing proprietor shall also execute a consent of surety to continue the liability of all bonds for the tax on the materials, notwithstanding the change in proprietorship.

(d) *Records.* Each proprietor shall maintain separate records and submit a separate ATF Form 5120.17 (702), Monthly Report of Bonded Wine Cellar Operations. All transfers of wine, spirits, and other accountable materials will be reflected in the records of each proprietor. Each proprietor shall maintain a record showing the name and registry number of the incoming or outgoing proprietor, the effective date and hour of alternation, and the quantity in gallons and the percent alcohol by volume or proof of any wine, spirits, or other accountable materials transferred or received.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended 1379, as amended, 1380, as amended, 1381, as amended, 1382, as amended (26 U.S.C. 5351, 5352, 5354, 5356, 5361, 5362, 5363, 5367, 5373))

§ 24.137 Alternate use of the wine premises for customs purposes.

(a) *General.* The wine premises may be alternated to be used temporarily by customs officers, under applicable customs laws and regulations, for the purpose of measuring, gauging, and bottling or packing wine. The use of the portion of the wine premises alternated for customs use is subject to the approval of the district director of customs. When it is necessary to convey wine in customs custody across bonded wine premises, the proprietor shall comply with the provisions of § 24.86.

(b) *Qualifying documents.* Where the proprietor desires to alternate a portion of wine premises for customs use, the following qualifying documents will be filed with the regional director (compliance):

(1) ATF Form 5120.25 (698) to cover the alternation;

(2) A diagram clearly depicting any area, building, floor, room or major equipment in use during the alternation; and

(3) Any other documents or additional information the regional director (compliance) may require.

(c) *Alternation.* After approval of the qualifying documents by the regional director (compliance), the proprietor may alternate the wine premises. Portions of the wine premises to be excluded by curtailment or included by extension may not be used for purposes other than those authorized. Prior to the effective date and hour of the alternation, the proprietor shall remove all wine and spirits from the portion of the wine premises to be alternated for customs purposes.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1380, as amended, 1381, as amended (26 U.S.C. 5356, 5357, 5361, 5365, 5367))

Permanent Discontinuance of Operations

§ 24.140 Notice.

(a) *General.* Where all operations at the wine premises are to be permanently discontinued, the proprietor shall file with the regional director (compliance) a notice in letter form to cover the discontinuance. The proprietor shall state in the notice the date on which operations will be discontinued and, if the wine premises are to be transferred to a successor proprietor, the name of the successor proprietor. Any basic permit issued to the proprietor under the Federal Alcohol Administration Act (49 Stat. 978; 27 U.S.C. 203) will be submitted to the regional director (compliance) with a written request for cancellation.

(b) *Bonded wine premises.* The proprietor shall certify in the notice, as applicable, that (1) all wine, spirits, or volatile fruit-flavor concentrate have been lawfully removed from bonded wine premises, destroyed, or transferred to a successor as of the effective date of discontinuance, (2) no wine, spirits, or volatile fruit-flavor concentrate are in transit to bonded wine premises, and (3) all approved applications covering the transfer of spirits to bonded wine premises have been returned to the regional director (compliance). The proprietor shall submit a report marked "Final" on the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations. Any wine, spirits, or volatile fruit-flavor concentrate transferred to a successor will be identified as "Transferred to successor" on the report and identified as "Received from predecessor" on the initial report filed by the successor.

(c) *Taxpaid wine premises.* The proprietor shall certify in the notice that all domestic and foreign taxpaid wine on hand has been disposed of, or if not yet disposed of, the manner of disposition and the time period in which the disposition will occur. The proprietor shall include domestic taxpaid wine on the ATF Form 5120.17 (702) report marked "Final." Any domestic taxpaid wine transferred to a successor will be identified as "Transferred to successor" on the report

VOL 51 ISS 45 MR 7 1986 UMI

and identified as "Received from predecessor" on the initial report filed by the successor.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.141 Bonded wine warehouse.

Where all operations at a bonded wine warehouse are to be permanently discontinued, the warehouse proprietor shall file with the regional director (compliance) a notice in letter form to cover the discontinuance. The warehouse proprietor shall state in the notice the name, registry number, and address of the bonded wine cellar on which the warehouse facilities are located and the date on which operations of the bonded wine warehouse will be discontinued.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5353))

Bonds and Consents of Surety

§ 24.145 General requirements.

Each person required to file a bond or consent of surety under this part shall prepare and execute the bond or consent of surety on the form prescribed in accordance with this part and the instructions printed on the form, and shall submit the form to the regional director (compliance). A person may not commence or continue any business or operation relating to wine until all bonds and consents of surety required under this part with respect to the business or operation have been approved by the regional director (compliance).

(Sec. 201, Pub. L. 85–859, 72 Stat. 1394, as amended (26 U.S.C. 5551))

§ 24.146 Bonds.

(a) *Wine bond.* The proprietor shall give bond on ATF Form 5120.36(700), Wine Bond, to cover the liability for excise taxes imposed by the Internal Revenue Code of 1954, on wines produced or received by the proprietor. This includes liability for special taxes and penalties and interest. The bond will apply to wine, spirits, and volatile fruit-flavor concentrate, or other commodities subject to tax under 26 U.S.C. Chapter 51, in transit to or on bonded wine premises, and to the operations of the bonded winery or bonded wine cellar, whether the transaction or operation on which the proprietor's liability is based occurred on or off the proprietor's premises. The bond will provide that the proprietor shall faithfully comply with all provisions of law and regulation relating to activities covered by the bond. This bond has a tax obligation limit of $500 for wine removed from bonded wine premises on which the tax has not been paid.

(b) *Tax deferral bond.* Where the proprietor removes wine from bonded wine premises for consumption or sale, after determination and before payment of tax, and the tax unpaid at any one time amounts to more than $500, the proprietor shall, in addition to any other bond required by this part, furnish a tax deferral bond on ATF Form 5120.36(700), Wine Bond, to ensure payment of the tax on the wine. The Tax deferral bond and the Wine bond may be submitted on the same ATF Form 5120.36(700).

(c) *Wine vinegar plant bond.* The proprietor of a wine vinegar plant who withdraws wine from a bonded winery or bonded wine cellar without payment of tax for use in the manufacture of vinegar shall file bond on ATF Form 5510.2(1676), Bond Covering Removal to and Use of Wine at Vinegar Plant, to ensure the payment of the tax on the wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1380, as amended (26 U.S.C. 5354, 5362))

§ 24.147 Operations bond or unit bond.

Notwithstanding the provisions of § 24.146, each person intending to commence or to continue business as the proprietor of a bonded winery or bonded wine cellar with an adjacent or contiguous distilled spirits plant qualified under 27 CFR Part 19 for the production of distilled spirits shall, in lieu of a winery bond and the bonds required under the provisions of 26 U.S.C. 5173, as amended, give an operations bond or unit bond in accordance with the applicable provisions of 27 CFR Part 19.

(Sec. 805(c), Pub. L. 96–39, 93 Stat. 276 (26 U.S.C. 5173))

§ 24.148 Penal sums of bonds.

The penal sums of bonds prescribed in this part are as follows:

Bond	Basis	Penal sum minimum/maximum
(a) Wine Bond, ATF Form 5120.36(700).	(1) Not less than the tax on all wine or spirits possessed, in transit, or unaccounted for at any one time.	$1,000/$50,000
	(2) Where the liability in (a)(1) of this section exceeds $250,000.———/.	$100,000
	(3) Where the unpaid tax amounts to more than $500, not less than the amount of tax which, at any one time, has been determined but not paid.	$500/$250,000
(b) Wine vinegar plant bond, ATF Form 5510.2(1676) [1].	Not less than the tax on all wine on hand, in transit, or unaccounted for at any one time.	$500/———

[1] The proprietor of a bonded winery or bonded wine cellar who operates an adjacent or contiguous wine vinegar plant with a Wine Bond which does not cover the operation may file a consent of surety to extend the terms of the Wine Bond in lieu of filing a wine vinegar plant bond.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1380, as amended (26 U.S.C. 5354, 5362))

§ 24.149 Corporate surety.

(a) Surety bonds required by this part may be obtained from corporate sureties which hold certificates of authority from and are subject to the limitations prescribed by the Secretary as set forth in the current revision of Treasury Department Circular No. 570 (Companies Holding Certificates of Authority as Acceptable Sureties on Federal bonds and as Acceptable Reinsuring Companies).

(b) Treasury Department Circular No. 570 is published in the **Federal Register** yearly on the first working day in July. As revisions of the circular occur, the revisions are published in the **Federal Register**. Copies may be obtained from the Audit Staff, Financial Management Service, Department of the Treasury, Washington, DC 20226.

(July 30, 1947, Ch. 390, Pub. L. 80–280, 61 Stat. 648, as amended (6 U.S.C. 6, 7))

§ 24.150 Powers of attorney.

Each bond, and each consent to changes in the terms of a bond, will be accompanied by a power of attorney whereby the surety authorizes the agent or officer who executed the bond or consent to act on behalf of the surety. The regional director (compliance) may require additional evidence of the authority of the agent or officer of the surety to execute the bond or consent. The power of attorney will be prepared on a form provided by the surety and executed under the corporate seal of the surety. If the power of attorney is other than a manually signed original, the regional director (compliance) may require a certification of validity.

(July 30, 1947, Ch. 390, Pub. L. 80–280, 61 Stat. 648, as amended (6 U.S.C. 6, 7))

§ 24.151 Deposit of collateral security.

(a) Bonds or notes of the United States, or other obligations which are unconditionally guaranteed as to both interest and principal by the United States, may be pledged and deposited as collateral security in lieu of corporate sureties in accordance with the

provisions of Treasury Department Circular No. 154 (31 CFR Part 225, Acceptance of Bonds, Notes or Other Obligations Issued or Guaranteed by the United States as Security in Lieu of Surety or Sureties on Penal Bonds). Cash, postal money orders, certified checks, cashiers' checks, or treasurers' checks may also be furnished as collateral security in lieu of corporate sureties.

(b) Treasury Department Circular No. 154 is periodically revised and contains the provisions of 31 CFR Part 225 and the forms prescribed in 31 CFR Part 225. Copies of the circular may be obtained from the Audit Staff, Financial Management Service, Department of the Treasury, Washington, DC 20226.

(July 30, 1947, Ch. 390, 61 Stat. 650 (6 U.S.C. 15); August 16, 1954, Ch. 736, 68A Stat. 847, as amended (26 U.S.C. 7101))

§ 24.152 Consents of surety.

Consents of surety to changes in the terms of bonds will be executed on ATF Form 5000.18 (1533), Consent of Surety, by the principal and by the surety with the same formality and evidence of authority as is required for the execution of bonds.

§ 24.153 Strengthening bonds.

In any instance where the penal sum of the bond on file becomes insufficient, the principal shall either give a strengthening bond with the same surety to attain a sufficient penal sum or give a new bond covering the entire liability. Strengthening bonds will not be approved where any notation is made thereon which is intended, or which may be construed, as a release of any former bond, or as limiting the amount of either bond to less than its full penal sum. Strengthening bonds will show the current date of execution and the effective date.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1394, as amended (26 U.S.C. 5551))

§ 24.154 New or superseding bonds.

When, in the opinion of the regional director (compliance), the interests of the Government demand it, or in any case where the validity of the bond becomes impaired in whole or in part for any reason, the principal will be required to give a new bond. A new bond will be required immediately in the case of the insolvency of a corporate surety. Executors, administrators, assignees, receivers, trustees, or other persons acting in a fiduciary capacity, to continue or to liquidate the business of the principal, will execute and file a new bond or obtain the consent of the surety or sureties on the existing bond or bonds. When under the provisions of § 24.157 the surety has filed an application to be relieved of liability under any bond given under this part and the principal desires or intends to continue business or operations to which the bond relates, the principal shall file a valid superseding bond to be effective on or before the date specified in the surety's notice. New or superseding bonds will show the current date of execution and the effective date.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1380, as amended, 1394, as amended (26 U.S.C. 5354, 5362, 5551))

§ 24.155 Disapproval and appeal from disapproval.

(a) *Disapproval.* The regional director (compliance) may disapprove any bonded wine premises bond or consent of surety if the individual, firm, partnership, corporation, or association giving the bond, or owning, controlling, or actively participating in the management of the bonded wine premises of the individual, firm, partnership, corporation, or association giving the bond, has been previously convicted in a court of competent jurisdiction of:

(1) Any fraudulent noncompliance with any provision of any law of the United States, if any provision relates to internal revenue taxation of distilled spirits, wine, or beer, or if the offense will be compromised with the person on payment of penalties or otherwise, or

(2) Any felony under a law of any State, or of the District of Columbia, or of the United States, prohibiting the manufacture, sale, importation, or transportation of distilled spirits, wine, beer, or other intoxicating liquor.

(b) *Appeal from disapproval.* Where a bond or consent of surety is disapproved by the regional director (compliance), the person giving the bond may appeal the disapproval to the Director. The decision of the Director will be final.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1394, as amended (26 U.S.C. 5551))

§ 24.156 Termination of bonds.

A bond prescribed in § 24.146 may be terminated as to future liability (a) pursuant to application by the surety as provided in § 24.157; (b) pursuant to approval of a superseding bond; or (c) on notification by the principal that the business has been discontinued. In the case of a tax deferral bond, the termination may be a notification by the principal that removals of wine requiring a tax deferral bond have been discontinued.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended (26 U.S.C. 5354))

§ 24.157 Application by surety for relief from bond.

A surety on any bond required by this part may at any time, in writing, notify the principal and the regional director (compliance) in whose office the bond is on file, that it desires after a specified date, to be relieved of liability under the bond. The date may not be less than 10 days after the date notice is received by the regional director (compliance) in the case of a tax deferral bond, and not less than 90 days after the date the notice is received in the case of a bonded winery, bonded wine cellar or wine vinegar plant bond. The surety will also file with the regional director (compliance) an acknowledgment, or other evidence of service, of a notice on the principal. If a notice is not thereafter in writing withdrawn, the rights of the principal as supported by the bond will be terminated on the date specified in the notice, and the surety will be relieved from liability to the extent set forth in § 24.158.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1380, as amended (26 U.S.C. 5354, 5362))

§ 24.158 Extent of relief.

(a) *General.* The surety on any bond required by this part who has filed a notice for relief from liability as provided in § 24.157 will be relieved from liability under bond as set forth in this section.

(b) *Wine bond.* Where a new or superseding bond is filed, the surety will be relieved of future liability with respect to wine, spirits, volatile fruit-flavor concentrate, or any other commodities subject to tax under 26 U.S.C. Chapter 51 on hand or in transit to bonded wine premises on or after the effective date of the new or superseding bond. Notwithstanding a relief, the surety will remain liable for the tax on all wine or volatile fruit-flavor concentrate produced at, and for wine, spirits, and volatile fruit-flavor concentrate consigned to, the bonded wine premises, and for all other liabilities incurred, during the term of the bond. Where a new or superseding bond is not filed the surety will, in addition to the continuing liabilities specified above, remain liable for all wine, spirits, volatile fruit-flavor concentrate, or other commodities subject to tax under 26 U.S.C Chapter 51 on hand or in transit to bonded wine premises on the date specified in the notice, until all the wine, spirits, volatile fruit-flavor concentrate, or commodities subject to tax under 26 U.S.C Chapter 51 have been lawfully disposed of, or a

VOL
51
ISS
45
MR
7
1986
UMI

new bond has been filed covering the liability.

(c) *Tax deferral bond.* The surety will be relieved of liability for the tax on any wine removed from the bonded wine premises after the date specified in the notice. The surety will continue to be liable for the tax on wine removed for consumption or sale on or before the date specified in the notice, until all tax is fully paid.

(d) *Wine vinegar plant bond.* The surety will be relieved of liability for tax on wine withdrawn for the manufacture of vinegar after the date specified in the notice. The surety will continue to be liable for the tax on wine withdrawn on or before the date specified in the notice, until all wine is fully accounted for.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1380, as amended (26 U.S.C. 5354, 5362))

§ 24.159 Release of collateral security.

Collateral security pledged and deposited will be released only in accordance with the provisions of 31 CFR Part 225. The collateral security will not be released by the regional director (compliance) until liability under the bond for which it was pledged has been terminated. If satisfied that the interests of the Government may not be jeopardized, the regional director (compliance) will fix the date or dates on which a part or all of the collateral security may be released. At any time prior to the release of the collateral security, the regional director (compliance) may, for proper cause, extend the date of release for any additional length of time.

(July 30, 1947, Ch. 390, Pub. L. 80–280, 61 Stat. 650 (6 U.S.C. 15))

Subpart E—Construction and Equipment

§ 24.165 Premises.

Wine premises will be located, constructed, and equipped, subject to approval by the regional director (compliance), in a manner suitable for the operations to be conducted and to afford adequate protection to the revenue.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended, 1379, as amended, 1380, as amended, 1381, as amended (26 U.S.C. 5351, 5352, 5357, 5361, 5363))

§ 24.166 Buildings or rooms.

All buildings or rooms on wine premises in which wine operations or other operations as are authorized in this part are conducted will be located, constructed, and equipped in a manner suitable for the intended purpose and to afford adequate protection to the revenue. Each building or room will be constructed of substantial materials and separated from adjacent or contiguous buildings, rooms, or designated areas in a manner satisfactory to the regional director (compliance). Where spirits are to be received and stored in packages, a storage room equipped for locking will be provided. The proprietor shall make provisions to assure ATF officers have ready ingress to and egress from any building or room on wine premises, and shall furnish at the request of the regional director (compliance) evidence that the means of ingress and egress by ATF officers are assured. Where the regional director (compliance) finds that any building or room on wine premises is located, constructed, or equipped as to afford inadequate protection to the revenue, the proprietor will be required to make changes in location, construction, or equipment to the extent necessary to afford adequate protection to the revenue.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended, 1379, as amended (26 U.S.C. 5352, 5357))

§ 24.167 Tanks.

(a) *General.* All tanks on wine premises used for wine operations or for other operations as are authorized in this part will be suitable for the intended purpose. Each tank used for wine operations will be located, constructed, and equipped as to permit ready examination and determination of the contents. Any tank used for wine operations not enclosed within a building or room will be enclosed within a secure fence unless the premises where the tank is located is enclosed by a fence or wall, or all tank openings are equipped for locking and locked when used for wine operations and there is no proprietor's representative on the wine premises, or the regional director (compliance) has approved some other adequate means of revenue protection. All open tanks will be under a roof or other suitable covering.

(b) *Other requirements.* Each tank used for the taxpayment of wine, storage of spirits, or spirits additions will be constructed and equipped as follows:

(1) An accurate means of measuring the contents of each tank will be provided by the proprietor. When a means of measuring is not a permanent fixture of the tank, the tank will be equipped with a fixed device to allow the approximate contents to be determined readily;

(2) Safe access to all parts of a tank will be provided by the proprietor;

(3) Tanks may not be used until they are accurately calibrated and a statement of certification of accurate calibration is included in the application;

(4) If a tank or its fixed measuring device is moved in location or position subsequent to original calibration, the tank may not be used until recalibrated; and

(5) All openings in tanks used for the storage, weighing, or measuring of spirits, or for the addition of spirits to wine, will be equipped for locking or have a similar means of revenue protection. Any vents, flame arrestors, foam devices, or other safety devices affixed to a spirits tank will be constructed to prevent extraction of the contents of the tank.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended, 1379, as amended 1395, as amended (26 U.S.C. 5352, 5357, 5552))

§ 24.168 Identification of tanks.

(a) *General.* Each tank, barrel, puncheon, or similar bulk container, used to ferment wine or used to process or store wine, spirits, or wine making materials will have the contents marked and will be marked as required by this section.

(b) *Tank markings.* (1) Each tank will have a unique serial number. A single series of numbers will be used for all tanks, except that separate series, preceded by an identifying letter, may be used for tanks in different buildings or rooms;

(2) Each tank will be marked to show its current use, either by permanent markings or by removable signs of durable material;

(3) If of uniform dimensions from top to bottom, the capacity per inch of depth will be marked on the tank; and

(4) If used to store wine made in accordance with a formula, the formula number will be marked or otherwise indicated on the tank.

(c) *Puncheon and barrel markings.* Puncheons and barrels, or similar bulk containers over 100 gallons capacity, will be marked in the same manner as tanks. A permanent serial number need not be marked on puncheons and barrels, or similar bulk containers of less than 100 gallons capacity, used for storage, but the capacity will be permanently marked.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended, 1379, as amended (26 U.S.C. 5352, 5357))

§ 24.169 Pipelines.

Pipelines, including flexible hoses, used to convey wine, spirits, or volatile fruit-flavor concentrate will be constructed, connected, arranged, and secured so as to afford adequate protection to the revenue and to permit ready examination. The regional director (compliance) may approve pipelines which cannot be readily examined if no jeopardy to the revenue is created.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended, 1379, as amended (26 U.S.C. 5352, 5357, 5552))

§ 24.170 Measuring devices and testing instruments.

(a) *Measuring devices.* The regional director (compliance) may at any time require proprietors to provide at their own expense equipment for ascertaining the capacity and contents of tanks and other storage containers, and scales and measuring devices for weighing and measuring wine, spirits, volatile fruit-flavor concentrate, or materials received and used in the production or treatment of wine. Where winemaking materials or other materials used in the treatment of wine are used immediately upon receipt on wine premises, or received and stored on bonded wine premises in original sealed shipping containers with a stated capacity, the quantity shown on the commercial invoice or other document covering the shipment may be accepted by the proprietor and entered into records in lieu of measuring the materials upon receipt.

(b) *Testing instruments.* The proprietor shall have ready access to equipment for determining the alcohol content unless the proprietor only receives and stores on wine premises bottled or packed wine with evidence showing the alcohol content had been determined. The proprietor who bottles or packs wine shall have ready access to equipment for determining the net contents of bottled or packed wine. The regional director (compliance) may require other testing instruments based upon the proprietor's operations.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1379, as amended, 1395, as amended (26 U.S.C. 5357, 5552))

Subpart F—Production of Wine

§ 24.175 General.

The kinds of wine which may be produced on bonded wine premises are:

(a) Natural wine produced in accordance with Subpart F and G of this part;

(b) Special natural wine produced in accordance with Subpart H of this part;

(c) Agricultural wine produced in accordance with Subpart I of this part; and

(d) Other than standard wine produced in accordance with Subpart J of this part.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1383, as amended, 1384, as amended, 1385, as amended, 1386, as amended (26 U.S.C. 5361, 5362, 5384, 5385, 5386, 5387))

§ 24.176 Crushing and fermentation.

In producing natural wine, water may be used to flush equipment during the crushing process or to facilitate fermentation but the density of the juice may not be reduced below 22 degrees Brix. However, if the juice is already less than 23 degrees Brix, the use of water to flush equipment or to facilitate fermentation is limited to a juice density reduction of no more than one degree Brix. At the start of fermentation no material may be added in the production of natural wine except water, sugar, concentrated fruit juice from the same kind of fruit, malo-lactic bacteria (grape wine only), yeast or yeast cultures grown in juice of the same kind of fruit, and yeast foods, sterilizing agents, precipitating agents or other approved fermentation adjuncts. Water may be used to rehydrate yeast to a maximum of two gallons of water for each pound of yeast; however, the maximum volume increase of the juice after the addition of rehydrated yeast is limited to 0.5 percent. After fermentation natural wines may be blended with each other only if produced from the same kind of fruit. Upon completion of fermentation or removal from the fermenter, the volume of wine will be accurately determined, recorded, and reported on ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations, as wine produced (any grape wine in fermenters when an annual inventory pursuant to § 24.314 is taken will be recorded and reported as produced). Any wine or juice remaining in fermentation tanks at the end of the month will be recorded and reported on ATF Form 5120.17 (702).

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1383, as amended, 1384, as amended, 1385, as amended (26 U.S.C. 5367, 5381, 5382, 5383, 5384))

§ 24.177 Chaptalization.

In producing natural wine from juice having a low sugar content, pure sugar may be added before or during fermentation to develop alcohol. The quantity of pure sugar added may not raise the original density of the juice above 25 degrees Brix. If the juice or wine is ameliorated, the quantity of pure sugar added to juice for chaptalization will be included as ameliorating material.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1385, as amended (26 U.S.C. 5382, 5384))

§ 24.178 Amelioration.

(a) *General.* In producing natural wine from juice having an acid level exceeding 5.0 grams per liter, the winemaker may adjust the acid level by adding ameliorating material (water, sugar, or a combination of both) before, during and after fermentation. The acid level of the juice is determined prior to fermentation and is calculated as tartaric acid for grapes, malic acid for apples, and citric acid for other fruit. Each 20 gallons of ameliorating material added to 1,000 gallons of juice or wine will reduce the acid level of the juice or wine by 0.1 gram per liter.

(b) *Limitations.* (1) Amelioration is permitted only at the bonded wine premises where the natural wine is produced.

(2) The ameliorating material added to juice or wine may not reduce the total acid level of the ameliorated juice or wine to less than 5.0 grams per liter.

(3) The amount of ameliorating material which may be added to juice derived from fruit grown in more than one State is limited to the acid level and the volume of the juice from each State determined before the juices are blended.

(4) Except for loganberries, currants, or gooseberries, the volume of ameliorating material added to juice or wine may not exceed 35 percent of the total volume of ameliorated juice or wine (calculated exclusive of pulp). Where the starting acid level is or exceeds 7.69 grams per liter, a maximum of 538.4 gallons of ameliorating material may be added to each 1,000 gallons of wine or juice.

(5) For wine produced exclusively from loganberries, currants, or gooseberries, the volume of ameliorating material added to juice or wine may not exceed 60 percent of the total volume of ameliorated juice or wine (calculated exclusive of pulp). If the starting acid level is or exceeds 12.5 grams per liter, a maximum of 1,500 gallons of ameliorating material may be added to each 1,000 gallons of wine or juice.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1384, as amended, 1385, as amended (26 U.S.C. 5383, 5384))

§ 24.179 Sweetening.

(a) *General.* In producing natural wine, sugar, juice or concentrated fruit juice of the same kind of fruit may be added after fermentation to sweeten wine. When juice or concentrated fruit juice is added, the solids content of the finished wine may not exceed 21 percent

by weight. When liquid sugar or invert sugar syrup is used, the resulting volume may not exceed the volume which would result from the maximum use of pure sugar only. Except as provided in paragraphs (a) and (b) of this section, when sugar is added, the alcohol content of the finished wine may not exceed 14 percent by volume and the solids content may not exceed 21 percent by weight.

(b) *Grape wine.* Any natural grape wine of a winemaker's own production may have sugar added after amelioration and fermentation provided the finished wine does not exceed 17 percent total solids by weight if the alcohol content is more than 14 percent by volume or 21 percent total solids by weight if the alcohol content is not more than 14 percent by volume.

(c) *Fruit wine.* Any natural fruit wine of a winemaker's own production may have sugar added after amelioration and fermentation provided the finished wine does not exceed 21 percent total solids by weight and the alcohol content is not more than 14 percent by volume.

(d) *Specially sweetened natural wine.* Specially sweetened natural wine is produced by adding to natural wine of the winemaker's own production sufficient pure sugar, juice or concentrated fruit juice of the same kind of fruit so that the finished product has a total solids content between 17 percent and 35 percent by weight, and an alcohol content of not more than 14 percent by volume. Natural wine containing added wine spirits may be used in the production of specially sweetened natural wine; however, wine spirits may not be added to specially sweetened natural wine. Specially sweetened natural wines may be blended with each other, or with natural wine or heavy bodied blending wine (including juice or concentrated fruit juice to which wine spirits have been added), in the further production of specially sweetened natural wine only if the wines (or juice) so blended is made from the same kind of fruit.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended, 1384, as amended, 1385, as amended, 1386, as amended (26 U.S.C. 5382, 5383, 5384, 5385))

§ 24.180 Use of concentrated and unconcentrated fruit juice.

Concentrated fruit juice reduced with water to its original density, or to 22 degrees Brix, or to any degree of Brix between its original density and 22 degrees Brix, and unconcentrated fruit juice reduced with water to not less than 22 degrees Brix, is considered juice for the purpose of standard wine production. The proprietor, prior to using concentrated fruit juice in wine production, shall obtain a statement in which the producer certifies the kind of fruit from which it was produced and the total solids content of the juice before and after concentration. Concentrated or unconcentrated fruit juice may be used in juice or wine made from the same kind of fruit for the purposes of chaptalizing, ameliorating or sweetening, as provided in this part. Concentrated fruit juice, or juice which has been concentrated and reconstituted, may not be used in standard wine production if at any time it was concentrated to more than 80 degrees Brix.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

§ 24.181 Use of sugar.

Only sugar, as defined in § 24.10, may be used in the production of standard wine. The use of liquid sugar or invert sugar syrup is limited so that the resulting volume will not exceed the volume which would result from the maximum use of pure sugar only. The quantity of sugar used will be determined either by measuring the increase in volume or by considering that each 13.5 pounds of pure sugar results in a volumetric increase of one gallon.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended, 1384, as amended, 1385, as amended, 1387, as amended (26 U.S.C. 5382, 5383, 5384, 5392))

§ 24.182 Use of acid to correct natural deficiencies.

Acids of the kinds occurring in fruit or berries may be added within the limitations of § 24.246 to juice or wine in order to correct natural deficiencies; however, no acid may be added to juice or wine which is chaptalized or ameliorated to correct natural deficiencies.

(a) *Grape wine.* Tartaric acid or malic acid, or a combination of tartaric acid and malic acid, may be added prior to or during fermentation, to grapes or juice from grapes and, after fermentation is completed, citric acid, fumaric acid, malic acid, lactic acid or tartaric acid, or a combination of two or more of these acids, may be added to correct natural deficiencies only to the extent that the fixed acid level of the finished wine (calculated as tartaric acid) does not exceed 8.0 grams per liter.

(b) *Fruit wine.* Only citric acid may be added to citrus fruit, juice or wine, only malic acid may be added to apples, apple juice or wine, and only citric acid or malic acid may be added to other fruit or berries or to juice or wine derived from other fruit or berries, to bring the acid level (calculated as malic acid for apples and citric acid for other fruit and berries) to 7.0 grams per liter.

(c) *Other use of acid.* A winemaker desiring to use an acid other than the acids allowed in paragraphs (a) and (b) of this section to correct natural deficiencies shall follow the procedure prescribed in § 24.250. A winemaker desiring to use acid to stabilize standard wine shall follow the requirements prescribed by § 24.244.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

§ 24.183 Use of distillates containing aldehydes.

Distillates containing aldehydes may be received on wine premises for use in the fermentation of wine and then returned to the distilled spirits plant from which distillates were withdrawn as distilling material. Distillates produced from one kind of fruit may not be used in the fermentation of wine made from a different kind of fruit. Distillates containing aldehydes which are received at bonded wine premises and not immediately used will be placed in a locked room or tank on bonded wine premises. Distillates containing aldehydes may not be mingled with wine spirits. If the distillates contain less than 0.1 percent of aldehydes, the proprietor shall comply with any additional condition relating to the receipt, storage, and use which the regional director (compliance) may require to assure that the distillates are properly used and accounted for.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1382, as amended (26 U.S.C. 5367, 5373))

§ 24.184 Use of volatile fruit-flavor concentrate.

(a) *General.* In the cellar treatment of natural wine of the winemaker's own production there may be added volatile fruit-flavor concentrate produced from the same kind of fruit or from the same variety of berry or grape so long as the proportion of volatile fruit-flavor concentrate added to the wine does not exceed the equivalent proportion of volatile fruit-flavor concentrate of the original juice or must from which it was produced.

(b) *Use of juice or must from which volatile fruit-flavor has been removed.* Juice, concentrated fruit juice, or must processed at a concentrate plant is considered to be pure juice, concentrated fruit juice, or must even though volatile fruit-flavor has been removed if, at a concentrate plant or at bonded wine premises, there is added to the juice, concentrated fruit juice, or

must (or in the case of bonded wine premises, to wine of the winemaker's own production made therefrom), either the identical volatile fruit-flavor removed or an equivalent quantity of volatile fruit-flavor concentrate derived from the same kind of fruit or from the same variety of berry or grape.

(c) *Certificate required.* The proprietor, prior to the use of volatile fruit flavor concentrate in wine production, shall obtain a certificate from the producer stating the kind of fruit or the variety of berry or grape from which it was produced and the total solids content of the juice before and after concentration.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

Subpart G—Production of Effervescent Wine

§ 24.190 General

Effervescent wine may be made on bonded wine premises. Where the effervescence results from fermentation of the wine within a closed container or bottle, the wine is classed and taxed as sparkling wine. The use of carbon dioxide, nitrogen gas, or a combination of both, is permitted to maintain counterpressure during the transfer of sparkling wine from bottles to processing tanks or *vice versa.* Wine carbonated by injection of carbon dioxide is classed and taxed as artificially carbonated wine. Sparkling wine, artificially carbonated wine, and any wine used as a base in the production of sparkling wine or artificial carbonated wine, may not have an alcohol content in excess of 14 percent by volume even though wine containing more than 14 percent of alcohol may be used in preparing a dosage for finishing sparkling wine or artificially carbonated wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

§ 24.191 Segregation of operations.

Where more than one process of producing sparkling wine or artificially carbonated wine is used, the regional director (compliance) may require the portion of the premises used for the production and storage of wine made by each process (bottle fermented, bulk fermented or artificially carbonated) to be segregated as provided by § *24.27*.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5365))

§ 24.192 Process and materials.

In preparing still wine for the production of sparkling wine or artificially carbonated wine, sugar and a small amount of acid may be added with yeast or yeast culture to acclimate the yeast and to facilitate the process of secondary fermentation or to correct the wine. Fruit syrup, sugar, wine, wine spirits, and acid may be used in preparing a finishing dosage for sparkling wine or artificially carbonated wine provided the dosage does not exceed 10 percent by volume of the finished product. Where the proprietor desires to use more than 10 percent by volume finishing dosage, the proprietor shall file for a formula approval under § 24.80. The fruit syrup, wine spirits and wine used will come from the same kind of fruit as the wine from which the sparkling wine or artificially carbonated wine is made. In the production of sparkling wine or artificially carbonated wine, taxpaid wine spirits or wine spirits withdrawn tax-free may be used. Tax-free wine spirits may only be used in the production of sparkling wine or artificially carbonated wine which is a natural wine. In the refermentation and finishing of a sparkling wine, the acids and materials specifically authorized in § 24.246 may be used.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

§ 24.193 Conversion into still wine.

Sparkling wine or artificially carbonated wine may be dumped for use as still wine. The dumping process will allow the loss of carbon dioxide remaining in the wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1331, as amended (26 U.S.C. 5041, 5361))

Subpart H—Production of Special Natural Wine

§ 24.195 General.

Special natural wine is a flavored wine made on bonded wine premises from a base of natural wine. The flavoring added may include natural herbs, spices, fruit juices, natural aromatics, natural essences or other natural flavoring, in quantities or proportions that the resulting product derives character and flavor distinctive from the base wine and distinguishable from other natural wine. Fruit juices may not be used to give to one natural wine the flavor of another but may be used with herbs or spices to produce a wine having a distinctive flavor. Caramel may also be added for coloring.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5386))

§ 24.196 Formula required.

Before producing any special natural wine, the proprietor shall receive approval of the formula by which it is to be made as provided by § 24.80. Any change in a formula will be approved as provided by § 24.81.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5386))

§ 24.197 Production by fermentation.

In producing special natural wine by fermentation, flavoring materials may be added before or during fermentation. Special natural wine produced by fermentation may be ameliorated in the same manner and to the same extent as natural wine made from the same fruit. Spirits may not be added to special natural wine with the exception of wine spirits contained in authorized essences made on bonded wine premises as provided in § 24.86 or approved essences made elsewhere. Upon removal of the wine from fermenters, the volume of liquid will be determined accurately and recorded as wine produced. The quantity of liquid in fermenters at the close of each month will be reported on the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations. Caramel and sugar may be used in special natural wine made under this section; however, the minimum 60 degrees Brix limitation prescribed in the definition of "Liquid sugar" and "Invert sugar syrup" in § 24.10 and in this section do not apply to materials used in the manufacture of vermouth. Finished vermouth produced under this section will contain a minimum of 80 percent by volume natural wine. Heavy bodied blending wine and juice or concentrated fruit juice to which wine spirits have been added may be used in the production of special natural wine pursuant to formula approval.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5386))

§ 24.198 Blending.

Special natural wine of the same class and kind may be blended with each other, and with heavy-bodied blending wine, or natural wine of the same kind of fruit, in the further production of special natural wine. The blending of special natural wines produced under different formulas requires the filing and approval of a formula authorizing a blending; however, where two or more formulas have been approved for the production of special natural wine of the same type, i.e., producing a sweet vermouth by blending sweet vermouths produced under two or more approved formulas, the submission and approval of an additional formula is not required.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5386))

Subpart I—Production of Agricultural Wine

§ 24.200 General.

Agricultural wine may be produced on bonded wine premises from suitable agricultural products other than the juice of fruit. Water or sugar, or both, may be used within the limitations of this subpart in the production of agricultural wine. Agricultural wine may not be flavored or colored; however, hops may be used in the production of honey wine. Spirits may not be used in the production of the wine and a wine made from one agricultural product may not be blended with a wine made from another agricultural product. Agricultural wine made with sugar in excess of the limitations of this subpart is other than standard wine and will be segregated and clearly identified. Since grain, cereal, malt, or molasses are not suitable materials for the production of agricultural wine, these materials may not be received on bonded wine premises. Beverage alcohol products made with these materials are not classed as wine and may not be produced or stored on bonded wine premises.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5387))

§ 24.201 Formula required.

Before producing any agricultural wine, the proprietor shall obtain from the Director approval of the formula and process by which it is to be made pursuant to the provisions of § 24.80. Any change in a formula will be approved in advance as provided by § 24.81.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended (26 U.S.C. 5387))

§ 24.202 Dried Fruit.

In the production of wine from dried fruit, a quantity of water sufficient to restore the moisture content to that of the fresh fruit may be added. If it is desired not to restore the moisture content of the dried fruit to that of the fresh fruit, or if the moisture content is not known, sufficient water may be added to reduce the density to 22 degrees Brix. If the dried fruit liquid after restoration is found to be deficient in sugar, sufficient pure sugar may be added to increase the total solids content to 25 degrees Brix. After addition of water to the dried fruit, the resulting liquid may be ameliorated with either water or sugar, or both, in such total volume as may be necessary to reduce the natural fixed acid level of the mixture to a minimum of five grams per liter; however, in no event may the volume of the ameliorating material exceed 35 percent of the total volume of the ameliorated juice or wine (calculated exclusive of pulp). Pure sugar may be used for sweetening. After complete fermentation or complete fermentation and sweetening, the finished product may not have an alcohol content of more than 14 percent by volume nor may the total solids content exceed 35 degrees Brix.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended, 1387, as amended (26 U.S.C. 5387))

§ 24.203 Honey wine.

In the production of wine from honey, a quantity of water may be added to facilitate fermentation provided the density of the mixture of honey and water is not reduced below 22 degrees Brix. Hops may be added in quantities not to exceed one pound for each 1,000 pounds of honey. Pure sugar or honey may be added for sweetening. After complete fermentation or complete fermentation and sweetening, the wine may not have an alcohol content of more than 14 percent by volume nor may the total solids content exceed 35 degrees Brix.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended, 1387, as amended (26 U.S.C. 5387))

§ 24.204 Other agricultural products.

In the production of wine from agricultural products, other than raisins and honey, water and sugar may be added to the extent necessary to facilitate fermentation; *Provided*, that the total weight of pure sugar used for fermentation is less than the weight of the primary winemaking material and the density of the mixture prior to fermentation is not less than 22 degrees Brix, if water, or liquid sugar, or invert sugar syrup is used. Additional sugar may be used for sweetening, provided the alcohol content of the finished wine after complete fermentation or after complete fermentation and sweetening, is not more than 14 percent by volume and the total solids content is not more than 35 degrees Brix.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1386, as amended, 1387, as amended (26 U.S.C. 5387))

Subpart J—Production of Other Than Standard Wine

§ 24.210 Classes of wine other than standard wine.

The following classes of wine are not standard wine:

(a) High fermentation wine, produced as provided in § 24.212;

(b) Heavy bodied blending wine, produced as provided in § 24.213;

(c) Spanish type blending sherry, produced as provided in § 24.214;

(d) Wine products not for beverage use, produced as provided in § 24.215;

(e) Distilling material, produced as provided in § 24.216;

(f) Vinegar stock, produced as provided in § 24.217;

(g) Wine other than those in classes listed in paragraphs (a), (b), (c), (d), (e), and (f), of this section produced as provided in § 24.218; and

(h) Spoiled wine, of the kind described in § 24.219.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1387, as amended (26 U.S.C. 5388))

§ 24.211 Formula required.

The proprietor who desires to produce wine other than standard wine shall first obtain approval of the formula by which it is to be made, except that no formula is required for distilling material or vinegar stock. The formula is filed with the Director as provided by § 24.80. Any change in the formula will be approved in advance as provided by § 24.81.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1387, as amended (26 U.S.C. 5388))

§ 24.212 High fermentation wine.

High fermentation wine is wine made with the addition of sugar within the limitations prescribed for natural wine except that the alcohol content after complete fermentation or complete fermentation and sweetening is more than 14 percent and wine spirits have not been added. Although high fermentation wine is not a standard wine, it is produced, stored, and handled on bonded wine premises subject to the same marking or labeling requirements.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1387, as amended (26 U.S.C. 5365, 5388))

§ 24.213 Heavy bodied blending wine.

Heavy bodied blending wine is wine made for blending purposes from grapes or other fruit without added sugar, and with or without added wine spirits, and having a total solids content in excess of 21 percent. Heavy bodied blending wine may be used in blending with other wine made from the same kind of fruit or for removal upon payment of tax, not for sale or consumption as beverage wine. Upon removal, the shipping containers and shipping records will be marked "Heavy Bodied Blending Wine—Not for Sale or Consumption as Beverage Wine."

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1387, as amended (26 U.S.C. 5361, 5388))

§ 24.214 Spanish type blending sherry.

Blending wine made with partially caramelized grape concentrate may be produced, stored, and handled on, or transferred in bond between bonded wine premises, or removed upon payment of tax, not for sale or consumption as beverage wine. Wine of a high solids content and dark in color, produced under this section, is designated "Spanish Type Blending Sherry." Upon removal, the shipping containers will be marked with the applicable designation and the legend "Not for Sale or Consumption as Beverage Wine." Spanish type blending sherry is not standard wine and may not be blended with standard wine except pursuant to an approved formula or in the further production of this type of wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1381, as amended, 1387 as amended (26 U.S.C. 5361, 5388))

§ 24.215 Wine or wine products not for beverage use.

(a) *General.* Wine, or wine products made from wine, may be treated with methods or materials which render the wine or wine products unfit for beverage use. No wine or wine products so treated may contain more than 21 percent of alcohol by volume at the time of withdrawal free of tax from bonded wine premises; nor may any wine or wine product so withdrawn be used in the compounding of distilled spirits or wine for beverage use or in the manufacture of any product intended to be used in the compounding. Wine or wine products produced under this section may be stored on and transferred in bond between bonded wine premises. Each container used to remove such wine or wine product from bond will be marked with the legend "Not for Sale or Consumption as Beverage Wine."

(b) *Salted wine.* Salted wine is a wine or wine product not for beverage use produced in accordance with the provisions of this section and having not less than 1.5 grams of salt per 100 milliliters.

(Sec. 201, Pub. L. 85–859 and Sec. 455, Pub. L. 98–369, 72 Stat. 1380, as amended (26 U.S.C. 5361, 5362))

§ 24.216 Distilling material.

Wine may be produced on bonded wine premises from grapes and other fruit, natural fruit products, or fruit residues, for use as distilling material, using any quantity of water desired to facilitate fermentation or distillation. No sugar may be added in the production of distilling material. Distillates containing aldehydes may be used in the fermentation of wine to be used as distilling material. Lees, filter wash, and other wine residues may also be accumulated on bonded wine premises for use as distilling material.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1381, as amended, 1382, as amended (26 U.S.C. 5361, 5373))

§ 24.217 Vinegar stock.

Vinegar stock may be produced on bonded wine premises with the addition of any quantity of water desired to meet commercial standards for the production of vinegar. Vinegar stock may be made only by the addition of water to wine or by the direct fermentation of the juice of grapes or other fruit with added water.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1381, as amended (26 U.S.C. 5361))

§ 24.218 Other wine.

(a) Wine produced with sugar and water beyond the limitations prescribed for standard wine, or wine made by blending wines produced from different kinds of fruit, or wine made with sugar other than pure sugar, or wine made with materials not authorised for use in standard wine, may be produced on bonded wine premises but will remain segregated from standard wine. Upon removal, the wine will be marked or labeled with a designation which will adequately disclose the nature and composition of the wine.

(b) Wine which is other than standard as a result of fermentation with sugar and water in excess of the limitations prescribed for standard wine will have a basic character derived from the primary winemaking material. The aggregate weight of any sugar used before and during fermentation will be less than the weight of the primary wine producing matrial. Wine spirits may be added to wine produced with sugar and water beyond the limitations for standard wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1387, as amended (26 U.S.C. 5365, 5388))

§ 24.219 Spoiled wine.

Whenever a standard wine becomes spoiled by reason of its condition, the spoiled wine will be immediately removed from the wine premises, unless the condition is corrected. Where the condition is not corrected, the wine will be removed for use as distilling material, for use in the manufacture of vinegar, or for destruction. Conditions requiring correction or removal are the development of volatile acidity in excess of the maximum level prescribed in 27 CFR Part 4, or disease or decomposition which causes the wine to lack the composition, color and other characteristics of standard wine of the same type.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1383, as amended (26 U.S.C. 5361))

Subpart K—Spirits

§ 24.225 General.

Wine spirits may be added to natural wine on bonded wine premises if both the wine and the spirits are produced from the same kind of fruit. In the case of still wine, wine spirits may be added in any State only to natural wine, produced by fermentation on bonded wine premises located within the same State. If wine has been ameliorated, wine spirits may be added (whether or not wine spirits were previously added) only if the wine contains not more than 14 percent of alcohol by volume derived from fermentation. Spirits other than wine spirits may be received, stored and used on bonded wine premises only for the production of nonbeverage wine and similar nonbeverage wine products. Wooden storage tanks used for the addition of spirits may not be used for the baking of wine.

(Sec. 201, Pub. L. 85–859 and Sec. 455, Pub. L. 98–369, 72 Stat. 1381, as amended, 1382, as amended, 1383, as amended, 1384, as amended (26 U.S.C. 5366, 5373, 5382, 5383))

§ 24.226 Receipt or transfer of spirits.

When spirits are received at the bonded wine premises, the proprietor shall determine that the spirits are the same as described on the transfer record and follow the procedures prescribed by 27 CFR 19.510. A copy of the transfer record, annotated to show any difference between the description of spirits and quantity received, will be maintained by the proprietor as a record of receipt. If spirits are to be transferred to a distilled spirits plant or to bonded wine premises, the proprietor shall use the transfer record and procedures prescribed by 27 CFR 19.508.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1382, as amended (26 U.S.C. 5373))

§ 24.227 Transfer of spirits by pipeline for immediate use.

Spirits transferred by pipeline for immediate use are gauged either by weight or by volume on the bonded premises of the distilled spirits plant. Where the spirits are gauged on the bonded premises of the distilled spirits plant, the pipeline will be directly connected with the spirits addition tanks. The valves in the pipeline will be closed and locked with a lock at all times except when necessary to be opened for the transfer of spirits. Where the proprietor has placed wine in a

VOL 51 ISS 45 MR 7 1986 UMI

spirits addition tank and has determined the quantity of spirits to be added, the spirits may be transferred.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1382, as amended (26 U.S.C. 5373))

§ 24.228 Transfer of spirits by pipeline to a spirits storage tank.

Where it is desired to transfer spirits by pipeline to bonded wine premises and store the spirits prior to use, there will be provided a suitable tank for storing the spirits. The spirits to be transferred, if not gauged on the bonded premises of the distilled spirits plant, will be gauged by weight or volume on bonded wine premises.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1382, as amended (26 U.S.C. 5373))

§ 24.229 Tank car and tank truck requirements.

Railroad tank cars and tank trucks used to transport spirits for use in wine production will be constructed, marked, filled, labeled, and inspected in the manner required by regulations in 27 CFR Part 19.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1360, as amended, 1362, as amended (26 U.S.C. 5206, 5214))

§ 24.230 Examination of tank car or tank truck.

Upon arrival of a tank car or tank truck at the bonded wine premises, the proprietor shall carefully examine the car or truck to see whether the seals are intact and whether there is any evidence of tampering or loss by leakage or otherwise. Any evidence of loss will be reported to the area supervisor. The contents of the tank car or tank truck will be gauged by weight or volume at the time of receipt by the proprietor. If the tank car or tank truck has been accurately calibrated and the calibration chart is available at the bonded wine premises, the spirits may be gauged by volume in the tank car or tank truck. In any case where a volume gauge is made, the actual measurements of the spirits in the gauging tank, tank car, or tank truck, and the temperature of the spirits will be recorded on a copy of the transfer record accompanying the shipment.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1360, as amended, 1362, as amended, 1381, as amended (26 U.S.C. 5206, 5214, 5366))

§ 24.231 Receipt of spirits in sealed bulk containers.

The proprietor shall examine sealed bulk containers (packages) of spirits received at the bonded wine premises to verify that the containers are the same as those described on the transfer record accompanying the shipment. Any container which appears to have been tampered with or from which spirits appear to have been removed or lost will be gauged by the proprietor and the proprietor shall prepare and submit to the regional director (compliance) a statement setting forth fully the circumstances and apparent cause of any loss.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1382, as amended (26 U.S.C. 5366, 5367, 5368, 5373))

§ 24.232 Gauge of spirits.

(a) If the spirits to be used are in a spirits storage tank on bonded wine premises, or received immediately prior to use from a distilled spirits plant not adjacent or contiguous to bonded wine premises, the proprietor shall determine the proof of the spirits and the quantity used by volume gauge or by weight. Upon completion of the transfer of spirits from the spirits storage tank to the spirits addition tank, the proprietor shall lock the spirits storage tank.

(b) If the spirits are received from the adjacent or contiguous bonded premises of a distilled spirits plant and are transferred directly into a spirits addition tank, the gauge of the spirits made on the distilled spirits plant premises will be used. The proprietor at the distilled spirits plant premises shall deliver a transfer record to the proprietor of bonded wine premises who shall acknowledge receipt of the spirits on the transfer record.

(c) If the spirits are received in packages and the quantity of spirits needed for the addition is not equal to the contents of full packages, a portion of one package may be used and the remnant package returned to the spirits storage room. The proprietor shall gauge the remnant package and attach to it a label showing the date of gauge, the weight of the remnant package, and the proof. The remnant package will be used at the first opportunity.

(Sec. 201; Pub. L. 85–859, 72 Stat. 1381, as amended, 1382, as amended (26 U.S.C. 5367, 5368, 5373))

§ 24.233 Addition of spirits to wine.

(a) *Prior to the addition of spirits.* Wine will be placed in tanks approved for the addition of spirits. The proprietor shall accurately measure the wine, determine its alcohol content, determine the proof of the spirits to be added, calculate the quantity of spirits required, and enter the details in the record of spirits added to wine.

(b) *After the addition of spirits.* The proprietor shall thoroughly agitate the contents of the tank to assure a complete mixture of the wine and spirits. The proprietor shall then measure the volume of wine in the tank, take a representative sample of the wine, and test for alcohol content. The result of the measurement and test and the quantity of spirits added will be entered in the record of spirits added to wine. The volume of wine used and the volume of wine resulting from the addition of spirits will be entered in the bulk wine record. The alcohol content of wine after the addition of spirits may not exceed 24 percent by volume.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1382, as amended, 1383, as amended (26 U.S.C. 5367, 5373, 5382))

§ 24.234 Other use of spirits.

The proprietor producing sparkling wine, artificially carbonated wine, formula wine, or essences for which spirits are required may use tax-free wine spirits. For nonbeverage wine, tax-free spirits other than wine spirits or brandy may also be used. The spirits received by the proprietor will be locked in a secure room or locker on bonded wine premises. The spirits will remain in the original container in the storeroom until withdrawn for use.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1382, as amended, 1383, as amended (26 U.S.C. 5373, 5382))

§ 24.235 Taxpayment or destruction of spirits.

(a) *Taxpayment of spirits.* The proprietor who wants to taxpay spirits shall follow the prepayment of tax procedures of 27 CFR 19.522(c).

(b) *Destruction of spirits.* The proprietor who wants to destroy spirits shall file an application with the area supervisor stating the quantity of spirits, the proposed date and method of destruction, and the reason for destruction. Spirits may not be destroyed prior to approval by the area supervisor.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1382, as amended (26 U.S.C. 5373))

§ 24.236 Losses of spirits.

Losses by theft or any other cause of spirits while on bonded wine premises or in transit are to be determined and reported at the time the losses are discovered. A physical inventory of the spirits storage tanks will be taken at the close of any month during which spirits were used in wine production, or upon completion of spirits use for the month or at any other time required by the regional director (compliance). Any loss which has not previously been reported will be determined by the inventory.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1323, as amended (26 U.S.C. 5008, 5373))

§ 24.237 Spirits added to juice or concentrated fruit juice.

Juice or concentrated fruit juice to which spirits have been added may not have an alcohol content exceeding 24 percent by volume. Although not considered to be wine, juice or concentrated fruit juice to which spirits have been added, will be included in the appropriate tax class of any wine inventory and will be properly identified. Juice or concentrated juice to which wine spirits are added will be reported on the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations, as wine, but a separate record will be maintained.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

Subpart L—Storage, Treatment and Finishing of Wine

§ 24.240 General.

Wine is to be stored on bonded wine premises in buildings or tanks constructed and secured in accordance with the provisions of §§ 24.166 and 24.167. Wine may be stored in tanks, casks, barrels, cased or uncased bottles, or in any suitable container, which will not contaminate the wine. Specifically authorized materials and processes for the treatment and finishing of wine are listed in §§ 24.246 and 24.248 of this subpart.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1378, as amended, 1379, as amended, 1383, as amended, 1385, as amended (26 U.S.C. 5352, 5357, 5382, 5552))

§ 24.241 Decolorizing wine.

(a) *Conditions and limitations.* If the proprietor wishes to use activated carbon or other decolorizing material to remove excess color from white wine (other than vermouth), or from pale dry sherry or cocktail sherry, the proprietor shall meet the following conditions and limitations:

(1) *White wine.* (i) The vinous character of the wine treated will not be reduced; (ii) the quantity of activated carbon or other decolorizing material used to treat white wine, including any decolorizing material used in the basic wine-producing material may not exceed nine pounds per 1,000 gallons; (iii) the total amount of decolorizing material used in the white wine before and after a transfer of wine in bond may not exceed the prescribed limitations of nine pounds per 1,000 gallons (see paragraph (b) of this section); and (iv) white wine treated with decolorizing material will have a color of not less than 0.6 Lovibond in a one-half inch cell or not more than 95 percent transmittance per AOAC Method 11.003–11.004 (see paragraph (c) of this section). However, the proprietor may produce a white wine having a color of less than 0.6 Lovibond or more than 95 percent transmittance per AOAC Method 11.003–11.004 by using normal methods and without the use of decolorizing material.

(2) *Pale dry sherry or cocktail sherry.* (i) The amber color and flavor characteristics generally attributed to sherry will be retained; (ii) the quantity of activated carbon or other decolorizing material used, including any decolorizing material used in the basic wine-producing material, may not exceed 25 pounds per 1,000 gallons of wine; (iii) the total amount of decolorizing material used in pale dry sherry or cocktail sherry before and after a transfer of wine in bond may not exceed the prescribed limitation of 25 pounds per 1,000 gallons (see paragraph (b) of this section); and (iv) the pale dry sherry or cocktail sherry treated with decolorizing material will have a color of not less than 0.6 Lovibond in a one-half inch cell or not more than 95 percent transmittance per AOAC Method 11.003–11.004 (see paragraph (c) of this section). However, the proprietor may produce a pale dry sherry or cocktail sherry having a color of less than 0.6 Lovibond or more than 95 percent transmittance per AOAC method 11.003–11.004 by using normal methods and without the use of decolorizing material.

(b) *Transfer in bond.* When a consignor proprietor transfers white wine, or pale dry sherry, or cocktail sherry treated with activated carbon or other decolorizing material to a consignee proprietor, the consignor proprietor shall record on the shipping record:

(1) The amount of the white wine, pale dry sherry, or cocktail sherry which has been treated under the provisions of this section; and

(2) The amount of decolorizing material used in treating the white wine or pale dry sherry or cocktail sherry before its transfer. The consignee proprietor may further treat the white wine or pale dry sherry or cocktail sherry with decolorizing material as long as the consignee proprietor has a copy of the shipping record and complies with the requirements of this section.

(c) *Incorporation by reference.* The "Official Methods of Analysis of the Association of Official Analytical Chemists" (AOAC Method 11.003–11.004; 13th Edition 1980) is incorporated by reference in this part. This incorporation by reference was approved by the Director of the Federal Register on May 7, 1981, and is available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, DC. The publication is available from the Association of Official Analytical Chemists, 11 North 19th Street, Suite 210, Arlington, Virginia 22209.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

§ 24.242 Authority to use greater quantities of activated carbon in juice and in white wine.

(a) *Proprietor's notice.* If the proprietor desires to remove color from juice prior to fermentation or if color in excess of that normally present in white wine develops during the production or storage of a particular lot or lots, and if the proprietor desires to use activated carbon in excess of nine pounds per 1,000 gallons (1.08 grams per liter) of juice or white wine to remove this color, the proprietor, prior to starting the treatment, shall submit to the regional director (compliance) a written notice for each lot of juice or white wine to be treated with activated carbon for decolorization. The written notice will state (1) the reason for the treatment; (2) the volume, kind, and type of juice or white wine to be treated; (3) the kind and quantity of activated carbon to be used for decolorization; and, (4) the length of time the activated carbon is in contact with the juice or white wine.

(b) *Action by the regional director (compliance) on proprietor's notice.* Upon receipt of the proprietor's notice, the regional director (compliance) may require the proprietor to submit samples representative of the lot of juice or white wine for examination by the ATF laboratory.

(c) *Samples and chemical analysis.* (1) *Samples.* If the regional director (compliance) requires samples under paragraph (b) of this section, the proprietor shall prepare samples representative of the lot of juice or white wine for examination. The samples will consist of (i) the juice or white wine before treatment with activated carbon, (ii) the juice or white wine after treatment with activated carbon, and (iii) the activated carbon used for decolorization.

(2) *Chemical analysis.* If the ATF chemical analyses of the samples shows that the proposed treatment would remove only the color of the juice, or in the case of white wine only the excess color and will not remove any of the usual natural color or other vinous characteristics of the white wine, the regional director (compliance) will return a copy of the proprietor's written

VOL 51 ISS 45 MR 7 1986 UMI

notice. If the ATF chemical analysis shows that the proposed treatment is not acceptable, the regional director (compliance) will send the proprietor a letter stating the reason(s) for disallowing the proposed treatment.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

§ 24.243 Filtering aids.

Inert fibers, pulps, earths, or similar materials, may be used as filtering aids in the cellar treatment and finishing of wine. Agar-agar, carrageenan, cellulose, and diatomaceous earth are commonly employed inert filtering aids. In general, there is no limitation on the use of inert materials and no records need be maintained concerning their use. However, if the inert material is dissolved in water prior to addition to wine, then the records required by § 24.301 will be maintained. Filtering aids which contain active chemical ingredients or which may alter the character of wine, may be used only in accordance with the provisions of § 24.246.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

§ 24.244 Use of acid to stabilize standard wine.

Standard wine other than citrus wine, regardless of acid level, may be stabilized as a part of the finishing process by the addition of citric acid within the limitations of § 24.246. Standard wine made from grapes, apples, or citrus fruit may be stabilized by the addition of fumaric acid within the limitations of § 24.246.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5382))

§ 24.245 Use of carbon dioxide in still wine.

The addition of carbon dioxide to (and retention in) still wine is permitted if at the time of removal for consumption or sale the still wine does not contain more than 0.392 grams of carbon dioxide per 100 milliliters of wine. However, a tolerance of not more than 0.009 grams per 100 milliliters to the maximum limitation of carbon dioxide in still wine will be allowed where the amount of carbon dioxide in excess of 0.392 grams per 100 milliliters is due to mechanical variations which can not be completely controlled under good commercial practice. A tolerance will not be allowed where it is found that the proprietor continuously or intentionally exceeds 0.392 grams of carbon dioxide per 100 milliliters of wine or where the variation results from the use of methods or equipment determined by the Director not in accordance with good commercial practice. The proprietor shall determine the amount of carbon dioxide added to wine using authorized test procedures announced by the Director. Penalties are provided in 26 U.S.C. 5662 for any person who, whether by manner of packaging or advertising or by any other form of representation, misrepresents any still wine to be effervescent wine or a substitute for effervescent wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1331, as amended 1381, as amended, 1407, as amended (26 U.S.C. 5041, 5367, 5662))

§ 24.246 Materials authorized for treatment of wine and juice.

Materials used in the process of filtering, clarifying, or purifying wine may remove cloudiness, precipitation, and undesirable odors and flavors, but the addition of any substance foreign to wine which changes the character of the wine, or the abstraction of ingredients which will change its character, to the extent inconsistent with good commercial practice, is not permitted on bonded wine premises. The materials listed in this section are approved as being consistent with good commercial practice in the production, cellar treatment, or finishing of wine, and, where applicable, in the treatment of juice, within the limitations specified in this section. However, when the specified use or limitation of any material on his list is determined to be unacceptable by the U.S. Food and Drug Administration, the Director may cancel or amend the approval for use of the material in the production, cellar treatment, or finishing of wine. And further, if water is added to facilitate the solution or dispersal of a material, the volume of water added, whether the material is used singly or in combination with other water based treating materials, may not total more than one percent of the volume of the treated wine or juice, or both, used to produce the wine.

Materials	Use	Reference or limitation
Acacia (gum arabic)	To clarify and to stabilize wine	The amount used will not exceed 2 lbs/1,000 gals. (0.24 g/l of wine. 21 CFR 184.1330 (GRAS [1]). See footnotes at end of table.
Activated	To assist precipitation during fermentation.	§ 24.176. GRAS per FDA advisory opinion dated 1/26/79.
	To clarify and to purify wine	The amount used to clarify and to purify wine will be included in the total amount of activated carbon used to remove excessive color in wine. §§ 24.241 and 24.242 (GRAS).
	To remove excessive color in white wine.	The amount used will not exceed 9 lbs/1,000 gals. (1.08 g/l) of wine. If the amount used exceeds this limit, a notice is required pursuant to § 24.242 (GRAS).
	To remove excessive color in pale dry sherry or cocktail sherry.	The amount used will not exceed 25 lbs/1,000 gals. (3.0 g/l) of wine. § 24.241 (GRAS).
	To reduce color in the juice from red and black grapes.	The amount used to reduce color may not exceed 4 lbs/1,000 gals. (0.48 g/l) of juice. Wine made from juice so treated will have a color of not more than 95 percent transmittance per AOAC [2] Method 11.003–11.004 (13th Ed.) or equivalent.
Albumen (egg white)	Fining agent for wine	May be prepared in a light brine: 1 oz. (28.35 grams) potassium chloride, 2 lbs (907.2 grams) egg white, 1 gal. (3.785 l) of water usage not to exceed 1.5 gals. of solution per 1,000 gals. of wine. (GRAS).
Alumino-silicates (hydrated) e.g., Bentonite (Wyoming clay) and Kaolin.	To clarify wine	21 CFR 182.2727, 182.2729, 184.1155 (GRAS) and 186.1256. The sodium content of the wine shall not be increased by such treatment. Request for GRAS advisory opinion pending.
Ammonium carbonate	Yeast nutrient to facilitate fermentation in wine.	The amount used may not exceed 2 lbs/1,000 gals. (0.24 g/l). 21 CFR 184.1137 (GRAS).
Ammonium phosphate (mono- and dibasic).	Yeast nutrient in wine production and to start secondary fermentation in the production of sparkling wine.	As a yeast nutrient in wine production, the amount may not exceed 1.7 lbs/1,000 gals. (0.20 g/l). In the production of sparkling wine, the amount used may not exceed 8 lbs/1,000 gals. (1.00 g/l) of wine. 21 CFR 184.1141 (GRAS).
Ascorbic acid, iso-ascorbic acid (erythorbic acid).	To prevent oxidation of color and flavor components of juice and wine.	May be added to fruit, grapes, berries, and other materials used in wine production, to the juice of such materials, or to the wine, within the limitations which do not alter the class or type of the wine. 21 CFR 182.3013 and 182.3041 (GRAS).
Autolyzed yeast	Yeast nutrient to facilitate fermentation in the production of grape or fruit wine.	21 CFR 172.896, 184.1983. GRAS per FDA advisory opinion of 10/6/59.
Calcium carbonate (with or without calcium salts of tartaric and malic acids).	To reduce the excess-natural acids in high acid wine.	The natural or fixed acids may not be reduced below 5 g/l. 21 CFR 184.1086, 184.1069, and 184.1191 (GRAS).
	A fining agent for cold stabilization	The amount used may not exceed 30 lbs/1,000 gals. (3.59 g/l) of wine.
Calcium sulfate (gypsum)	To lower pH in sherry wine	The calcium sulfate content of the finished wine may not exceed 16.69 lbs/1,000 gals. (2.0 g/l). 21 CFR 184.1230 (GRAS)

Materials	Use	Reference or limitation
Carbon dioxide	To stabilize [3] and to preserve wine	§24.245. 21 CFR 184.124 (GRAS).
	To maintain counterpressure during the transfer of sparkling wine.	The carbon dioxide content of the finished wine may not be increased during the transfer operation. §24.190.
Casein, potassium salt of casein.	To clarify wine	GRAS per FDA opinions of 2/23/60 and 8/25/61. §24.243.
Citric acid	To correct natural acid deficiencies in wine.	§§24.182 and 24.192; 21 CFR 182.1033 (GRAS).
	To stabilize wine other than citrus wine.	The amount of citric acide may not exceed 5.8 lbs/1,000 gals. (0.7 g/l). §24.244; 21 CFR 182.1033 (GRAS).
Copper sulfate	To remove hydrogen sulfide and/or mercaptans from wine.	The quantity of copper sulfate added (calculated as copper) may not exceed 0.5 part copper per million parts of wine with the residual level of copper not to be in excess of 0.2 part per million. GRAS per FDA advisory opinion of 7/23/68.
Defoaming agents: (polyoxyethylene 40 monostearate, silicon dioxide, dimethylpolysiloxane, and sorbitan monostearate).	To control foaming	Defoaming agents which are 100% active may be used in amounts not exceeding 0.15 lbs/1,000 gals. (0.018 g/l) of wine. defoaming agents which are 30% active may be used in amounts not exceeding 0.5 lbs/1,000 gals. (0.06 g/l) of wine Silicon dioxide will be completely removed by filtration. The amount of silicon remaining in the wine may not exceed 10 parts per million and no soluble residue in excess of 25 parts per million will remain in the wine. 21 CFR 173.340.
Enzymatic activity		The enzyme preparation use will be prepared from nontoxic and nonpathogenic microorganisms in accordance with good manufacturing practice and be approved for use in food by either FDA regulation or by FDA advisory opinion.
Carbohydrase (*alpha-Amylase*).	To convert starches to fermentable carbohydrates.	The amylase enzyme activity will be derived from *Aspergillus niger, Aspergillus oryzae, Bacillus subtilis*, or barley malt per FDA advisory opinion of 8/18/83 or from *Rhizopus oryzae* per 21 CFR 173.130 or from *Bacillus licheniformis* per 21 CFR 184.1027.
Carbohydrase (*beta-Amylase*).	To convert starches to fermentable carbohydrates.	The amylase enzyme activity will be derived from barley malt per FDA advisory opinion dated 8/18/83.
Carbohydrase (Glucoamylase, Amylogluco-sidase).	To convert starches to fermentable carbohydrates.	The amylase enzyme activity will be derived from *Aspergillus niger* or *Aspergillus oryzae* per FDA advisory opinion dated 8/18/83 or from *Rhizopus oryzae* per 21 CFR 173.130 or from *Rhizopus niveus* per 21 CFR 173.110.
Catalase	To clarify and to stabilize wine	The enzyme activity will be derived from *Aspergillus niger* or bovine liver per FDA advisory opinion dated 8/18/83 (GRAS).
Cellulase	To clarify and to stabilize wine and to facilitate separation of the juice from the fruit.	The enzyme activity will be derived from *Aspergillus niger* per FDA advisory opinion dated 8/18/83 (GRAS).
Glucose oxidase	To clarify and to stabilize wine	The enzyme activity will be derived from *Aspergillus niger* per FDA advisory opinion of 8/18/83 (GRAS).
Pectinase	To clarify and to stabilize wine and to facilitate separation of juice from the fruit.	The enzyme activity will be derived from *Aspergillus niger* per FDA advisory opinion dated 8/18/83 (GRAS).
Protease (general)	To reduce or to remove heat labile proteins.	The enzyme activity used will be derived from *Aspergillus niger* or *Bacillus subtilis* per FDA advisory opinion dated 8/18/83 or from *Bacillus licheniformis* per 21 CFR 184.1027 (GRAS).
Protease (Bromelin)	To reduce or to remove heat labile proteins.	The enzyme activity used will be derived from *Ananus comosus* or *Ananus bracteatus* (*L*) per FDA advisory opinion dated 8/18/83 (GRAS).
Protease (Ficin)	To reduce or to remove heat labile proteins.	The enzyme activity used will be derived from *Ficus spp.* per FDA advisory opinion dated 8/18/83 (GRAS).
Protease (Papain)	To reduce or to remove heat labile proteins.	The enzyme activity used will be derived from *Carica papay* (*L*) per 21 CFR 184.1585 (GRAS).
Protease (Pepsin)	To reduce or to remove heat labile proteins.	The enzyme activity used will be derived from porcine or bovine stomachs per FDA advisory opinion dated 8/18/83 (GRAS).
Protease (Trypsin)	To reduce or to remove heat labile proteins.	The enzyme activity used will be derived from porcine or bovine pancreas per FDA advisory opinion dated 8/18/83 (GRAS).
Ethyl maltol	To smooth wine	Use limited to not more than 100 mg/l. 21 CFR 172.515.
Ferrocyanide compounds (sequestered complexes).	To remove trace metal from wine to remove objectionable levels of sulfide and mercaptans from wine.	No insoluble or soluble residue in excess of 1 part per million will remain in the finished wine and the basic character of the wine may not be changed by the treatment. GRAS per FDA advisory opinion of 6/22/82.
Ferrous sulfate	To clarify and to stabilize wine	The amount used may not exceed 3 ozs./1,000 gals. (0.022 g/l) of wine. 21 CFR 182.8315 (GRAS).
Fumaric acid	To correct natural acid deficiencies in grape wine.	§§ 24.182 and 24.192 21 CFR 172.350. The fumaric acid content of the finished wine may not exceed 3.0 g/l.
	To stabilize wine	Use may not exceed 25 lbs/1,000 gals. (3.0 g/l). § 24.244. and 21 CFR 172.350. The fumaric acid content of the finished wine may not exceed 3.0 g/l.
Gelatin (food grade)	To clarify juice or wine	(GRAS).
Granular cork	To treat wine	The amount used may not exceed 10 lbs/1,000 gals. of wine (1.2 g/l). Request for GRAS advisory opinion pending.
Hydrogen peroxide	To facilitate secondary fermentation in the production of sparkling wine.	Amount used may not exceed 3 parts per million. The finished wine will contain no residual hydrogen peroxide. (GRAS).
	To remove color from the juice of red and black grapes.	The amount used may not exced 500 parts per million. The use of hydrogen peroxide is limited to oxidizing color pigment in the juice of red and black grapes. 21 CFR 182.1366 (GRAS).
Isinglass	To clarify wine	Request for GRAS advisory opinion pending.
Lactic acid	To correct natural acid deficiencies in grape wine.	§§ 24.182 and 24.192; 21 CFR 182.1061 (GRAS).
Malic acid	To correct natural acid deficiencies in juice or wine.	§§ 24.182 and 24.192. 21 CFR 184.1069 (GRAS).
Malo-lactic bacteria	To stabilize grape wine	Malo-lactic bacteria of the type *Leuconostoc oenos* may be used in treating wine. Request for GRAS advisory opinion pending.
Maltol	To smooth wine	Use limited to not more than 250 mg/l. 21 CFR 172.515.
Nitrogen gas	To maintain pressure during filtering and bottling of wine and to prevent oxidation of wine.	21 CFR 184.1540 (GRAS).
Oak chips or particles, uncharred and untreated.	To smooth wine	21 CFR 172.510.
Oxygen and compressed air.	In baking or maturing wine and aeration of sherry.	May be used provided it does not cause changes in the wine other than those occuring during the usual storage in wooden cooperage over a period of time.
Parabens (n-alkyl esters of p-hydroxl-bezoic acid: heptyl-, propyl-, and methyl-.	To preserve wine	Use, separately or in combination may not exceed 0.1 percent by weight (w/w). Use of n-heptyl-paraben may not exceed 12 parts per million. 21 CFR 172.145, 184.1490, 184.1670 (GRAS).
Polyvinyl- polypyr-rolidone (PVPP).	To clarify and to stabilize wine	The amount used may not exceed 6 lbs/1,000 gals. (0.72 g/l) of wine. Material will be removed during filtration. 21 CFR 173.50.
Polyvinyl-pyrrolidone (PVP).	To clarify wine	The residual level of PVP in the finished wine may not exceed 60 parts per million. 21 CFR 173.55.
Potassium benzoate	To preserve wine	Use separately or in combination with other approved antimicrobial agents may not exceed 0.1 percent of the volume of juice and/or wine so treated. GRAS advisory opinion pending.
Potassium bitartrate	To stabilize grape wine	The amount used may not exceed 35 lbs/1,000 gals. (4.19 g/l) of grape wine. 21 CFR 184.1077 (GRAS).
Potassium carbonate and/or potassium bicarbonate.	To reduce excess natural acidity in wine.	The natural or fixed acids may not be reduced below 5 grams per liter. 21 CFR 184.1613 and 184.1619 (GRAS).

Materials	Use	Reference or limitation
Potassium citrate	pH control agent and sequestrant in treatment of citrus wine.	The amount of potassium citrate may not exceed 25 lbs/1,000 gals. (3.0 g/l) of finished wine. § 24.182; 21 CFR 182.1625 and 182.6625 (GRAS).
Potassium meta-bisulfite	To sterilize and to preserve wine	The sulfur dioxide content of the finished wine may not exceed the limitations prescribed in 27 CFR 4.22 21 CFR 182.3637 (GRAS).
Propylene glycol	Solvent for parabens	The amounts used may not exceed 40 parts per million in wine. 21 CFR 184.1666 (GRAS).
Silica gel (colloidal silicon dioxide).	To clarify wine	Use may not exceed the equivalent of 20 lbs. colloidal silicon dioxide at a 30% concentration per 1,000 gals. of wine. (2.4 g/l). Silicon dioxide will be completely removed by filtration. (GRAS)
Sorbic acid and potassium salt of sorbic acid.	To sterilize and to preserve wine; to inhibit mold growth and secondary fermentation.	The finished wine will contain not more than 30 milligrams of sorbic acid per liter of wine. 21 CFR 183.3089 and 182.3640 (GRAS).
Soy flour (defatted)	Yeast nutrient to facilitate fermentation of wine.	The amount used may not exceed 2 lbs/1,000 gals. (0.24 g/l) of wine. (GRAS)
Sulfur dioxide	To sterilize and to preserve wine	The sulfur dioxide content of the finished wine may not exceed the limitations prescribed in 27 CFR 4.22(b)(1). 21 CFR 182.3862 (GRAS).
Tannin	To adjust tannin content in apple juice or wine.	The residual amount of tannin may not exceed 3.0 g/l, calculated as gallic acid equivalents (GAE). GRAS per FDA advisory opinions dated 4/6/59 and 3/29/60.
	To clarify or to correct tannin deficiencies in grape juice or wine.	The residual amount of tannin, calculated in gallic acid equivalents, may not exceed 0.8 g/l in white wine and 3.0 g/l in red and rose wine. Only tannin which does not impart color may be used in the cellar treatment of juice or wine. GRAS per FDA advisory opinion dated 4/6/59 and 3/29/60.
Tartaric acid	To correct natural acid deficiencies in grape juice or grape wine.	Use as prescribed in §§ 24.182 and 24.192; 21 CFR 184.1099 (GRAS).
Thiamine hydrochloride	Yeast nutrient to facilitate fermentation of wine.	The amount used may not exceed 0.005 lb/1,000 gals. (0.6 mg/l) of wine or juice. 21 CFR 184.1875 (GRAS)
Urea	Yeast nutrient to facilitate fermentation of wine.	The amount used may not exceed 2 lbs/1,000 gals. (0.24 g/l) of wine. 21 CFR 184.1923 (GRAS).

[1] GRAS—An acronym for "generally recognized as safe." The term means that the treating material has an FDA listing in Title 21, Code of Federal Regulations, Part 182 or Part 184, or is considered to be generally recognized as safe by the U.S. Food and Drug Administration.

[2] AOAC—Association of Official Analytical Chemists.

[3] To stabilize—To prevent or to retard unwanted alteration of chemical and/or physical properties.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5381, 5382, 5385, 5386, and 5387))

§ 24.247 Materials authorized for treatment of distilling material.

The materials listed in this section as well as the materials listed in § 24.246 are approved as being consistent with good commercial practice for use by the proprietor of a bonded winery or bonded wine cellar in the treatment of distilling material within the limitations specified in this section. However, when the specified use of limitation of any material on this list is determined to be unacceptable by the U.S. Food and Drug Administration, the Director may cancel or amend the approval for use of the material in the treatment of distilling material.

Materials	Use	Reference or limitation
Amonium phosphate (mono- and dibasic).	Yeast nutrient in distilling material	The amount used may not exceed 10 lbs/1,000 gals. (1.2 g/l). 21 CFR 184.1141 (GRAS).[1] See footnote at end of table
Amylase enzyme activity		The enzyme preparation used will be prepared from nontoxic and nonpathogenic microorganisms in accordance with good manufacturing practice and be approved for use in food by either FDA regulation or by FDA advisory opinion
Carbohydrase (*alpha-Amylase*).	To convert starches to fermentable carbohydrates.	The amylase enzyme activity will be derived from *Aspergillus niger, Aspergillus oryzae, Bacillus subtilis,* or barley malt per FDA advisory opinion of 8/18/83 or from *Rhizopus oryzae* per 21 CFR 173.130 or from *Bacillus licheniformis* per 21 CFR 184.1027.
Carbohydrase (*beta-Amylase*).	To convert starches to fermentable carbohydrates.	The amylase enzyme activity will be derived from barley malt per FDA advisory opinion dated 8/18/83.
Carbohydrase (Glucoamylase, Amyloglucosidase).	To convert starches to fermentable carbohydrates.	The amylase enzyme activity will be derived from *Aspergillus niger* or *Aspergillus oryzae* per FDA advisory opinion dated 8/18/83 or from *Rhizopus oryzae per 21 CFR 173.130 or from Rhizopus niveus* per 21 CFR 173.110.
Copper sulfate	To eliminate hydrogen sulfide and mercaptans.	The finished brandy or wine spirits produced from distilling material to which copper sulfate has been added may not contain more than 2 parts per million (2 mg/l) residual copper. GRAS per FDA advisory opinion of 7/23/69.
Hydrogen peroxide	To reduce the bisulfite aldehyde complex in distilling material.	The amount used may not exceed 200 parts per million. 21 CFR 182.1366 (GRAS).
Potassium permanganate	Oxidizing agent	The finished brandy or wine spirits produced from distilling material to which potassium permanganate has been added will be free of chemical resid resulting from such treatment. (GRAS)
Sodium benzoate	To prevent fermentation of the sugar in special natural wine being accumulated as distilling material.	The amount used may n exceed 0.1% (w/w). 21 CFR 184.1733 (GRAS).
Sodium hydroxide	Acid neutralizing agent	The finished brandy or wine spirits produced from distilling material to which sodium hydroxide has been added will be free of chemical residue resulting from the treatment. 21 CFR 184.1763 (GRAS).
Sulfuric acid	To effect favorable yeast development in distilling material; to prevent fermentation of the sugar in special natural wine being accumulated as distilling material; to lower pH to 2.5 to prevent putrefaction and/or ethyl acetate development.	§ 24.216; 21 CFR 184.1095 (GRAS).

[1] GRAS—An acronym for "generally recognized as safe." The term means that the treating material has an FDA listing in Title 21, Code of Federal Regulations, Part 182 or Part 184, or is considered to be generally recognized as safe by the U.S. Food and Drug Administration.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5381, 5382, 5385, 5386, and 5387))

§ 24.248 Processes authorized for treatment of wine, juice, and distilling material.

The processes listed in this section are approved, as being consistent with good commercial practice, for use by the proprietor of a bonded winery or bonded wine cellar in the production, cellar treatment, or finishing of standard wine, juice, and distilling material, within the limitations specified in this section. However, when the specified use or limitation of any process on this list is determined to be unacceptable for use in foods and beverages by the U.S. Food and Drug Administration, the Director may cancel or amend the approval for use of the process in the production, cellar treatment, or finishing of standard wine, juice, and distilling material.

Processes	Use	Reference or limitation
Ion exchange	Various applications in the treatment of wine.	Anion, cation, and non/ionic resins, except those anionic resins in the mineral acid state, may be used in batch or continuous column processes as total or partial treatment of wine, provided that with regard to the finished wine: 1. The treatment will not alter the vinous character of the wine. 2. The treatment will not reduce the color of the wine to less than that normally contained in the wine. 3. Treatment will not increase inorganic anions in the wine by more than 10 mg/l. 4. The treatment will not reduce the metallic cation concentration in the wine to less than 300 mg/l. 5. The treatment will not reduce natural or fixed acid in grape wine below 4 g/l for red table wine, 3 g/l for white table wine, 2.5 g/l for all other grape wine, 4 g/l for wine other than grape wine. 6. Treatment will not reduce the pH of the wine to less than pH 3 nor increase the pH to more than pH 4.5. 7. The resins used will not impart to the wine any material or characteristic (incidental to the resin treatment) which may be prohibited under any other section of the regulations in this part. The winemaker may employ conditioning and/or regenerating agents consisting of water, fruit acids common to the wine being treated, and inorganic acids, salts and/or bases provided the conditioned or regenerated resin is rinsed with water until the resin and container are essentially free from unreacted (excess) conditioning or regenerating agents prior to the introduction of the wine. 21 CFR 173.25.
Thermal gradient processing.	To separate standard wine into low alcohol and high alcohol wine fractions.	The fractions derived from the processing will retain the color, taste, and other vinous characteristics of the wine prior to treatment. The treatment may not reduce the ethyl alcohol content of the low alcohol fraction to less than 3 percent by volume nor increase the alcohol content of the high alcohol fraction to more than 24 percent by volume. Blending is restricted to wine of the proprietor's own production. Reconstitution, i.e., the addition of water other than that originally present in the wine prior to processing, is prohibited.
Thin-film evaporation under reduced pressure.	To separate standard wine into a low alcohol wine fraction and into a higher alcohol distillate.	The wine treated will retain the color, flavor and other vinous characteristics of the wine prior to treatment. The treatment may not reduce the ethyl alcohol content of the low alcohol fraction to less than 3 percent by volume. Blending is restricted to wine of the proprietor's own production. Reconstitution, i.e., the addition of water other than that originally present in the wine prior to processing, is prohibited. Water lost in processing may be recovered by refluxing in a closed continuous system and returned to the wine from which it was extracted.
Elimination of sulfur dioxide by physical process.	To reduce the sulfur dioxide content of juice.	Use of a physical process to remove sulfur dioxide from juice may not alter the basic character of the juice so treated.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5381, 5382, 5385, 5386, and 5387))

§ 24.249 Experimentation with new treating material or process.

(a) *General.* The proprietor may, under the provisions of this section, conduct on bonded wine premises experimentation with a treating material or process as the Director finds may be conducted in a manner that will not jeopardize the revenue, conflict with wine operations, or be contrary to law.

(b) *Application.* The proprietor who desires to conduct experimentation shall file an application with the regional director (compliance) setting forth in detail the experimentation to be conducted and the facilities and equipment to be used. The proposed experimentation will not be conducted until the Director has determined that the conduct of such experimentation will not jeopardize the revenue, conflict with wine operations, or be contrary to law; and the regional director (compliance) has approved the application. Where the Director has determined previously that an experiment may be conducted on bonded wine premises, the regional director (compliance) may approve applications to conduct a similar type of experiment, unless the regional director (compliance) finds that there are particular conditions in respect of the applicant's premises or operations that would cause the conduct of this experiment to be a jeopardy to the revenue or to conflict with wine operations.

(c) *Segregation of operations.* Experimentation authorized under this section will be conducted with the degree of segregation from wine operations as may be required by the regional director (compliance) under the provisions of § 24.27.

(d) *Records.* The proprietor shall, with respect to each experiment authorized under this section, keep records of the kind and quantity of materials received and used and the volume of wine treated. The disposition of the wine will be done in accordance with the provisions of § 24.97.

(Sec. 201, Pub. L. 85–859 (72 Stat. 1383, as amended (26 U.S.C. 5361, 5362))

§ 24.250 Application for use of new treating material or process.

(a) *General.* If the proprietor desires to use a material or process which is not specifically authorized in §§ 24.246, 24.247, 24.248, or elsewhere in this part, an application shall be filed with the regional director (compliance) of the region in which the bonded wine premises is located to show that the proposed material or process is a cellar treatment consistent with good commercial practice.

(b) *Data required.* The application will include the following: (1) The name and description of the material or process; (2) the purpose, the manner, and the extent to which the material or process is to be used together with any technical bulletin or other pertinent information relative to the material or process; (3) a sample, if a proposed material; (4) documentary evidence of the U.S. Food and Drug Administration's approval of the material for its intended purpose in the amounts proposed for the particular treatment contemplated; (5) the test results of any laboratory-scale pilot study conducted by the winemaker in testing the material and an evaluation of the product and of the treatment including the results of tests of the shelf life of the treated wine; (6) a tabulation of pertinent information derived from the testing program conducted by the chemical manufacturer demonstrating the function of the material or process; (7) a list of all chemicals used in compounding the treating material and the quantity of each component; (8) the recommended maximum and minimum amounts, if any, of the material proposed to be used in the treatment and a statement as to the volume of water required, if any, to facilitate the addition of the material or operation of the process; and, (9) two 750-milliliter samples representative of the wine before and after treatment. Information of a confidential or proprietary nature to the manufacturer or supplier of the treating material or process may be forwarded by the manufacturer or supplier to the Director with a reference to the application filed by the winemaker.

(c) *Use of cellar treatment.* The proprietor may not use the proposed treating material or process until a determination has been made by the Director that the intended use of the material or process is acceptable in

VOL 51
ISS 45
MR 7
1986
UMI

good commercial practice. If the regional director (compliance) has been advised by the Director that the use of the material or process has been previously approved, the proprietor will be informed of the approval and of any limitations which will be observed. However, if the regional director (compliance) has not been advised, the application will be forwarded to the Director for a decision regarding the use of the material or process.

(d) *Processing of application.* After evaluation of the data submitted with the application, the Director will make a decision regarding the acceptability of the proposed treatment in good commercial practice. The Director will notify the regional director (compliance) of the approval or disapproval of the application. The regional director (compliance) will then inform the proprietor of the Director's decision.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383, as amended (26 U.S.C. 5381, 5382, 5385, 5386, and 5387))

Bottling, Packing, and Labeling of Wine

§ 24.255 Bottling or packing wine.

(a) *General.* Bottles or containers will be filled as nearly as possible to conform to the amount shown on the label or blown in the bottle or marked on the container; but in no event may the net contents of any bottle or container vary from the amount stated more than: 1.0 percent for 15.0 liters and above, 1.5 percent for 1.0 liter to 14.9 liters, 2.0 percent for 750 ml, 3.0 percent for 375 ml, 4.5 percent for 187 ml and 100 ml, and 9.0 percent for 50 ml. There will be substantially as many bottles or containers overfilled as there are bottles or containers underfilled for each lot of wine bottled or packed; however, the quantity of wine filled into bottles or containers, for each tax class, may not exceed 0.5 percent of the net contents stated on the bottles or containers during a consecutive three month period, calculated on the basis of the proprietor's fill test records. The proprietor is liable for the tax on the entire amount of a tax class removed, without benefit of tolerance, when the fill of bottles or containers for that tax class exceeds the tolerance for the three month period, or when filling is not conducted in compliance with good commercial practice. Short-filled bottles of wine which are sold or otherwise disposed of by the winery to its own employees for personal consumption need not be labeled, but, if labeled, need not show an accurate statement of net contents.

(b) *Fill tests.* The proprietor shall test at representative intervals wine bottled or packed during the bottling or packing operation to determine if the wine contained in the bottle or container is in agreement with that stated on the label, bottle, or container.

(c) *Alcohol tests.* The proprietor shall test the alcohol content by volume to determine the tax class of the wine and to ensure the alcohol content to be stated on the label is in agreement with the requirements of § 24.257.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5368))

§ 24.256 Bottle aging wine.

Wine bottled or packed and stored for the purpose of aging need not have labels affixed until the wine is removed for consumption or sale. However, the bins, pallets, stacks, cases or containers of unlabeled wine will be marked in some manner to show the kind (class and type) and alcohol content of the wine. If the unlabeled wine is stored at a location other than the bottling or packing winery, the registry number of the bottling or packing winery will also be shown.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1407, as amended (26 U.S.C. 5368, 5662))

§ 24.257 Labeling wine bottles or containers.

(a) The proprietor shall securely affix to each bottle or container of beverage wine prior to removal for consumption or sale a label showing:

(1) The name and address of the wine premises where bottled or packed;

(2) The brand name (the name and address required by (a)(1) of this section may be the brand name);

(3) The kind of wine. The designation as to kind will be shown as follows: (i) For wine requiring a label approval under 27 CFR Part 4, the class, type, or other designation provided in that Part. (ii) For wine labeled under an exemption from label approval, an adequate statement of composition may be the designation in lieu of the kind (class and type) stated in 27 CFR Part 4. (iii) For wine with less than 7 percent alcohol by volume, the word "wine" or the words "carbonated wine" if the wine contains more than 0.392 grams of carbon dioxide per 100 milliliters will appear as part of the brand name or in a phrase in direct conjunction with the brand name;

(4) The alcohol content as percent by volume or the alcohol content stated in accordance with 27 CFR Part 4. For wine with less than 7 percent alcohol by volume there will be allowed a tolerance of plus or minus 10 percent of the stated alcohol content; and

(5) The net content of the bottle or container unless the net content is permanently marked on the bottle or container as provided in 27 CFR Part 4.

(b) The information shown on any label applied to bottled or packed wine is subject to the recordkeeping requirements of § 24.315.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1407, as amended (26 U.S.C. 5368, 5388, 5662))

§ 24.258 Certificates of approval or exemption.

The proprietor shall obtain a certificate of label approval or a certificate of exemption from label approval as required by 27 CFR Part 4.

(August 29, 1935, ch. 814, Sec. 5, 49 Stat. 981, as amended (27 U.S.C. 205))

§ 24.259 Marks.

(a) *Required marks.* Each case or container used to remove wine for consumption or sale will be durably marked to show the following information:

(1) The serial number or filling date as provided in § 24.260;

(2) The name (or trade name) and the registry number of the bottling wine premises;

(3) The kind (class and type) and the alcohol content of the wine. The kind of wine and alcohol content will be stated in accordance with § 24.257. The formula number will be marked on containers of special natural wine or other wine produced under § 24.218;

(4) The net contents of the case or container in wine gallons or, for cases or containers filled according to metric measure, the contents in liters. If wine is removed in cases, the cases may be marked to show the number and size of bottles in each case in lieu of the net contents of the case; and

(5) Except for cases, the date of removal or shipment.

(b) *Application of marks.* Required marks may be cut, printed, or otherwise legibly and durably marked upon the case or container, or placed on a label or tag securely affixed to the case or container. Abbreviation of words may be used if the abbreviation is universally understood.

(c) *Location of marks.* Required marks will be placed on a container or on the side of a case for ready examination by ATF officers.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1387, as amended, 1407, as amended (26 U.S.C. 5368, 5388, 5662))

§ 24.260 Serial numbers or filling date.

All cases or containers used for removing wine for consumption or sale are to be marked with a serial number or filling date at the time the cases or

---

containers are prepared for removal. Serial numbers will commence with "1" and continue until the numeral "1,000,000" is reached, whereupon the series may recommence with the numeral "1." However, the proprietor may initiate a new series after the numeral "100,000" has been reached provided no numeral will be used more than once during a 12-month period. If desired, a separate series of numbers with letter prefixes may be used for containers and for cases, or for cases filled on different bottling lines, or for removals from different loading docks. The proprietor may mark the cases with the filling date in lieu of using a serial number or use both a serial number and the filling date. However, if the proprietor desires to change from the use of a serial number to use of a filling date, or *vice versa,* a notice will be sent to the regional director (compliance) before making the change. Where domestic or foreign wine is recased, the cases will be marked with the date of recasing, preceded by the letter "R", in lieu of a serial number or filling date.

(72 Stat. 1381; 26 U.S.C. 5367, 5368)

Subpart M—Losses of Wine

§ 24.265 Losses by theft.

The proprietor shall be liable for and pay the tax on wine unlawfully removed while on bonded wine premises, or while in transit thereto or therefrom in bond, unless the proprietor or other person responsible for the tax, establishes to the satisfaction of the regional director (compliance) that the theft did not occur as the result of connivance, collusion, fraud or negligence on the part of the proprietor or other person responsible for the tax or the owner, consignor, consignee, bailee, or carrier, or their agents or employees.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5370))

§ 24.266 Inventory losses.

(a) *General.* The proprietor shall take a physical inventory of all untaxpaid wine on-hand on bonded wine premises as of the close of business each tax year, or where a cycle different from the tax year has been established as provided in § 24.314, the inventory will be taken annually at the end of that cycle, or at any time required by an ATF officer. The physical inventory of bulk and bottled or packed wine will be recorded and reported as required by § 24.314.

(b) *Bulk wine losses.* The physical inventory of bulk wine will determine losses due to spillage, leakage, soakage, evaporation, and other losses normally occurring from racking and filtering since the previous physical inventory required by this section. A claim for allowance of loss, under the provisions of § 24.65, is required for inventory losses in production or storage: (1) where there are circumstances indicating that all or a part of the wine reported lost was unlawfully removed, or (2) where the loss on bonded wine premises during the annual period exceeds three percent of the aggregate volume of wine on-hand at the beginning of the annual period and the volume of wine received in bond during the annual period; or the loss exceeds six percent of the still wine produced by fermentation; or the loss exceeds six percent of the sparkling wine produced by fermentation in bottles; or the loss exceeds three percent of the special natural wine produced under § 24.195 or other wine produced under § 24.218; or the loss exceeds three percent of the artificially carbonated wine produced; or the loss exceeds three percent of the bulk process sparkling wine produced. The percentage applicable to each tax class of wine will be calculated separately, unless the calculation is impracticable because of the mixture of different tax classes by addition of wine spirits or blending during the annual period, in which case the percentage will be calculated on the aggregate volume. Wine removed immediately after production for use as distilling material and on which the usual racking, clarifying, and filtering losses are not sustained, will not be included in the calculations.

(c) *Bottle and container wine losses.* Wine filled into a bottle or container is not subject to losses due to spillage, leakage, soakage, evaporation, and other losses normally occurring from racking and filtering. In addition, wine that has been filled into a bottle or container can be accurately accounted for and any unexplained shortage is considered evidence of an unreported removal. Therefore, the proprietor shall pay the tax on any unexplained loss of untaxpaid bottled or packed wine disclosed by inventory or otherwise.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367, 5369, 5370))

§ 24.267 Losses in transit.

Where the loss of wine in transit of a shipment in bond or the total daily in bond shipments received from the same winery exceeds one percent (two percent on transcontinental shipments) of the volume shipped, the proprietor of the receiving bonded wine premises shall immediately notify the regional director (compliance) or nearest designated ATF officer and file a claim under the provisions of § 24.65.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5370))

§ 24.268 Losses by fire or other casualty.

The proprietor shall report any loss by fire or other casualty, or any other extraordinary or unusual loss, including a loss by theft, immediately to the regional director (compliance) or nearest designated ATF officer and file a claim under the provisions of § 24.65. The volume of wine loss will be reported on the ATF Form 5120.17 (702) for the month the loss occurred.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5370))

Subpart N—Removal, Return and Receipt of Wine

Taxpaid Removals

§ 24.270 Determination of tax.

The tax on wine is determined at the time of removal from bonded wine premises for consumption or sale. Section 5041 of Title 26, United States Code, imposes an excise tax, at the rates prescribed, on all wine (including imitation, substandard, or artificial wine, and compounds sold as wine, which contain 24 percent or less of alcohol by volume) produced in or imported into the United States. Wine containing more than 24 percent of alcohol by volume is classed as distilled spirits and taxed accordingly. The tax is determined and paid on the volume of wine:

(1) In bottles or containers filled according to U.S. measure; or,

(2) In bottles or containers filled according to metric measure, on the volume of wine in U.S. wine gallons; or

(3) In the case of pipeline removals, on the volume of bulk wine removed recorded to the nearest whole gallon, five-tenths gallon being converted to the next full gallon.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1331, as amended (26 U.S.C. 5041))

§ 24.271 Payment of tax by check, cash, or money order.

(a) *General.* Unless prepaid, the tax on wine is paid by a semi-monthly, quarterly, or annual Excise Tax Return, ATF F 5000.24, which is filed with remittance (check or money order) for the full amount of tax due. Prepayments of tax on wine during the period covered by the return are shown separately on the Excise Tax Return form.

(b) *Return periods.* Except for quarterly and annual returns filed under the provisions of § 24.273, return periods are from the 1st day of each month through the 15th day of that month, and from the 16th day of each month through

VOL 51
ISS 45
MR 7
1986
UMI

the last day of that month. The proprietor shall file a return, with remittance, for each return period no later than the last day of the return period next succeeding that period, excluding any Saturday, Sunday, or legal holiday in the District of Columbia, or any Statewide holiday of the State in which the return is required to be filed.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1335, as amended (26 U.S.C. 5061)

§ 24.272 Payment of tax by electronic fund transfer.

(a) *General.* (1) During a calendar year any taxpayer who is liable for a gross amount of wine excise tax equal to or exceeding $5 million combining tax liabilities incurred under this part and Parts 250 and 251 of this chapter, shall during the succeeding calendar year use a financial institution in making payment by electronic fund transfer (EFT) of wine taxes for that year. A taxpayer who is required by this section to make remittance by EFT may not effect payment of wine taxes by cash, check, or money order, as described in § 24.271.

(2) For the purposes of this section, the dollar amount of tax liability is defined as the gross tax liability on all taxable withdrawals and importations (including wines brought into the United States from Puerto Rico or the Virgin Islands) during the calendar year, without regard to any drawback, credit, or refund, for all premises from which the activities are conducted by the taxpayer.

(3) For the purposes of this section, a taxpayer includes a controlled group of corporations, as defined in 26 U.S.C. 1563 and implementing regulations in 26 CFR 1.1563–1–1.1563–4.

(4) The taxpayer who is required by this section to make remittances by EFT shall, for each bonded wine premises from which wine is withdrawn upon determination of tax, make a separate EFT remittance and file a separate tax return.

(b) *Requirements.* (1) On or before January 10 of each calendar year, except for a taxpayer already remitting the tax by EFT, each taxpayer who was liable during the previous calendar year for a gross amount of wine excise tax equal to or exceeding $5 million, combining tax liabilities incurred under this part and Parts 250 and 251 of this chapter, shall give written notice to the regional director (compliance) of each ATF region in which taxes are paid agreeing to make remittances by EFT.

(2) For each return filed in accordance with this subpart, the taxpayer shall direct the taxpayer's financial institution to make an electronic fund transfer in the amount of the tax payment to the Treasury Account as provided in paragraph (e) of this section. The request will be made to the financial institution early enough for the transfer of funds to be made to the Treasury account by no later than the close of business on the last day of the next succeeding return period, excluding any Saturday, Sunday, or legal holiday in the District of Columbia, or any Statewide holiday in the State of New York. The request will take into account any time limit established by the financial institution.

(3) If the taxpayer was liable during the preceding calendar year for less than $5 million in wine excise taxes, combining tax liabilities incurred under this part and Parts 250 and 251 of this chapter, the taxpayer may choose either to continue remitting the tax as provided in this section or to remit the tax with the return as prescribed by § 24.271. Upon filing the first return on which the taxpayer chooses to discontinue remittance of the tax by EFT and to begin remittance of the tax with the tax return, the taxpayer shall notify the regional director (compliance) by attaching a written notification to the tax form stating that no wine excise tax is due by EFT because the tax liability during the preceding calendar year was less than $5 million, and that the remittance will be filed with the tax return.

(c) *Remittance.* (1) The taxpayer shall show on the tax return information about remitting the tax for that return by EFT and shall file the return with the director of the service center, district director, or regional director (compliance) in accordance with the instructions on the tax form.

(2) Remittances will be considered as made when a taxpayer unconditionally directs the financial institution to effect immediately an electronic fund transfer in the amount of the taxpayment to the Treasury Account, in accordance with the procedures established by the financial institution.

(3) When the taxpayer directs the financial institution to effect an electronic fund transfer message as required by paragraph (b)(2) of this section, the transfer data record furnished to the taxpayer through normal banking procedures will serve as the record of payment, and will be retained as part of the required records.

(d) *Failure to request an electronic fund transfer.* The taxpayer is subject to a penalty imposed by 26 U.S.C. 5684, 6651, and 6656, as applicable, for failure to make a taxpayment by EFT on or before the close of business on the prescribed last day for filing.

(e) *Procedure.* Upon the notification required under paragraph (b)(1) of this section, the regional director (compliance) will issue to the taxpayer an ATF Procedure entitled, Payment of Tax by Electronic Fund Transfer. This publication outlines the procedure a taxpayer follows when preparing returns and EFT remittances in accordance with this subpart. The U.S. Customs Service will provide the taxpayer with instructions for preparing EFT remittances for payments to be made to the U.S. Customs Service for payment of excise tax on imported wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1335, as amended (26 U.S.C. 5061))

§ 24.273 Exception to filing semi-monthly tax returns.

(a) Any proprietor who has paid less than $500 in wine excise tax during the previous calendar year may file the Excise Tax Return, ATF F 5000.24, and remittance, if any, within 15 days after the end of the calendar year instead of semi-monthly as required by § 24.271. However, if before the close of the current calendar year the wine excise tax owed will exceed $500 (or at any other subsequent $500 tax interval), the Excise Tax Return with remittance will be filed on that date and also within 15 days after the end of the calendar year.

(b) The proprietor who paid less than $5000 the previous calendar year in wine excise tax may file the Excise Tax Return and remittance, if any, within 15 days after the end of each calendar quarter of a calendar year instead of semi-monthly. However, if during a calendar quarter the wine excise tax owned will exceed $5000 (or at any other subsequent $5000 tax interval), the Excise Tax Return with remittance will be filed on that date and also within 15 days after the end of that calendar quarter.

(c) A proprietor who files tax returns under paragraphs (a) and (b) of this section is subject to the failure to pay or file provisions of § 24.274. The regional director (compliance) may deny the exceptions to filing tax returns in this section at any time.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1335, as amended (26 U.S.C. 5061))

§ 24.274 Failure to timely pay tax or file a return.

Penalties for failure to pay tax at the time required, for willful refusal to pay the tax and for fraudulent nonpayment of tax are provided for in 26 U.S.C. 5661 and 6656. In addition to these penalties, there is a penalty for the delinquent filing of a tax return, imposed as an addition to the tax shown on the return, amounting to five percent for each month or fraction thereof of the delinquency, not exceeding 25 percent in the aggregate, unless it is shown that the delinquency is due to reasonable cause and not to willful neglect.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1407, as amended, 1410, as amended (26 U.S.C. 5661, 5684, 6651, 6656))

§ 24.275 Prepayment of tax.

(a) *General.* The proprietor shall, before removal of wine for consumption or sale, file Excise Tax Return, ATF F 5000.24, with remittance, where (1) required to prepay tax under § 24.276; or, (2) the tax deferral bond is not in the maximum penal sum and the tax determined and unpaid at any one time exceeds the penal sum of the bond by more than $100; or, (3) there is no approved tax deferral bond and the total amount of tax unpaid at any one time exceeds $500. The return with remittance is forwarded pursuant to the instructions printed on the return. For the purpose of complying with this section, the term "forwarding" means deposit in the U.S. mail properly addressed to the Internal Revenue Service.

(b) *Electronic fund transfer.* When the proprietor is required by § 24.272 to deliver payment of tax by electronic fund transfer, the proprietor shall prepay the tax before any wine can be removed for consumption or sale by (1) completing the Excise Tax Return and by mailing it, as instructed on the form, to the director of the service center, district director, or regional director (compliance) and (2) by directing the proprietor's financial institution to effect an electronic fund transfer.

(August 16, 1954, ch. 736, 68A Stat. 775, as amended, 777, as amended, 391, as amended (26 U.S.C. 6301, 6311, 6302))

§ 24.276 Prepayment of tax; proprietor in default.

When the proprietor fails to forward a payment for wine excise tax due by presentment of a check or money order, or when the proprietor is otherwise in default of payment of the tax, no wine may be removed for consumption or sale until the tax has been paid for the period of the default and until the regional director (compliance) finds the revenue will not be jeopardized by the late payment of the tax. Any remittance made during the period of the default will be in cash, or will be in the form of a certified, cashier's, or treasurer's check drawn on any financial institution incorporated under the laws of the United States, or under the laws of any State, territory, or possession of the United States, or in the form of a money order, as provided in 26 CFR 301.6311–1 (payment by check or money order) or in the form of an electronic fund transfer.

(August 16, 1954, ch. 736, 68A Stat. 775, as amended, 777, as amended, 391, as amended (26 U.S.C. 6301, 6311, 6302))

§ 24.277 Date of mailing and delivering of returns.

(a) When the proprietor sends the Excise Tax Return, ATF F 5000.24, with or without remittance, by U.S. mail, the official postmark of the U.S. Postal Service stamped on the cover of the envelope in which the return was mailed is considered the date of delivery of the tax return and, if accompanied, the date of delivery of the remittance. When the postmark on the cover is illegible, it is the proprietor's responsibility to prove when the postmark was made.

(b) When the proprietor sends the tax return by registered mail or by certified mail, the date of registry or the date of the postmark on the sender's receipt of certified mail, as the case may be, is treated as the date of delivery of the tax return and, if accompanied, the remittance.

(August 16, 1954, ch. 736, 68A Stat. 775, as amended, 777, as amended, 391, as amended (26 U.S.C. 6301, 6311, 6302))

Transfer of Wine in Bond

§ 24.280 General.

Wine may be removed for transfer in bond, from one bonded wine premises to another bonded wine premises or to a distilled spirits plant. For bulk wine transferred in bond between adjacent or contiguous bonded wine premises or to an adjacent or contiguous distilled spirits plant, an accurately calibrated tank for measuring the wine is required on at least one of the premises. The volume of wine transferred will be recorded to the nearest whole gallon, five-tenths gallon being converted to the next full gallon.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1395, as amended (26 U.S.C. 5362, 5552))

§ 24.281 Consignor premises.

Prior to transferring wine in bond, the proprietor shall prepare the transfer record prescribed by § 24.309. Except as provided in § 24.282, a transfer record will be prepared for each shipment. On completion of lading (or completion of transfer by pipeline), the proprietor shall retain one copy of the transfer record for the files and forward the original and one copy of the transfer record to the consignee (to accompany the shipment, if by truck). Upon receipt of a signed copy from the consignee, the file copy of the transfer record may be discarded. The signed copy of the transfer record will be maintained as a record of removal as required by Subpart O of this part.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended (26 U.S.C. 5362))

§ 24.282 Multiple transfers.

(a) *Truck.* The proprietor may use one transfer record for all wine shipped by truck on the same day to other premises. The proprietor shall prepare a shipment or delivery order for each shipment showing date of transfer, name and address of the proprietor and consignee, number of cases or containers, serial numbers of cases (if any) of container identification marks, and quantity shipped in gallons or liters. A copy of the shipping or delivery order will be retained by the proprietor and a copy sent with the shipment. On completion of lading the last truck for the day, the proprietor shall prepare and process a transfer record as provided in § 24.281.

(b) *Pipeline.* The proprietor may use one transfer record for all wine (including distilling material and vinegar stock) transferred by pipeline to adjacent premises during a month. The proprietor shall prepare a record for each transfer showing date of transfer, name and address of the proprietor and consignee, and quantity transferred in gallons or liters. At the end of the month, the proprietor shall prepare and process a transfer record as provided in § 24.281.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended (26 U.S.C. 5362))

§ 24.283 Reconsignment.

Where, prior to or on arrival at the premises of a consignee, wine transferred in bond is not accepted by the consignee, or by a carrier, the wine may be reconsigned by the proprietor. The bond of the proprietor to whom the wine is reconsigned will cover the wine while in transit after reconsignment. Notice of cancellation of the shipment will be made to the consignee by the proprietor who shipped the wine. Where reconsignment is to other than the shipping proprietor, a new transfer record prominently marked "Reconsignment" will be prepared and and processed as provided by § 24.281.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended (26 U.S.C. 5362))

§ 24.284 Consignee premises.

When wine is received by transfer in bond, the consignee shall check the shipment against the transfer record and determine by volumetric measure or weight the quantity received. The date received and, if different from the

VOL 51 ISS 45 MR 7 1986 UMI

quantity shipped, the quantity received will be recorded on the transfer record. Sealed containers and cases received without apparent loss need not be measured or weighed. The consignee will retain the original of the transfer record and send the copy to the consignor. The retained copy of the transfer record will be maintained as a record of receipt as required by Subpart O of this part.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended (26 U.S.C. 5362))

Removals Without Payment of Tax

§ 24.290 Distilling material.

(a) *General.* Still wine may be removed without payment of tax to the production facilities of a distilled spirits plant for use as distilling material in the distillation of spirits. The volume of distilling material may be determined at either the bonded wine premises or the distilled spirits plant.

(b) *Formula wine.* Unmarketable formula wine may be removed to a distilled spirits plant for use as distilling material in the production of wine spirits (but not brandy). Where sugar has been used in the production of formula wine, the wine may not be removed for use as distilling material if the unfermented sugars therein have been fermented prior to the removal. If wine spirits produced from formula wine contain any flavor characteristics of the formula wine, the wine spirits may be used only in the production of a formula wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1382, as amended 1395, as amended (26 U.S.C. 5362, 5373, 5552))

§ 24.291 Vinegar.

(a) *General.* Where the proprietor is also the proprietor of a vinegar plant located adjacent or contiguous to bonded wine premises, still wine may be removed free of tax for use in the manufacture of vinegar upon the filing of ATF Form 5000.18 (1533), Consent of Surety, extending the terms of the wine bond to cover the removal and use of wine in the manufacture of vinegar. The proprietor of a vinegar plant filing ATF Form 5510.2 (1676), Bond Covering Removal to & Use of Wine at Vinegar Plant, may have wine shipped thereto, free of tax, for use in the manufacture of vinegar. Still wine which has acetified and contains not less than four percent of acetic acid by volume may also be removed, free of tax, for use as vinegar.

(b) *Vinegar plant records.* Each proprietor of a vinegar plant to which wine is shipped, free of tax, for use in the manufacture of vinegar shall keep a record of all wine received and used for the manufacture of vinegar and of all vinegar produced and disposed of. The record will show the following information:

(1) The volume and alcohol content of all wine received, the date of receipt, and the name, registry number, and address of the bonded wine premises from which received;

(2) The volume and alcohol content of all wine used in the manufacture of vinegar, and the date of use;

(3) The volume and grain strength of the vinegar produced, and the date of production. (This volume will be reported on a 100-grain strength basis and will be determined by multiplying the wine gallons of vinegar produced by the grain strength thereof and dividing the rest by 100); and

(4) The names and addresses of all persons to whom vinegar is shipped, the volume and grain strength shipped to each, and the date of shipment. (Grain strength is a measure of the acetic content of vinegar, expressed as 10 times the grams of acetic acid per 100 ml).

(c) *Inspection of vinegar plants.* The proprietor of a vinegar plant receiving wine, free of tax, for use in the manufacture of vinegar shall make the premises and records available for inspection by ATF officers during regular business hours.

(August 16, 1954, ch. 736, 68A Stat. 903, as amended (26 U.S.C. 7606); Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended (26 U.S.C. 5362))

§ 24.292 Exported wine.

(a) *General.* Wine may be removed from a bonded wine cellar without payment of tax for exportation, for use on vessels and aircraft, for transportation to and deposit in a "Class 6" manufacturing bonded warehouse, for transfer to and deposit in a customs bonded warehouse, and for transfer to and deposit in a foreign-trade zone for exportation or for storage pending exportation. Removals of wine for export will be in accordance with the procedures in Part 252 of this chapter.

(b) *Return of wine to bonded storage.* Wines which have been lawfully withdrawn, without payment of tax, under the provisions of Part 252 of this chapter may be returned to bonded wine premises from which withdrawn for storage pending subsequent removal for lawful purposes. On return of wine to bonded wine premises, the proprietor shall record the receipt showing the gallonage of each tax class received and returned to storage on bonded wine premises and shall report the return on the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations, for the month with an explanatory notation. All provisions of this part applicable to wine in bond at bonded wine premises and to removals from bond are applicable to returned wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended (26 U.S.C. 5361, 5362))

§ 24.293 Wine for Government use.

(a) *General.* Wine may be removed from bonded wine premises, free of tax, for use of the Government of the United States, or any agency thereof, upon receipt of a proper Government order signed by the office in charge of the department, institution, station, or similar establishment, to which the wine is to be shipped or other officer duly authorized to sign the order. Wine may also be removed for use by the governments of the several states and the District of Columbia, or of any subdivision thereof, or by any agency of the governments, free of tax, from bonded wine cellars for analysis, testing, research or experimentation.

(b) *Bill of lading and report of shipment.* Where wine is shipped by common carrier, the proprietor shall return a copy of the bill of lading, covering the shipment, with the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations, for the month in which the shipment is made. The bill of lading will show the name and address of the agency to which the wine is shipped, identifying marks on containers or cases, and alcohol content of the wine. The governmental order, or a copy of the order, will be filed at the bonded wine premises available for inspection by ATF officers.

(Sec 201, Pub. L. 85–859, 72 Stat. 1380, as amended, 1381, as amended (26 U.S.C. 5362, 5367))

§ 24.294 Destruction of wine.

(a) *General.* Wine on bonded wine premises may be destroyed on or off wine premises by the proprietor without payment of tax. A proprietor who desires to destroy wine on or off wine permises shall file with the area supervisor an application stating the kind, alcohol content, and approximate volume of wine to be destroyed, where the wine is to be destroyed, and the reason for destruction. Wine to be destroyed will be inspected and the destruction supervised by an ATF officer, unless the area supervisor authorizes the proprietor to destroy the wine without inspection and supervision. The wine may not be destroyed until the proprietor has received authority from the area supervisor.

(b) *Record of destruction.* The proprietor shall maintain a record of the volume destroyed and include the quantity on the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations. If part of the volume of the material destroyed is not wine, the volume destroyed will be reported on the basis of actual wine content of the material, excluding any dilution by water or other substance.

(Sec. 201, Pub: L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367, 5370))

Return of Taxpaid Wine to Bond

§ 24.295 Return of Taxpaid wine to bond.

(a) *General.* Domestically produced wine which has been taxpaid, removed from bonded wine premises, and is subsequently determined to be unmerchantable may be returned to bonded wine premises for reconditioning or destruction. The tax paid on the wine may, when the wine is returned to bond, be refunded or credited, without interest, to the proprietor of the bonded wine cellar to which the wine is delivered. However, no tax paid on any wine for which a claim has been or will be made under the provisions of Subpart O of Part 170 of this chapter will be refunded or credited. If the tax on the wine has been determined but not paid, the person liable for the tax may, when the wine is returned to bond, be relieved of the liability. Claims for refund or credit, or relief from liability, of tax paid or determined on wine returned to bond are filed in accordance with § 24.66.

(b) *Receipt.* The amount of unmerchantable taxpaid wine returned to bond is determined upon receipt on bonded wine premises. The quantity determined will be entered on the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations, for the month during which the wine is returned.

(c) *Records.* The proprietor shall maintain records covering each lot of unmerchantable taxpaid wine returned to bond in accordance with § 24.311.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1332, as amended, 1382, as amended (26 U.S.C. 5044, 5371))

Taxpaid Wine Operations

§ 24.296 Taxpaid wine operations.

(a) *General.* The proprietor may conduct taxpaid wine operations authorized by § 24.102 in an area designated as taxpaid wine premises at a bonded winery or bonded wine cellar, or at a taxpaid wine bottling house. Any taxpaid wine operations will be separate from all nontaxpaid wine operations and taxpaid wine will be clearly identified as provided in § 24.135. The regional director (compliance) may require any additional segregation and identification of taxpaid wine operations as deemed necessary to protect the revenue.

(b) *Treatment.* Taxpaid wine may be treated with sulfur dioxide compounds, refrigeration or pasteurization and may also be preserved, filtered or clarified by the use of methods or materials which will not change the basic character of the wine. The proprietor who desires to treat wine in any manner (other than by simple filtration or the use of sulfur compounds, refrigeration or pasteurization) shall first file with the regional director (compliance) an application giving the details of the proposed treatment. The proprietor may not use the treatment prior to approval. The proprietor may incur civil or criminal liability for using an unauthorized treatment of taxpaid wine. Wine of the same kind (class, type, or national origin) and tax class may be mixed to facilitate handling; otherwise, the blending of taxpaid wine is prohibited. Also, water may not be added to the taxpaid wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1407 (26 U.S.C. 5352, 5661))

Subpart O—Records and Reports

§ 24.300 General.

(a) *Records and reports.* A proprietor who conducts wine operations shall maintain wine transaction records and submit reports as required by this part. Transaction records may be recorded in wine gallons or in liters. However, required reports submitted to the regional director (compliance) will show wine volumes in wine gallons. The equivalent wine gallons of wine bottled and labeled according to metric measure will be determined using the following conversion factors:

(1) Per case. Equivalent gallonage may be determined using the following conversion factors for cases of metric bottles:

Bottles per case	Net content each bottle	Equivalent gallonage
120	50ml	1.58502
60	100ml	1.58502
48	187ml	2.37119
24	375ml	2.37753
12	750ml	2.37753
12	1 liter	3.17004
6	1.5 liter	2.37753
4	3 liter	3.17004

(2) Per liter. Equivalent gallonage may be determined by multiplying total liters by a conversion factor of 0.26417 gallons per liter.

(b) *Time of making entries.* Any operation or transaction is to be entered in records or commercial papers at the time the operation or transaction occurs, except that where records are posted from source records or from supplemental auxiliary records prepared at the time the operation or transaction occurs, entries in another record may be deferred to not later than the close of business of the third business day succeeding the day on which the operation or transaction occurs. The proprietor shall retain all source records and all supplemental or auxiliary records which support entries in other records or commercial papers in order to facilitate verification of operations by ATF officers. Source records and supplemental or auxiliary records may be used as the record of an operation or transaction and to prepare the ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations, provided the record will readily allow for verification of an operation or transaction by ATF officers.

(c) *Prescribed forms.* All reports required by this part are to be submitted on forms prescribed by the Director. Entries will be made as indicated by the headings of the columns and lines and as required by the instructions on the form. Report forms filed with the regional director (compliance) are furnished free of cost.

(d) *Period of retention.* All prescribed returns, reports and records (including source records) will be retained by the proprietor for a period of not less than three years from the record date or the date of the last entry required to be made in the record, whichever is later. However, the regional director (compliance) may require records to be kept an additional period not exceeding three years in any case where retention is determined to be necessary.

(e) *Data processing.* (1) Notwithstanding any other provision of this section, data maintained on data processing equipment may be kept at a location other than the wine premises if the original operation or transaction source records required by this subpart are kept available for inspection at the wine premises.

(2) Data which has been accumulated on cards, tapes, discs, or other accepted recording media will be retrievable within five business days.

(3) The applicable data processing program will be made available for examination if requested by an ATF officer.

(f) *ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations.* A proprietor who conducts wine operations shall summarize transaction entries and submit an ATF Form 5120.17

VOL
51
ISS
45
MR
7
1986
UMI

(702) to the regional director (compliance) in accordance with instructions on the form. If the proprietor does not expect an inventory change or any reportable operations to be conducted in a subsequent month or months, a statement may be attached to the ATF Form 5120.17 (702) filed that, until a change in the inventory or a reportable operation occurs, an ATF Form 5120.17 (702) will not be filed. The information reported on the ATF Form 5120.17 (702) will be maintained in accordance with the requirements of this part. Any fractional parts of a gallon will be expressed in decimals to the nearest one-tenth gallon, five-hundredths gallon being converted to the next full one-tenth gallon.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.301 Bulk still wine record.

A proprietor who produces or receives still wine, (including wine intended for use as distilling material or vinegar stock to which water has not yet been added) shall maintain records of transactions for bulk still wine. Records will be maintained for each tax class of still wine including the date the transaction occurred. The bulk still wine record will contain the following:

(a) The volume produced by fermentation in wine gallons determined by actual measurement;

(b) The volume received, shipped taxpaid, removed (e.g., taxpaid, in bond, export, family use, samples) and used in sparkling wine production;

(c) The specific type of production method used, e.g., natural fermentation, sweetening, addition of spirits, amelioration, blending;

(d) The volume of wine used and produced by sweetening, amelioration, or addition of spirits as determined by measurements of the wine before and after production;

(e) The volume of wine used for and produced by blending if wines of different tax classes are blended together;

(f) The volume of wine used to produce vinegar stock and distilling material;

(g) The volume of wine removed to fermenters for refermentation or removed directly to the production facilities of a distilled spirits plant or vinegar plant;

(h) Where a process authorized under § 24.248 is employed, records will be maintained to allow for verification of any limitation specified for the process employed and to ensure that the use of the process is consistent with good commercial practice;

(i) Where a treating material is dissolved or dispersed in water as authorized in this part, the volume of water and treating material added to the wine; and

(j) An explanation of any unusual transaction.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.302 Effervescent wine record.

A proprietor who produces or receives sparkling wine or artificially carbonated wine shall maintain records showing the transaction date and details of production, receipt, storage, removal, and any loss incurred. Records will be maintained for each specific process used (bulk or bottle fermented, artificially carbonated) and by the specific kind of wine, e.g., grape, pear, cherry. The record will contain the following:

(a) The volume of still wine filled into bottles or pressurized tanks prior to secondary fermentation or prior to the addition of carbon dioxide;

(b) The quantity of any first dosage used;

(c) Any in-process bottling losses, e.g., refilling, spillage, breakage;

(d) The volume of bottle fermented sparkling wine in process, transferred and received;

(e) The volume returned to still wine;

(f) The quantity of any finishing dosage used;

(g) The volume of finished sparkling wine or artificially carbonated wine bottled or packed (amount produced);

(h) The quantity of each item used in the production of dosages, e.g., wine, sugar, spirits; and

(i) An explanation of any unusual transaction.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.303 Formula wine record.

A proprietor who produces formula wine shall maintain records showing by transaction date the details of production. The formula wine record will contain the following:

(a) A number for each lot produced;

(b) The approved formula number for each lot;

(c) The volume of wine used in the production;

(d) The volume produced and the gain or loss resulting from the production of each lot as determined by comparing the volume finished with the volume used (report the total monthly loss or gain on the ATF Form 5120.17 (702));

(e) An explanation of unusual loss or gain;

(f) The production of essences showing the formula number, quantities of spirits and herbs used, and the amount produced;

(g) The quantity of essences purchased, and the use, transfer or other disposition of essences produced or purchased; and

(h) A record of the receipt and use or other disposition of all herbs, aromatics, essences, extracts, or other flavoring materials used in the production of formula wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.304 Chaptalization and amelioration record.

(a) *General.* A proprietor who chaptalizes juice or ameliorates juice or wine, or both, shall maintain a record of the operation and the transaction date. Records will be maintained for each kind of wine produced (grapes, fruit, or berry). No form of record is prescribed, but the record maintained will contain the information necessary to enable ATF officers to readily determine compliance with amelioration limitations. All quantities will be recorded in wine gallons, and, where pure sugar is used, the quantity will be determined either by measuring the increase in volume or by considering that each 13.5 pounds of pure sugar results in a volumetric increase of one gallon. If juice is chaptalized and subsequently this juice or wine is ameliorated, the quantity of pure sugar added to juice will be included as ameliorating material. The record will include the following:

(1) The volume of juice (exclusive of pulp) deposited in fermenters;

(2) The maximum volume of ameliorating material to which the juice is entitled, as provided in § 24.178;

(3) The volume of ameliorating or chaptalizing material used, including sugar used for adjustment of the total solids; and

(4) The volume of material authorized but not yet used.

(b) *Supporting records.* The amelioration record will show the basis for entries and calculations, including determination of the natural fixed acid level and total solids content of juice, as applicable. The records are maintained on the basis of annual accounting periods, with each period commencing on July 1 of a year and ending on the following June 30, except the record for an accounting period may be continued after June 30, where the juice or wine included therein is to be held after that date for completion. When the amelioration of wine included in the record for one accounting period is complete, the record is closed and any

unused amelioration material may not be used. Wines included in the records for different accounting periods may not be mixed with each other until the amelioration of both wines is complete.

(c) *Variation.* Notwithstanding the provisions of paragraph (b) of this section prohibiting the mixing of wines included in the records for different accounting periods, the proprietor may mix wines before amelioration of the wine is completed. However, the proprietor shall additionally maintain records necessary to establish the quantity of unused authorized material to which the resultant mixture would be entitled so that ATF officers may readily ascertain compliance with amelioration limitations.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1385, as amended (26 U.S.C. 5367, 5384))

§ 24.305 Sweetening record.

A proprietor who sweetens natural wine with sugar under the provisions of this part shall maintain a record of sweetening by transaction date. The record will contain the following:

(a) The gallons and degrees Brix of the wine before sweetening;

(b) The gallon equivalent of pure sugar that would be required to sweeten the volume of wine to its maximum authorized total solids content;

(c) The quantity of sugar used for sweetening; and

(d) The gallons and degrees Brix of the wine produced by sweetening.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.306 Distilling material or vinegar stock record.

A proprietor who produces or receives wine containing excess water which will be used expressly as distilling material or vinegar stock shall maintain a record by transaction date showing the amount and kind produced, received, from whom received, removed, and to whom sent. The proprietor shall keep a record of each type of material from which the distilling material or vinegar stock was fermented (e.g., grape, fruit, berry). The volume of distilling material or vinegar stock produced, including wine lees refermented for use as distilling material, will be recorded upon removal from fermented tanks. However, the provisions of this section do not apply to standard wine or unwatered wine lees recorded on the proprietor's record of bulk still wine and removed for use as distilling material or vinegar stock.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.307 Nonbeverage wine record.

A proprietor who produces nonbeverage wine shall maintain a record by transaction date of each formula number produced and withdrawn as follows:

(a) The kind, volume, and percent alcohol by volume of wine, or wine products made from wine, which was rendered unfit for beverage use;

(b) The kind and quantity of materials received and used to render wine, or wine products made from wine, unfit for beverage use;

(c) The name, volume, percent alcohol by volume, and formula number of each nonbeverage wine or wine product produced;

(d) The volume, percent alcohol by volume, and formula number of nonbeverage wine removed; and

(e) The name and address of the consignee if the removal is more than five wine gallons or two cases, or if the nonbeverage wine is shipped for resale.

When the proprietor sends nonbeverage wine free of tax to an adjacent or contiguous premises operated by the proprietor, records required by paragraphs (d) and (e) of this section will be maintained at each location.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.308 Bottled or packed wine record.

A proprietor who bottles, packs, or receives bottled or packed wine in bond shall maintain a record, by tax class, as follows:

(a) The date, kind of wine, and volume of wine bottled or packed, received in bond, returned to bond, and removed, e.g., taxpaid removals, in bond removals, dumped to bulk or destroyed, breakage, used for tasting. The number and size of bottles or containers filled will be shown in the record and will determine the volume bottled or packed. The volume recorded as bottled for bottle fermented sparkling wine is determined after the disgorging and refilling process.

(b) The label used on bottles or containers will be shown in the record by using the "Applicant's Serial No." which appears as item 2 on the label approval form, ATF Form 5100.31 (1649).

(c) The record of fill tests and alcohol tests required by § 24.255 will be maintained for each lot of wine bottled or packed showing the date, type of test, item tested and the test results.

(Sec. 201. Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.309 Transfer in bond record.

A proprietor who transfers wine in bond shall prepare a transfer record. The transfer record will show:

(a) The name, address and registry number of the proprietor;

(b) The name, address and registry number of the consignee;

(c) The shipping date;

(d) The kind of wine (class and type);

(e) The alchohol content or the tax class;

(f) The number of cases or containers;

(g) The serial numbers of cases (if any);

(h) Any container identification marks;

(i) The volume shipped in gallons or liters;

(j) The serial number of any seal used;

(k) For unlabeled bottled or packed wine, the registry number of the bottler or packer;

(l) Information necessary for compliance with § 24.315, e.g., the varietal, vintage, appellation of origin designation of the wine or any other information that may be stated on the label; and

(m) Information as to any added substance or cellar treatment for which a label declaration is required for the finished product, or any other cellar treatment for which limitations are prescribed in this part, e.g., amount of decolorizing material used, quantity of ameliorating material used.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.310 Taxpaid removals from bond record.

A proprietor removing wine from bond for consumption or sale on determination of tax shall maintain a record of wine removed at the time of removal either to taxpaid wine premises or for direct shipment. The record will show the date of removal, the name and address of the person to whom shipped, and the volume, kind (class and type) and alcohol content of the wine. The proprietor who removes taxpaid bulk wine to another wine premises shall prepare the shipping record and follow the procedures prescribed by § 24.281. The volume of wine removed taxpaid will be summarized daily by tax class. If the wine is not sold for resale or shipped for sale, the name and address of the person to whom sold or shipped may be omitted from the record. On sales of not more than one case or one demijohn, the name and address of the consignee need not be recorded.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

VOL 51 ISS 45 MR 7 1986 UMI

§ 24.311 Taxpaid wine record.

A proprietor who has taxpaid wine premises shall maintain records as follows:

(a) *Record of receipts.* (1) The name and address of the person or wine premises from whom received;

(2) The registry number (if any) of the wine premises from which received;

(3) The date of receipt;

(4) The kind of wine (class, type and, in the case of foreign wine, country of origin);

(5) Alcohol content or tax class of the wine; and,

(6) The volume of wine received in gallons.

(b) *Record of removals.* (1) The name and address of the person to whom removed; however, on sales of not more than one case or one demijohn made direct to consumers the name and address of the consignee need not be shown;

(2) The date of removal;

(3) The kind of wine (class, type and, in the case of foreign wine, country of origin); and

(4) The volume of wine shipped in gallons.

(c) *Record of cases or containers filled.* (1) The date the cases or containers were filled;

(2) The kind (class, type and, in the case of foreign wine, country of origin) of wine bottled or packed;

(3) The number of the tank used to fill the bottles or containers;

(4) The size of bottles or containers and the number of cases or containers filled;

(5) The serial number or date of fill marked on the cases or containers filled; and

(6) The total volume of wine bottled or packed in liters or wine gallons.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367)).

§ 24.312 Taxpaid wine returned to bond record.

A proprietor shall maintain a record of any unmerchantable taxpaid wine returned to bond as follows:

(a) The kind, volume, and tax class of the wine;

(b) With regard to each tax class, the amount of tax previously paid or determined;

(c) The location of the wine premises at which the wine was bottled or packed and, if known, the identity of the bonded winery or bonded wine cellar from which removed on determination of tax;

(d) The date the wine was returned to bond;

(e) The serial numbers or other identifying marks on the cases or containers in which the wine was received; and

(f) The final disposition of the wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.313 Reconditioned foreign wine record.

A proprietor shall maintain a record of any taxpaid foreign wine received on taxpaid wine premises for reconditioning as follows:

(a) The name and address from whom the wine is received;

(b) The date of receipt and the kind, volume, and tax class of the wine received;

(c) The serial numbers or other identifying marks of the cases or containers in which the wine is received;

(d) The date of reconditioning; and the volume and tax class of the wine reconditioned;

(e) The name and address of the person to whom the reconditioned wine is shipped; and

(f) The date of shipment and the kind (class, type, and, in the case of foreign wine, country of origin), volume, and tax class of the wine shipped.

If the information required in regard to receipts and shipments is shown or the taxpaid wine record, the record of reconditioning need not include information as to receipt and disposition of the wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.314 Inventory record.

A proprietor shall prepare a record of the physical inventory of all wine and spirits in storage at the close of business for each tax year, or where a different cycle has been established, the inventory will be taken at the end of that annual period. (Proprietors may begin with an annual inventory period different from the period beginning on July and ending on June 30 (tax year); however, if the proprietor wants to change an inventory period, a notice will be submitted to the regional director (compliance)). The inventory record will be retained on file with the proprietor's ATF Form 5120.17 (702), Monthly Report of Wine Cellar Operations, for the month the inventory was taken. If at other times a complete inventory of all wine is taken, losses disclosed will be reported on the ATF Form 5120.17 (702) and the inventory record will also be retained on file with the report for that month. The proprietor's inventory record will include:

(a) *Description of wine.* (1) State the generic name (e.g., port, claret) or designated as a white, rose or red table or dessert wine; or

(2) Wine intended to be marketed with a vintage date, varietal name, or geographical designation will be appropriately identified, e.g., 1977 Napa Valley Pinot Noir; and

(3) If the wine is other than grape wine, state the type, e.g., orange, honey.

(b) *Bulk containers.* Tanks containing wine will be listed by tank number. Bulk containers which are barrels or puncheons containing the same kind of wine may be summarized, e.g., 10 barrels-red table wine 500 gals.;

(c) *Cases, containers and bottles.* The total volume of one kind of wine in cases, containers and bottles may be entered as one item and appropriately identified;

(d) *Inventory summary.* The volume of bulk and bottled or packed wine will be totaled separately in wine gallons or in liters, by tax class, and reported on the ATF Form 5120.17 (702). Spirits will also be totaled and reported on the ATF Form 5120.17 (702); and

(e) *Inventory record.* All inventory pages will be numbered consecutively and the last inventory page will be dated and signed after the statement, "Under penalties of perjury, I declare that I have examined this inventory record and to the best of my knowledge and belief, it is a true, correct and complete record of all wine and spirits required to be inventoried."

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367, 5369))

§ 24.315 Label information record.

A proprietor who removes bottled or packed wine with information stated on the label (e.g., varietal, vintage, appellation of origin, analytical data, date of harvest) shall have complete records so that the information appearing on the label may be verified by an ATF audit. A wine is not entitled to have information stated on the label unless the information can be readily verified by a complete and accurate record trail from the beginning source material received or initial operation conducted to removal of the wine for consumption or sale. All records necessary to verify wine label information are subject to the record retention requirements of § 24.300(d).

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.316 Materials received and used record.

(a) *General.* A proprietor who produces wine shall maintain a record showing the receipt and use or other disposition of basic winemaking materials received on wine premises. The record will show the date of receipt, the quantity received, the name and address from whom received, and the date of use or other disposition of the materials. For any material stored off wine premises, invoices or other commercial papers covering the purchase will also be kept available for inspection. Where grapes (or other fruit) received on wine premises are used in producing juice to be stored for future use or for removal, the record will show the quantity used and juice produced.

(b) *Concentrated fruit juice.* When concentrated fruit juice or must is produced or received, the record will show the degrees Brix of the juice before and after concentration, the maximum volume of water authorized to restore one gallon of concentrated juice, the volume of juice before and after reconstitution, the volume of reconstitution water used, and, if volatile fruit flavor was added, the kind and volume. Where fruit or juice is used to produce concentrated juice, the record will also show the quantity of fruit or volume of juice used. If the concentrated fruit juice is removed for use by another proprietor, a copy of the certificate required by § 24.180 will be retained. The record of concentrated fruit juice will contain the information necessary to determine compliance with the limitations prescribed in § 24.180. Incomplete or inaccurate records of concentrated fruit juice may result in the wine produced from the concentrated juice to be designated substandard.

(c) *Volatile fruit-flavor concentrate.* If volatile fruit-flavor concentrate is received, the record will show the volume received, the fold, the percent of alcohol by volume, any loss in transit, and the use or other disposition of the volatile fruit-flavor concentrate.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.317 Spirits record.

A proprietor who receives, stores, or uses spirits shall maintain a record of receipt and use. The record will show the date of receipt, from whom received, and the kind and proof gallons. The spirits record will also show by date and proof gallons the spirits used or removed from bonded wine premises and to whom. The proof gallons of spirits received, used, removed from bonded wine premises, and on hand will be summarized and the account balanced at the end of each month and reported on the ATF Form 5120.17 (702).

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended, 1382, as amended, 1383, as amended (26 U.S.C. 5367, 5373))

§ 24.318 Sugar record.

A proprietor who receives, stores, or uses sugar shall maintain a record of receipt and use. The record will show the date of receipt, from whom received, and the kind and quantity. Invoices covering purchases will be retained. When sugar is used for chaptalization, amelioration or sweetening, the record will show the date, kind, and quantity used. The sugar record will also show sugar used in the production of allied products and any sugar removed from the wine premises. At the close of each month the account will be balanced and the quantity of each kind of sugar remaining on hand will be shown.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.319 Acid record.

A proprietor who adds acid to correct a natural deficiency in juice or wine or to stabilize wine shall maintain a record showing date of use, the kind and quantity of acid used, the kinds and volume of juice or wine in which used, and the fixed acid level of juice or of wine before and after the addition of acid. The record will account for all acids received and be supported by purchase invoices.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.320 Carbon dioxide record.

A proprietor who uses carbon dioxide in still wine shall maintain a record of the laboratory tests conducted to establish compliance with the limitations prescribed in § 24.245.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.321 Chemical record.

A proprietor who uses chemicals, preservatives, or other such materials shall maintain a record of the purchase, receipt and disposition of these materials. The record will show the kinds and quantities received, the date of receipt, and the names and addresses from whom, purchased. A record of use in juice or wine of any of these materials, except for filtering aids, inert fining agents, and oxygen, will be maintained, showing the kind, quantity, and date of use, and kind and volume of juice or wine in which used.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.322 Activated carbon record.

A proprietor who treats juice, white wine, pale dry sherry, or cocktail sherry with activated carbon or other decolorizing material shall maintain a record to show:

(a) The type (e.g. grape variety or kind of wine) and volume of juice, white wine, pale dry sherry, or cocktail sherry;

(b) The kind and quantity of the decolorizing material used per 1,000 gallons of wine or juice;

(c) The complete cellar treatment given each lot of juice, white wine, pale dry sherry, or cocktail sherry, and the date and the length of time the decolorizing material is in contact with the juice, white wine, pale dry sherry, or cocktail sherry;

(d) The temperature of the juice or wine during treatment; and

(e) The range of color (Lovibond scale in a one-half inch cell) or the percentage of transmittance per AOAC 11.003–11.004 of the expressed juice or the wine before treatment with any decolorizing material and the range of color or the percentage of transmittance per AOAC 11.003–11.004 after treatment.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.323 Allied products record.

A proprietor who uses fruit, fruit juice or concentrated fruit juice in the production of allied products shall maintain a record of these materials in accordance with § 24.316. The record will also show the production and disposition of other allied products. If sugar, acids, or chemicals are used in allied products, the receipt and use will also be recorded.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5367))

§ 24.324 Excise Tax Return form.

A proprietor who removes wine subject to tax shall prepare an Excise Tax Return form unless exempted under the provisions of § 24.273. Any increase or decrease in tax due to previous return errors or for authorized credits will be shown on the return. The Excise Tax Return will be prepared and filed by the proprietor in accordance with the instructions printed on the form.

(August 16, 1954, ch. 736, 68A Stat. 775, as amended, 777, as amended, 391, as amended, 917, as amended (26 U.S.C. 6301, 6311, 6302, 7805))

Signed: May 29, 1985.

Stephen E. Higgins,
Director.

Approved: September 20, 1985.

David D. Queen,
Acting Assistant Secretary (Enforcement and Operations).

National Archives and Records Administration

Privacy Act of 1974; Systems of Records; Notice

VOL 51 ISS 45 MR 7 1986 UMI

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Privacy Act of 1974; Systems of Records

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of new systems and amendments of systems of records.

SUMMARY: NARA proposes to publish all its systems of records subject to the Privacy Act of 1974, as amended (5 U.S.C. 552a). The specific changes to the notices being amended are set forth below followed by the systems notices, as amended, published in their entirety.

DATE: NARA filed a new systems report with the Speaker of the House, the President of the Senate, and the Director, Office of Management and Budget (OMB) on November 6, 1985. The proposed systems shall be effective without further notice on April 7, 1986, unless comments are received which would result in a contrary determination.

ADDRESS: Comments should be addressed to Adrienne C. Thomas, Director, Program Policy and Evaluation Division (NAA), National Archives and Records Administration, Washington, D.C. 20408. Telephone (202) 523–3214.

FOR FURTHER INFORMATION CONTACT: Adrienne C. Thomas or Nancy Allard, Program Policy and Evaluation Division (NAA). Telephone (202) 523–3214 or (FTS) 523–3214.

SUPPLEMENTARY INFORMATION: On April 1, 1985, the National Archives and Records Service ceased to be a part of the General Services Administration. It became the National Archives and Records Administration, an independent agency in the executive branch. This required NARA to establish its own Privacy Act Notice of Systems. NARA's 24 systems of records subject to the Privacy Act include 22 modifications of the existing General Services Administration's systems. These modifications involved changing the name and number of the existing system of records, changing the name of the system manager, and changing the location of the records.

NARA's two new systems are NARA 15, Editorial Freelance Vendor Files, and NARA 16, Library Circulation Files. The categories of individuals covered by NARA 15 include former and current freelance vendors qualified to perform editorial services. The categories of records in this system includes correspondence with the editorial vendors, including all or parts of the following: Name; address; telephone number; education; professional vita; samples of work; assignments and evaluations of work done for the National Archives; and purchase order documents. The authority for maintenance of this system is 44 U.S.C. 2104. NARA procedures for contesting records are contained in 36 CFR Part 1202.

NARA 16, Library Circulation Files, is located in the Library of the National Archives Building at 8th and Pennsylvania Avenue NW., Washington, D.C. The mailing address is National Archives (NNIL), Washington, D.C. 20408. All NARA employees who have borrowed books and other materials from the Library are included in this category. The categories of records in this system includes specialized forms listing the names of individuals, materials borrowed and dates of loan. The authority for the maintenance of this system is 44 U.S.C. 2104. NARA rules for access to records and for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

Dated: February 28, 1986.

Frank G. Burke,

Acting Archivist of the United States.

NARA 1

SYSTEM NAME:

Researcher Application Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building, Presidential Libraries, Washington National Records Center, National Personnel Records Center, Federal Records Centers, and National Archives Field Branches. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Researchers who apply to use records in the National Archives, Presidential Libraries, and National Archives Centers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications to use records including name, address, telephone number, occupation, research topic, educational level, and field of interest.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2108, 2203(f)(1), and 2907.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by employees of NARA who have a need for the records in the performance of their duties to identify and record the individuals who use records in the National Archives and other repositories listed above, to provide a means of contacting the individual if additional information of research interest to him or her is found, and to mail notices of events and programs of interest to users of the records in the National Archives. The routine use statements A, F, and G, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in card files and file folders.

RETRIEVABILITY:

Filed alphabetically at each location by name of individual.

SAFEGUARDS:

During normal hours of operation, records are maintained in areas accessible only to authorized personnel of NARA. After hours, buildings have security guards and/or doors are

secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

Records are cut off annually, held one year, and retired. After 14 additional years they are destroyed. These procedures are in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

NARA officials with responsibility for this geographically dispersed system of records are the Assistant Archivist for the National Archives at the National Archives Building, the directors of the Presidential Libraries, the directors of the National Archives Field Branches, and the directors of the Federal Records Centers at the addresses listed for these locations in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information may be obtained from the officials cited above at the appropriate repository where individuals have used records.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Assistant Archivist for the National Archives, the directors of the Presidential Libraries, the directors of the National Archives Field Branches, or the directors of Federal Records Centers, depending on where individuals have used records. In person requests may be made during business hours listed for each location in the appendix following the NARA Notices. For written requests, the individual should provide full name, address, and telephone number, and the approximate dates records were used. For personal visits, individuals should be able to provide some acceptable identification, such as a driver's license or student or employee identification. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Researchers.

NARA 2

SYSTEM NAME:

Reference Request Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building, Presidential Libraries, Washington National Records Centers, National Personnel Records Center, National Archives Field Branches, Federal Records Center, and the National Audiovisual Center. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Researchers and correspondents requesting information from the records in the National Archives, Presidential Libraries, National Archives Centers, and the National Audiovisual Center.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence, reference slips, receipts for money, deposit account records, reproduction orders, reference logs, lending files, and reference files pertaining to requests for information, including all or parts of the following: Requester's name, address, telephone number, occupation, research topic, educational level, and field of interest.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2108, 2203(f)(2) and 2907.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by employees of NARA who have a need for the records in the performance of their duties to record requests for information and the responses to those requests; to maintain control over information requests received and answered; to enable later contact with the requester if required; to assist in the preparation of standard replies to similar questions; to facilitate preparation of statistical and other reports; to maintain control of records being used; to establish researcher accountability for records; to record payment for reproduction orders and funds placed on deposit; to record loans of materials or records from the above locations; and, when requested by a researcher, to write recommendations for researchers for grants or employment. The routine use statements A, F, and G, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in card files and file folders.

RETRIEVABILITY:

The records within this system are primarily retrieved by name.

SAFEGUARDS:

During normal working hours of operation, records are maintained in areas accessible only to authorized personnel of NARA. After hours, buildings have security guards and/or doors are secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

Records which are:

(1) Created in the administration of loans are cut off after the return of the materials, held one year, and destroyed.

(2) Created in the process of providing reference service by mail are cut off annually, held two years, and destroyed.

(3) Created in the process of providing records to researchers in National Archives research rooms are cut off annually, held one year and retired. After 14 additional years they are destroyed.

These procedures are in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

Depending on where the records are located the system managers are the Assistant Archivist for the National Archives, the Director of the National Audiovisual Center, the directors of the Presidential Libraries, the directors of the National Archives Field Branches, and the directors of Federal Records Centers at the address listed for these locations in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information may be obtained from the officials listed above at the appropriate repository where individuals have used records or directed inquiries. The addresses are listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Assistant Archivist for the National Archives, the directors of the Presidential Libraries, the directors of National Archives Field Branches, or the directors of Federal Records Centers, or the Director of the National Audiovisual Center depending on where individuals used records or directed inquiries. In person requests may be made during normal business hours listed for each location in the appendix following NARA notices. For written requests, provide full name, address, telephone number, and the approximate dates of the correspondence or transaction. For personal visits, individuals should be able to provide

VOL 51 ISS 45 MR 7 1986 UMI

some acceptable identification, such as a driver's license or student or employee identification. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Researchers, correspondents, and employees of the National Archives.

NARA 3

SYSTEM NAME:

Donors of Historical Materials Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building and the Presidential Libraries. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Donors and potential donors of papers or other historical materials to the National Archives and Presidential Libraries.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence, deeds of gift, deposit agreements, accession files, accession cards, administrative files, inventories of museum objects, oral history use agreements, tapes, and transcripts, all of which are related to the solicitation and preservation of donations. Also included are biographical data on donors as well as their addresses, telephone numbers, and occupations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2111 and 2112.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by employees of NARA who have a need for the records in the performance of their duties primarily to record solicitation efforts and accessioning of papers and other historical materials for preservation in the above locations; to maintain control over the accessions program; to facilitate future solicitations of gifts; to record deeds of gift; and to record agreements of use. The routine uses of records also include releasing biographical material about donors and prospective donors to the public as well as the routine use statements A, F, and G, described in the appendix following the NARA Notices.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders; sound recordings.

RETRIEVABILITY:

Filed alphabetically at each location by name of donor.

SAFEGUARDS:

Buildings have security guards, and records and other materials are maintained in areas accessible only to authorized personnel of NARA.

RETENTION AND DISPOSAL:

Records are permanent. These procedures are in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

Depending on where the records are maintained the system managers are the Assistant Archivist for the National Archives and the Assistant Archivist for Presidential Libraries at the National Archives Building, and the directors of the Presidential Libraries. The addresses are listed in the appendix following the NARA Notices.

NOTIFICATION PROCEDURES:

Information may be obtained from the officials listed above at the appropriate repository where individuals have donated materials or from which they have received requests for donations. The addresses are listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Assistant Archivist for the National Archives, the Assistant Archivist for Presidential Libraries, or a director of a Presidential Library depending on which repository the individual has been associated with. In person requests may be made during normal business hours listed for each location in the appendix following the NARA Notices. For written requests, provide full name, address, telephone number, and the approximate dates of the correspondence or transaction. For personal visits individuals should be able to provide some acceptable identification such as a driver's license or employee identification card. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Donors, potential donors, and employees of the National Archives.

NARA 4

SYSTEM NAME:

National Archives Committees Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building. The address is listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Former, current, and prospective advisory committee members.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence with and biographical information about former, current, and prospective advisory committee members including all or parts of the following: Name, address, telephone number, education, professional vita, and publications.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2104(f)

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by employees of NARA who have a need for these records in the performance of their duties to review professional qualifications of prospective committee members; to document activities of the committees themselves; to serve as a mailing list of current and past members; to record the committee members' role; and to help formulate advisory committee policy. Biographical material relating to advisory committee members is made available to the public for purposes of publicizing the membership and activities of the committees. The routine use statement F, described in the appendix following the NARA Notices, also applies to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

Filed alphabetically by name of individual.

SAFEGUARDS:

During normal hours of operation, records are maintained in areas

accessible only to authorized personnel of NARA. After hours, the building has security guards and/or doors are secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

These records are cut off after each meeting, held five years, and offered to the National Archives. These procedures are in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

The NARA official with overall responsibility for the system records is the Assistant Archivist for Management and Administration (NA), National Archives Building, 8th and Pennsylvania Avenue NW., Washington, DC 20408.

NOTIFICATION PROCEDURE:

Information may be obtained from the official listed above at the address listed above.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Assistant Archivist for Management and Administration (NA). In person requests may be made during normal business hours listed in the appendix, following the NARA Notices. For written requests, provide full name, address, telephone number, and if applicable, dates of service. For personal visits, individuals should be able to provide some acceptable identification, such as a driver's license or employee identification card. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Former, current, and prospective advisory committee members, associates of committee members, and employees of the National Archives.

NARA 5

SYSTEM NAME:

Conference and Related Activities Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building, Presidential Libraries, Washington National Records Center, National Personnel Records Center, Federal Records Centers, and National Archives Field Branches. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Participants or potential participants in symposia, conferences, lectures, etc.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical information about individuals involved in these activities including name, address, telephone number, area of expertise, research interest, occupation, education, and publications.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2104, 2109, and 2204.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by employees of NARA who have a need for the records in the performance of their duties in the various archival programs indicated above; to provide a record of previous activities; to promote the use of archival materials; to provide mailing lists; to facilitate publication of the activity's proceedings; and to register persons attending the activity. The routine use statement F, described in the appendix following the NARA Notices, also applies to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in card files and file folders.

RETRIEVABILITY:

Filed alphabetically at each location by name of individual.

SAFEGUARDS:

During normal hours of operations, records are maintained in areas accessible only to authorized personnel of NARA. After hours, buildings have security guards and/or doors are secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

These records are cut off after the event, held for one year, and destroyed. These procedures are in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

NARA officials with responsibility for this geographically dispersed system of records are the Assistant Archivist for the National Archives and the Assistant Archivist for Public Programs at the National Archives Building, the directors of the Presidential Libraries, the directors of the Federal Records Centers, and the directors of the National Archives Field Branches at the addresses listed in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information may be obtained from the officials listed above at the appropriate location which sponsored the activity which the individual attended or in which he or she participated. The addresses are listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Assistant Archivist for the National Archives, the Assistant Archivist for Public Programs, the directors of Presidential Libraries, the directors of Federal Records Centers, or directors of National Archives Field Branches. In person requests may be made during normal working hours listed for each location in the appendix following the NARA Notices. For written requests, provide full name, address, telephone number, and the dates of activity. For personal visits, provide some acceptable identification, such as a driver's license or an employee identification card. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Participants, attendees, and employees of the National Archives.

NARA 6

SYSTEM NAME:

Mailing List Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building, Presidential Libraries, Washington National Records Center, National Personnel Records Center, National Audiovisual Center, National Archives Field Branches, and Federal Records Centers. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Researchers; buyers of NARA products and those making inquiries or receiving price quotations on possible orders; tourists; Government officials; professional colleagues; professionals in

VOL
51
ISS
45
MR
7
1986
UMI

related fields, such as librarians and teachers; and others with an interest in National Archives activities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Mailing lists include primarily the individual's name and address. Some lists also include telephone number, title, occupation, and institutional affiliation. Some mailing lists include type and subject of materials purchased, date purchased, and dollar value.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2109, 2112, 2307, 2902, and 2904.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The mailing lists are used by employees of NARA who have a need for the records in the performance of their duties, to address newsletters, announcements, programs, and material about special events; to bill researchers for reproduction orders; and to mail press releases and other information. On occasion the mailing lists are donated to or exchanged with private and public organizations to further scholarship and NARA programs. The routine use statement F, described in the appendix following the NARA Notices, also applies to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in card files, index cards, address plates, magnetic cards, punch cards, cassettes, and magnetic tape.

RETRIEVABILITY:

Filed alphabetically at each location by name of individual.

SAFEGUARDS:

During normal hours of operation, these records are maintained in areas accessible only to authorized personnel of NARA. After hours, buildings have security guards and/or doors are secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

These mailing lists are reviewed annually and updated. Outdated information is purged. These procedures are in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

Officials responsible for the geographically dispersed system of records are the Assistant Archivist for Management and Administration, Assistant Archivist for the National Archives, the Assistant Archivist for the Presidential Libraries, and the Assistant Archivist for Public Programs at the National Archives Building, and the Assistant Archivist for Records Administration, at 801 D Street NW., Washington, DC 20408. Other officials are directors of the Presidential Libraries, the directors of Federal Records Centers, and directors of National Archives Field Branches. The addresses for these locations are listed in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information may be obtained from the officials cited above at the appropriate location in which the individual has expressed an interest or in which he or she has a potential interest. The addresses are listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

Requests from individuals to access records should be addressed to the Assistant Archivist for Management and Administration, the Assistant Archivist for the National Archives, the Assistant Archivist for Presidential Libraries, the Assistant Archivist for Public Programs, the Assistant Archivist for Records Administration, the directors of the Presidential Libraries, the directors of Federal Records Centers, and the directors of National Archives Field Branches, depending on which archives activity maintains the specific records. In person requests may be made during normal business hours listed for each location in the appendix following the NARA Notices. For written requests, provide full name, address, and telephone number, and the approximate date of communications with the repository. For personal visits, individuals should be able to provide some acceptable identification, such as a driver's license or employee identification card. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Individuals expressing an interest in archives activities and NARA employees.

NARA 7

SYSTEM NAME:

Mandatory Review of Classified Documents Request Files and Freedom of Information Act Request Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building, Presidential Libraries, Washington National Records Center, Federal Records Centers, and National Archives Field Branches. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Researchers requesting mandatory review of security classified documents and requesting records under the Freedom of Information Act.

CATEGORIES OF RECORDS IN THE SYSTEM:

Requests for records under the Freedom of Information Act include requestor's name, address, and material requested. Requests for mandatory review of classified documents include requestor's name, address, telephone number, occupation, employer, and research topic.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 12356, April 2, 1982 (3 CFR, 1982 Comp., P. 166) and 5 U.S.C. 552, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by employees of NARA who have a need for the records in the performance of their duties to record requests for access to security-classified records and requests to obtain records under the Freedom of Information Act; to record status of each request; to record actions taken on requests, and to compile information for statistical reports. Records in this system may be made available for access review to the agency that created the documents requested under the Freedom of Information Act or a Mandatory Review request. The routine use statements A, F, and G, described in the appendix following the NARA Notices, also apply to this system of records.

POLICY AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in card files and file folders.

RETRIEVABILITY:

Filed alphabetically at each location by name of individual.

SAFEGUARDS:

During normal hours of operation, these records are maintained in areas accessible only to authorized personnel of NARA. After hours, buildings have security guards and/or doors are secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

Records are cut off annually, held one year, and retired. They are subsequently destroyed in accordance with NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

NARA officials with responsibility for this geographically dispersed system of records are the Assistant Archivist for the National Archives and the Assistant Archivist for Management and Administration at the National Archives Building, the directors of the Presidential Libraries, the directors of the National Archives Field Branches, and the director of the Federal Records Centers at the addresses listed for these locations in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information may be obtained from the officials listed above at the appropriate repository where individuals have requested mandatory review of classified records or have requested records under the Freedom of Information Act. The addresses are listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Assistant Archivist for Management and Administration, the Assistant Archivist for the National Archives, the directors of the Presidential Libraries, directors of the National Archives Field Branches, and the directors of the Federal Records Centers, depending on where the individual requested the mandatory review or requested records under the Freedom of Information Act. In person requests may be made during normal business hours listed for each location in the appendix following NARA Notices. For written requests, provide some acceptable identification. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Researchers who have requested mandatory review of records or who have requested records under the Freedom of Information Act.

NARA 8

SYSTEM NAME:

Restricted and Classified Records Access Authorization Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building, Presidential Libraries, Washington National Records Center, National Personnel Records Center, Federal Records Centers, and National Archives Field Branches. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Researchers who apply to use agency-restricted, donor-restricted, or classified records in the locations listed above.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications and letters of authorization to use restricted and/or classified records, including name, address, telephone number, occupation, employer, security clearance, social security number, date and place of birth, purpose, field of interest, citizenship, intention to publish, and type of publication.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2108 and 2204.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by employees of NARA who have a need for the records in the performance of their duties to control access to restricted materials; to maintain a record of requests for access; and to authorize access to restricted/classified materials. Records in this system may be made available for access review to agencies whose restricted records are the subject of an access request. The routine use statements A, F, and G, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in card files and file folders.

RETRIEVABILITY:

Filed alphabetically at each location by name of individual.

SAFEGUARDS:

During normal hours of operation, these records are maintained in areas accessible only to authorized personnel of NARA. After hours, buildings have security guards and/or doors are secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

These records relating to private individuals requesting access are cut off annually, held one year, and retired. After 14 additional years they are destroyed. Records relating to agency officials requesting access are destroyed on supersession or obsolescence of the authorization document, or on transfer or separation of the individual concerned. These procedures are in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

NARA officials with responsibility for this system or records are the Assistant Archivist for the National Archives at the National Archives Building, the directors of Presidential Libraries, the directors of the National Archives Field Branches, and the directors of Federal record centers at the addresses listed for these locations in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information may be obtained from the officials listed above at the appropriate repository where individuals have applied for access to records. The addresses are listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Assistant Archivist for the National Archives, the directors of the Presidential Libraries, directors of National Archives Field Branches, or the directors of the Federal Records Centers, depending on where the individual submitted his or her application for access to the records. In person requests may be made during normal business hours listed for each location in the appendix following the NARA Notices. For written requests, provide full name, address, telephone

VOL 51

MR 7
1986
UMI

number, and the approximate dates the application was made. For personal visits, individuals should be able to provide some acceptable identification, such as a driver's license or employee identification card. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 Part CFR 1202.

RECORD SOURCE CATEGORIES:

Researchers and agency officials.

NARA 9

SYSTEM NAME:

Authors Files, NARA.

SYSTEM LOCATION:

This system of records is located in the National Archives Building, Presidential Libraries, and National Archives Field Branches. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Authors whose publications are based on National Archives holdings and authors who have submitted manuscripts which have been published or considered for publication in *Prologue: The Journal of the National Archives.*

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical information about the authors including name, address, telephone number, occupation, education, and research interests, and manuscript copies of writings.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2307.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by employees of NARA who have a need for the records in the performance of their duties to provide an indication of areas of interest in archival holdings and the extent to which the scholarly community relies on National Archives holdings as primary source material; and to maintain a record of manuscripts which *Prologue* has rejected or accepted and published. The routine use statement F, described in the appendix following the NARA Notices, also applies to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

RETRIEVABILITY:

Filed alphabetically at each location by name of individual.

SAFEGUARDS:

During normal business hours of operation, these records are maintained in areas accessible only to authorized personnel of NARA. After hours, buildings have security guards and/or doors are secured, and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

Disposition of these records shall be in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

NARA officials responsible for this geographically dispersed system of records are the Assistant Archivist for the National Archives and the Assistant Archivist for Public Programs at the National Archives Building, the directors of the Presidential Libraries, and the directors of the National Archives Field Branches. The addresses are listed in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information may be obtained from the official listed above and at the appropriate repository where individuals have used records or submitted manuscripts for publication. The addresses are listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Assistant Archivist for the National Archives, the Assistant Archivist for Public Programs, the directors of the Presidential Libraries, or the directors of National Archives Field Branches. In person requests may be made during normal business hours listed for each location in the appendix following NARA notices. For written requests, provide full name, address, telephone number, and the title of publication. For personal visits, individuals should be able to provide some acceptable identification such as a driver's license or an employee identification card. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Authors and National Archives employees.

NARA 10

SYSTEM NAME:

Employee Drug Abuse/Alcoholism Files, NARA.

SYSTEM LOCATION:

This system of records is located in the personnel offices of NARA at the addresses listed in the appendix following the NARA Notices; in the offices of designated counselors; and in the offices of supervisors who supervise employees suspected or known to have drug abuse problems (including alcoholism).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NARA employees who have been suspected of known to have an alcohol or drug abuse problem.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system of records includes referrals for counseling, counseling files, and referrals for rehabilitative assistance.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

21 U.S.C. 1101 et. seq. and 5 U.S.C. 7901.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system of records are used to document that supervisors have properly dealt with employees whose work is affected by alcohol or other drug abuse; to communicate information to personnel having a need for the information in connection with their duties, such as medical or health personnel, alcohol or other drug abuse counselors and program administrators, and qualified service organizations; to provide a basis for meeting reporting requirements to the Office of Personnel Management; and to disclose information to the Department of Justice or other appropriate Federal agencies in defending claims against the United States, when the claim is based upon an employee's mental or physical condition and is alleged to have arisen because of the activities of NARA in connection with such individual. Such disclosure will be restrictively made; in particular, disclosures of information pertaining to an individual with a history of alcohol or other drug abuse will be limited in compliance with the restrictions of the confidentiality of Alcohol and Drug

Abuse Patient Records regulation, 42 CFR Part 2.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file drawers or cabinets.

RETRIEVABILITY:

Filed alphabetically at each location by name of individual.

SAFEGUARDS:

When not in normal use by an authorized person, these records are stored in lockable metal file cabinets or in secured rooms.

RETENTION AND DISPOSAL:

These records are maintained for 1 year after the employee's last contact with the counselor, or until the employee's separation or transfer, whichever comes first. These records are destroyed by shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

The Director of Personnel at 601 D Streets NW., Washington, DC 20408. Mailing address: National Archives and Records Administration (NAP), Washington, DC 20408.

NOTIFICATION PROCEDURE:

Current NARA employees may obtain information about whether they are part of this system of records from their supervisor or from their personnel officer at the appropriate address listed in the appendix following the NARA Notices, or from the NARA Director of Personnel at the address noted above, whichever is applicable. Former NARA employees should direct requests to gain access to information pertaining to them to the appropriate NARA personnel officer at the address listed in the appendix. For identification requirements refer to the NARA regulations outlined in 36 CFR Part 1202.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Supervisors, counselors, personnel specialists, and the employees themselves.

NARA 11

SYSTEM NAME:

Credentials, Passes, and Licenses, NARA.

SYSTEM LOCATION:

This system of records is maintained by the Administrative Services Division, National Archives Building, 8th and Pennsylvania Avenue NW., Washington, DC; the Director of the Washington National Records Center, 4205 Suitland Road, Suitland, Maryland; and by the Administrative Officer at other NARA facilities listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All NARA employees and volunteers whose assigned responsibilities require the issuance of credentials for identification and security purposes, or a license to operate a motor vehicle.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. Standard Form 47, Physical Fitness Inquiry for Motor Vehicle Operators (Name, date of birth, title of position, home address, agency, medical inquiry, applicant's signature and date, signature of designated official, and date).
2. NA Form 6006, Request for and Record of Credential or Pass (Name, description of individual, SSN, and place of employment).
3. NA Form 6000, National Archives Identification Card (Photo, signature of employee, name of employee, signature of issuing official, date issued, identification serial number, height, weight, color eyes, color hair, and date of birth).
4. NA Form 7001, Application for Motor Vehicle Operator's identification Card (SF 46) (Name, organization, type of vehicle, personal data and driving record, applicant's signature and date, physical fitness certification by signature of certifying official, and certification of eligibility by signature of certifying official).
5. OF 7, Property Pass (Name, building, description of property, agency, and effective date).
6. OF 55, U.S. Government Identification.
7. NA Form 6009, Parking Control Record (Name, address, agency, correspondence symbol, office telephone number, and length of service).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2104.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system are used primarily to facilitate the issuance and control of cards, parking permits, building passes, drivers licenses, and similar credentials. The routine use statements A, B, and F, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper forms.

RETRIEVABILITY:

By name.

SAFEGUARDS:

When not in use by an authorized person, these records will be stored in lockable metal file cabinets or in secured areas.

RETENTION AND DISPOSAL:

Disposition of these records shall be in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

The official NARA responsible for this system of records is the NARA Director of Administrative Services, 8th and Pennsylvania Avenue NW., Washington, DC 20408. Since this is a geographically dispersed system, individuals may gain access to it by contacting the Administrative Officers at locations listed in the appendix following the NARA Notices or the Director, Washington National Records Center (NCW), Washington, DC 20409.

NOTIFICATION PROCEDURE:

The address of the NARA offices to which inquiries should be addressed and addresses at which an individual may request whether a system contains records pertaining to himself or herself is the same as that shown in the appendix following NARA notices. Individuals should provide name, social security number, period of employment, and position held to assist the office in locating the record.

RECORD ACCESS PROCEDURES:

Individuals can obtain information on the procedures for gaining access to or contesting records from the Director, Office of Administrative Services, the Director of the Washington National Records Center, or the Administrative Officers at NARA facilities, as shown in the appendix following the NARA Notices.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

VOL 51
ISS 45
MR 7
1986
UMI

RECORD SOURCE CATEGORIES:

Information is provided by the employee being issued the credential and by the issuing official.

NARA 12

SYSTEM NAME:

Emergency Notification Rosters and Files, NARA.

SYSTEM LOCATION:

This system of records is maintained in the NARA Administrative Services Division, 8th and Pennsylvania Avenue NW., Washington, DC and in all NARA facilities outside the Washington, DC metropolitan area listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NARA officials at division director level and above, and NARA employees with emergency assignments.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records consist of roster of NARA officials; NARA employee emergency assignments; and essential employees' residence telephone numbers. Information includes name, office and home telephone numbers, home address, title and emergency assignment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2104.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system are used primarily to maintain current directory information on key NARA officials or for use by the Central Office contact point during weekends, holidays, and emergencies; to provide essential telephone service to key employees during emergencies; and to notify officials and employees of emergency conditions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

When not in use by an authorized person, these records will be stored in lockable metal file cabinets or in secured areas.

RETENTION AND DISPOSAL:

Disposition of records shall be in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

The NARA official with overall responsibility for the system of records is the Director of Administrative Services, 8th and Pennsylvania Avenue NW., Washington, DC 20408. Since this is a geographically dispersed system of records, individuals may gain access to it by contacting the officials at locations listed in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

NARA employees may obtain information as to whether they are part of this system of records from the Director of Administrative Services or the applicable director of a Presidential Library, Federal Records Center, or National Archives Field Branch listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

An individual can obtain information on the procedures for gaining access to records from the Director of Administrative Services or the applicable director of a Presidential Library, Federal Records Center, or National Archives Field Branch listed in the appendix following the NARA Notices.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Information if provided by subject individuals and their supervisors.

NARA 13

SYSTEM NAME:

Defunct Agency Records, NARA.

SYSTEM LOCATION:

This system of records is located in the Federal Records Centers at the locations listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of defunct agencies and individuals who may have had dealings with the defunct agencies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records other than those covered by Government-wide systems which are arranged or can be retrieved alphabetically by name or other personal identifiers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2108.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM:

The routine use of statements A, B, C, F, and G, described in the appendix following the NARA notices, apply to this system of records. The records, if unscheduled for disposition, are routinely used during the appraisal process.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders and card files, microfilm records in reels, and computer records on tapes. All records stored in record center containers.

RETRIEVABILITY:

Records are retrieved generally by name or social security number.

SAFEGUARDS:

When not in use by an authorized person, the records are stored in record center containers located in Federal records center storage areas.

RETENTION AND DISPOSAL:

Records appraised as permanent will be transferred to the custody of the Office of the National Archives. Records appraised as temporary will be destroyed immediately or after a fixed period of time, whichever is approved by the Archivist of the United States.

SYSTEM MANAGER(S) AND ADDRESS;

The system manager is the Deputy Archivist of the United States, 8th and Pennsylvania Avenue NW., Washington, DC 20408. Mailing address: National Archives and Records Administration (ND), Washington, DC 20408.

NOTIFICATION PROCEDURE:

Requests for assistance should be made to the Deputy Archivist of the United States, National Archives and Records Administration (ND), Washington, DC 20408.

RECORD ACCESS PROCEDURES:

NARA procedures for record access are contained in 36 CFR Part 1202.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Upon termination of an agency, the agency transfers its records to the custody of NARA.

NARA 14

SYSTEM NAME:

Payroll and Time and Attendance Reporting System, NARA.

SYSTEM LOCATION:

This system of records is located in the NARA offices wherever there are timekeepers and at the addresses listed in the appendix following the NARA Notices. Two automated series of records in this system, the Personnel Information Resources System (PIRS) and the Payroll Information Processing System (PIPS), are maintained for NARA by the General Services Administration under a reimbursable agreement.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former NARA employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system provides for reporting each employee's pay status as either on the job time or as paid or unpaid time, including absences without authorized leave. Accordingly, records include but are not limited to name, home address, telephone number, work location, social security number, hours of duty, and payroll and attendance information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C., Part III, (sec. 2101–8901) is the authority for the overall system. Specific authority for use of social security numbers is contained Executive Order 9397, 26 CFR 31.6011(b) 2, and 26 CFR 31.6109–1.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To the extent necessary, the records are available outside NARA to monitor and document grievance proceedings, EEO complaints, and adverse actions; and to conduct counseling sessions. The information contained in this system of records may be disclosed to the Office of Management and Budget in connection with the review of private relief legislation at any stage of the legislative coordination and clearance process. A record from this system of records may be provided to the Office of Personnel Management in its production of summary descriptive statistics for which these records are collected and maintained, or for related work studies. While published statistics and studies do not contain individual identifiers, in some instances the selection of elements of data included in the study may be structured in a way to make individuals identifiable by inference. The routine use statements A, B, C, D, E, F, G, and H, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders, card files, and cabinets; microfilm records in reels and cabinets; microfiche in cabinets; magnetic tapes and cards in cabinets and storage Libraries; and computer records within a computer and attached equipment.

RETRIEVABILITY:

Filed alphabetically by name.

SAFEGUARDS:

Stored in guarded buildings and/or in controlled areas.

RETENTION AND DISPOSAL:

Disposition of these records will be in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Services Division, National Archives and Records Administration, 601 D Street NW, Washington, DC 20408. Mailing address: National Archives (NAP), Washington, DC 20408.

NOTIFICATION PROCEDURE:

Current NARA employees may obtain information about this system of records from their supervisor or from the Director, Personnel Services Division, National Archives and Records Administration, 601 D Street NW, Washington, DC 20408. Former NARA employees may obtain information at the address listed above.

RECORD ACCESS PROCEDURE:

Requests from current or former NARA employees to access records should be directed to the employee's supervisor or to the Director, Personnel Services Division, at the address noted above, whichever is applicable. For written request, former NARA employees should provide full name, social security number, address, telephone number, and approximate dates and places of employment. For identification requirements, refer to the agency regulations as outlined in 36 CFR Part 1202.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

The individuals themselves, other NARA employees, supervisors, other Federal agencies, and management officials.

NARA 15

SYSTEM NAME:

Editorial Freelance Vendor File, NARA.

SYSTEM LOCATION:

The system is located in the National Archives Building.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Former and current freelance vendors qualified to perform editorial services.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence with and biographical information about former and current editorial freelance vendors, including all or parts of the following: name, address, telephone number, education, professional vita, samples of work, assignments and evaluations of work done for the National Archives, and purchase order documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2104.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by the employees of NARA who have a need for the records in the performance of their duties to review professional qualifications of freelance contract editors; to make editorial assignments to freelance contract editors; to review progress being made on an assignment; to evaluate the quality of work performed during an assignment; and to account for money spent on contract editorial work.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

Filed alphabetically by name of individual.

SAFEGUARDS:

System is in a locked file cabinet.

RETENTION AND DISPOSAL:

Disposition of these records will be in accordance with the NARA Records Maintenance and Disposition Manual.

VOL 51 ISS 45 MR 7 1986 UMI

SYSTEM MANAGER(S) AND ADDRESS:

The agency official with overall responsibility for the system of records is the Director, Publications Division, National Archives Building, 8th and Pennsylvania Avenue NW, Washington, DC 20408. Mailing address: National Archives (NEP), Washington, DC 20408.

NOTIFICATION PROCEDURE:

Information may be obtained from the official listed above.

RECORD ACCESS PROCEDURES:

Requests for these records should be addressed to the Director, Publications Division, Office of Public Programs. In person requests may be made during normal business hours. For written requests, provide full name, address, telephone number, and date span. For personal visits, individuals should provide some acceptable identification, such as a driver's license or employee identification card. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Former and current freelance vendors qualified to perform editorial services and NARA employees.

NARA 16

SYSTEM NAME:

Library Circulation Files, NARA.

SYSTEM LOCATION:

This system of records is located in the Library in the National Archives Building at 8th and Pennsylvania Avenue, NW, Washington, DC 20408. Mailing address: National Archives (NNIL), Washington, DC 20408.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All NARA employees who have borrowed books and other materials from the Library.

CATEGORIES OF RECORDS IN THE SYSTEM:

Specialized forms giving the names of individuals, materials borrowed, and dates of loan.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2104.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are primarily used by the Library staff for controlling the circulation of Library monographs and serials. The routine use statements A and F, described in the appendix following the NARA Notices, apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file trays.

RETRIEVABILITY:

Filed alphabetically by name.

SAFEGUARDS:

Records are stored in an area available to authorized Library personnel only.

RETENTION AND DISPOSAL:

Disposition of records shall be in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

The Chief, Library and Printed Archives Branch (NNIL) 8th and Pennsylvania Avenue, NW, Washington, DC 20408. Mailing address: National Archives (NNIL), Washington, DC 20408.

NOTIFICATION PROCEDURE:

NARA employees may obtain information about whether they are part of this system of records from the Library staff at the address listed above.

RECORD ACCESS PROCEDURES:

Requests from NARA employees to gain access to information pertaining to them should be directed to the Chief, Library and Printed Archives Branch (NNIL), 8th and Pennsylvania Avenue, NW, Washington DC 20408. For identification requirements refer to the agency regulations as outlined in 36 CFR Part 1202.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

NARA employees borrowing books and other materials from the National Archives Library.

NARA 17

SYSTEM NAME:

Grievance Records, NARA.

SYSTEM LOCATION:

These records are located in the personnel offices of NARA at the location listed in the appendix following the NARA Notices or designated offices in NARA where the grievances were filed.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current or former NARA employees who have submitted grievances with NARA in accordance with the Office of Personnel Management (OPM) Regulations (5 CFR Part 771) or a negotiated procedure.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system of records contains records relating to grievances filed by NARA employees under the OPM regulations. These case files contain all documents related to grievances including statements of witnesses, reports of interviews and hearings, examiner's findings and recommendations, a copy of the original and final decision, and related correspondence and exhibits. This system also includes files and records of internal grievance and arbitration systems that are established through negotiations with recognized labor organizations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 1302, 3301, and 3302; E.O. 10577 (3 CFR 1954–1958 Comp., p. 218); E.O. 10987 (3 CFR 1959–1963 Comp. p. 549).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system of records are used to disclose information to any source from which additional information is requested in the course of processing a grievance, to the extent necessary to identify an individual, inform the source of the purpose(s) of the request and identify the type of information requested. They are also used to provide information to officials of labor organizations recognized under the Civil Service Reform Act when relevant and necessary to their duties of exclusive presentation concerning personnel policies, practices, and matters affecting work conditions. The routine use statements D, F, G, and H, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders.

RETRIEVABILITY:

These records are retrieved by the names of the individuals on whom they are maintained.

SAFEGUARDS:

These records are maintained in lockable metal filing cabinets to which only authorized personnel have access.

RETENTION AND DISPOSAL:

These records are disposed of 3 years after closing of the case. Disposal is by shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

The Director, Personnel Services Division, 601 D Street NW, Washington, DC 20408. Mailing address: National Archives (NAP), Washington, DC 20408.

NOTIFICATION PROCEDURE:

It is required that individuals submitting grievances be provided a copy of the record under the grievance process. They may, however, contact the NARA personnel, or other designated office, where the action was processed regarding the existence of such records on them. They must furnish the following information for their records to be located and identified: Name, date of birth, approximate date of closing of the case and kind of action taken, and the organizational component involved.

RECORD ACCESS PROCEDURES:

It is required that individuals submitting grievances be provided a copy of the record under the grievance process. However, after the action has been closed, an individual may request access to the official copy of the grievance file by contacting the NARA personnel or other designated office where the action was processed. Individuals must provide the following information for their records to be located and identified: Name, date of birth, approximate date of closing of the case, kind of action taken, and organizational component involved. Individuals requesting access must also follow the NARA regulations as outlined in 36 CFR Part 1202 regarding access to records.

CONTESTING RECORD PROCEDURES:

Review of requests from individuals seeking amendment of their records which have been the subject of a judicial or quasi-judicial action will be limited in scope. Review of amendment requests of these records will be restricted to determine if the record accurately documents the action of NARA's ruling on the case and will not include a review of the merits of the action, determination, or finding. Individuals wishing to request amendment of their records to correct factual errors should contact the NARA personnel or designated office where the grievance was processed. Individuals must furnish the following information for their records to be located and identified: Name, date of birth, approximate date of closing of the case, kind of action taken, and organizational component involved. Individuals must also follow the NARA Privacy Act regulations outlined in 36 CFR Part 1202 regarding amendment to records.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided by the individual on whom the record is maintained, by testimony of witnesses, by agency officials, and from related correspondence from organizations or persons.

NARA 18

SYSTEM NAME:

General Law Files, NARA/NSL.

SYSTEM LOCATION:

This system of records is maintained by the Legal Services Staff, National Archives Building, 8th and Pennsylvania Avenue NW., Washington, DC 20408. Mailing address: National Archives (NSL), Washington, DC 20408.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The system covers one or more of the following categories of individuals: NARA employees, past and present; other Federal agency employees; members of the public (including individuals, corporations, and firms); witnesses in litigation; persons who have Freedom of Information and Privacy Act requests and persons about whom such requests have been made; persons pursuing tort claims against the Government or who are involved in litigation with NARA and/or have filed grievances.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system covers one or more of the following categories of records: Among other data, name of individual; position description, grade, salary; SSN; work history; complaint; history of the case; applicable law; working papers of attorneys; testimony of witnesses; background investigation materials, records subject to complaint, request, or litigation; correspondence; damage reports; contracts, accident reports, pleadings; affidavits; credit ratings; medical diagnoses and prognoses; doctor's bills; estimates of repair costs; invoices; litigation reports; and financial data.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The system is authorized by one or more of the following statutes or Executive Orders:

Freedom of Information Act, 5 U.S.C. 552 as amended; the Privacy Act of 1974, 5 U.S.C. 552a; 5 U.S.C., Part II (Civil Service Commission); 5 U.S.C., Chapter 33 (examination, selection and placement); Equal Employment Opportunity Act of 1972, 5 U.S.C. 5108, 5314–5316 and 42 U.S.C. 20003, et seq.; 5 U.S.C. 7151–7154 (antidiscrimination in employment); 5 U.S.C. 7301 (regulation of conduct); 5 U.S.C. 7501, note (adverse actions); 5 U.S.C., Chapter 77 (appeals); title 11 U.S.C. (bankruptcy); Federal Tort Claims Act, 28 U.S.C. 1291, 1346(b)(c), 1402(b), 1504, 2110, 2401(b), 2402, 2411(b), 2412(c), 2671–2680; 31 U.S.C. 191 (debts owed by or due to U.S.); Federal Claims Collection Act of 1972, 31 U.S.C. 951–953, 341 U.S.C. 240–243 (settlement of claims); E.O. 6166 Reorganization of Executive Agencies; E.O. 10577, Amending the Civil Service Rules and Authorizing a new Appointment System for the Competitive Service; E.O. 11491, Labor-Management Relations in the Federal Service; E.O. 11787, Revoking Executive Order 10987, Relating to Agency Systems for Appeals from Adverse Actions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records are used to give general legal advice, as requested, throughout NARA and to prepare attorneys for hearings and trials, to reference past actions, and to maintain internal statistics. Information may be released to the Department of Justice in review, settlement, defense, and prosecution of claims, complaints, and law suits involving contracts, torts, debts, bankruptcy, personnel adverse action, EEO, unit determination, unfair labor practices, and Freedom of Information and Privacy Act requests. The routine use statements A, B, C, E, F, and G, described in the appendix following the NARA notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

1986
UMI

SAFEGUARDS:

Records are stored in secured buildings; available to authorized persons only.

RETENTION AND DISPOSAL:

Disposition of records shall be in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

The system manager for the system is: Director, Legal Services; Staff (NSL).

NOTIFICATION PROCEDURE:

NARA notification procedures are contained in 36 CFR Part 1202.

RECORD ACCESS PROCEDURES:

NARA procedures for record access are contained in 36 CFR Part 1202.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Information in this system of records comes from one or more of the following sources: Federal employees and private parties involved in torts, contracts, personnel actions, unfair labor practices, and debts concerning the Federal Government; general law texts and sources; Dun and Bradstreet and other sources of financial information; law enforcement officers; and witnesses.

NARA 19

SYSTEM NAME:

Workers Compensation Case Files, NARA.

SYSTEM LOCATION:

This system of records is located in the personnel offices of NARA at the locations listed in the appendix following the NARA Notices and the offices of all supervisors who have had employees injured on the job or other occupational health problems with employees supervised.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NARA employees who have sustained injuries or other occupational health problems.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains accident reports (including CA-1 & 2: Federal Employees Notice of Injury or Occupational Disease); claims for compensation for injury or occupation disease (CA-4); and claims for continuance of compensation on account of disability (CA-8).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. Chap. 81 (Compensation for Work Injuries) and 5 U.S.C. 7293 and 7901.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system of records are used to identify and record those employees who have sustained injuries or other occupational health problems and provide information required by applicable law to be disclosed to a Federal, State, or local public health service agency concerning individuals who have contracted certain communicable diseases or conditions. Such information is used to prevent further outbreak of the disease or condition and is used in connection with a claim for benefits filed by an employee. The routine use statements A, B, C, F, and G, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file cabinets.

RETRIEVABILITY:

Filed alphabetically at each location by name.

SAFEGUARDS:

When not in use by an authorized person, these records are stored in lockable metal file cabinets or in secured rooms.

RETENTION AND DISPOSAL:

Disposition of records shall be in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

The Director, Personnel Services Division, 601 D Streets NW, Washington, DC 20408. Mailing address: National Archives (NAP), Washington, DC 20408.

NOTIFICATION PROCEDURE:

Current NARA employees may obtain information about whether they are a part of this system of records from their supervisor or from their personnel officer at the appropriate address listed in the appendix following the NARA Notices, or from the Director, Personnel Services Division at the address noted above, whichever is applicable. Former NARA employees may obtain information from the personnel officers at the addresses listed in the appendix.

RECORD ACCESS PROCEDURE:

Requests from current NARA employees to gain access to information pertaining to them should be directed to their supervisor or to their personnel officer at the appropriate address listed in the appendix following the NARA Notices, or to the Director, Personnel Services Division at the address noted above, whichever is applicable. Former NARA employees should direct requests to gain access to information pertaining to them to the appropriate personnel officer at the address listed in the appendix. For identification requirements, refer to the agency regulations as outlined in 36 CFR Part 1202.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

The information in this system of records is provided by the individuals to whom the records pertain, by supervisors required to complete various forms, or by the personnel specialists who prepare various records or claims.

NARA 20

SYSTEM NAME:

Reviewer/Consultant File, NARA.

SYSTEM LOCATION:

This system of records is located at the National Historical Publications and Records Commission, 1100 Pennsylvania Avenue NW, Washington, DC 20408.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Archival reviewers and consultants who apply to serve as consultants or reviewers for the National Historical Publications and Records Commission's (NHPRC) records grant program.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical information about the reviewers and consultants including name, address, telephone number, education, professional vita, publications, archival skills, archival and historical records experience, and program evaluation experience.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2501–2506.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The biographical material is used by NHPRC staff principally in the records grant program for selecting reviewers to

evaluate proposals received by NHPRC and for proposing possible archival consultants for those individuals who have received grants. The routine use statement F, described in the appendix following the NARA Notices, also applies to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

Filed alphabetically by name of individual.

SAFEGUARDS:

During normal hours of operation, records are maintained in areas accessible only to authorized personnel of NARA. After hours, the building has security guards and/or doors are secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

Records are destroyed when no longer needed for administrative purposes.

SYSTEM MANAGER(S) AND ADDRESS:

The official responsible for the system is the Executive Director, National Historical Publications and Records Commission, 1100 Pennsylvania Avenue NW., Washington, DC 20408. Mailing address: National Historical Publications and Records Commission (NP), Washington, DC 20408.

NOTIFICATION PROCEDURE:

Inquiries by individuals as to whether the system contains a record pertaining to themselves should be addressed to the system manager.

RECORD ACCESS PROCEDURES:

Requests from individuals for access to records should be addressed to the system manager. In person requests may be made during normal business hours at 1100 Pennsylvania Avenue NW., Washington, DC. For written requests individuals should provide full name, address, telephone number, and approximate date of communication with the Commission. For personal visits, individuals should be able to provide some acceptable identification such as a driver's license or employee identification card. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Archival experts who have volunteered to serve as reviewers or consultants.

NARA 21

SYSTEM NAME:

OPM Government-wide Notices. The National Archives and Records Administration maintains personnel records and files which are part of the Office of Personnel Management's (OPM) system of records or subject to control by OPM. These systems are as follows:

OPM/GOVT–1 General personnel records.
OPM/GOVT–3 Records of Adverse Actions and Actions Based on Unacceptable Performance.
OPM/GOVT–4 Executive Branch Public Financial Disclosure Reports and Other Ethics Program Records.
OPM/GOVT–7 Applicant race, sex, ethnicity and disability status records.
OPM/GOVT–9 Position classification review and retained rate of pay appeals.

SYSTEM LOCATION:

The above designated systems are located in the NARA personnel offices at the locations listed in the appendix following the NARA notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

See OPM/GOVT–1, 3, 4, 7, and 9.

CATEGORIES OF RECORDS IN THE SYSTEM:

See OPM/GOVT–1, 3, 4, 7, and 9.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

See OPM/GOVT–1, 3, 4, 7, and 9.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See OPM/GOVT–1, 3, 4, 7, and 9.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders and card files, magnetic tapes and disks, and computer printouts.

RETRIEVABILITY:

The records within this system are primarily retrieved by name.

SAFEGUARDS:

When not in use by an authorized person, these records are stored in lockable file cabinets, lockable desk drawers, and/or in secured rooms.

RETENTION AND DISPOSAL:

Disposition of these records shall be in accordance with General Records Schedules.

SYSTEM MANAGER(S) AND ADDRESS:

The Director, Personnel Services Division, 601 D Street NW., Washington, DC 20408. Mailing address: National Archives (NAP), Washington, DC 20408

NOTIFICATION PROCEDURE:

Current NARA employees may obtain information about whether they are a part of these systems of records from their personnel officer at the appropriate address listed in the appendix following the NARA Notices. Former NARA employees may obtain information as set forth in the OPM system notices.

RECORD ACCESS PROCEDURES:

Requests from current NARA employees to gain access to information pertaining to them should be directed to their personnel officer at the appropriate address listed in the appendix following the NARA Notices. Former NARA employees should direct requests to gain access to information pertaining to them as set forth in the OPM system notices.

CONTESTING RECORD PROCEDURES:

NARA rules for access to records and for contesting the contents and appealing initial determination are found in 36 CFR Part 1202. OPM rules are found in 5 CFR Part 297.

RECORD SOURCE CATEGORIES:

See OPM/GOVT–1, 3, 4, 7, and 9.

NARA 22

SYSTEM NAME:

Employee Related Files, NARA.

SYSTEM LOCATION:

This system of records may be maintained at the supervisory or administrative offices at all NARA facilities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Former and current NARA employees, applicants for employment, volunteer workers, and relatives of employees of the National Personnel Records Center.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of a variety of employee related records maintained by operating officials for the purpose of administering personnel matters affecting their employees and uncompensated workers. The documents include, but are not limited to, information on the individuals relating to name, social security number,

VOL 51
ISS 45
MR 7
1986
UMI

birth date, home and emergency addresses and telephone numbers, personnel actions, professional registration, qualifications, training, congressional employee relief bills, injuries, employment history, awards and other recognition, counseling, warnings, reprimands, grievances, appeals, conduct, leave, pay, attendance, work assignments, performance, assessments, applications for permits and passes, indebtedness complaints, travel, and outside employment. The documents include military service data on employees of the National Personnel Records Center and their relatives accumulated by operating officials in administering the records security program at the Center. This system does not include official personnel files which are covered by the Office of Personnel Management's systems of records OPM/GOVT-1 through 9.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Titles 5 and 31 U.S.C. generally.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system of records are used to initiate requests for personnel actions, to plan and schedule training, to counsel employees on their performance, to establish a basis for proposing recommendations for disciplinary actions, and to carry out personnel management responsibilities in general. The routine use statements A, B, C, D, F, and G, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders and card files, magnetic tape and disks, and computer printouts.

RETRIEVABILITY:

The records within this system are primarily retrieved by name.

SAFEGUARDS:

When not in use by an authorized person, these records are stored in lockable file cabinets, lockable desk drawers, and/or in secured rooms.

RETENTION AND DISPOSAL:

Records are reviewed annually, documents are updated, and irrelevant documents destroyed. No copies of records are retained in this system after the original or copies of the same records have been purged from the Official Personnel Folders. When an employee leaves the agency through transfer or other separation, the records in this system are immediately forwarded to the office maintaining the Official Personnel Folder. There the records are screened to ensure that there are no records that should be permanently filed in the Official Personnel Folder. The records in this system are then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Administrative officers in NARA field facilities and all NARA supervisors maintaining employee related files. The addresses of Administrative officers and NARA supervisors are listed in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information about whether an individual is a part of this system of records may be obtained from the supervisors at the appropriate repository where the individuals have records. If not known, general inquiries should be made to the appropriate Head of the Offices or Staffs. Their addresses are listed in the appendix following the NARA Notices.

RECORD ACCESS PROCEDURES:

Requests from current NARA employees to gain access to information pertaining to them should be directed to their supervisor or to their personnel officer at the appropriate address listed in the appendix following the NARA Notices, or to the Director, Personnel Services Division at the address noted above, whichever is applicable. Former NARA employees should direct requests to gain access to information pertaining to them to the appropriate personnel officer at the address listed in the appendix. For identification requirements refer to the agency regulations as outlined in 36 CFR Part 1202.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

The individuals themselves, other employees, supervisors, personnel records, and third parties submitting indebtedness complaints.

NARA 23

SYSTEM NAME:

Investigation Case Files, NARA.

SYSTEM CLASSIFICATION:

Some of the material contained in the system has been classified in the interests of the national security pursuant to Executive Order 12356.

SYSTEM LOCATION:

The system is located in the Administrative Services Division, National Archives Building, 8th and Pennsylvania Avenue NW, Washington, DC 20408.

CATEGORIES OF INDIVIDUALS IN THE SYSTEM:

Individuals covered by the system are employees, applicants for employment, and former employees of NARA and advisory committee members. Also included are researchers, employees of contractors performing custodial or guard services in buildings under NARA jurisdiction, individuals who have been the source of a complaint or an allegation that a crime has taken place, witnesses having information or evidence concerning an investigation and suspects in criminal, administrative, or civil actions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Investigative files contain information such as name, date and place of birth, experience, and investigatory material.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. App. Section 2 et seq.; Executive Order 10405, April 27, 1953; Executive Order 11478, August 8, 1969; Executive Order 12356, April 2, 1982; Executive Order 11246, September 24, 1965; and 40 U.S.C. 276a through a–7, 276c, 318 (a) through (d), and 327 through 331.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The routine use statements A, B, C, and G, described in the appendix following the NARA Notices, apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in files and file folders.

RETRIEVABILITY:

Paper records are retrieved manually by name from files that are indexed alphabetically and filed numerically by location and incident.

SAFEGUARDS:

Paper records are stored in locked alarmed vault type rooms and/or three-way combination dial safes with access limited to authorized personnel.

SYSTEM MANAGER(S) AND ADDRESS:

The official responsible for the system is the Director of Administrative Services, 8th and Pennsylvania Avenue NW., Washington, DC 20408. Mailing address: Administrative Services Division (NAS), Washington, DC 20408.

NOTIFICATION PROCEDURE:

Inquiries made by individuals as to whether the system contains a record pertaining to themselves should be addressed to the Director, Administrative Services Division (NAS), 8th and Pennsylvania Avenue NW., Washington, DC 20408.

RECORD ACCESS PROCEDURES:

Requests from individuals for access to records should be addressed to the Administrative Services Division, and should include full name (maiden name where appropriate), address, and date and place of birth. Only general inquiries may be made by phone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Individuals, employees, informants, law enforcement agencies, other Government agencies, intelligence sources, employers, references, co-workers, neighbors, and educational institutions.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

In accordance with 5 U.S.C. 552a(k)(1), (k)(2), and (k)(5), this system of records is exempt from subsections (c)(3); (d); (e)(1); (e)(4) (G), (H), and (I); and (f) of the Privacy Act of 1974. The system is exempt:

a. To the extent that the system consists of investigatory material compiled for law enforcement purposes; however, if any individual is denied any right, privilege, or benefit to which the individual would otherwise be eligible as a result of the maintenance of such material, such material shall be provided to such individual, except to the extent that the disclosure of such material would reveal the identity of a person who furnished information to the Government under an express promise that the identity of the person would be held in confidence, or, prior to the effective date of the Act, under an implied promise that the identity of the person would be held in confidence; and

b. To the extent the system consists of investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified material, but only to the extent that the disclosure of such material would reveal the identity of a person who furnished information to the Government under an express promise that the identity of the person would be held in confidence, or, prior to the effective date of the Act, under an implied promise that the identity of the person would be held in confidence.

This system has been exempted to maintain the efficacy and integrity of lawful investigations conducted pursuant to the Administrative Services Division's law enforcement responsibilities and responsibilities in the areas of Federal employment, Government contracts, and access to security classified information.

NARA 24

SYSTEM NAME:

Personnel Security Files, NARA.

SYSTEM CLASSIFICATION:

Some of the material contained in the system has been classified in the interests of the national security pursuant to Executive Order 12356.

SYSTEM LOCATION:

Personnel security files are maintained in the Personnel Services Division (NAP), 601 D Street NW., Washington, DC 20408. Records relating to violations of information security regulations are maintained by the Administrative Services Division (NAS), National Archives Building, 8th and Pennsylvania Avenue NW., Washington, DC 20408.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered by the system are employees, applicants for employment, and former employees of NARA. Also included are researchers, experts or consultants, and employees of contractors performing services under NARA jurisdiction.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel security files contain information such as name, date and place of birth, address, social security number, education, occupation, experience, and investigatory material. Information security files contain records of security violations which may include employees' names and positions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 10450, April 27, 1953, as amended; Executive Order 12356, April 2, 1982; 31 U.S.C. 686; and 40 U.S.C. 318 (a) through (d).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system of records are used as a basis for issuance of security and ADP clearances and for recommending administrative action against employees found to be in violation of NARA information security regulations. The routine use statements A and F, described in the appendix following the NARA notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders and microfiche in cabinets.

RETRIEVABILITY:

Paper records are retrieved manually by name from files that are indexed alphabetically and filed numerically by location and incident. Microfiche records are filed alphabetically or by social security number.

SAFEGUARDS:

Records are stored in locked, alarmed room and/or three way combination dial safes with access limited to authorized employees. Information is released only to officials on a need-to-know basis.

RETENTION AND DISPOSAL:

Disposition of these records is in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

The official responsible for the personnel security files is the Director of Personnel Services (NAP), 601 D Street, NW., Washington, DC 20408. The official responsible for files relating to violations of information security regulations is the Director of Administrative Services (NAS), 8th and Pennsylvania Avenue NW., Washington, DC 20408.

NOTIFICATION PROCEDURE:

Inquiries by individuals as to whether the system contains a record pertaining to themselves should be addressed to the applicable system manager.

RECORD ACCESS PROCEDURES:

Requests from individuals for access to records should be addressed to the applicable system manager and should include full name (maiden name where appropriate), address, and date and place of birth. Only general inquiries may be made by telephone.

VOL 51 ISS 45 MR 7 1986 UMI

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Individuals, employees, informants, law enforcement agencies, other Government agencies, employees references, co-workers, neighbors, educational institutions, and intelligence sources.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

In accordance with 5 U.S.C. 552a (k)(1), (k)(2), and (k)(5), the personnel security case files in this system of records are exempt from subsections (c)(3); (d); (e)(1); (e)(4) (G), (H), and (I); and (f) of the Privacy Act of 1974, as amended. The system is exempt:

a. To the extent that the system consists of investigatory material compiled for law enforcement purposes; however, if any individual is denied any right, privilege, or benefit to which the individual would otherwise be eligible as a result of the maintenance of such material, such material shall be provided to such individual, except to the extent that the disclosure of such material would reveal the identity of a person who furnished information to the Government under an express promise that the identity of the person would be held in confidence or, prior to the effective date of the Act, under an implied promise that the identity of the person would be held in confidence; and

b. To the extent the system consists of investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified material, but only to the extent that the disclosure of such material would reveal the identity of a person who furnished information to the Government under an express promise that the identity of the person would be held in confidence, or, prior to the effective date of the Act, under an implied promise that the identity of the person would be held in confidence.

This system has been exempted to maintain the efficacy and integrity of lawful investigations conducted pursuant to the Administrative Services Division's and the Personnel Services Division's responsibilities in the areas of Federal employment, Government contracts, and access to security classified information.

Appendix

The following routine use statements will apply to National Archives and Records Administration notices where indicated:

A. Routine Use-Law Enforcement: In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

B. Routine Use-Disclosure When Requesting Information: A record from this system of records may be disclosed as a routine use to a Federal, State, or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary, to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

C. Routine Use-Disclosure of Requested Information: A record from this system of records may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, conducting a security or suitability investigation, classifying a job, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

D. Routine Use-Grievance, Complaint, Appeal: A record from this system of records may be disclosed to an authorized appeal or grievance examiner, formal complaints examiner, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee. A record from this system of records may be disclosed to the United States Office of Personnel Management in accordance with its responsibility for evaluation of Federal personnel management. To the extent that official personnel records in the custody of NARA are covered within the system of records published by the Office of Personnel Management as Government-wide records, those records will be considered as a part of that Government-wide system. Other official personnel records covered by notices published by NARA and considered to be separate systems of records may be transferred to the Office of Personnel Management in accordance with official personnel programs and activities as a routine use.

E. Routine Use-Congressional Inquiries: A record from this system of records may be disclosed as a routine use to a Member of Congress or to a Congressional staff member in response to an inquiry of the Congressional office made at the request of the individual about whom the record is maintained.

F. Routine Use-NARA Agents: A record from this system of records may be disclosed as a routine use to an expert, consultant, or a contractor of NARA to the extent necessary for them to assist NARA in the performance of its duties.

G. Routine Use-Department of Justice/Courts: A record from this system of records may be disclosed to the Department of Justice or in a proceeding before a court or adjudicative body before which NARA is authorized to appear, when (a) NARA, or any component thereof; or, (b) any employee of NARA in his or her official capacity; or, (c) any employee of NARA in his or her individual capacity where the Department of Justice or NARA has agreed to represent the employee; or (d) the United States, where NARA determines that litigation is likely to affect the agency or any of its components, is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice or by NARA before a court or adjudictive body is deemed by NARA to be relevant and necessary to the litigation, provided, however, that in each case, NARA determines that disclosure of the records is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

H. Routine Use-MSPB, FLRA, and EEOC. Information from this system of records may be disclosed to officials of the Merit Systems Protection Board or Federal Labor Authority, or the Equal Employment Opportunity Commission when requested in performance of their authorized duties.

Part V

Department of the Interior

Minerals Management Service

30 CFR Part 216

Production Accounting and Auditing System; Reporting and Recordkeeping Requirements; Final Rule

VOL 51 ISS 45 MR 7 1986 UMI

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 216

Production Accounting and Auditing System; Reporting and Recordkeeping Requirements

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Final rule.

SUMMARY: This final rule prescribes the information collection requirements necessary to verify that mineral production quantities have been correctly reported and used in calculating royalties due from Federal and Indian leases, including the Outer Continental Shelf. This system is called the Production Accounting and Auditing System (PAAS).

EFFECTIVE DATE: April 7, 1986.

FOR FURTHER INFORMATION CONTACT: Lucy R. Querques on (303) 231–3865 or FTS 326–3865.

SUPPLEMENTARY INFORMATION: The principal authors of this final rulemaking are Peter Rutledge, John Price, Billie Clark, and Martin Grieshaber of the Minerals Management Service, Lakewood, Colorado.

I. Background

On April 1, 1985 (50 FR 12828), MMS proposed regulations for the implementation of the PAAS.

In January 1982, the Commission on Fiscal Accountability of the Nation's Energy Resources (Commission) made several recommendations to improve internal controls of accounting for royalties due the Government from Federal and Indian leases. The term "Federal leases" includes Outer Continental Shelf (OCS) lands. One of the primary purposes for which the PAAS was developed by the MMS was to respond to the Commission recommendation:

"That the Royalty Managers incorporate production data into the . . . system in order to cross-check the data for all leases for each payment period."

Section 101(a) of the Federal Oil and Gas Royalty Management Act of 1982 (Act), 30 U.S.C. 1711(a), provides that, "The Secretary shall establish a comprehensive inspection, collection and fiscal and production accounting and auditing system. . . ." In addition, section 103(a) of the Act, 30 U.S.C. 1713, states that:

> "A lessee, operator, or other person directly involved in developing, producing, transporting, purchasing, or selling oil or gas subject to this Act through the point of first sale or the point of royalty computation, whichever is later, shall establish and maintain any records, make any reports, and provide any information that the Secretary may, by rule, reasonably require for the purposes of implementing this Act. . . ."

The Department is implementing similar cross-checks for solid materials in response to the statement of the Commission that, ". . . it appears that the general problems of verifying production, . . . and designing an effective audit program are common to all minerals." Report of the Commission at 181.

The PAAS is an integrated computer system, based upon production and processing reports submitted by lease and facility measurement point operators, designed to track mineral production on Federal and Indian lands, including the Outer Continental Shelf, from the source of production to the point of disposition with emphasis on the point of royalty determination, and/or point of sale, whichever is applicable.

The Auditing and Financial System (AFS), operated by MMS, will provide payment and sales volumes and values reported by payors. These data will be compared to lease-level production and processing volumes reported to PAAS by producers and facility operators. This comparison will enable the MMS to verify that proper royalties are being received for all minerals produced.

The PAAS is based upon an information collection system composed of eight forms of oil and gas. Three forms are needed for solid mineral leases; one form is applicable to all minerals. Some of these forms are one-time reports. However, all lease operators are required to periodically (usually monthly) submit either Form MMS–4054 for oil and gas, or Form MMS–4059 for solid minerals. Other forms are for selected use, such as the Form MMS–4056, which is required monthly only from gas plant operators, and Form MMS–4058, required only from operators of facilities or measurement devices handling commingled production.

The regulations herein prescribe which person is to file each form and when the report is due. They also designate when the rules will become applicable to operators who are not already reporting to the PAAS on the effective date of this rule. All offshore leases and all solid mineral leases issued on or after the effective date of this rule shall be subject to the requirements of this part without any conversion period. The report forms covered by this rule are listed below, together with the applicable section number that explains the use of the form:

Form No. and Name of form	Section reference
MMS–4050—Mine Information Form (MIF)	216.201
MMS–4051—Facility and Measurement Information Form and Supplement (FMIF and FMIF–S).	216.202 and 216.51
MMS–4052—Well Information Form (WIF)	216.52
MMS–4053—First Purchaser Report (FPR)	216.53
MMS–4054—Oil and Gas Operations Report (OGOR).	216.54
MMS–4055—Gas Analysis Report (GAR)	216.55
MMS–4056—Gas Plant Operations Report (GPOR).	216.56
MMS–4057—Fractionation Plant Operations Report (FPOR).	216.57
MMS–4058—Production Allocation Schedule Report (PASR).	216.58
MMS–4059—Solid Minerals Operations Report (SMOR).	216.203
MMS–4060—Solid Minerals Facility Report (SMFR).	216.204
MMS–4061—API Well Number Change Report (ANCR).	216.61

The Mine Information Form (Form MMS–4050) is required by MMS to identify the mine, the products recovered, the leases that make up the mine, and the mining methods used on each lease.

The Facility and Measurement Information Form (Form MMS–4051) is required by MMS to precisely identify the facilities where oil and gas production is stored or processed and the metering points where production is measured for sale or transfer. The information is used for reference by field operations personnel and auditors to assure that all production is accounted for properly.

The Well Information Form (Form MMS–4052) is required by MMS to obtain data or confirmation of data from each lease operator to assure that all wells are identified. Primary identification is by the American Petroleum Institute (API) number. Each well on a lease is identified by API and operator well number, producing interval, location, well status, date of first production, and producing reservoir or formation name.

The First Purchaser Report (Form MMS–4053) is required by MMS to obtain product prices from selected first purchasers of any product attributable to a Federal or Indian mineral lease. The information is used by MMS auditors to independently verify prices and quantities reported by lease operators.

The Oil and Gas Operations Report (Form MMS–4054) is required by MMS to identify all operations on production and disposition of oil and gas from Federal and Indian lands. Monthly production information will be compared with monthly data on sales and royalty from Form MMS–2014, Report of Sales and Royalty Remittance, to ensure that proper royalties are paid on the oil and gas reported as produced or sold.

The Gas Analysis Report (Form MMS–4055) is required by MMS to identify the separate components of natural gas production. The information on the GAR is used in conjunction with the GPOR and OGOR to make lease-level AFS/PAAS comparisons on processed and natural gas liquids.

The Gas Plant Operations Report (Form MMS–4056) is required by MMS to identify the disposition and components of natural gas produced from or allocated to Federal and/or Indian leases. MMS uses the data to expected residue gas and natural gas liquids production and to determine royalties due.

The Fractionation Plant Operators Report (Form MMS–4057) is required by MMS to identify the volumes of raw make transferred to the plant and of natural gas liquids produced. MMS uses the information to determine the production of specific components on which royalties are due, in conjunction with data from the Gas Plant Operations Report.

The Production Allocation Schedule Report (Form MMS–4058) is required by MMS to determine whether sales reported by the leasee are reasonable in cases where such sales are from production which has been commingled. Each line identifies a lease or measurement point and its delivered production and allocated sales or transfer volumes.

The Solid Minerals Operations Report (Form MMS–4059) is required by MMS to identify, for each lease and lease product, the beginning inventory, quantity produced, processing losses, net production, quality of production, type of disposition, quantity disposed of, identification of the processing facility, measurement point number at which disposition quantity is determined, and ending inventory. For mines from which production is sold after secondary processing or from remote storage, the form identifies the lease or development contract credited with an allocated part of the production, the product and quantity sold, and the facility from which it was sold.

The Solid Minerals Facility Report (Form MMS–4060) is required by MMS to identify for each mineral processed by a mineral processing facility the mine and measuring point from which a mineral was received, the type of product received, and the quantity and quality of inputs and outputs. The report is also used by MMS to identify, for each product and its source mine, the beginning inventory, raw materials received during the reporting period, amount of production, type of disposition, quantity sold or transferred, the facility or measuring point to which it is transferred, and ending inventory. MMS uses this information to insure that lease production is accurately tracked from the mine to the point of royalty determination, when royalty is determined after secondary processing. The information obtained is compared with that from the Solid Minerals Operations Report.

The API Well Number Change Report (Form MMS–4061) is required when a well with a temporary identification number is assigned a permanent American Petroleum Institute (API) well number or when the API well number and producing interval code combination used in the PAAS is in error and needs to be changed. The report gives the existing well number and producing interval and the new well number and producing interval. MMS uses the information to change the identification of the well in the data base.

The PAAS pilot program was operated with voluntary participants from both the onshore and offshore environment. Subsequent conversions have brought all OCS operators into the system as well as most of the solid mineral operators. These regulations will apply immediately to all reporters currently submitting reports to the PAAS. If, in the future, reporters are to be converted to the PAAS, they will be given notice one year prior to the date of first reporting (the conversion period). This period is intended to provide the reporter with ample time to gather reference data and receive training with respect to the PAAS reporting requirements. The time period between the notification of conversion and the date of first reporting may be less than one year at the request of the reporter being converted to the PAAS reporting guidelines and regulations.

During the conversion period, the reporter is required by the rules to file the Facility and Measurement Information Form (Form MMS–4051), the Well Information Form (Form MMS–4052), or the Mine Information Report (Form MMS–4050), as applicable. The provisions on applicability are in § 216.20 of the rules.

MMS will specifically notify each reporter being converted to the PAAS of the startup schedules for reporting under the PAAS. Simultaneously with startup notification, MMS will provide each reporter with a schedule to discontinue reporting using existing production reports 3160–6 (formerly 9–329 and 9–329–1), 9–152, 9–373A, 9–128, 9–128a, 9–128b, 9–128c, 9–128d, 9–368, 9–1146, etc. For some reporters there may be a short period of overlap of the old and new reporting systems to assure a smooth transition. These regulations will apply to newly converted reporters as MMS directs during the conversion period. Following the completion of the conversion to the PAAS, the Department will promulgate regulations removing the regulatory requirements for submission of existing production reporting forms from the regulations in 43 CFR Part 3160. This rulemaking amends 30 CFR Part 216 by adding Subparts A, B, and E containing §§ 216.1, 216.2, 216.6, 216.10, 216.20, 216.25, 216.30, 216.40, 216.50, 216.51, 216.52, 216.53, 216.54, 216.55, 216.56, 216.57, 216.58, 216.61, 216.200, 216.201, 216.202, 216.203, and 216.204.

II. Summary of Rules Adopted

The rule being adopted is substantially the same as the proposed rule. Therefore, much of the discussion in the preamble to the proposed rule applies to the final rule. Where significant changes are being made to the final rules, they are discussed in the preamble.

The provisions of Part 216 establish the reporting requirements for the PAAS. This part indicates the types of reports which must be filed in order for the PAAS to accomplish its stated goal of tracking mineral production on Federal and Indian lands from the source of production to the point of disposition with emphasis on the point of royalty determination and/or point of sale, whichever is applicable.

III. Comments Received on Proposed Rule—General

The proposed rulemaking published April 1, 1985 (50 FR 12828), provided for a 60-day public comment period which ended May 31, 1985, and was extended to June 17, 1985. All comments received during that time period are addressed in this section, and the text of these regulations has been changed to reflect comments as appropriate.

Six commenters thought the conversion of onshore operations to the PAAS should be delayed until the system can be reevaluated and a decision reached on the final scope and design of the PAAS. Two commenters stated that the onshore conversion should never occur and that current reporting requirements are adequate. Seven commenters said the design and reporting requirements of the system exceeded the information reasonably required and that the system would be

VOL 51 ISS 45 MR 7 1986 UMI

overburdened by details concerning the amount and type of data being collected.

The Royalty Management Action Plan recently issued by DOI, calls for a study of the PAAS, including the advantages and disadvantages of proceeding with the conversion of the remaining onshore Federal and Indian leases to the PAAS. At present, 2.5 percent of onshore leases are in the PAAS as a result of the pilot program effort. To date, two reporters participating in the pilot program have requested to convert the remainder of their onshore leases to PAAS to eliminate the need for maintaining two separate production reporting systems—one automated and one manual. MMS is allowing these conversions to take place on a case-by-case basis to reduce reporting burden and also to obtain additional information about the feasibility of large-scale onshore lease PAAS reporting.

As part of the Department's Lease Management Information Study, a report will be prepared and issued in late fall 1986. Among the specific aspects of onshore reporting to be studied are:

—Experiences of offshore reporters that affect large onshore operators.
—The problems associated with developing and maintaining a large reference data base for onshore leases.
—Alternatives for PAAS reporting for small operators with few leases or minimal production.
—Industry burden associated with extension of PAAS into the onshore environment.
—The feasibility of obtaining some or all of the PAAS data requirements from other sources.
—The feasibility of a less frequent reporting cycle for onshore Federal and Indian leases.

Four commenters stated that the PAAS implementation should be delayed until the valuation guidelines have been finalized.

The PAAS is a production accounting system. The current valuation guidelines, as well as any future revisions, will not affect the reporting requirements in the PAAS nor will the PAAS affect the valuation guidelines.

Four commenters said that MMS should delay further expansion of the PAAS until the AFS is correct and fully operational.

The PAAS collects production volume, well status, and disposition information which is then compared with volumes reported to the AFS. Functionally, the PAAS does not depend on the AFS which is undergoing conversion to the new mainframe computer purchased by MMS.

Two commenters said that MMS should test and prove the capability of the AFS/PAAS exception processing subsystem.

The complete exception processing subsystem of the PAAS, including the AFS/PAAS comparison, has been tested. The system has proven its capability to make accurate comparisons of PAAS and AFS data using information from pilot companies and data being collected from all offshore reporters.

Six commenters stated that, based upon experience gained during the PAAS pilot and subsequent offshore conversion, the proposed 180-day notice of conversion was too short.

MMS agrees and has changed this time interval to one year, allowing a shorter period if requested by the reporter.

One commenter thought that the PAAS would be limited by hardware capacity if further conversion efforts were not delayed.

The acquisition of a new mainframe computer by Royalty Management and the conversion of the AFS to the more sophisticated and larger computer will make available the hardware which currently houses the AFS data bases. This additional computer capacity should alleviate any concerns about the potential expansion of the PAAS to onshore operations.

One commenter stated that the PAAS Reporter Handbook should be included in the regulations because it contains the complex and sophisticated requirements of the PAAS.

The purpose of the regulations is to outline which forms and what data are required by the PAAS. The various codes, field by field explanations, and edits are part of the implementation of the PAAS, not the regulatory requirements.

Numerous commenters questioned the necessity of reporting more than operations and production data at the lease level. They thought the reporting should end with the OGOR and corroborative reporting was not warranted; therefore, the GAR, GPOR, FPOR, and PASR forms should be eliminated.

The information contained on the GAR, GPOR, and FPOR is necessary to meet the stated objective of the PAAS which is to track the product from the source to the point of sale or royalty determination. In the case of gas, this may be the tailgate of the gas or fractionation plant. Volumes for which royalties are due are reported to the AFS at this level. Because of the nature of the comments received, we intend to establish a nine-month trial period to assess the effectiveness of the data being collected on these forms. One year from the effective date of these regulations, MMS will report the results of this analysis. If the reporting requirements for these forms change, based upon this analysis, the appropriate regulatory action will be pursued. Until such time, pursuant to the regulations, reporting is required on these forms.

The PASR provides the PAAS with corroborative data pertaining to the allocation of sales back to the individual lease/agreements involved in commingling situations. Upon recommendations from industry representatives, following the pilot phase, the form was extensively redesigned to more accurately reflect actual operations. It is the opinion of MMS that PASR reporting is essential to the integrity of the PAAS.

Fifteen commenters questioned the accuracy of the $1.5 million cost burden of the proposed regulations. One main reason given for doubting the estimated cost was that the development and implementation of a PAAS reporting system had already been costly considerable sum.

In general, commenters failed to understand the basis for the $1.5 million estimate associated with additional burden on industry. The $1.5 million figure included only the estimated cost of *additional* burden hours over and above estimated burden associated with existing manual production reporting. The figure did not include costs associated with the development of automated systems or acquired or developed software which industry may have chosen to purchase to comply with the PAAS requirements. The choice to automate was not a requirement of the PAAS reporting. Currently, nine of the one hundred ninety-seven operators providing PAAS reports submit OGOR information via magnetic tape.

It is the opinion of MMS that the costs of systems purchased by industry should not be included in burden cost analysis for the following reasons:

—Trends in industry over the last ten years have led to the development of automated production accounting systems to meet industry needs. Some of those systems have been enhanced or modified to allow a company to comply with the PAAS reporting requirements. These incremental costs are minimal when compared to the sunk costs of systems development which was initiated voluntarily by industry.
—Many of the software programs acquired by industry at considerable expense are not required by MMS to meet the PAAS reporting requirements. They are primarily aimed at allowing industry to test report data prior to submission to MMS against replicated PAAS edits to determine the extent of compliance with lease management requirements and potential liability for noncompliance.

Hence, when looked at in the proper context, MMS still maintains that the $1.5 million figure is a good estimate of the increased burden hours associated with the PAAS reporting.

Four commenters thought training should be provided to any "Reporter" required to submit a PAAS report to MMS. They questioned the intent of the wording "the MMS provides special training and assistance to small organizations" under the heading of Regulatory Flexibility Act in the preamble to the proposed rule.

The PAAS, since its inception, has relied heavily on contact with the industry. Through the American Petroleum Institute (API), Council of Petroleum Accountant Societies (COPAS), and several major oil and gas company representatives, a good working relationship with industry has been maintained. This cooperation continued during the Pilot Phase and the conversion of all OCS operators. From the beginning of the conversion effort, PAAS personnel have been available to assist the reporter through conversion training sessions and necessary follow-up visits. The knowledge gained from these experiences will continue with all future PAAS conversions.

One commenter questioned the statement made under the heading Paperwork Reduction Act of 1980 in the preamble to the proposed rule that "Information collection under provisions of § 216.30 will affect less than 10 respondents annually . . . ."

Since the inception of the PAAS, no requests for information under these provisions have been made. The 10 respondents estimate appears reasonable.

One commenter believes that some of the proposed requirements under §§ 216.201, 216.202, 216.203, and 216.204 are not needed to determine royalty payments for its Federal leases and, therefore, wants to avoid the time and cost involved in reporting information not required.

For MMS to ensure that proper royalties are being received for all minerals produced and sold, the PAAS is needed to track production and sales prior to royalty determination. Therefore, the reporting guidelines for solid minerals are necessary and appropriate.

IV. Comments Received on Proposed Rules—Specific by Section

Section 216.1 Purpose

Three commenters stated that the purpose as outlined in the proposal was broader than that enumerated in section 101(a) of the Federal Oil and Gas Royalty Management Act and, therefore, the PAAS would be expanded into a broader data collection system than was contemplated by Congress.

MMS believes that the scope of PAAS conforms with section 101(a) of the Act in that it sets up a comprehensive production accounting system that will provide the capability to accurately determine if proper royalties are being paid. The Department's Lease Management Information Study will reassess lease information data currently being received by the Department and the industry burden in supplying these data. This reassessment will include the relationship of current and future data requirements and the PAAS.

One commenter wondered if the term "agreement" used in this section is the same as "agreement" as defined in § 216.6.

Yes, the term "agreement" as used in this section is the same as defined in § 216.6.

One commenter stated that the purpose should consider the future possibility that comparisons between the PAAS and AFS can be done at the First Purchaser Division Order level.

The PAAS is designed to collect data from operators at the lease/agreement or facility level. The First Purchaser Report is included in the PAAS to be responsive to recommendations of the Linowes Commission. It provides a mechanism for collection of data for audit purposes at the request of the Royalty Compliance Division and, as such, will not be required for all reporters.

One commenter stated that the purpose should address the full implementation of the PAAS for both onshore and offshore.

The decision concerning any further implementation of the PAAS will be made as part of the Department's Lease Management Study. The regulations are appropriate for complete and accurate production reporting for both onshore and offshore operations.

Section 216.2 Scope

One commenter stated that the scope was too broad without the issuance of formal valuation guidelines because the point of royalty determination could not be conclusively identified.

The PAAS has the ability to modify the royalty determination point data so that it will be consistent with the applicable valuation guidelines.

One commenter felt that all conversion data from the calendar year in which conversion to the PAAS is being done should be loaded into the system.

The PAAS is not intended to collect historical data that has previously been supplied but simply to begin accepting reports on a monthly basis, beginning with the first month of conversion.

One commenter questioned whether leases, as mentioned in this section, include sand and gravel permits on which royalties are also paid.

Yes, sand and gravel permits are included in the intent of this section. The change in definitions in § 216.6 reflects this intent.

Section 216.6 Definitions

The commenters stated that the definition of "operator" should be identical to the definition used in the Federal Oil and Gas Royalty Management Act of 1982. They believed that the expanded definition would cause problems because it is too broad.

The PAAS definition of "operator" is meant to include all entities who have a reporting responsibility under the PAAS data collection formats. Operators of gas plants, for example, are required to submit the appropriate reports but lease-level reporting by operators of plants or facilities is not the intention of the PAAS. The definition of operator in the PAAS was expanded to include the wording found in section 103(a) of the Act. MMS believes no change is necessary.

Five commenters agreed with the definition of "first purchaser" as long as a sale between affiliates is considered a first sale for royalty purposes.

MMS does not consider a sale between affiliates to be a first sale for most royalty purposes. However, for purposes of the PAAS reporting requirements only, a transfer between affiliates falls within the definition of "first purchaser."

Four commenters stated that the definition of "raw make" should not include the phrase "and transferred to a fractionation plant for further processing" because not all raw make is transferred but is sometimes sold "as is."

The word "and" in the fourth line of the definition has been changed to "which sometimes" in order to address

VOL 51
ISS 45
MR 7
1986
UMI

all situations involving the disposition of raw make.

One commenter stated that the definition of "facility" may cause invalid information to be supplied on the FMIF and FMIF–S without formal valuation guidelines being in effect. This would result in an additional cost to industry in the event much of the data base would need to be redeveloped.

MMS believes that the final valuation guidelines, when ultimately published, will not seriously affect the PAAS in regard to the data submitted on the FMIF and FMIF–S. No compehensive changes are anticipated to be necessary.

One commenter stated that the definition of "oil or gas" did not reflect condensate.

The proposed definition has been changed to explicitly cover condensate.

One commenter noted that the definition of "measurement device" was silent as to industry-recognized metering standards.

For PAAS purposes, a "measurement device" is the mechanism (meter, scale, tank gauging) by which the volume to be reported is determined. The authority for approval of such devices is contained in 43 CFR 3162.7–2 and 3162.7–3 for onshore Federal and Indian leases and 30 CFR 250.60 and 250.61 for offshore Federal leases.

Section 216.10 Information collection

One commenter stated that a reference should be made to the comparison of production data with revenue data.

There are references made to the AFS/PAAS comparison in the final regulations.

One commenter thought that § 210.10 should be amended to reflect that the forms, together with their documentation and instructions, should have been published for public comment as a proposed rule.

The forms and their documentation have in fact been made available for public comment in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35) (PRA) and the implementing regulations. We have issued information collection notices regarding the PAAS forms in the **Federal Register** (48 FR 31473) and (50 FR 25335). These notices referenced the availability of the forms and explanatory materials for public comment. The PRA provides a mechanism for commenting of forms.

Section 216.20 Applicability

A new § 216.20 Applicability, has been added to the final rule to state clearly when the PAAS rules will become applicable to a reporter.

Section 216.21 General obligations of the reporter

Five commenters questioned the reference made to the PAAS Reporter Handbook as a source of specific guidance on the use of the forms. They thought it was possible that the Handbook could become a vehicle for changing the existing rules and regulations.

As stated above, the Handbook is intended to be an instructional tool which provides guidelines and reference data (including examples) to assist the reporter in completing the appropriate forms.

One commenter thought that the regulations should require a reporter to give notice to the lessor that reporting under the PAAS was to begin with a certain report period.

MMS believes that the one-year notification of conversion included in the regulations will provide sufficient time for contact between reporters and lessors concerning PAAS reporting.

Section 216.25 Confidentiality

Eight commenters noted that the proposed regulations made no reference to "tight hole" data and test production nor mentioned how the PAAS was going to treat such data.

The PAAS gathers production data. After acceptance of the information into the system, reports are supplied to the BLM in the case of onshore reporters and the MMS in the case of offshore reporters. Because these are the agencies that classify wells as tight holes, it is their responsibility to keep operations and test production information confidential until such time as the data is available for public inspection. Royalty Management has no facilities for the public inspection of PAAS data. If, in the future, the necessity arises for the PAAS to keep particular information confidential, a method and procedure for doing so will be developed and the reporter notified.

Seven commenters questioned the reference to geologic geophysical information and whether the PAAS intended to collect this data.

The only geologic and geophysical data collected by the PAAS is the reservoir/formation name gathered on the Well Information Form. This data is provided back to the individual reporters and the BLM on the appropriate confirmation reports. The PAAS will not collect any other geologic or geophysical information.

One commenter stated that § 216.25(a)(1) should be expanded to include references to the Tribal Leasing Act of 1938 (25 U.S.C. 396a et seq.) and the Allotted Indian Land Leasing Act of 1909 (25 U.S.C. 396).

The references have been included in the regulations.

One commenter urged the MMS to expand the confidentiality provisions of § 216.25 to also include coal quality information.

Information collected by the PAAS on the solid minerals reporting forms is regarded as confidential and all monthly activity reports supplied to the Bureau of Land Management are marked as such.

Section 216.30 Special forms and reports

Six commenters stated that this section was too vague. They thought that if special reports were required, the reports should be subject to public comment via proposed rulemaking procedures prior to implementation.

The first sentence of the regulation has been eliminated. The term "MMS" in the second sentence has been replaced with "Associate Director." The regulation has been reworded so that it will conform more closely with 30 CFR 210.105 and 250.96. Section 216.30 is included in the regulations to establish the rule referenced in section 103(a) of the Act, which empowers the Secretary to collect data determined to be necessary.

MMS disagrees that forms always must be issued through rulemaking. When MMS has the authority to collect the information, the form for doing so does not require rulemaking unless the form substantially affects the rights or obligations of the reporter.

Section 216.40 Assessments for incorrect or late reports and failure to report

Twelve commenters requested a further clarification of "incorrectly completed" because the term is so vague that assessment of penalties would be arbitrary. Nine comments contended that the proposed penalty system was excessive and made no provisions for reporters who were making a good faith effort as compared to habitually bad reporters. Two comments concerned the complexity of the system and the inability to submit 100 percent correct data. Two commenters thought the reporter should not be penalized for errors caused by typographical or footing problems or errors attributable to problems within the PAAS data base.

It is the opinion of MMS that an incorrectly completed report is one that fails to pass the system edits. The edits, as outlined in the Reporter Handbook, are designed to prevent the acceptance

of erroneous data. All late or incorrect reports, regardless of the cause, are detrimental to the PAAS and the efficient operation of the Royalty Management Program; thus, MMS wants PAAS reporting to be as accurate and timely as possible. However, MMS recognizes that some reporting problems are beyond the control of the reporters. MMS will not make assessments for those types of problems (e.g., reports delivered late because of bad weather).

Incorrect reporting may be penalized under the provisions of § 216.40 of these regulations. Assessments made under the provisions of § 216.40 do not preclude the issuance of civil penalties under 30 CFR Part 241 for habitual misreporting. Failure to report could also result in the imposition of civil penalties.

Seven commenters took exception to the interpretation of a report as being an individual line of production information.

MMS believes that for the purpose of determining accurate assessments for incorrect reporting, each line of production information on the stated forms constitutes a report. This also is consistent with the MMS definition of reports relating to assessments for reporting errors in the AFS, 30 CFR 218.56.

One commenter stated that this section should be deleted because any civil penalty authority of the Secretary related to production accounting has been subsumed into and/or preempted by section 109 of the Act.

MMS disagrees with this interpretation of the Act. Section 304(a) of the Act provides that the penalties and authorities of the Act are supplemental to, and not in derogation of, any penalties or similar authorities in other laws. The Secretary's authority for the assessments provided by § 216.40 is derived not from the Act but from the Secretary's responsibilities to administer the Mineral Leasing Act, the Outer Continental Shelf Lands Act, and other mineral leasing laws.

One commenter asked if there would be a grace period on assessments after conversion to PAAS, recommending that no assessments be made until the system is fully operational and all conversions have been made.

Assessments will not be considered until an appropriate period of time has passed following an operator's conversion to the PAAS. This time period could be as many as four report periods.

Section 216.50 [Reserved]

Section 216.51 Facility and Measurement Information Form and Supplement (FMIF and FMIF–S)

One commenter stated that the second "of" in line 19 of § 216.51(a) should be "or".

The change has been made in the final regulations.

One commenter suggested a clarification of the word "party" referenced in line 11 of § 216.51(b).

The word "party" has been changed to "person."

One commenter thought the regulations should require the operator to certify that the measurement device meets recognized standards, that a flow chart referencing measurement location with respect to the wellhead be provided, and that the regulations should provide guidance as to proper placement of the metering loop.

All these comments fall under the auspices of the appropriate operations agency and are not within the scope of the PAAS functions. No changes will be made to the proposed regulations.

One commenter was concerned about the use of zeroes and alpha o's in the same fields. He thought it was "only asking for trouble" within an already complex system.

MMS realizes that some problems may arise from allowing these two characters in the same fields. If the system is redesigned in the future, consideration will be given to not allowing these two characters in the same field.

One commenter requested a clarification as to who was responsible for submittal of the FMIF subsequent to conversion.

After conversion, Form MMS–4051 must be filed by the operator with MMS/RMP for all new, or changes to, facilities or measurement devices which are under the administrative control of the Bureau of Land Management. Updates to the PAAS data base for MMS OCS approved facilities and measurement devices will be made by the appropriate MMS office. The regulation has been rewritten to reflect this understanding.

Section 216.52 Well Information Report (WIF)

One commenter stated that because the producing interval is assigned by MMS, MMS should bear the responsibility of change and notification of industry.

MMS provides confirmation reports to the operator of the well when changes are made to the API well number and/or producing interval code.

One commenter stated that the regulation requires the submittal of a WIF on a one-time-only basis. He questioned subsequent changes to the API well number, well status, and producing interval code and who was required to file these forms.

Only the initial WIF is to be submitted by the operator prior to conversion. Subsequent additions of wells or changes to existing wells will be made by the appropriate BLM or MMS/OCS office.

One commenter thought that the following data items should be required on the WIF: purchaser name and number, purchaser assigned lease/property number, windfall profit tax tier, and Natural Gas Policy Act certification category.

The items that the commenter requested to be added to the WIF are not necessary for the accurate reporting of production. They are royalty/valuation related items and as such do not belong in the PAAS. MMS believes that including these items would be inappropriate.

Section 216.53 First Purchaser Report (FPR)

One commenter stated that a more reasonable time limit for record retention than six years should be applicable to first purchasers.

The six-year recordkeeping requirement is provided by section 103(b) of the Act. A lesser time limitation would be impractical and incompatible with statute of limitation requirements found in Federal and State law.

Two commenters questioned the usefulness of the report, considering the additional review work necessary by the audit program which this report serves.

The FPR the result of a Linowes Commission recommendation, is intended as a preliminary mechanism for data gathering for audit activities. MMS believes that the report will serve a useful purpose when deemed necessary.

One commenter requested that the wording in the proposed regulation be changed so that all first purchasers file the report monthly.

It is not the intent of the report to gather all purchaser data on a monthly basis but only when a specific request is necessary in relation to audit activities. The wording is not changed.

Two commenters stated that the FPR should be eliminated from the PAAS as the system should not require information beyond the OGOR.

VOL 51
ISS 45
MR 7
1986
UMI

Although the report need only be filed as directed by MMS, it is still important because it enables MMS to perform its data gathering function more efficiently.

Section 216.54 Oil and Gas Operations Report (OGOR)

Five commenters thought the words "and sold" should be added after the word "produced" in line 10 of the regulation because royalty is paid on quantities produced and sold.

The wording has been changed to "produced or sold." The wording is meant to include the intention of the regulations in 30 CFR 202.100, 202.150, 206.151, and 206.152.

Four commenters stated that the third sentence should be clarified to create a separate reporting requirement for each operator on Federal or Indian lease, unit, or communitization agreement.

The third sentence has been changed to "The report must be filed by every operator of the lease or agreement . . . ." The term "operator" is defined in § 216.6.

One commenter stated that all volumes reported on the OGOR should be metered, specifically flared/vented volumes.

The PAAS will allow reporting of estimated or calculated volumes when no actual measurement has occurred. The requirements of determining which volumes are to be measured is an operational function and beyond the scope of the PAAS.

One commenter stated the PAAS should be reevaluated to determine if quarterly or semiannual reporting is feasible.

The study currently underway within the Department will cover all options concerning future PAAS reporting.

Section 216.55 Gas Analysis Report (GAR)

Nine commenters thought that § 216.55 should be amended so that reporting frequency outlined in the regulations corresponds to that in the Reporter's Handbook.

The fifth sentence of this section has been changed to read "The form is due monthly or as specified by the gas sales contract terms but no less frequently than semiannual, and must be submitted on or before the 15th day of the second month following the end of the reporting period to which the information applies."

Seven comments received stated that the GAR should be eliminated from the PAAS reporting requirements.

The GAR provides necessary data which is used in association with the GPOR and OGOR. MMS can then make lease-level AFS/PAAS comparisons on processed gas and its related liquids.

Section 216.56 Gas Plant Operations Report (GPOR)

All twelve comments received on this specific section recommended that the GPOR reporting requirements be eliminated from the PAAS because the data being collected will result in numerous errors in the AFS/PAAS comparison. This, in turn, would cause the reporters to spend time answering inquiries from MMS. The commenters thought that MMS would be better served by audit procedures.

As previously stated, MMS requires additional time to assess the value of this report. Reporters will be notified if the reporting requirements change at a later date.

Section 216.57 Fractionation Plant Operations Report (FPOR)

The twelve comments received concerning the FPOR were identical to those in the previous section. The need for this report will be assessed simultaneously with the GPOR.

Section 216.58 Production Allocation Schedule Report (PASR)

Twelve commenters thought that the PASR should be eliminated from the PAAS reporting requirements. They believe that the PAAS reporting should end at the lease and no corroborative reports should be required.

The PASR provides MMS with a mechanism for verifying the allocation of sales from the onshore or offshore commingled sales point to the individual leases or agreements which produce to that point. The information is currently being provided by the sales point operator. The PASR organizes the data in a readily useful manner.

Two commenters stated that the requirements of who is required to file a PASR should be included in the regulations.

The section has been reworded to include the criteria of who must file a PASR.

One commenter stated that in line 14, the word "of" should be "or."

The requested change has been made.

One commenter wanted the regulations to require a certification as to the accuracy of all allocation meters and, upon initial submittal of a PASR, the reporters to include a flow chart detailing product flow lines, metering, and gathering points.

The information which these recommendations would require is unnecessary for the PAAS to accomplish its purpose. The proposed requirements are of an operational nature and will not be included in the PAAS.

Section 216.61 API Well Number Change Report. (ANCR)

One commenter stated that the form should be redesigned to include the operator's internal assigned well number in addition to the API well number.

The API well number provides a unique identifier and as such is a key to the PAAS. An operator's internally assigned well number would not necessarily be unique to all operators. The operator's internally assigned well number does provide a convenient mechanism for identifying each individual operator. The comments field of the form can be used for these data.

One commenter stated that, because MMS assigns the producing interval code, it was the responsibility of MMS to notify industry of subsequent changes.

The PAAS provides a confirmation report of each ANCR processed to the appropriate operator.

Section 216.202 Facility and Measurement Information Form (FMIF)

One commenter pointed out that the FMIF is not submitted on a one-time-only basis and that the statement is confusing.

MMS agrees with this comment and will clarify this section by eliminating "on a one time only basis."

Section 216.203 Solid Minerals Operation Report (SMOR)

One commenter requested that the SMOR be submitted only for those operations that are producing mines.

MMS agrees that if a mine is not producing, is not expected to produce in the next twelve months, and has no outstanding inventory, then the SMOR is not required. MMS will eliminate "or inactive mines" from this section.

V. Procedural Matters

Executive Order 12291

The Department of the Interior has considered all comments received on the proposed rule and has determined that this document is not a major rule and does not require a regulatory analysis under Executive Order 12291.

Although the final rule establishes certain assessments for improper reporting, there is no economic effect so long as there is compliance with the regulations.

The increased regulatory burden on industry due to the information collection requirements for establishing production quantities is estimated to be approximately $1.5 million. Therefore, a regulatory impact analysis is not required.

Regulatory Flexibility Act

Some portion of the approximately $1.5 million cost burden to the public will fall on the small businesses that are among the potential respondents. Since the total cost to the public is relatively small, and because the MMS provides special training and assistance to small organizations, there will be no significant economic effect on small entities. Although the rule establishes certain penalty assessments for improper reporting, as long as there is compliance with the regulations, there is no cost. Consequently, it does not require a Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) analysis.

Paperwork Reduction Act of 1980

The information collection requirements contained in Subparts B and E of this proposed rule have been approved by the Office of Management and Budget (OMB) under 44 U.S.C. 3504(h), and granted OMB Clearance Number 1010–0040 and 1010–0063, respectively. Information collection under provisions of § 216.30 will affect less than 10 respondents annually and does not require OMB approval.

National Environmental Policy Act of 1969

This action is categorically excluded (40 CFR 1508.4) from the requirements of the National Environmental Policy Act 42 U.S.C. 4321 *et seq.*, and has been so designated by the Department. (516 DM 2 appendix 1.6; and 516 DM 6, appendix 2.4 (B)(1)(k).)

List of Subjects in 30 CFR Part 216

Mineral production, Mineral royalties, Reporting and recordkeeping requirements, Oil and gas, Solid minerals.

Under the authority of the Secretary of the Interior contained in 30 U.S.C. 1751, 30 CFR is amended by the addition of a new Part 216.

Dated: January 17, 1986.

J. Steven Griles,

Assistant Secretary for Land and Minerals Management.

Title 30 of the Code of Federal Regulations is amended by adding Part 216 to read as follows:

Authority: The Act of February 25, 1920 (30 U.S.C. 181 *et seq.*) as amended; the Act of May 21, 1930 (30 U.S.C. 301–306); the Minerals Leasing Act for Acquired Lands (30 U.S.C. 351–359), as amended; the Act of March 3, 1909 (25 U.S.C. 396), as amended; the National Environmental Policy Act of 1969 (42 U.S.C. 4321, *et seq.*) as amended; the Act of May 11, 1938 (25 U.S.C. 396a–396q), as amended; the Act of February 28, 1891 (25 U.S.C. 397), as amended; the Act of May 29, 1924 (25 U.S.C. 398); the Act of March 3, 1927 (25 U.S.C. 398a–398e); the Act of June 30, 1919 (25 U.S.C. 399), as amended; R.S. § 441 (43 U.S.C. 1457), see also Attorney Generals's Opinion of April 2, 1941 (40 Op. Atty. Gen. 41); the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471, *et seq.*), as amended; the Act of December 12, 1980 (Pub. L. 96–514, 94 Stat. 2964); the Combined Hydrocarbon Leasing Act of 1981 (Pub. L. 97–78, 95 Stat. 1070); the Outer Continental Shelf Lands Act (43 U.S.C. 1331, *et seq.*), as amended; Section 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262); Secretarial Order No. 3071 of January 19, 1982, as amended; Secretarial Order 3087, as amended; The Indian Mineral Development Act of 1982 (25 U.S.C. 2101, *et seq.*); and the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701, *et seq.*).

Subpart A—General Provisions

§ 216.1 Purpose.

The purpose of this part is to ensure that the Federal Government receives proper information regarding energy and mineral resources removed from Federal and Indian leases and federally approved agreements, including the Outer Continental Shelf (OCS).

§ 216.2 Scope.

This part governs the reporting of oil, gas, and solid minerals operations information on Federal and Indian leases or federally approved agreements including the OCS. This part also governs the reporting of other operational information associated with production from Federal and Indian leases or federally approved agreements when such operations occur prior to the point of sale or royalty determination, whichever is applicable. Reporters are required to continue to submit existing production reports (3160–6 (formerly 9–329 and 9–329–1), 9–152, 9–373A, 9–128, 9–128a, 9–128b, 9–128c, 9–128d, 9–368, 9–1146, etc.) until conversion to PAAS. The appropriate MMS official will notify reporters being converted to PAAS of the proper schedules for start-up of reporting under PAAS and for discontinuing reporting using the existing production report forms.

§ 216.6 Definitions.

For purposes of this part:

(a) *"Agreement"* means a binding arrangement between two or more parties purporting to the act of agreeing or of coming to a mutual arrangement that is accepted by all parties to a transaction (e.g., communitizations, unitization, gas storage, or compensatory royalty agreements.).

(b) *"Alaska Native Corporation"* means a corporation created pursuant to the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 *et seq.*).

(c) *"Approved mining plan"* as used in this part means an approved resource recovery and protection plan (43 CFR 3480.5) or approved mining plan (43 CFR 3572.1).

VOL
51
ISS
45
MR
7
1986
UMI

(d) *"Associate Director"* means the Associate Director for Royalty Management of the MMS.

(e) *"Conversion period"* means that period of time between the date an operator not subject to the rules of this part is notified that the rules are to be made applicable to that operator, and the effective date of applicability. The conversion period will not be less than one year unless the operator requests a shorter period.

(f) *"Facility"* means a structure(s) used to store or process Federal or Indian mineral production prior to or at the point of royalty determination.

(g) *"Federal lease"* means a lease concerning minerals owned by the United States and includes a lease where an Alaska Native Corporation receives all or part of the royalties accruing from that lease, and the MMS has not waived administration of that lease.

(h) *"First purchaser"* means any entity receiving the lease production in a first transfer for value transaction.

(i) *"Gas"* means any fluid, either combustible or noncombustible, which is extracted from a reservoir and which has neither independent shape nor volume, but tends to expand indefinitely; a substance that exists in a gaseous or rarefied state under standard temperature and pressure conditions.

(j) *"Indian lease"* means a lease concerning lands or interest in lands of an Indian Tribe or an Indian allottee, his heirs or devisees, held in trust by the United States or which is subject to Federal restriction against alienation, including mineral resources and mineral estates reserved to an Indian Tribe or an Indian allottee, his heirs or devisees thereto in the conveyance of a surface or non-mineral estate, except that such term does not include any lands subject to the provisions of section 3 of the Act of June 28, 1906 (34 Stat. 539).

(k) *"Lease"* means any contract, profit-share arrangement, joint venture, permit, or other agreement issued or approved by the United States under a mineral leasing law that authorizes exploration for, extraction of, or removal of oil, gas, or solid minerals—or the land area covered by that authorization, whichever is covered by the context.

(l) *"Lessee"* means any person to whom the United States, an Indian Tribe, or an Indian allottee, issues a lease, or any person who has been assigned an obligation to make royalty or other payments required by the lease.

(m) *"MMS/RMP"* means the Royalty Management Program of the Minerals Management Service.

(n) *"Measurement device"* means a mechanical or electrical device that is used to measure production of oil, gas, or solid minerals for sales, transfers, and/or royalty determination.

(o) *"Mine"* means an underground or surface excavation or series of excavations and the surface or underground support facilities that contribute directly or indirectly to mining, production, preparation, and handling of coal or other solid minerals.

(p) *"Mineral Leasing Law"* means any Federal law administered by the Secretary authorizing the disposition under lease of oil, gas, or solid minerals.

(q) *"Oil"* means any fluid hydrocarbon substance other than gas which is extracted in a fluid state from a reservoir and which exists in a fluid state under the existing temperature and pressure conditions of the reservoir. Oil includes liquefiable hydrocarbon substances such as drip gasoline or other natural condensates recovered in a liquid state from gas.

(r) *"Operator"* means any person, including a lessee who has control of, or who manages operations on, any oil and gas or solid minerals lease site on Federal (including the OCS) or Indian lands. "Operator" also means any entity engaged in the business of developing, drilling for, producing, transporting, purchasing, selling, or processing oil, gas or solid minerals and/or which has the responsibility of reporting production from a lease or a portion thereof.

(s) *"Outer Continental Shelf (OCS)"* has the same meaning as provided in section 2 of the Outer Continental Shelf Lands Act, 43 U.S.C. 1331.

(t) *"Person"* means any individual, firm, corporation, association, partnership, consortium or joint venture.

(u) *"Production Accounting and Auditing System (PAAS)"* means an integrated system of manual and automated processes for minerals production reporting, accounting, and auditing. Based upon production reports submitted by reporters, the PAAS will track oil, gas, and solid minerals produced from or allocated to Federal and Indian leases, including the OCS, from the source of production to the point of disposition with emphasis on the point of royalty determination, or point of sale, whichever is applicable.

(v) *"Raw make"* means natural gas liquids (NGL's) that are extracted from the wet gas stream at a gas plant (e.g., ethane through natural gasoline) which sometimes is transferred to a fractionation plant for further processing.

(w) *"Reporter"* means any reporting entity required to submit a PAAS report or form to the MMS.

(x) *"Secretary"* means the Secretary of the Interior or his/her designee.

(y) *"Solid minerals"* means those minerals including but not limited to coal, potash, sodium, phosphate, sulfur, lead, zinc, copper, silica sands, sand and gravel, and other minerals under mineral leasing laws originating from or allocated to Federal or Indian leases, excluding oil or gas, oil shale, and geothermal resources.

§ 216.10 Information collection.

(a) The information collection requirements contained in Subpart B require the filing of forms which have been approved by the Office of Management and Budget (OMB) under 44 U.S.C. 3507, and assigned clearance number 1010–0040. The information is being collected for Federal and Indian royalty accounting purposes. The information collection requirements contained in Subpart E also require the filing of forms which have been approved under 44 U.S.C. 3507 and assigned clearance number 1010–0063.

(b) The information collected will be used to permit accounting and auditing of production information submitted by the reporter for mineral production from Federal and Indian leases and federally approved agreements. Information reporting forms are available from the MMS. Requests shall be addressed to: Minerals Management Service, Royalty Management Program, Box 17110, Denver, Colorado 80217.

§ 216.20 Applicability.

(a) The requirements of this part shall apply to all operators already reporting to the PAAS on April 7, 1986.

(b) The requirements of this part shall not apply to any operator not included in subsection (a) until MMS notifies the operator in writing, certified mail, return receipt requested, at least one year in advance of the date the rules are to be applicable to that operator, except such operators shall be required during the conversion period to file the reports required by § 216.51, § 216.52a, § 216.201, or § 216.202 as applicable.

(c) Notwithstanding subsection (b), any operator may request and MMS may approve a conversion period of less than one year.

(d) Notwithstanding any of the provisions of this section, operators on all offshore leases and all solid mineral leases issued on or after April 7, 1986, shall be subject to the requirements of this part without any conversion period.

§ 216.21 General obligations of the reporter.

The reporter shall submit accurately, completely and timely, pursuant to the requirements of this part, all information

forms and other information required by MMS. Specific guidance on the use of the required forms is contained in the Production Accounting and Auditing System Reporters Handbook. Copies of the handbook are available from the MMS.

§ 216.25 Confidentiality.

(a) Information obtained by MMS pursuant to the rules of this part shall be open for public inspection and copying during regular office hours upon a written request, pursuant to rules at 43 CFR Part 2, except that:

(1) Notwithstanding any other provision of this part, information obtained from a reporter under this part relating to a minerals agreement approved pursuant to the Indian Mineral Development Act of 1982, 25 U.S.C. 2101 *et seq.*, the Tribal Leasing Act of 1938 (25 U.S.C. 396a *et seq.*), or the Allotted Indian Mineral Development Act of 1909 (25 U.S.C. 396), shall not be released without the written consent of the Indian Tribe(s) or individual Indian(s) who are parties to the mineral agreement.

(2) Information obtained from a reporter pursuant to this part that constitutes a trade secret and/or commercial or financial information which is privileged or confidential, or other information that may be withheld under the Freedom of Information Act (5 U.S.C. 552(b)), such as geologic and geophysical data concerning wells, shall be available for public inspection in accordance with 43 CFR Part 2. When such information is related to Indian lands, consent to release the information must also be obtained from the cognizant Tribe or allottee.

(b) If any geologic and/or geophysical data is submitted under this part, these shall be made available to the public only in accordance with the provisions of 30 CFR 250.3, 250.4 and 252.7, if these relate to an offshore lease, and in accordance with 43 CFR 3162.8 if these relate to an onshore Federal or Indian lease.

§ 216.30 Special forms and reports.

When special forms or reports other than those referred to in the regulations in this part are necessary, instructions for the filing of such forms or reports will be provided by the Associate Director. Such requests will be made in conformity with the requirements of the Paperwork Reduction Act of 1980, and are expected to involve less than 10 respondents annually.

§ 216.40 Assessments for incorrect or late reports and failure to report.

(a) An assessment of $10.00 per day may be charged for each report not received by MMS by the designated due date.

(b) An assessment of $10.00 per day may be charged for each report received by the designated due date but which is incorrectly completed.

(c) For purposes of oil and gas reporting under the PAAS, a report is defined as each line of production information required on the Oil and Gas Operations Report (Form MMS–4054), Gas Analysis Report (Form MMS–4055), Gas Plant Operations Report (Form MMS–4056), Fractionation Plant Operations Report (Form MMS–4057), and Production Allocation Schedule Report (Form MMS–4058).

(d) For purposes of solid minerals reporting under PAAS, a report is defined as each line of production information required on the Solid Minerals Operation Report (Form MMS–4059) and Solid Minerals Facility Report (Form MMS–4060).

(e) The MMS will not make assessments for reporting problems which are beyond the control of the reporter (e.g., reports received late because of bad weather). The reporter shall have the burden of proving that a reporting problem was unavoidable.

(f) An assessment under this section shall not be shared with a State, Indian tribe, Indian allottee, or Alaska Native Corporation.

Subpart B—Oil and Gas, General

§ 216.50 [Reserved]

§ 216.51 Facility and Measurement Information Form and Supplement.

(a) The Facility and Measurement Information Form (Form MMS–4051) must be filed for each facility or measurement device which handles production from any Federal or Indian lease, or federally approved agreement, through the point of first sale or the point of royalty computation, whichever is later. The completed form must be filed by the operator of the facility or measurement device initially at the request of MMS during the conversion of facility and measurement device operators to the PAAS. After conversion, Form MMS–4051 must be filed with MMS/RMP no later than 30 days after establishment of a new facility or measurement device, or a change to an existing facility or measurement device which is not approved by the MMS/OCS.

(b) The Facility and Measurement Information Form-Supplement (Form MMS–4051 Supplement) must be filed for each facility or measurement device that handles production from any Federal or Indian lease, or federally approved agreement, through the point of first sale or the point of royalty computation, whichever is later, when such facility or measurement device is operated by any party other than the operator(s) of the lease(s) or approved agreement(s) served by said facility or measurement device. The completed form must be filed by each operator of the lease(s) or federally approved agreement(s) served by said facility or measurement device if that operator is not the same person that operates said facility or measurement device. Form MMS–4051 Supplement must be filed at the request of the MMS initially during the conversion of lease and agreement operators to PAAS.

§ 216.52 Well Information Form.

The Well Information Form (Form MMS–4052) must be filed at the request of MMS for each Federal or Indian lease, or federally approved agreement, on which there exists at least one well that is not permanently plugged and abandoned. The completed form must be filed by the operator of the lease or agreement initially during the conversion of lease and agreement operators to the PAAS.

§ 216.53 First Purchaser Report.

The First Purchaser Report (Form MMS–4053) must be filed by first purchasers only upon the specific request of MMS.

§ 216.54 Oil and Gas Operations Report.

The Oil and Gas Operations Report (Form MMS–4054) must be filed by every operator of the lease or agreement for each Federal or Indian lease, or federally approved agreement, on which there exists at least one well that is not permanently plugged and abandoned. Completed Form MMS–4054 must be filed for each calendar month, beginning with the month in which drilling operations are initiated, and must be filed on or before the 15th day of the second month following the month being reported until the lease or agreement is terminated or the last well is permanently plugged or abandoned or until omission of the report is authorized by the MMS.

§ 216.55 Gas Analysis Report.

The Gas Analysis Report (Form MMS–4055) must be filed for each Federal or Indian lease, or federally approved agreement from which gas is transferred for processing prior to the point of royalty computation. The completed form must be filed by the

VOL
51
ISS
45
MR
7
1986
UMI

operator of the lease or approved agreement. The form is due monthly or as specified by the gas sales contract terms but no less than semiannually, and must be submitted on or before the 15th day of the second month following the end of the reporting period to which the information applies.

§ 216.56 Gas Plant Operations Report.

The Gas Plant Operations Report (Form MMS–4056) must be filed for each gas plant that processes gas that originates from a Federal or Indian lease, or federally approved agreement, prior to the point of royalty computation, by the operator of the gas plant. Completed Form MMS–4056 must be filed for each calendar month, beginning with the month in which processing of gas originating from a Federal or Indian lease or federally approved agreement is initiated, and must be filed on or before the 15th day of the second month following the month being reported.

§ 216.57 Fractionation Plant Operations Report.

The Fractionation Plant Operations Report (Form MMS–4057) must be filed for each fractionation plant that fractionates raw make attributable to a Federal or Indian lease, or federally approved agreement, prior to the point of royalty computation for such lease or agreement. The completed form must be filed by the operator of the fractionation plant. Form MMS–4057 must be filed for each calendar month, beginning with the month in which fractionation of raw make originating from a Federal or Indian lease, or federally approved agreement is initiated, and must be filed on or before the 15th day of the second month following the month being reported.

§ 216.58 Production Allocation Schedule Report.

The Production Allocation Schedule Report (Form MMS–4058) shall be filed for each facility or measurement device where the production from a Federal or Indian lease or agreement is commingled with the production from one or more other Federal, Indian or non-Federal leases or agreements prior to measurement for royalty computation purposes. A report is not required whenever the leases/agreements involved are all Federal or all Indian; all have the same fixed royalty rate; all are operated by the same person; and the facility/measurement device is operated by the same person as the leases/agreements. The completed form must be filed by the operator of such facility or measurement device. Form MMS–4058 must be filed for each calendar month, beginning with the month in which handling or production covered by this section is initiated, and must be filed on or before the 15th day of the second month following the month being reported.

§ 216.61 API Well Number Change Report.

The API Well Number Change Report (Form MMS–4061) must be filed whenever there is a change to an existing API well number and/or the MMS assigned producing interval code within the PAAS, on which an Oil and Gas Operations Report (Form MMS–4054) have been filed. The completed form must be filed by the operator of the Federal or Indian lease, or federally approved agreement, with which the well is associated. Form MMS–4061 must be filed at least 10 days prior to the submission of an Oil and Gas Operations Report containing the new API well number and/or the MMS assigned producing interval code.

Subpart C—Oil and Gas, Onshore [Reserved]

Subpart D—Oil, Gas, and Sulfur, Offshore [Reserved]

Subpart E—Solid Minerals, General

§ 216.200 [Reserved]

§ 216.201 Mine Information Report.

The Mine Information Form (Form MMS–4050) must be filed for each mine that includes Federal or Indian leases in its approved mining plan. The completed form must be filed by the operator of the mine/lease(s). Form MMS–4050 must be filed at the request of the MMS initially during the conversion of the mine/lease(s) to the PAAS.

§ 216.202 Facility and Measurement Information Form.

The Facility and Measurement Information Form (Form MMS–4051) must be filed for each facility or measurement device which handles solid mineral production from any Federal or Indian lease, or federally approved agreement, through the point of first sale or the point of royalty computation, whichever is applicable. The completed form must be filed by the operator of the facility or measurement device. Form MMS–4051 must be filed initially at the request of the MMS during the conversion of facility and measurement device operators to the PAAS. Subsequent to conversion, Form MMS–4051 must be filed with MMS/RMP no later than 30 days after establishment of a new facility or measurement device, or a change to any existing facility or measurement device that handles production attributable to any Federal or Indian lease, or federally approved agreement, through the point of first sale or royalty computation, whichever is applicable.

§ 216.203 Solid Minerals Operations Report.

The Solid Minerals Operation Report (Form MMS–4059) must be submitted by all Federal and Indian lease operators of producing mines that are part of an approved mine plan. Form MMS–4059 must be filed for the same period established for payment for royalties in the lease terms, unless a different reporting frequency is established by an MMS authorized official, and on or before the 15th day of the second month following the period being reported until all the leases within a mine are terminated or until omission of the report is authorized by the MMS.

§ 216.204 Solid Minerals Facility Report.

The Solid Minerals Facility Report (Form MMS–4060) must be filed by operators of secondary processing facilities that handle production attributable to Federal or Indian leases where royalty is determined after processing. The report period is monthly, unless a longer period is specified in the lease document, or otherwise approved by the MMS. The Form MMS–4060 must be filed on or before the 15th day of the second month following the period being reported.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 201

[Docket No. 85N-0553]

Labeling for Oral and Rectal Over-the-Counter Aspirin and Aspirin-Containing Drug Products

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations to require that the labeling of oral and rectal over-the-counter (OTC) aspirin and aspirin-containing drug products for human use bear a warning that such products should not be used to treat chicken pox or flu symptoms in children and teenagers before consulting a doctor about Reye syndrome, a rare but serious illness. FDA is taking this action in order to bring uniformity and consistency to the marketplace and to aid in increasing the public awareness about this disease.

DATES: These final regulations are effective June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Christopher Smith, Office of the Commissioner (HF-1), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5133.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of December 17, 1985 (50 FR 51401), FDA proposed to require that the labeling of oral OTC aspirin and aspirin-containing drug products for human use bear a warning that such products should not be used to treat chicken pox or flu symptoms in children and teenagers before consulting a doctor about Reye syndrome, a rare but serious illness. FDA proposed this rule in order to bring uniformity and consistency to the marketplace and to aid in increasing the public awareness about this disease.

In the proposal, FDA described: (a) Reye syndrome and its symptoms; (b) the early scientific studies that were conducted to look at the possible association between the use of aspirin and the onset of Reye syndrome; (c) the Public Health Service (PHS) study now being conducted under the direction of the PHS Reye Syndrome Task Force; and (d) the educational activities that have been carried out by FDA and aspirin industry about the use of aspirin and Reye syndrome. FDA acknowledged in the proposal and the successful voluntary public education and labeling efforts made by the aspirin industry, but noted that these voluntary efforts led to considerable diversity in the specific message being conveyed to consumers, particularly through product labeling. A complete discussion of this diversity along with examples of product labeling and the concerns expressed by several organizations are contained in the proposed rule.

FDA also noted that, under the voluntary program, it was unable to ascertain with certainty whether all aspirin-containing products that should be labeled with the warning statement have, in fact, been labeled.

II. Highlights of the Final Rule

As described further below, all the comments received on the proposal expressed support for the new regulation. Thus, to increase consumer awareness, to avoid public confusion, and to achieve uniformity in the marketplace, FDA is issuing a final regulation which closely parallels the proposal.

As in the proposal, the final rule requires the following labeling statement:

"WARNING: Children and teenagers should not use this medicine for chicken pox or flu symptoms before a doctor is consulted about Reye syndrome, a rare but serious illness."

Also like the proposal, FDA is requiring that this warning precede any additional warnings that may appear on the product labeling in order to assure the prominence of the message.

In addition, in response to comments received on the proposal (described below), FDA is adding rectal OTC aspirin and aspirin-containing products within the scope of this regulatory action, and is making it clear that this final rule preempts State and local labeling requirements that are not identical to it with respect to oral and rectal OTC aspirin and aspirin-containing drug products for human use. The final rule and this preamble also contain some minor clarifications to statements in the proposal or to comments received.

III. Comments

FDA received 17 comments on the proposed rule: 4 from industry, 6 from trade associations, 3 from health professional associations, 2 from State agencies, 1 from a consumer group, and one from FDA staff. All comments were positive and expressed support for the agency's action. Some suggested changes in the proposal or expressed concerns with specific portions of the proposal.

A. Individual Manufacturer's Comments

FDA received comments from four pharmaceutical firms. Two expressed concern that since they had participated in the voluntary program and were labeling their products with a warning statement, they should be allowed to use up existing supplies of labels now in inventory, or that, at a minimum, FDA should extend the effective date in order to allow for most such inventories to be used. Two other firms suggested that their present labeling contains warning statements that, although not exactly as that proposed by FDA, are close enough in their language to be acceptable.

FDA disagrees that stocks of labels that are in inventory or labeling that is not exactly like that in the final rule, but close to that in the final rule, should be allowed to be used as a matter of course. While FDA recognizes that some firms may be inconvenienced after having already changed their labels in order to participate in the voluntary program, the purpose of this rule is specifically to bring uniformity and consistency to the marketplace. However, FDA points out that the new regulatory requirement is directed to the initial introduction of the product into interstate commerce. Thus, products in retail packaging that are labeled with an earlier Reye syndrome warning, and that have been initially introduced into interstate commerce prior to the effective date of this rule, will be permitted to be sold. In contrast, products produced in retail packaging, and initially delivered for introduction into interstate commerce on or after the effective date of this rule, will be required to be in compliance with the new requirements.

FDA also is not extending the rule's effective date. This is to help ensure that aspirin and aspirin-containing products that are on the store shelves by the next flu season will be labeled according to this final rule. FDA recognizes that there may be a few small manufacturers for whom, for various financial or other reasons, it is impossible to comply with this final rule by the effective date. In these unusual circumstances, FDA will consider requests for limited extensions. Such requests should be sent to Office of Compliance, Center for Drugs and Biologics, HFN-300, Food and Drug Administration, 5600 Fishers Lane,

Rockville, Maryland 20857, and should document both the need for an extension and the duration of time requested.

B. Comments From Trade Associations

FDA received comments from six trade associations. While none of the industry trade associations that commented suggested a delay in the effective date for the rule, or a time period during which labels printed with the voluntary warning should still be allowed, several of the comments did request that FDA allow for the "sell-through" of current stocks already in the distribution chain. FDA agrees with these comments and, as discussed earlier, will allow the "sell-through" of products already in interstate commerce.

Comments also were received expressing concern that the proposal was unclear about the exact type of product material on which the warning statement must appear. In response to the comments, the final rule has been clarified to state that the warning statement must appear in several places. First, the warning is required to appear on the label of the immediate container. Second, in cases where the immediate container is not the retail package (e.g., where a bottle of tablets is packaged in a box), the retail package must also bear the warning statement. Finally, the warning statement must appear on any labeling that contains other warnings, and, in such cases, the Reye warning is required to be the first warning under the heading "Warnings." However, items such as "shelf talkers," store displays or money-saving coupons would not be required to bear the warning statement.

Two trade association comments suggested that FDA preempt State requirements for label warnings regarding Reye syndrome. While FDA is unaware of any such requirements at this time, FDA agrees with the comments. FDA is authorized to assure the safety of drugs marketed in interstate commerce in this country. The manufacturing and distribution system for these products is national in scope and the measures adopted by FDA to regulate this national system should be adequate to safeguard the interests of the entire population. While State and local requirements for products may on occasion be appropriate and necessary, such measures should not interfere with FDA's accomplishing those purposes that are within its Congressionally mandated area of responsibility. State and local requirements for the labeling of oral and rectal OTC aspirin-containing drug products that differ from those established by this final rule would interfere with the accomplishment of FDA's objective to bring consistency and uniformity to the marketplace with respect to the labeling of these products regarding Reye syndrome. Thus, FDA intends that the regulations issued in this document preempt State and local packaging requirements that are not identical to it with respect to oral and rectal OTC aspirin-containing drug products for human use.

C. Comments From Health Professional Associations

FDA received comments from three health professional associations. Two comments urged that the warning include more explicit language about aspirin and Reye syndrome such as "Studies show that aspirin may increase the risk of developing Reye syndrome." While FDA has stated that the available data do not establish a definitive cause-and-effect relationship between aspirin-containing products and the disease, the agency has concluded that the studies that have been done to date suggest a possible association between aspirin use and Reye syndrome. Thus, FDA felt it was appropriate to carry out a public awareness campaign and to encourage voluntary industry public education efforts. However, in the proposal FDA specifically states that the impetus for the rule is to bring consistency and uniformity to the marketplace with respect to the warning statement. For these reasons, FDA believes that the warning statement as proposed is sufficient at this time and the agency disagrees with the comment. The final rule is, however, an interim measure in that it will expire in 2 years. FDA will consider the need for a change in the warning statement based upon the available data at that time.

One comment suggested that the final rule be extended to cover aspirin-containing prescription drug products as well as those available OTC. FDA does not agree at this time that this final rule should be applied to prescription drugs. The warning statement required by the rule is aimed at consumers buying and using aspirin-containing products without the advice of a physician. Thus, the statement required by the final rule suggests that persons consult a doctor before using the drug in certain circumstances. Prescription drugs are dispensed only on the order of a physician. FDA informs physicians of such matters as the possible association between aspirin and Reye syndrome in many ways including information bulletins and requirements under the prescription drug regulations. Therefore, FDA believes it is taking the appropriate action with regard to Reye syndrome and OTC drugs at this time. However, in 2 years, upon expiration of this final rule, if the agency seeks to continue the requirement based upon new information available then, the agency may reconsider the need for a warning in the professional labeling for prescription drug products.

Finally, one health professional group suggested that the required warning statement include pharmacists as a group that might be consulted prior to the use of the medication. FDA disagrees with this comment because the warning statement suggests that consultation be obtained about a disease, Reye syndrome, rather than information about a pharmaceutical product.

D. State Comments

FDA received comments from two State organizations. One comment simply expressed support for the proposal. The other, while advocating the labeling requirement, suggested that the warning also require a listing of the symptoms of Reye syndrome. FDA agrees that the public should be knowledgeable of the symptoms of Reye syndrome, and both FDA and the aspirin industry have included that information as part of the public education campaign described in the proposal. However, the purpose of the label warning is preventive—i.e., that aspirin should not be used for certain purposes without first consulting a physician. Thus, including the symptoms of Reye syndrome on the product label would not further that purpose.

E. Consumer Group Comments

FDA received comment from one consumer organization. While supportive of the agency's efforts to require a warning, the group did offer several suggested changes. The comment supported the proposal and called for the effective date to be May 30, 1986, even if the time period between publication and the effective date needed to be shortened from 90 days. FDA disagrees. The effective date of this regulation is June 5, 1986, which is not appreciably different from the proposed effective date of May 30, 1986.

The comment also suggested that the warning statement be required to be boxed so that it will be highlighted to the consumer. FDA does not believe a boxed warning is necessary. The requirement that the warning be the first warning under the heading "Warning" appropriately highlights the information.

VOL 51
ISS 45
MR 7
1986
UMI

Another part of the comment suggested that the warning include the statement that Reye syndrome is "often fatal." While FDA agrees that Reye syndrome can be fatal, in the majority of cases it is not. FDA therefore believes the warning, as proposed, is appropriate, and that the consumer's physician can discuss such specifics as the disease's fatality rate as the need arises.

The comment also suggested that products subject to this rule that are indicated for use by both children and adults be required to have in the "Indications" section a clarification that the product should not be used by persons under 21 for the treatment of flu or chicken pox or, at a minimum, that the "Indications" section should contain a cross-reference to the Reye syndrome warning elsewhere in the labeling. FDA does not agree that an additional statement should be required in the "Indications" section or that a cross-reference is needed. FDA believes that the placement of the required warning statement as the first warning under the "Warning" section is an appropriate method of conveying the information to teenagers who may use adult aspirin products and to those who may consider the use of these products to treat children with flu or chicken pox.

Finally, the comment urged that FDA extend the labeling requirements to prescription drugs. FDA disagrees with this suggestion for reasons already discussed.

F. FDA Staff

One comment was filed by employees of the agency's Center for Drugs and Biologics who suggested that the rule be extended to include aspirin and aspirin-containing OTC rectal suppository drugs. The comment pointed out that such products are aften used in patients unable to take oral medication, expecially in infants, or when oral medication is not retained. The comment also noted that comparison of absorption of rectal versus oral doses of aspirin show that the rectal absorption can be equivalent to that obtained by the oral dose. FDA agrees with the comment and is including rectal OTC aspirin and aspirin-containing drug products in the final rule.

IV. Agency Action

FDA has evaluated the comments as well as information already in the agency's files and concludes that, for the reasons stated above, the proposed labeling for oral and rectal OTC aspirin and aspirin-containing drug products is necessary and appropriate and that the regulations should be amended as set forth below.

The agency laid out its legal authority and assessed the economic and environmental impact of this rule in the proposal of December 17, 1985 (50 FR 51401). This assessment concluded that the proposed rule was not a major rule as defined by Executive Order 12291. No new information or comments were received that would alter this determination or the agency's previous determination that there is no significant impact on the human environment and that an environmental impact statement is not required.

List of Subjects in 21 CFR Part 201

Drugs, Labeling.

Therefore, under the Federal Food, Drug, and Cosmetic Act, Part 201 is amended as follows:

PART 201—LABELING

1. The authority citation for 21 CFR Part 201 is revised to read as follows:

Authority: Secs. 201, 502, 505, 701, 52 Stat. 1040–1042 as amended, 1050–1056 as amended (21 U.S.C. 321, 352, 355, 371); 21 CFR 5.10 and 5.11.

2. In § 201.314 by adding new paragraph (h) to read as follows;

§ 201.314 Labeling of preparations containing salicylates.

* * * * *

(h)(1) The labeling of orally or rectally administered over-the-counter aspirin and aspirin-containing drug products subject to this paragraph is required to prominently bear a warning. The warning shall be as follows: "WARNING: Children and teenagers should not use this medicine for chicken pox or flu symptoms before a doctor is consulted about Reye syndrome, a rare but serious illness."

(2) This warning statement shall appear on the immediate container labeling. In cases where the immediate container is not the retail package, the retail package also must bear the warning statement. In addition, the warning statement shall appear on any labeling that contains warnings and, in such cases, the warning statement shall be the first warning statement under the heading "Warnings."

(3) Over-the-counter drug products subject to this paragraph and labeled solely for use by children (pediatric products) shall not recommend the product for use in treating flu or chicken pox.

(4) Any product subject to this paragraph that is not labeled as required by this paragraph and that is initially introduced or initially delivered for introduction into interstate commerce after June 5, 1986, is misbranded under sections 201(n) and 502 (a) and (f) of the Federal Food, Drug, and Cosmetic Act.

(5) The requirements of this paragraph shall expire June 6, 1988 unless extended by the Food and Drug Administration by publication for notice and comment in the **Federal Register**.

Dated: February 27, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

Otis R. Bowen, M.D.,

Secretary of Health and Human Services.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

Bicentennial of the United States Constitution Commission

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 51, No. 46
Monday, March 10, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 443

[Doc. No. 0077A]

Hybrid Seed Crop Insurance Regulations; Correction

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule; correction.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) published a final rule in the Federal Register on Tuesday, February 18, 1986, at 51 FR 5695, revising and reissuing the Hybrid Seed Crop Insurance Regulations (7 CFR Part 443), effective for the 1986 and succeeding crop years. The provision added in § 443.7(d) 1.b. (7) inadvertently cited inadequate germination as the basis for determining the loss of production to timely plant the male seed. This notice is published to correct that error and to clarify the FCIC's intent with respect to the necessity of referring to the male seed being timely planted in order to pollinate the female plant.

ADDRESS: Written comments on this correction should be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 447-3325.

SUPPLEMENTARY INFORMATION: FR Doc. 86-3440, appearing at page 5698 is corrected as follows:

§ 443.7 [Corrected]

1. 7 CFR Part 443.7(d) 1.b. (7) is corrected as follows:

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Hybrid Seed Crop Insurance Policy

* * * * *

(7) The failure to plant the male seed at a time sufficient to assure adequate pollination of the female plant;

* * * * *

2. The authority citation for 7 CFR Part 443 continues to read as follows:

Authority: Secs. 506, 516, Pub. L. 75-430, 52 Stat. 73, 77, as amended (7 U.S.C. 1506, 1516).

Done in Washington, DC, on February 27, 1986.

Edward Hews,
Acting Manager, Federal Crop Insurance Corporation.

[FR Doc. 86-5080 Filed 3-7-86; 8:45 am]

BILLING CODE 3410-08-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 103

Powers and Duties of Service Officers; Availability of Service Records

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule reflects a title change of the custodian of records at the El Paso Intelligence Center (EPIC). The Immigration and Naturalization Service Program Coordinator, or the designee authorized in writing, is delegated the authority to certify records in the custody of that facility.

EFFECTIVE DATE: March 10, 1986.

FOR FURTHER INFORMATION CONTACT: For General Information: Loretta J. Shogren, Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-3048.

For Specific Information: Tedd Spears, Management Analyst, Records Services Section, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-2442.

SUPPLEMENTARY INFORMATION: This change has been made to reflect the current organizational structure and position title of the custodian for the records at EPIC. As a Supervisory Border Patrol Agent is no longer assigned to the El Paso Intelligence Center (EPIC), the position title of the custodian for the records at EPIC is now the Immigration and Naturalization Service Program Coordinator.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary as this rule relates to agency organiation and management.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule does not have significant economic impact on substantial number of small entities. This is not a rule within the definition of section 1(a) of E.O. 12291 as it relates to agency organization and management.

List of Subjects in 8 CFR Part 103

Administrative practice and procedure, Archives and records, Authority delegation, Fees, Forms.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

1. The authority citation for Part 103 of Title 8 continues to read as follows:

Authority: Sec. 103 of the Immigration and Nationality Act, as amended (8 U.S.C. 1103).

2. Section 103.7 is amended by revising paragraph (d)(3) to read as follows:

§ 103.7 Fees.

* * * * *

(d) * * *

(3) The Immigration and Naturalization Service Program Coordinator, El Paso Intelligence Center, or the designee, authorized in writing to make certification in event of the Program Coordinator's absence—copies of files, documents, and records of the Immigration and Naturalization Service in the custody of that office

* * * * *

Dated: March 3, 1986

John W. Murray,
Associate Commissioner, Information System, Immigration and Naturalization Service.

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 563g

[No. 86–200]

Securities Offerings

Dated: February 28, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule; technical and clarifying corrections.

SUMMARY: The Federal Home Loan Bank Board (the "Board") has adopted technical corrections and clarifications to its final regulation governing securities offerings made by insured institutions. Besides correcting certain typographical and punctuation errors, the amended regulation: (1) Clarifies the exemption from the offering circular requirements for offers and sales to officers, directors and employees by revising the exemption to cover employee benefit plans and dividend or interest reinvestment plans and provides for definitions of such plans; (2) clarifies the definition of "security" to make clear that accounts insured by the Federal Deposit Insurance Corporation ("FDIC"), like accounts insured by the Federal Savings and Loan Insurance Corporation ("Corporation" or "FSLIC"), are not securities subject to the Board's securities offerings regulation; (3) clarifies the definition of "underwriter" by incorporating a safe harbor holding period of two years and deletes the two year consent transfer restriction which was originally a part of § 563g.4 (relating to certain exempt non-public offerings); (4) clarifies other exemptions to the offering circular requirements by more clearly defining when an offering commences for purposes of § 563g.3(a) and that cash is a permissible form of collateral for purposes of § 563g.3(f); (5) clarifies the effective date of post-effective amendments by adding new 563g.6(e) providing for effectiveness on such date as the Corporation may determine; and (6) clarifies that the accounting requirements for offering circulars set forth at § 563g.7(b) includes the accounting requirements of Regulation S–X promulgated by the Securities and Exchange Commission ("Commission") as provided for in Part 563c of the Board's Insurance Regulations. For ease of reference, the regulations are being republished in their entirety, with the foregoing technical and clarifying amendments incorporated therein.

EFFECTIVE DATE: March 1, 1986.

FOR FURTHER INFORMATION CONTACT: Scott E. Bartel, Attorney, Corporate and Securities Division, (202–377–6963), Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: On December 20, 1985, the Board, as operating head of the FSLIC, adopted final regulations governing securities offerings by insured institutions. *See* Board Res. No. 85–1197, dated December 20, 1985, effective March 1, 1986 (50 FR 53284 (December 31, 1985)). In response to public comments, the final regulations contained substantial revisions to the regulations first proposed in March of 1983 and later re-proposed in September of 1985. *Compare* Board Res. No. 85–1197, dated December 20, 1985 (50 FR 53284 (December 31, 1985)) *with* Resolution No. 83–126, dated March 3, 1983 (48 FR 10684 (March 14, 1983)) and Board Res. No. 85–822, dated September 13, 1985 (50 FR 38839 (September 25, 1985)). Since adoption of the final regulations, the Office of General Counsel, Corporate and Securities Division, has received a variety of requests for clarification with respect to the scope and meaning of certain provisions of the regulation. While the majority of the requests concerned provisions which were not in need of clarification, the Board has recognized that other provisions, which are being amended today, should be amended to make clear the Board's intention in adopting such regulations. In addition, the Board is taking this opportunity to correct certain typographical and technical errors which appear in the regulations as adopted on December 20, 1985. See Board Res. No. 85–1197, dated December 20, 1985 (50 FR 53284 (December 31, 1985)). For the convenience of the public, the Board is republishing the entire text of new Part 563g, as amended by its action today.

Exemption for Employee Benefit Plans and Employee Dividend or Interest Reinvestment Plans—§ 563g.3(h)

As originally adopted, the regulations provided an exemption from the offering circular requirements of § 563g.2 for offers and sales "to its [an issuer's] employees or directors pursuant to any qualified pension, profit-sharing, or stock bonus plan meeting the requirements of Section 401(a) of the Internal Revenue Code of 1954, as amended [26 U.S.C. 401(a)]. See § 563g.3(h), 50 FR 53284, 53290 (December 31, 1985.) Originally, the Board believed that the vast majority of other employee compensation plans, such as option, appreciation and reinvestment plans, would be exempt from the offering circular requirements of § 563g.2 by reason of other available exemptions, such as the Board's non-public offering safe-harbor exemption § 563g.4. However, because of a perceived reluctance by counsel and others to use the Board's safe-harbor exemption for compensation plans not specifically included in the above quoted § 563g.3(h) exemption, the Board has decided to clarify its intention to exempt employee compensation plans, including stock option and rights plans, from the offering circular requirement of § 563g.2. As amended today, § 563g.3(h) provides an exemption from the offering circular requirements of § 563g.2 for offers and sales of securities by an issuer to its officers, directors or employees pursuant to an employee benefit plan or a dividend or interest reinvestment plan. To qualify for the exemption, however, the plan must be approved by the shareholders at a legal meeting and must be an employee benefit plan or a dividend or interest reinvestment plan as defined in the regulation. "Employee benefit plan" is defined in new § 563g.1(a)(4) and includes most of the common types of employee compensation, option, and pension plans. "Dividend or interest reinvestment plan" is defined in new § 563g.1(a)(3). To qualify for the exemption, however, the dividend or interest reinvestment plan must be limited to the issuer's officers, directors or employees. Plans which are not so limited, but instead allow all shareholders of an insured institution to participate, are not included in the amended § 563g.3(h) exemption. Unless another independent exemption is available, these unlimited plans would be subject to § 563g.2's offering circular requirements.[1] When drafting the offering circular for non-exempt plans, the issuer should refer to Commission Form S–8 as a guide to disclosure pertaining to the plan.

Safe-Harbor Definition of Underwriter—§ 563g.1(a)(14)

The offering circular requirements of § 563g.2 apply to insured institutions that offer or sell, directly or indirectly, any security issued by it. *See,* § 563g.2(a), 50 FR 53284, 53289 (December 31, 1985). In turn, "insured institution" is defined to include, solely for purposes of § 563g.2, any underwriter participating in the distribution of the securities offered. *See,* § 563g.1(a)(7), 50 FR 53289 (December 31, 1985). Therefore, the offering circular requirements of Part 563g work in a manner similar to the registration requirements of Section 5 of the Securities Act of 1933, as amended (15 U.S.C. 77e (1982)) ("Securities Act"), except that different approaches were taken to reach similar results. For example, in enacting the Securities Act, Congress made the registration provisions applicable to all persons, but then provided an exemption for all persons *except* issuers, underwriters and dealers. *Compare,* section 5 of the Securities Act (15 U.S.C. 77e (1982)) with section 4(1) of the Securities Act (15 U.S.C. 77d(1) (1982)). In contrast, the Board made the offering circular requirements of its securities offerings regulation applicable only to insured institutions and then, solely for purposes of the offering circular requirements, defined insured institution as including, *inter alia,* underwriters participating in the distribution. *See,* §§ 563g.1(a)(7), § 563g.2(a), 50 FR 53284, 53289 (December 31, 1985).

In the final regulations as adopted by the Board on December 20, 1985, § 563g.1(a)(14) defined "underwriter" to mean the same as the meaning set forth in the Board's Conversion Regulations at § 563b.2(a)(36), 12 CFR 563b.2(a)(36) (1985). *See,* 50 FR at 53289. This definition,[2] retained many of the uncertainties which exist in the Securities Act's definition of underwriter.[3] Whether a person has purchased with a view to distribution, or is participating, directly or indirectly, in a distribution of securities and hence is an underwriter of the securities, has been one of the more difficult questions in securities regulation. These uncertainties motivated the Commission to adopt a safe-harbor rule, Rule 144, which purports to define persons not engaged in a distribution and, therefore, not underwriters. *See,* 17 CFR 230.144 (1985). Basically, the Commission's Rule 144 requires a two (2) year holding period, after which the restricted securities may be "trickled" into the market in small amounts provided there is adequate public information available on the issuer in the market place.

Instead of promulgating a separate regulation similar to the Commission's Rule 144, the Board has decided to incorporate a safe-harbor directly into its definition of "underwriter." As amended, § 563g.1(a)(14) specifically provides that an "underwriter" does not include persons who have purchased from an issuer where the persons have continually held the securities being transferred for a period of two (2) consecutive years, and the amount of securities sold in any one (1) transaction is less than ten percent (10%) of the issued and outstanding securities of the same class. The safe-harbor also includes tacking provisions similar to Commission's Rule 144(d) (17 CFR 230.144(d) (1985)) for purposes of calculating the holding period of the securities. In addition, the safe-harbor also allows the tacking of holding periods in transactions involving exchanges of securities of one issuer for the securities of another issuer.

Sales made prior to the completion of the two (2) year holding period or sales made in an amount greater than, or equal to, ten percent (10%) of the issued and outstanding securities of the same class will not necessarily be deemed a sale by an underwriter under § 563g.1(a)(14). In interpreting § 563g.1 (a)(14), the Board will apply an analysis, on a case by case basis, similar to the analysis used by the courts and the Commission in interpreting the Securities Act's definition of underwriter. [4] In addition, the language of § 563g.1(a)(14) is in the disjunctive. Therefore, it is insufficient to conclude that a person is not an underwriter solely because such person did not purchase the securities with a view to their distribution to the public. It must also be established that the person is not offering or selling for the insured institution in connection with the distribution of the securities or participating in nor have a direct or indirect interest in any such distribution.

Whether a person is an underwriter by reason of participation in a distribution of securities depends upon the facts and circumstances surrounding the transaction. An investment banking firm which arranges with the issuer for a public sale of the issuer's securities is clearly an underwriter under § 563g.1(a)(14). Likewise, individual investors who are not securities professionals could be underwriters within the meaning of § 563g.1(a)(14). Because it is difficult to ascertain the mental state of the purchasers at the time of acquisition, subsequent acts and circumstances may be probative in determining whether the purchaser took with a view to distribution at the time of the acquisition. Factors to be considered in making such a determination include, but are not limited to, the length of time the purchaser has held the securities prior to re-sale, whether there has been an unforeseeable change in the circumstances of the purchaser, and whether the purchaser has assumed the economic risks of the investment, and therefore, is not acting as a conduit for sales to the public of the securities, directly or indirectly, on behalf of the issuer.

A notable difference between § 563g.1(a)(14)'s definition of underwriter and the Securities Act's definition of underwriter is that § 563g.1(a)(14) does not include the Securities Act's control clause." Under the Securities Act, for purposes of the Act's definition of underwriter only, " . . . the term 'issuer' shall include, in addition to an issuer, any person directly or indirectly controlling or controlled by the issuer, or any person under direct or indirect common control with the issuer."[5] The Board has decided not to adopt a "control clause" at this time because it believes that the regulation's current definition of underwriter, as amended, adequately implements the Board's securities offering regulation without being overly broad or expansive. However, the Board may reconsider the necessity of a "control clause" as part of § 563g.1(a)(14)'s definition of underwriter if, in the future, it appears that the absence of such clause is undermining the effectiveness of the Board's securities offerings regulation.

Finally, with the incorporation of a safe-harbor provision in the Board's definition of underwriter, the Board is

---

[1] Under certain limited conditions, the filing of an offering circular may not be required. In this respect, the Board intends to follow the position of the Commission set forth in SEC Release 33–5515 (August 8, 1974). *See also* SEC Release 33–4790 (July 13, 1965). *See generally,* SEC Releases 33–6281 (July 15, 1981); 33–6188 (February 1, 1980).

[2] 12 CFR 563b.2(a)(36) (1985) provides the following definition for "underwriter": The term "underwriter" means any person who has purchased from an applicant with a view to, or offers or sells for an applicant in connection with, the distribution of any security, or participates or has a direct or indirect participation in the direct or indirect underwriting of any such undertaking; but such term shall not include a person whose interest is limited to a commission from an underwriter or dealer not in excess of the usual and customary distributors' or sellers' commission. The term "principal underwriter" means an underwriter in privity of contract with the applicant or other issuer of securities as to which he is the underwriter.

[3] *See,* Section 2(11) of the Securities Act, 15 U.S.C. 77(b)(11) (1982) which provides: The term "underwriter" means any person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security, or participates or has a direct or indirect participation in any such undertaking, participates or has participation in the direct or indirect underwriting of any such undertaking; but such term shall not include a person whose interest is limited to a commission from an underwriter of dealer not in excess of the usual and customary distributors' or sellers' commission. As used in this paragraph, the term "issuer" shall include, in addition to an issuer, any person directly or indirectly controlling or controlled by the issuer, or any person under direct or indirect common control with the issuer.

[4] For example, it is possible for a person to be an underwriter within the meaning of § 563g.1(a)(14) even though such person has no contractual relationship or understanding with the issuer. *See,* Securities and Exchange Commission v. Chinese Consolidated Benevolent Assn., Inc., 120 F.2d 738, 740 (2d Cir). *cert. denied.* 314 U.S. 618 (1941); L. Loss, Fundamentals of Securities Regulation, 277–296 (1983).

[5] 15 U.S.C. 77b(11)(1982).

VOL 51 ISS 46 MR 10 1986 UMI

also amending its safe-harbor non-public offering exemption in § 563g.4 by deleting the two (2) year consent transfer restriction. As originally adopted, § 563g.4(d) required, for a period of two (2) years, the written consent of the Corporation prior to any re-sale of securities purchased in reliance on the safe-harbor. *See,* § 563g.4(d), 50 FR 53284, 53290 (December 31, 1985). At the time the exemption was adopted, the Board believed that the consent transfer restriction was necessary to prevent unlawful distributions of securities in circumvention of Part 563g's offering circular requirements. From the inquiries made to the staff since the adoption of the exemption in final form on December 20, 1985, the Board is concerned that the exemption's consent transfer restriction is deterring its use, thereby undermining the Board's intent to provide certainty and comfort in this area by adopting a safe-harbor non-public offering exemption. With the Board's revision to § 563g.1(a)(14) providing a safe-harbor in connection with its definition of underwriter, the Board is amending § 563g.4(d) by replacing the two (2) year consent transfer restriction with the requirement that, *inter alia,* the issuer exercise reasonable care to ensure that purchasers of securities relying on the safe-harbor are not underwriters within the meaning of § 563g.1(a)(14). Reasonable care includes, but is not limited to, (a) reasonable inquiry to determine if the purchaser is acquiring the securities for the purchaser, or for other persons; (b) written disclosure to the purchaser that the securities are not offered pursuant to an offering circular filed with, and declared effective by, the Corporation; and (c) placement of a legend on the certificate evidencing the security stating that the securities have not been offered under an offering circular filed with, and declared effective by, the Corporation and that due care should be taken to ensure that the seller of the securities is not an underwriter within the meaning of § 563g.1(a)(14).

FDIC Insured Accounts not a Security—§ 563g.1(a)(13)

As originally adopted, § 563g.1(a)(13) provided that "security" means the same as the meaning set forth at 561.41 of the Board's Insurance Regulations (12 CFR 561.41 (1985)). *See,* §§ 563g.1(a)(13), 50 FR 53284, 53289 (December 31, 1985). Section 561.41 specifically excludes from the definition of security any "insured account" which, in turn, is defined in § 561.3 as including only accounts insured by the FSLIC. (12 CFR 561.3 (1985)). Because the Board's securities offerings regulation applies to federally chartered savings banks whose accounts are insured by the Federal Deposit Insurance Corporation, the Board is clarifying its definition of "security" in § 563g.1(a)(13) by providing that a security shall not include accounts insured by either the FSLIC or FDIC. However, the amendment is not intended to affect the applicability of § 563.3–10 regulating earnings-based accounts.

Grandfather Provision—§ 563g.3(a)

As originally adopted, § 563g.3(a) provided that the offering circular requirements of § 563g.2 shall not apply to offers and sales of securities "made" prior to March 1, 1986 provided, *inter alia,* that the "offer or sale" does not continue for more than 60 days after March 1, 1986. In clarification of the words "made" and "offer or sale", the Board is amending § 563g.3(a) by substituting the word "commencing" for "made" and the word "offering" for "offer or sale." In this respect, whether an offering has commenced prior to March 1, 1986 depends upon the facts and circumstances of each situation. However, the Board is of the view that an offering will commence at least at the time an offering document, such as a preliminary prospectus or offering circular, is first publicly distributed to potential purchasers. An offering ceases on the last date consideration may be received from the purchasers pursuant to the terms of the offering. With respect to foreign offerings the Board recognizes that different practices are followed in offering securities abroad and is of the view that, for purposes of § 563g.3(a), an offering commences on the publication of the invitation to subscribe for the securities.

Cash Permitted as Collateral—§ 563g.2(f)

The Board is also amending its exemption for collateralized debt securities by revising the list of permissible collateral in § 563g.3(f) to include cash. This amendment is intended to clarify that the Board intended cash to be a permissible form of collateral and to more fully conform with industry practices.

Effective Date-Post Effective Amendments—§ 563g.6

Section 563g.6(c) currently requires post-effective amendments to be filed with the Corporation reflecting changes in material fact which are not reflected in the offering circular on the date it was declared effective by the Corporation. While § 563g.6(c) is clear in providing that such post-effective amendments are not automatically effective in twenty (20) days, but instead must be declared effective by the Corporation, the Board is taking this opportunity to amend § 563g.6 which generally discusses the effective date of an offering circular by adding a new paragraph (e) which provides that an amendment to an offering circular filed after the effective date shall become effective on such date as the Corporation may determine. The other paragraphs in § 563g.6 have been re-lettered to incorporate new paragraph (e).

Content of the Offering Circular—§ 563g.7(a)(4)

The Board is amending § 563g.7(a)(4) for the purposes of clarifying the information required to be included in an offering circular filed pursuant to § 563g.2. As amended, § 563g.7(a)(4) provides that, in addition to the information required by the Commission's Regulation S–K, all of the information required by Item 7 of the Board's Form PS (12 CFR 563b.101) should be included in the offering circular.

Accounting Requirements—§ 563g.7(b)

The Board is also amending § 563g.7(b) concerning the accounting requirements for offering circulars filed with, and declared effective by, the Corporation. The Board is revising the language of § 563g.7(b) to make clear that Subpart A of Part 563c of the Board's Insurance Regulations set forth the applicable accounting requirements for offering circulars, which includes, to the extent required by Part 563c, applicable provisions of the Commission's Regulation S–X.

Other Technical Amendments

By its action today, the Board is also taking the opportunity to make other amendments which are generally technical in nature. The Board is deleting the definitions of "Beneficial Owner" (§ 563g.1(a)(3), 50 FR 53284, 53289 (December 31, 1985)) as unnecessary at this time; and is also making non-substantive corrections of punctuation and form to §§ 563g.1(a) (6), (7), (9); 563g.1(c); 563g.2(b) (1), (2); 563g.3(g); 563g.4(b)(1); 563g.7(a) (7), (8); 563g.10; 563g.11; 563g.12(a), (b) (1), (2); 563g.17 and 563g.18(a), 563g.20; 563.21; 50 FR 53284, 53289, 53291–93 (December 31, 1985).

Pursuant to 12 CFR 508.11 and 508.14, the Board finds that, because of the technical and clarifying nature of the amendments, notice and public procedure are unnecessary, as is the 30-day delay of the effective date. Furthermore, the Board is making the amendments effective as of March 1, 1986, in order to secure for insured institutions the full benefit of the exemption granted and the restrictions relieved.

List of Subjects in 12 CFR Part 563g

Savings and loan associations, Securities.

Accordingly, the Federal Home Loan Bank Board hereby revises Part 563g, Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth and republished in its entirety below.

PART 563g—SECURITIES OFFERINGS

Sec.

563g.1 Definitions.
563g.2 Offering circular requirement.
563g.3 Exemptions.
563g.4 Non-public offerings.
563g.5 Filing and signature requirements.
563g.6 Effective date.
563g.7 Form, content, and accounting.
563g.8 Use of the offering circular.
563g.9 Escrow requirement.
563g.10 Unsafe or unsound practices.
563g.11 Withdrawal or abandonment.
563g.12 Securities sale report.
563g.13 Public disclosure and confidential treatment.
563g.14 Waiver.
563g.15 Requests for interpretive advice or waiver.
563g.16 Delayed or continous offering and sale of securities.
563g.17 Direct sales of securities at an office.
563g.18 Current and periodic reports.
563g.19 Approval of the security.
563g.20 Form for securities sale report.
563g.21 Filing of copies of offering circulars in certain exempt offerings.
563g.22 Delegation of authority.

Authority: Secs. 402, 403 and 407 of the National Housing Act, 48 Stat. 1256, 1257 and 1260, as amended 12 U.S.C. 1725, 1726 and 1730; sec. 5 of the Home Owners' Loan Act of 1933, 48 Stat. 132, as amended, 12 U.S.C. 1464; secs. 3(b), 12, 13, 14, 16, and 23 of the Securities Exchange Act of 1934, 48 Stat. 882, 892, 894, 895, 896, and 901, as amended, 15 U.S.C. 78c(b), 78*l*, m, n, p, and w; the Federal Home Loan Bank Act, 12 U.S.C. 1421 *et seq.;* Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

§ 563g.1 Definitions.

(a) For purposes of this Part, the following definitions apply:

(1) "Accredited investor" means the same as in Commission Rule 501(a) (17 CFR 230.501(a)) under the Securities Act, and includes any insured institution.

(2) "Commission" means the Securities and Exchange Commission

(3) "Dividend or interest reinvestment plan" means a plan which is offered solely to existing security holders of the insured institution which allows such persons to reinvest dividends or interest paid to them on securities issued by the insured institution, and which also may allow additional cash amounts to be contributed by the participants in the plan, provided that the securities to be issued are newly issued, or are purchased for the account of plan participants, at prices not in excess of current market prices at the time of purchase, or at prices not in excess of an amount determined in accordance with a pricing formula specified in the plan and based upon average or current market prices at the time of purchase.

(4) "Employee benefit plan" means any purchase, savings, option, rights, bonus, ownership, appreciation, profit sharing, thrift, incentive, pension or similar plan solely for offices, directors or employees.

(5) "Exchange Act" means the Securities Exchange Act of 1934 (15 U.S.C. 78a–78jj).

(6) "Filing date" means the date on which a document is actually received during business hours, 9:00 a.m. to 5:00 p.m. Eastern Standard Time, by the Corporate and Securities Division, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, DC 20552. However if the last date on which a document can be accepted falls on a Saturday, Sunday, or holiday, such document may be filed on the next business day.

(7) "Insured institution" means the same as in § 561.1 of this Subchapter, and includes a federally-chartered insured institution in organization under this Chapter, and a state-chartered institution in organization which is granted conditional approval of insurance of accounts by the Corporation. In addition, for purposes of § 563g.2 of this part, "insured institution" includes any underwriter participating in the distribution of securities of an insured institution.

(8) "Issuer" means an insured institution which issues or proposes to issue any security.

(9) "Offer;" "Sale" or "sell." For purposes of this Part, the term "offer," "offer to sell," or "offer for sale" shall include every attempt or offer to dispose of, or solicitation of an offer to buy, a security or interest in a security, for value. However, these terms shall not include preliminary negotiations or agreements between an issuer and any underwriter or among underwriters who are or are to be in privity of contract with the issuer. "Sale" and "sell" includes every contract to sell or otherwise dispose of a security or interest in a security for value. Every offer or sale of a warrant or right to purchase or subscribe to another security of the same or another issuer, as well as every sale or offer of a security which gives the holder a present or future right or privilege to convert the security into another security of the same or another issuer, includes an offer and sale of the other security only at the time of the offer or sale of the warrant or right or convertible security; but neither the exercise of the right to purchase or subscribe or to convert nor the issuance of securities pursuant thereto is an offer or sale.

(10) "Person" means the same as in § 563b.2(a)(24) of this subchapter, and includes an insured institution.

(11) "Purchase" and "buy" means the same as in § 563b.2(a)(26) of this Subchapter.

(12) "Securities Act" means the Securities Act of 1933 (15 U.S.C. 77a–77aa).

(13) "Security" means any non-withdrawable account, note, stock, treasury stock, bond, debenture, evidence of indebtedness, certificate of interest or participation in any profit-sharing agreement, collateral-trust certificate, preorganization or subscription, transferable share, investment contract, voting trust certificate or, in general, any interest or instrument commonly known as a "security," or any certificate of interest or participation in, temporary or interim certificate for, receipt for, guarantee of, or warrant or right to subscribe to or purchase any of the foregoing, except that a "security" shall not include an account insured, in whole or in part, by the Federal Savings and Loan Insurance Corporation or the Federal Deposit Insurance Corporation. Nothing in this part shall affect the applicability of § 563.3–10 of this Subchapter.

(14) "Underwriter" means any person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security, or participates or has a participation in the direct or indirect underwriting of any such undertaking; but such term shall not include a person whose interest is limited to a commission from an underwriter or dealer not in excess of the usual and customary distributors' or sellers' commission and such term shall also not include any person who has continually held the securities being transferred for a period of two (2) consecutive years provided that the securities sold in any one (1) transaction shall be less than ten percent (10%) of the issued and oustanding securities of the same class. The following shall apply for the

VOL

1986
UMI

purpose of determining the period securities have been held:

(i) *Stock Dividends, Splits and Recapitalizations.* Securities acquired from the issuer as a dividend or pursuant to a stock split, reverse split or recapitalization shall be deemed to have been acquired at the same time as the securities on which the dividend or, if more than one, the initial dividend was paid, the securities involved in the split or reverse split, or the securities surrendered in connection with the recapitalization.

(ii) *Conversions.* If the securities sold were acquired from the issuer for a consideration consisting solely of other securities of the same issuer surrendered for conversion, the securities so acquired shall be deemed to have been acquired at the same time as the securities surrendered for conversion.

(iii) *Contingent Issuance of Securities.* Securities acquired as a contingent payment of the purchase price of an equity interest in a business, or the assets of a business, sold to the issuer or an affiliate of the issuer shall be deemed to have been acquired at the time of such sale if the issuer was then committed to issue the securities subject only to conditions other than the payment of further consideration for such securities. An agreement entered into in connection with any such purchase to remain in the employment of, or not to compete with, the issuer or affiliate or the rendering of services pursuant to such agreement shall not be deemed to be the payment of further consideration for such securities.

(iv) *Pledged Securities.* Securities which are bona fide pledged by any person other than the issuer when sold by the pledgee, or by a purchaser, after a default in the obligation secured by the pledge, shall be deemed to have been acquired when they were acquired by the pledgor, except that if the securities were pledged without recourse they shall be deemed to have been acquired by the pledgee at the time of the pledge or by the purchaser at the time of purchase.

(v) *Gifts of Securities.* Securities acquired from any person, other than the issuer, by gift shall be deemed to have been acquired by the donee when they were acquired by the donor.

(vi) *Trusts.* Securities acquired from the settler of a trust by the trust or acquired from the trust by the beneficiaries thereof shall be deemed to have been acquired when they were acquired by the settler.

(vii) *Estates.* Securities held by the estate of a deceased person or acquired from such an estate by the beneficiaries thereof shall be deemed to have been acquired when they were acquired by the deceased person, except that no holding period is required if the estate is not an affiliate of the issuer or if the securities are sold by a beneficiary of the estate who is not such an affiliate.

(viii) *Exchange Transactions.* A person receiving securities in a transaction involving an exchange of the securities of one issuer for securities of another issuer shall be deemed to have acquired the securities received when such person acquired the securities exchanged.

(*b*) A term not defined in this Part but defined in another part of this Subchapter, when used in this Part, shall have the meanings given in such other part, unless the context otherwise requires.

(c) When used in the rules, regulations, or forms of the Commission referred to in this Part, the term "Commission" shall be deemed to refer to the Corporation or the Board, the term "registrant" shall be deemed to refer to an issuer defined in this Part, and the term "registration statement" or "prospectus" shall be deemed to refer to an offering circular filed under this Part, unless the context otherwise requires.

§ 563g.2 Offering circular requirement.

(a) *General.* No insured institution shall offer or sell, directly or indirectly, any security issued by it unless:

(1) The offer or sale is accompanied or preceded by an offering circular which includes the information required by this Part and which has been filed and declared effective pursuant to this Part; or

(2) An exemption is available under this part.

(b) *Communications not deemed an offer.* The following communications shall not be deemed an offer under this section:

(1) Prior to filing an offering circular, any notice of a proposed offering which satisfies the requirements of Commission Rule 135 (17 CFR 230.135) under the Securities Act;

(2) Subsequent to filing an offering circular, any notice circular, advertisement, letter, or other communication published or transmitted to any person which satisfies the requirements of Commission Rule 134 (17 CFR 230.134) under the Securities Act; and

(3) Oral offers of securities covered by an offering circular made after filing the offering circular with the Corporation.

(c) *Preliminary offering circular.* Notwithstanding paragraph (a) of this section, a preliminary offering circular may be used for an offer of any security prior to the effective date of the offering circular if:

(1) The preliminary offering circular has been filed pursuant to this part;

(2) The preliminary offering circular includes the information required by this part, except for the omission of information relating to offering price, discounts or commissions, amount of proceeds, conversion rates, call prices, or other matters dependent on the offering price; and

(3) The offering circular declared effective by the Corporation is furnished to the purchaser prior to, or simultaneously with, the sale of any such security.

§ 563g.3 Exemptions.

The offering circular requirement of § 563g.2 of this part shall not apply to an issuer's offer or sale of securities:

(a) Commencing prior to March 1, 1986: *Provided,* that (1) the offering does not continue for more than 60 days after March 1, 1986, and (2) the issuer is not a *de novo* federally-chartered institution in organization;

(b) Complying with the requirements for retail repurchase agreements of § 563.8–4 of this subchapter, except where the issuer has a net-worth deficiency under that section;

(c) Exempt from registration under either section 3(a) or section 4 of the Securities Act, but only by reason of an exemption other than section 3(a)(5) (for regulated savings and loan associations), and section 3(a)(11) (for intrastate offerings) of the Securities Act;

(d) In a conversion from the mutual to the stock form of organization pursuant to Part 563b of this subchapter, except for a supervisory conversion undertaken pursuant to Subpart C of Part 563b of this subchapter;

(e) In a non-public offering which satisfies the requirements of § 563g.4 of this part;

(f) That are debt securities issued in denominations of $100,000 or more, which are fully collateralized by cash, any security issued, or guaranteed as to principal and interest, by the United States, the Federal Home Loan Mortgage Corporation, Federal National Mortgage Association, Government National Mortgage Association or by interests in mortgage notes secured by real property;

(g) Distributed exclusively abroad to foreign nationals: *Provided,* that (1) the offering is made subject to safeguards reasonably designed to preclude distribution or redistribution of the securities within, or to nationals of, the United States, and (2) such safeguards include, without limitation, measures

that would be sufficient to ensure that registration of the securities would not be required if the securities were not exempt under the Securities Act; or

(h) To its officers, directors or employees pursuant to an employee benefit plan or a dividend or interest reinvestment plan, and provided that any such plan has been approved by the majority of shareholders present in person or by proxy at an annual or special meeting of the shareholders of the insured institution.

§ 563g.4 Non-public offering.

Offers and sales of securities by an issuer that satisfy the conditions of paragraph (a) or (b) and the requirements of paragraphs (c) and (d) of this section shall be deemed to be transactions not involving any public offering within the meaning of section 4(2) of the Securities Act and §§ 563g.3(c) and 563g.3(e) of this part. However, an issuer shall not be deemed to be not in compliance with the provisions of this section solely by reason of making an untimely filing of the notice required to be filed by paragraph (c) of this section so long as the notice is actually filed and all other conditions and requirements of this section are satisfied.

(a) *Regulation D.* The offer and sale of all securities in the transaction satisfies the Commission's Regulation D (17 CFR 230.501–230.506), except for the notice requirements of Commission Rule 503 (7 CFR 230.503) and the limitations on resale in Commission Rule 502(d) (17 CFR 230.502(d)).

(b) *Sales to 35 persons.* The offer and sale of all securities in the transaction satisfies each of the following conditions:

(1) Sales of the security are not made to more than 35 persons during the offering period, as determined under the integration provisions of Commission Rule 502(a) (17 CFR 230.502(a)). The number of purchasers referred to above is exclusive of any accredited investor, officer, director or affiliate of the issuer. For purposes of this paragraph (b), a husband and wife (together with any custodian or trustee acting for the account of their minor children) are counted as one person and a partnership, corporation or other organization which was not specifically formed for the purpose of purchasing the security offered in reliance upon this exemption, is counted as one person.

(2) All purchasers either have a pre-existing personal or business relationship with the issuer or any of its officers, directors or controlling persons, or by reason of their business or financial experience or the business or financial experience of their professional advisors who are unaffiliated with and who are not compensated by the issuer or any affiliate or selling agent of the issuer, directly or indirectly, could reasonably be assumed to have the capacity to protect their own interests in connection with the transaction.

(3) Each purchaser represents that the purchaser is purchasing for the purchaser's own account (or at trust account if the purchaser is a trustee) and not with a view to or for sale in connection with any distribution of the security.

(4) The offer and sale of the security is not accomplished by the publication of any advertisement.

(c) *Filing of notice of sales.* Within 30 days after the first sale of the securities, every six months after the first sale of the securities and not later than 30 days after the last sale of securities in an offering pursuant to this section, the issuer, shall file with the Corporation a report describing the results of the sale of securities as required by § 563g.12(b) of this part.

(d) *Limitation on resale.* The issuer shall exercise reasonable car to assure that the purchasers of the securities are not underwriters within the meaning of § 563g.1(a)(14) of this part, which reasonable care shall include, but not be limited to, the following:

(1) Reasonable inquiry to determine if the purchaser is acquiring the securities for the purchaser or for other persons;

(2) Written disclosure to each purchaser prior to the sale that the securities are not offered by an offering circular filed with, and declared effective by, the Corporation pursuant to § 563g.2 of this part, but instead are being sold in reliance upon the exemption from the offering circular requirement provided for by this section; and

(3) Placement of a legend on the certificate, or other document evidencing the securities, indicating that the securities have not been offered by an offering circular filed with, and declared effective by, the Corporation and that due care should be taken to ensure that the seller of the securities is not an underwriter within the meaning of § 563g.1(a)(14) of this part.

§ 563g.5 Filing and signature requirements.

(a) *Procedures.* An offering circular, amendment, notice, report, or other document required by this part shall, unless otherwise indicated, be filed in accordance with the requirements of § 563b.8(e) (1), (3) and (4), (f) through (q), and (s), of this subchapter.

(b) *Number of copies.* (1) Unless otherwise required, any filing under this part shall inlcude 10 copies of the document to be filed with the Corporation, as follows:

(i) Seven copies, which shall include one manually signed copy with exhibits, three conformed copies with exhibits, and three conformed copies without exhibits, to the Corporate and Securities Division, Office of General Counsel; and

(ii) Three copies, which shall include one manually signed copy with exhibits and two conformed copies without exhibits, to the Principal Supervisory Agent.

(2) Within five days after the effective date of an offering circular or the commencement of a public offering after the effective date, whichever occurs later, 25 copies of the offering circular used shall be filed with the Corporation, as follows: 22 copies to the Corporate and Securities Division, Office of General Counsel, and three copies to the Principal Supervisory Agent.

(3) After the effective date of an offering circular, an offering circular which varies from the form previously filed shall not be used, unless it includes only non-material supplemental or additional information and until 10 copies have been filed with the Corporation in the manner required.

(c) *Signature.* (1) Any offering circular, amendment, or consent filed with the Corporation pursuant to this Part shall include an attached manually signed signature page which authorizes the filing and has been signed by:

(i) The issuer, by its duly authorized representative;

(ii) The issuer's principal executive officer;

(iii) The issuer's principal financial officer;

(iv) The issuer's principal accounting officer; and

(v) At least a majority of the issuer's directors.

(2) Any other document filed pursuant to this Part shall be signed by a person authorized to do so.

(3) At least *one copy* of every document filed pursuant to this Part shall be manually signed, and every copy of a document filed shall:

(i) Have the name of each person who signs typed or printed beneath the signature;

(ii) State and capacity or capacities in which the signature is provided;

(iii) Provide the name of each director of the issuer, if a majority of directors is required to sign the document; and

(iv) With regard to any copies not manually signed, bear typed or printed signatures.

§ 563g.6 Effective date.

(a) Except as provided for in paragraph (d) of this section, an offering circular filed by an insured institution shall be deemed to be automatically declared effective by the Corporation on the twentieth day after filing or on such earlier date as the Corporation may determine for good cause shown.

(b) If any amendment is filed prior to the effective date, the offering circular shall be deemed to have been filed when such amendment was filed.

(c) The period until automatic effectiveness under this section shall be stated at the bottom of the facing page of the Form OC or any amendment.

(d) The effectiveness will be delayed if a duly authorized amendment, telegram confirmed in writing, or letter states that the effective date is delayed until a further amendment is filed specifically stating that the offering circular will become effective in accordance with this section.

(e) An amendment filed after the effective date of the offering circular shall become effective on such date as the Corporation may determine.

(f) If it appears to the Corporation at any time that the offering circular includes any untrue statement of a material fact or omits to state any material fact required to be stated therein or necessary to make the statements therein not misleading, then the Federal Home Loan Bank Board, as the operational head of the Corporation, may pursue any remedy it is authorized to pursue under section 407 of the National Housing Act of 1934, as amended, (12 U.S.C. 1730) including, but not limited to, institution of cease-and-desist proceedings.

§ 563g.7 Form, content, and accounting.

(a) *Form and content.* Any offering circular or amendment filed pursuant to this part shall:

(1) Be filed under cover of Form OC, which is under Part 563b of this subchapter;

(2) Comply with the requirements of Items 3 and 4 of Form OC and the requirements of all items of the form for registration (17 CFR Part 239) that the issuer would be eligible to use were it required to register the securities under the Securities Act;

(3) Comply with all item requirements of the Form S–1 (17 CFR Part 239) for registration under the Securities Act, if the institution issuing the securities is not in compliance with the Corporation's regulatory net-worth requirements during the time the offering is made;

(4) Where a form specifies that the information required by an item in the Commission's Regulation S–K (17 CFR Part 229) should be furnished, include such information and all of the information required by Item 7 of Form PS, which is under Part 563b of this Subchapter;

(5) Include after the facing page of the Form OC a cross-reference sheet listing each item requirement of the form for registration under the Securities Act and indicate for each item the applicable heading or subheading in the offering circular under which the required information is disclosed;

(6) Include in Part II of the Form OC the applicable undertakings required by the form for registration under the Securities Act;

(7) If the issuer has not previously been required to file reports pursuant to section 13(a) of the Exchange Act or § 563g.18 of this Part, include in Part II of Form OC the following undertaking: "The issuer hereby undertakes, in connection with any distribution of the offering circular, to have a preliminary or effective offering circular including the information required by this Part distributed to all persons expected to be mailed confirmations of sale not less than 48 hours prior to the time such confirmations are expected to be mailed;"

(8) In offerings involving the issuance of options, warrants, subscription rights or conversion rights within the meaning of § 563g.1(a)(9), include in Part II of Form OC an undertaking to provide a copy of the issuer's most recent audited financial statements to persons exercising such options, warrants or rights promptly upon receiving written notification of the exercise thereof;

(9) Include as supplemental information and not as part of the Form OC and only with respect to *de novo* offerings, a copy of the application for permission to organize for federally-chartered institutions, and a copy of the application for insurance of accounts for state-chartered institutions; and

(10) In addition to the information expressly required to be included by this section, there shall be added such further material information, if any, as may be necessary to make the required statements, in light of the circumstances under which they are made, not misleading.

(b) *Accounting requirements.* To be declared effective, an offering circular or amendment shall satisfy the accounting requirements in Subpart A of Part 563c of this subchapter.

§ 563g.8 Use of the offering circular.

(a) An offering circular or amendment declared effective by the Corporation shall not be used more than nine months after the effective date, unless the information contained therein is as of a date not more than 16 months prior to such use.

(b) An offering circular filed under § 563g.5(b)(3) of this part shall not extend the period for which an effective offering circular or amendment may be used under paragraph (c) of this section.

(c) If any event arises, or change in fact occurs, after the effective date and such event or change in fact, individually or in the aggregate, results in the offering circular containing any untrue statement of material fact, or omitting to state a material fact necessary in order to make statements made in the offering circular not misleading under the circumstances, then no offering circular, which has been declared effective under this part, shall be used until an amendment reflecting such event or change in fact has been filed with, and declared effective by, the Corporation.

§ 563g.9 Escrow requirement.

(a) Any funds received in an offering which is offered and sold on a best efforts all-or-none condition or with a minimum-maximum amount to be sold shall be held in an escrow or similar separate account until such time as all of the securities are sold with respect to a best efforts all-or-none offering or the stated minimum amount of securities are sold in a minimum-maximum offering.

(b) If the amount of securities required to be sold under escrow conditions in paragraph (a) of this section are not sold within the time period for the offering as disclosed in the offering circular, all funds in the escrow account shall be promptly refunded unless the Corporation otherwise approves an extension of the offering period upon a showing of good cause and provided that the extension is consistent with the public interest and the protection of investors.

§ 563g.10 Unsafe or unsound practices.

It shall constitute an unsafe or unsound practice within the meaning of Section 5(d) of the Home Owner's Loan Act of 1933 (12 U.S.C. 1464(d)) and section 407(e) of the National Housing Act of 1934 (12 U.S.C. 1730(e)) for any person, directly or indirectly,

(a) To employ any device, scheme or artifice to defraud,

(b) To make any untrue statement of a material fact or to omit to state a material fact necessary in order to make statements made, in light of the circumstances under which they were made, not misleading, or

(c) To engage in any act, practice, or course of business which operates as a fraud or deceit upon any person, in connection with the purchase or sale of any security of an insured institution. Nothing in this section shall be construed as a limitation on the applicability of section 10(b) of the Exchange Act (15 U.S.C. 78j(b)) or Rule 10b–5 promulgated thereunder (17 CFR 240.10b–5).

§ 563g.11 Withdrawal or abandonment.

(a) Any offering circular, amendment, or exhibit may be withdrawn prior to the effective date. A withdrawal shall be signed and state the grounds upon which it is made. Any document withdrawn will not be removed from the files of the Corporation, but will be marked "Withdrawn upon the request of the issuer on (date)."

(b) When an offering circular or amendment has been on file with the Corporation for a period of nine months and has not become effective the Corporation may, in its discretion, determine whether the filing has been abandoned, after notifying the issuer that the filing is out of date and must either be amended to comply with the applicable requirements of this Part or be withdrawn within 30 days after the date of such notice. When a filing is abandoned, the filing will not be removed from the files of the Corporation, but will be marked "Declared abandoned by the FSLIC on (date)."

§ 563g.12 Securities sale report.

(a) Within 30 days after the first sale of the securities, every six months after such 30 day period and not later than 30 days after the later of the last sale of securities in an offering pursuant to § 563g.2 of this part or the application of the proceeds therefrom, the issuer shall file with the Corporation a report describing the results of the sale of the securities and the application of the proceeds, which shall include all of the information required by Form G–12 set forth at § 563g.20 of this part and shall also include the following:

(1) The name, address, and docket number of the issuer;

(2) The title, number, aggregate and per-unit offering price of the securities sold;

(3) The aggregate and per-unit dollar amounts of actual itemized expenses, discounts or commissions, and other fees;

(4) The aggregate and per-unit dollar amounts of the net proceeds raised, and the use of proceeds therefrom; and

(5) The number of purchasers of each class of securities sold and the number of owners of record of each class of the issuer's equity securities after the issuance of the securities or termination of the offer.

(b) Within 30 days after the first sale of the securities, every six months after the first sale of the securities and not later than 30 days after the last sale of securities in an offering pursuant to § 563g.4 of this Part, the issuer shall file with the Corporation a report describing the results of the sale of securities, which shall include all of the information required by Form G–12 set forth at § 563g.20 of this part, and shall also include the following:

(1) All of the information required by paragraph (a) of this section; and

(2) A detailed statement of the factual and legal grounds for the exemption claimed.

§ 563g.13 Public disclosure and confidential treatment.

(a) Any offering circular, amendment, exhibit, notice, or report filed pursuant to this part will be publicly available. Any other related documents will be treated in accordance with the provisions of the Freedom of Information Act (5 U.S.C. 552), the Privacy Act of 1974 (5 U.S.C. 552a), and Parts 505 and 505a of this chapter.

(b) Any requests for confidential treatment of information in a document required to be filed under this Part shall be made as required under Commission Rule 24b–2 (17 CFR 240.24b–2) under the Exchange Act.

§ 563g.14 Waiver.

(a) The Corporation may waive any requirement of this Part, or any required information:

(1) Determined to be unnecessary by the Corporation;

(2) In connection with a transaction approved by the Corporation for supervisory reasons, or

(3) Where a provision of this Part conflicts with a requirement of applicable state law.

(b) Any condition, stipulation or provision binding any person acquiring a security issued by an insured institution which seeks to waive compliance with any provision of this Part shall be void, unless approved by the Corporation.

§ 563g.15 Requests for interpretive advice or waiver.

Any requests to the Corporation for interpretive advice or a waiver with respect to any provision of this Part shall satisfy the following requirements:

(a) A copy of the request, including any attachments, shall be filed with the Office of General Counsel, Corporate and Securities Division;

(b) The provisions of this Part to which the request relates, the participants in the proposed transaction, and the reasons for the request, shall be specifically identified or described; and

(c) The request shall include a legal opinion as to each legal issue raised and an accounting opinion as to each accounting issue raised.

§ 563g.16 Delayed or continuous offering and sale of securities.

Any offer or sale of securities under § 563g.2 of this part may be made on a continuous or delayed basis in the future, if:

(a) The securities would satisfy all of the eligibility requirements of the Commission's Rule 415, 17 CFR 230.415; and

(b) The institution issuing the securities is in compliance with the Corporation's regulatory net-worth requirements during the time the offering is made.

§ 563g.17 Direct sales of securities at an office.

Securities of an insured institution or an affiliate may only be offered or sold at an office of an insured institution or an affiliate, if:

(a) No commissions are paid to any employee or other person;

(b) No offers or sales are made by tellers or at the teller counter, or by comparable persons at comparable locations;

(c) Offers and sales are made only by regular, full-time employees; and

(d) The institution issuing the securities is in compliance with the Corporation's regulatory net-worth requirements during the time the offering is made, except that such compliance is not required for repurchase agreements issued in compliance with § 563.8–4 of this subchapter.

§ 563g.18 Current and periodic reports.

(a) Each insured institution which files an offering circular which becomes effective pursuant to this Part, after such effective date, shall file with the Corporation periodic and current reports on Forms 8–K, 10–Q and 10–K as may be required by section 13 of the Exchange Act (15 U.S.C. 78m) as if the securities sold by such offering circular were securities registered pursuant to section 12 of the Exchange Act (15 U.S.C. 78*l*). The duty to file periodic and current reports under this section shall be automatically suspended if and so long as any issue of securities of the insured institution is registered pursuant to

VOL
51
ISS
46
MR
10
1986
UMI

section 12 of the Exchange Act (15 U.S.C. 78l). The duty to file under this section shall also be automatically suspended as to any fiscal year, other than the fiscal year within which such offering circular became effective, if, at the beginning of such fiscal year, the securities of each class to which the offering circular relates are held of record by less than three hundred persons.

(b) For purposes of registering securities under sections 12(b) or 12(g) of the Exchange Act, an issuer subject to the reporting requirements of paragraph (a) of this section may use the Commission's registration statement on Form 10 or Forms 8–A or 8–B as applicable.

§ 563g.19 Approval of the security.

Any securities of an insured institution which are not exempt under this Part and are offered or sold pursuant to an offering circular which becomes effective under this Part, are deemed to be approved as to form and terms for purposes of § 563.1 of this subchapter.

§ 563g.20 Form for securities sale report.

Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552

[Form G–12]

Securities Sale Report Pursuant to Section 563g.12

FHLBB No.
Issuer's Name:
Address:
If in organization, state the date of certification of insurance of accounts:........
State the title, number, aggregate and per-unit offering price of the securities sold:........
State the aggregate and per-unit dollar amounts of actual itemized offering expenses, discounts, commissions, and other fees:........
State the aggregate and per-unit dollar amounts of the net proceeds raised:........
Describe the use of proceeds. If unknown, provide reasonable estimates of the dollar amount allocated to each purpose for which the proceeds will be used:........
State the number of purchasers of each class of securities sold and the number of owners of record of each class of the issuer's equity securities at the close or termination of the offering:........
For a non-public offering, also state the factual and legal grounds for the exemption claimed (attach additional pages if necessary):........
For a non-public offering, all offering materials used should be listed:........
Person to Contact:........
Telephone No.:........

This issuer has duly caused this securities sale report to be signed on its behalf by the undersigned person.

Date of securities sale report........
Issuer:........
Signature:........
Name:........
Title:........

Instruction: Print the name and title of the signing representative under his signatures. Ten copies of the securities sale report should be filed, including one copy manually signed, as required under 12 CFR 563g.5.

Attention

Intentional misstatements or omissions of fact constitute violations of Federal law (See 18 U.S.C. 1001 and 12 CFR 563.18(b)).

§ 563g.21 Filing of copies of offering circulars in certain exempt offerings.

A copy of the offering circular, or similar document, if any, used in connection with an offering exempt from the offering circular requirement of § 563g.2 by reason of §§ 563g.3(f) or 563g.4 of this part shall be mailed to the Corporation within 30 days after the first sale of such securities. Such copy of the offering circular, or similar document, is solely for the information of the Corporation and shall not be deemed to be "filed" with the Corporation pursuant to § 563g.2 of this part. The mailing to the Corporation of such offering circular, or similar document, shall not be a pre-condition of the applicable exemption from the offering circular requirements of § 563g.2 of this part.

§ 563g.22 Delegation of authority.

The General Counsel, Deputy General Counsel, Associate General Counsel for Corporate and Securities or their designee, is authorized to act on, or exercise the Corporation's authority pursuant to, this Part.

By the Federal Home Loan Bank Board.

Jeff Sconyers,
Secretary.

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83–ANE–27; Amdt. 39–5240]

Airworthiness Directives; McCauley Accessory Division, Models 2A34C66, E2A34C73, and 2A36C23 Constant Speed Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) which requires a one-time inspection of certain McCauley Model 2A34C66 and E2A34C73 propellers. The amendment is needed to make the AD applicable to the Model 2A36C23 propeller because the FAA has determined that these propellers are susceptible to blade retention failure to which the AD is directed.

DATES: Effective March 12, 1986.

Compliance required as prescribed in body of AD.

Incorporation by Reference—Approved by the Director of the Federal Register effective on March 12, 1986.

ADDRESSES: The applicable service bulletin may be obtained from McCauley Accessory Division, Cessna Aircraft Company, 3535 McCauley Drive, P.O. Box 430, Vandalia, Ohio 45377.

A copy of the service bulletin is contained in the Rules Docket, Office of Regional Counsel, FAA, Attn: Rules Docket No. 83–ANE–27, 12 New England Executive Park, Burlington, Massachusetts 01803 and may be examined weekdays, except Federal holidays, between 8:00 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Alpiser, Chicago Aircraft Certification Office, Propulsion Branch, ACE–140C, FAA, 2300 East Devon Avenue, Des Plaines, Illinois 60018; telephone 312–694–7130.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment 39–4768, 48 FR 54588, AD 83–24–11, which currently requires a one-time inspection of the retention threads on the blades and ferrules for scratches and sharp edges, and repair as necessary, on certain McCauley 2A34C66 and E2A34C73 model propellers. After issuing Amendment 39–4768, the FAA has determined, through service experience, that the Model 2A36C23 propellers are susceptible to the same blade retention failure to which the AD is directed. Therefore, the FAA is amending Amendment 39–4768 by requiring a one-time inspection of the retention threads on the blades and ferrules for scratches and sharp edges, and repair as necessary, on certain McCauley Model 2A36C23 propellers.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of the final evaluation when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT".

List of Subjects in 14 CFR Part 39

Propellers, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By amending Amendment 39–4768 (48 FR 54588) AD 83–24–11, as follows:

(a) By revising the applicability statement to read as follows:

Applies to certain McCauley Model 2A34C66/90AT–2, E2A34C73/90AT–8, and 2A36C23/84B–0 constant speed propellers with specific serial numbers listed in McCauley Service Bulletin No. 151A dated December 6, 1985, or FAA approved equivalent, installed on, but not limited to, Cessna 180, 180A through 180J, Cessna 188, 188A, and 188B, Cessna P206, P206A through P206E, Cessna 210E through 210L, and Beech 33, 35, and 36 series aircraft certificated in any category.

(b) By revising paragraphs (1), (2), and (4) of the amendment by changing the McCauley Service Bulletin citation from "No. 151 dated September 15, 1983," to "No. 151A dated December 6, 1985, or FAA approved equivalent".

McCauley Service Bulletin No. 151A dated December 6, 1985, identified and described in this directive, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to McCauley Accessory Division, Cessna Aircraft Company, 3535 McCauley Drive, P.O. Box 430, Vandalia, Ohio 45377. This document also may be examined at the Office of the Regional Counsel, FAA, Attn: Rules Docket No. 83–ANE–27, 12 New England Executive Park, Burlington, Massachusetts 01803, weekdays, except Federal holidays, between 8:00 a.m. and 4:30 p.m.

This amendment becomes effective on March 12, 1986.

This amendment amends Amendment 39–4768 (48 FR 54588), AD 83–24–11.

Issued in Burlington, Massachusetts, on February 11, 1986.

Robert E. Whittington,
Director, New England Region.

14 CFR Part 71

[Airspace Docket No. 86–AWA–8]

Alteration of VOR Federal Airway V–181, South Dakota

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the description of V–181 located in the vicinity of Yankton, SD. The Yankton very high frequency omni-directional radio range distance measuring equipment (VOR/DME) has been relocated and is currently on the Yankton Airport. The NPRM was originally published in the Federal Register on December 23, 1983, as Airspace Docket 83–AWA–28 (48 FR 56769). However, due to engineering and technical problems associated with the new site location Yankton VOR/DME did not receive a satisfactory flight check for commissioning and acceptance in the National Airspace System (NAS). We have now been advised that Yankton, SD, VOR/DME has successfully passed the required flight check for commissioning into the NAS.

EFFECTIVE DATE: 0901 G.m.t., May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426–8626.

SUPPLEMENTARY INFORMATION:

History

On December 23, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the description of V–181 located in the vicinity of Yankton, SD (48 FR 56769). Due to engineering and technical problems associated with the new site location, the Yankton, SD, VOR/DME did not receive a satisfactory flight check for commissioning and acceptance into the NAS, therefore, ASD 83–AWA–23 was cancelled on February 19, 1986 (51 FR 5989). We have been advised that Yankton, SD, VOR/DME has now successfully passed the required flight check for commissioning into the NAS. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for this action being given a new docket number this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the description of V–181 located in the vicinity of Yankton, SD. Yankton VOR/DME has been relocated on the Yankton Airport from its present position to a position approximately 1,350 feet north. The only airway description change is for V–181W. This action redescribes V–181W to insure adequate divergence from V–181 for air traffic control purposes.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

VOL 51 ISS 46 MR 10 1986 UMI

Aviation safety, VOR federal airways.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. Section 71.123 is amended as follows:

By deleting the words "Sioux Falls, SD, including a W alternate via INT Yankton 016° and Sioux Falls, SD, 230° radials; Watertown, SD," and substituting the words "Sioux Falls, SD, including a W alternate via INT Yankton 015° and Sioux Falls 231° radials; Watertown, SD,"

Issued in Washington, DC, on March 3, 1986.

Daniel J. Peterson,
Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 71

[Airspace Docket No. 85-AGL-10]

Realignment of VOR Federal Airways V–144 and V–45

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action realigns V–144 in the states of Indiana and Ohio and V–45 in the states of Ohio and West Virginia. This action is taken to help relieve traffic congestion, provide a more direct route for airspace users and enhance air traffic control nonradar services.

EFFECTIVE DATE: 0901 UTC, May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Gene Falsetti, Airspace and Air Traffic Rules Branch (ATO–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On November 14, 1985, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to realign V–144 from Ft. Wayne, IN, to Appleton, OH, to alleviate traffic congestion and to provide a more direct route for airspace users and extend V–45 from Charleston, WV, to Henderson, WV, to Appleton, OH (50 FR 47061). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. One comment was received expressing concern for the effect the extended airway V–45 would have on sport flying in the area. The commenter subsequently concurred after dialog with the FAA and the common conclusion that safety in aviation was the uppermost concern. Also, due to budgetary and workload consideration, flight check action for the proposed V–45 segment between Henderson, WV, and Charleston, WV, cannot be completed in the foreseeable future. Therefore, that segment of the proposed route will not be implemented with this docket. Except for the above, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations realigns V–144 from Ft. Wayne, IN, to Appleton, OH, and extends V–45 from Henderson, WV, to Appleton, OH. This action is taken to help relieve traffic congestion and provide a more direct route for airspace users and enhance air traffic control nonradar services.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. Section 71.123 is amended as follows:

V–144 [Amended]

By removing the words "Findlay, OH; INT Findlay, 131° and Appleton, OH, 312° radials; Appleton;" and substituting "Appleton, OH;"

V–45 [Amended]

By adding the words "From Henderson, WV; Appleton, OH." after the words "Charleston, WV."

Issued in Washington, DC, on March 3, 1986.

Daniel J. Peterson,
Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 71

[Airspace Docket No. 85-AWA-3]

Establishment of Airport Radar Service Areas; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: This action corrects the description of the Palm Beach International Airport, West Palm Beach, FL, Airport Radar Service Area (ARSA). In the final rule an error was made in the radius of the cutout for Palm Beach County Park Airport. This action corrects that error.

EFFECTIVE DATE: 0901 UTC, March 13, 1986.

FOR FURTHER INFORMATION CONTACT: Paul Smith, Airspace and Air Traffic Rules Branch (ATO–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

Federal Register document 86-2712 was published on February 7, 1986, in which an ARSA was designated for Palm Beach International Airport, West Palm Beach, FL. A cutout was provided for Palm Beach County Park Airport delineated by a 1.5-mile radius of the latter and west of Interstate 95. It should have been a 2-mile radius. This action corrects that error.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

Adoption of the Correction

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, **Federal Register** Document 86-2712, as published in the **Federal Register** on February 7, 1986 (51 FR 4872) is corrected as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a) and 1354(a); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. Section 71.501 is amended as follows:

Palm Beach International Airport, FL [Amended]

By removing the words "within a 1½-mile radius" and by substituting the words "within a 2-mile radius"

Issued in Washington, DC, on March 3, 1986.

Daniel J. Peterson,
Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Parts 71 and 75

[Airspace Docket No. 86-ANM-5]

Alteration of VOR Federal Airways and Jet Routes; Colorado

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments alter the descriptions of all airways and jet routes that have Gunnison, CO, very high frequency omni-directional radio range and tactical air navigational aid (VORTAC) in their route/airway alignments. The Gunnison VORTAC has been renamed Blue Mesa and these actions make editorial changes to those descriptions. These actions make no changes to controlled airspace.

EFFECTIVE DATE: 0901 UTC, May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8626

The Rule

These amendments to Parts 71 and 75 of the Federal Aviation Regulations reflect the change in name of the Gunnison, CO, VORTAC to Blue Mesa, CO, VORTAC, which requires changes to all airway and jet route descriptions that have Gunnison, CO, in their route alignment. Since these actions are merely editorial in nature, and involve no changes to the current controlled airspace, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because these actions are minor amendments in which the public would not be particularly interested. Section 71.123 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations were republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Parts 71 and 75

Aviation safety, VOR Federal airways, Jet routes.

Adoption of the Amendments

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) are amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. Section 71.123 is amended as follows:

V–26, V–95, V–244, V–421 and V–484 [Amended]

By removing the word "Gunnison" and substituting the words "Blue Mesa".

PART 75—[AMENDED]

3. The authority citation for Part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

4. Section 75.100 is amended as follows:

J–10, J–26, J–128, J–146, J–197 and J–206 [Amended]

By removing the word "Gunnison" and substituting the words "Blue Mesa".

Issued in Washington, DC, on March 3, 1986

Daniel J. Peterson,
Manager, Airspace-Rules and Aeronautical Information Division.

[COTP San Diego Regulation 85–17]

Security Zone Regulations; San Diego Bay, CA, Pacific Ocean

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a security zone at Naval Air Station North Island, San Diego, California, consisting of the water area

BEST COPY AVAILABLE

VOL 51 ISS 46 MR 10 1986 UMI

within 100 yards (91.5 meters) of the cruiser pier (berths J–K) and within 300 yards (275 meters) of the carrier pier (quay wall, berths L–P). This security zone is established at the request of the United States Navy and is needed to safeguard U.S. Naval vessels and property from sabotage or other subversive acts, accidents, criminal actions, or other causes of a similar nature. Entry into this zone is prohibited unless authorized by the Captain of the Port, the Commander, Naval Air Force, U.S. Pacific Fleet, the Commander, Naval Base San Diego, or the Commanding Officer, Naval Air Station North Island.

EFFECTIVE DATE: This regulation is effective on April 9, 1986.

FOR FURTHER INFORMATION CONTACT: LCDR Steven P. Mojonnier, USCG, c/o U.S. Coast Guard Captain of the Port, 2710 N. Harbor Drive, San Diego, CA 92101–1064, telephone (619) 293–5860.

SUPPLEMENTARY INFORMATION: On January 3, 1986, the Coast Guard published a notice of proposed rule making in the **Federal Register** for these regulations (51 FR 224).

Interested persons were requested to submit comments, and no comments were received.

Drafting Information

The drafters of this notice are LCDR Steven P. Mojonnier, project officer for the Captain of the Port, and LT Joseph R. McFaul, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Comments

No comments were received on the notice of proposed rule making, and no changes have been made in the regulation as proposed.

This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; 26 February 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. The area within the zone is a small area outside the normal shipping channels. The only vessels normally using these waters are U.S. Naval vessels. There will be minimal effect on routine navigation.

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231: 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 33 CFR 160.5.

2. In Part 165, a new § 165.1105 is added, to read as follows:

§ 165.1105 Security Zone: San Diego Bay, California.

(a) *Location.* The following area is a security zone: The water area adjacent to Naval Air Station North Island, Coronado, California, and within 100 yards (91.5 meters) of the Cruiser (J–K) Pier and within 300 yards (275 meters) of the Carrier (L–P) Pier, described as follows:

From a point on the shoreline of Naval Air Station North Island, on North Island, Coronado, California, at latitude 32°42'47.5" N., longitude 117°11'25.0" W. (Point A), for a place of beginning; thence northeasterly to latitude 32°42'52.0" N., longitude 117°11'21.5" W. (Point B); thence southeasterly to latitude 32°42'44.5" N., longitude 117°11'11.0" W. (Point C); thence southerly to latitude 32°42'31.0" N., longitude 117°11'16.4" W. (Point D); thence southeasterly to latitude 32°42'21.4" N., longitude 117°10'44.5" W. (Point E); thence southerly to latitude 32°42'12.6" N., longitude 117°10'47.8" W. (Point F); thence generally northwesterly along the shoreline of Naval Air Station North Island to the place of beginning (Point A).

(b) *Regulations.* In accordance with the general regulations in § 165.33 of this part, entry into the area of this zone is prohibited unless authorized by the Captain of the Port, the Commander, Naval Air Force, U.S. Pacific Fleet, the Commander, Naval Base San Diego, or the Commanding Officer, Naval Air Station North Island. Section 165.33 also contains other general requirements.

Dated: February 24, 1986.

E.A. Harmes,

Commander, U.S. Coast Guard, Captain of the Port, San Diego, California.

[FR Doc. 86–5154 Filed 3–7–86; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 165

[COTP San Diego Regulation 85–19]

Security Zone Regulations: San Diego Bay, CA, Pacific Ocean

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a security zone at Naval Submarine Base, San Diego, California. This security zone is established at the request of the United States Navy and is needed to safeguard U.S. Naval vessels and property from sabotage or other subversive acts, accidents, criminal actions, or other causes of a similar nature. Entry into this zone is prohibited unless authorized by the Commander, Naval Base San Diego, the Commander, Submarine Force, U.S. Pacific Fleet Representative, West Coast, or the Captain of the Port.

EFFECTIVE DATE: This regulation is effective on April 9, 1986.

FOR FURTHER INFORMATION CONTACT: LCDR Steven P. Mojonnier, USCG c/o U.S. Coast Guard Captain of the Port, 2710 N. Harbor Drive, San Diego, CA 92101–1064, telephone (619) 293–5860.

SUPPLEMENTARY INFORMATION: On January 3, 1986, the Coast Guard published a notice of proposed rule making in the **Federal Register** for these regulations (51 FR 225). Interested persons were requested to submit comments, and one comment was received.

Drafting Information

The drafters of this notice are LCDR Steven P. Mojonnier, project officer for the Captain of the Port, and LT Joseph R. McFaul, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Comments

One commenter from the Defense Mapping Agency stated that the area of the security zone as proposed overlaps two existing restricted areas established under 33 U.S.C. 1, and that this could create confusion and conflict in the enforcement of these regulations. The commenter suggested that the boundary of the security zone be redrawn to eliminate these conflicts. The Coast Guard concurs with this comment and the boundary of the security zone has been changed slightly to eliminate conflict with the existing restricted areas. The eastern boundary has been moved westward approximately 200 feet (61 meters), and the northern boundary

has been moved southward approximately 250 feet (77 meters). This change slightly reduces the area of the security zone, and is not a significant change.

This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; 26 February 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. The area within the zone is a small area outside the normal shipping channels. The only vessels normally using these waters are U.S. Naval vessels. There will be minimal effect on routine navigation.

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231: 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–(g), 6.04–1, 6.04–6, and 33 CFR 160.5.

2. In Part 165, a new § 165.1104 is added to read as follows:

§ 165.1104 Security Zone: San Diego Bay, California.

(a) *Location.* The following area is a security zone: The water area adjacent to Naval Submarine Base, San Diego, California, described as follows:

Commencing at a point on the shoreline of Ballast Point, at latitude 32°41'11.2" N., longitude 117°13'57.0" W. (Point A), for a place of beginning; thence northerly (approximately 352 °T) to latitude 32°41'31.8" N., longitude 117°14'00.6" W (Point B); thence westerly (approximately 243 °T) to latitude 32°41'24.5" N., longitude 117°14'18.7" W. (Point C); thence generally southeasterly along the shoreline of the Naval Submarine Base to the place of beginning (Point A).

(b) *Regulations.* In accordance with the general regulations in § 165.33 of this part, entry into the area of this zone is prohibited unless authorized by the Captain of the Port, the Commander, Naval Base San Diego, or the Commander, Submarine Force, U.S. Pacific Fleet Representative, West Coast. Section 165.33 also contains other general requirements.

Dated: February 24, 1986.

SUPPLEMENTARY INFORMATION: On January 3, 1986, the Coast Guard published a notice of proposed rule making in the **Federal Register** for these regulations (51 FR 226). Interested persons were requested to submit comments, and no comments were received.

Drafting Information

The drafters of this notice are LCDR Steven P. Mojonnier, project officer for the Captain of the Port, and LT Joseph R. McFaul, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Comments

No comments were received on the notice of proposed rule making, and no changes have been made in the regulation as proposed.

This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. The area within the zone is a small area outside the normal shipping channels. The only vessels normally using these waters are U.S. Naval vessels. There will be minimal effect on routine navigation.

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231: 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 33 CFR 160.5.

2. In Part 165, a new § 165.1103 is added to read as follows:

§ 165.1103 Security Zone: San Diego Bay, California.

(a) *Location.* The following area is a security zone: The water area adjacent to the Naval Ocean Systems Center, San Diego, California, and the Naval Supply Center, San Diego, California, described as follows:

Commencing at a point on the shoreline of Point Loma, at latitude 32°41'57.8" N, longitude 117°14'17.5" W (Point A), for a place of beginning; thence easterly to latitude 32°41'56.0" N, longitude 117°14'09.9" W (Point B); thence northeasterly to latitude 32°42'03.8" N, longitude 117°14'04.7" W (Point C); thence northeasterly to latitude 32°42'10.2" N, longitude 117°14'00.6" W (Point D); thence northwesterly to latitude

VOL 51 ISS 46 MR 10 1986 UMI

32°42′14.6″ N, longitude 117°14′02.1″ W (Point E); thence northwesterly to latitude 32°42′22.7″ N, longitude 117°14′05.8″ W (Point F); thence northwesterly to latitude 32°42′28.3″ N, longitude 117°14′09.4″ W (Point G); thence westerly to latitude 32°42′28.3″ N, longitude 117°14′09.6″ W (Point H); thence generally southerly along the shoreline of Point Loma to the place of beginning (Point A).

(b) *Regulations.* In accordance with the general regulations in § 165.33 of this part, entry into the area of this zone is prohibited unless authorized by the Captain of the Port, the Commander, Naval Base, San Diego, the Commander, Naval Ocean Systems Center, San Diego, or the Commanding Officer, Naval Supply Center, San Diego. Section 165.33 also contains other general requirements.

Dated: February 24, 1986.

E. A. Harmes,

Commander, U.S. Coast Guard Captain of the Port, San Diego, California.

33 CFR Part 165

[COTP San Diego Regulation 85-21]

Security Zone Regulations; San Diego Bay, CA, Pacific Ocean

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a security zone at Naval Station, San Diego, California. This security zone is established at the request of the United States Navy and is needed to safeguard U.S. Naval vessels and property from sabotage or other subversive acts, accidents, criminal actions, or other causes of a similar nature. Entry into this zone is prohibited unless authorized by the Captain of the Port, the Commander, Naval Base San Diego, or the Commanding Officer, Naval Station, San Diego.

EFFECTIVE DATE: This regulation is effective on April 9, 1986.

FOR FURTHER INFORMATION CONTACT: LCDR Steven P. Mojonnier, USCG, C/O U.S. Coast Guard Captain of the Port, 2710 N. Harbor Drive, San Diego, CA 92101-1064, telephone (619) 293-5860.

SUPPLEMENTARY INFORMATON: On January 3, 1986, the Coast Guard published a notice of proposed rule making in the **Federal Register** for these regulations (51 FR 227).

Interested persons were requested to submit comments, and no comments were received.

Drafting Information

The drafters of this notice are LCDR Steven P. Mojonnier, project officer for the Captain of the Port, and LT Joseph R. McFaul, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Comments

No comments were received on the notice of proposed rule making, and no changes have been made in the regulation as proposed.

This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; 26 February 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. The area within the zone is a small area outside the normal shipping channels. The only vessels normally using these waters are U.S. Naval vessels. There will be minimal effect on routine navigation.

Since the impact of these regulations is expected to be minimal the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C 1225 and 1231: 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6, and 33 CFR 160.5.

2. In Part 165, a new § 165.1102 is added, to read as follows:

§ 165.1102 Security Zone: San Diego Bay, California.

(a) *Location.* The following area is a security zone: The water area within Naval Station, San Diego, California, described as follows:

Commencing at a point at the mouth of Chollas Creek, at latitude 32°41′12.5″ N, longitude 117°07′0.57.0″ W, (Point A), for a place of beginning; thence southwesterly to a point on the U.S. Pierhead Line 100 yards (92 meters) northwest of the head of Pier 1, at latitude 32°41′05.8″ N, longitude 117°08′05.8″ W, (Point B); thence southeasterly along the U.S. Pierhead Line to the south side of Pier 13 (Point C); thence northeasterly along the south side of Pier 13 to the shoreline of the Naval Station (Point D); thence generally northwesterly along the shoreline of the Naval Station to the place of beginning (Point A).

(b) *Regulations.* In accordance with the general regulations in § 165.33 of this part, entry into the area of this zone is prohibited unless authorized by the Captain of the Port, the Commander, Naval Base San Diego, or the Commanding Officer, Naval Station, San Diego. Section 165.33 also contains other general requirements.

Dated: February 24, 1986.

E.A. Harmes,

Commander, U.S. Coast Guard, Captain of the Port, San Diego, California.

33 CFR Part 165

[COTP San Diego Regulation 85-23]

Security Zone Regulations; Pacific Ocean off Mission Beach, San Diego, CA

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a security zone around the Naval Ocean Systems Center (NOSC) Research Tower located approximately 0.9 mile off Mission Beach, San Diego, California. This security zone is established at the request of the United States Navy and is needed to safeguard U.S. Naval vessels and property from sabotage or other subversive acts, accidents, criminal actions, or other causes of a similar nature. Entry into this zone is prohibited unless authorized by the Captain of the Port, the Commander, Naval Base San Diego, or the Commander, Naval Ocean Systems Center, San Diego.

EFFECTIVE DATE: This regulation is effective on April 9, 1986.

FOR FURTHER INFORMATION CONTACT: LCDR Steven P. Mojonnier, USCG, C/O U.S. Coast Guard Captain of the Port, 2710 N. Harbor Drive, San Diego, CA 92101-1064, telephone (619) 293-5860.

SUPPLEMENTARY INFORMATION: On January 3, 1986, the Coast Guard published a notice of proposed rule making in the **Federal Register** for these regulations (51 FR 228).

Interested persons were requested to submit comments and two comments were received.

Drafting Information

The drafters of this notice are LCDR Steven P. Mojonnier, project officer for the Captain of the Port, and LT Joseph R. McFaul, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Comments

One commenter, a marine biologist with San Diego State University, stated that these regulations would restrict access to the NOSC Tower for research on marine species that are unique to that environment. He stated that they have enjoyed unrestricted access to the tower for their research, and that restricting that access would significantly impact on their scientific research. The commenter stated that he has not routinely sought or obtained NOSC permission to collect specimens at that location. In the past, the Captain of the Port, San Diego, has been requested by NOSC to assist in removing unauthorized persons from the area around the tower, because of sensitive or dangerous projects in place there. A key provision of these regulations is the ability of the Captain of the Port and certain Naval commanders to allow access to the area of the security zone under certain conditions. Access to the tower can be permitted if the necessary permission has been obtained. These regulations will enhance safety of the public by providing for contact between prospective visitors to the tower and the tower operators to ensure there is no danger to visitors during the planned visit. No change has been made to the regulations as a result of this comment.

Another commenter from the Defense Mapping Agency pointed out that the latitude of the research tower was described in error as 323°46.4′ N. It should read 32°46.4′ N, and has been corrected accordingly.

This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; 26 February 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. The area within the zone is a small area outside the normal shipping channels. The only vessels normally using these waters are U.S. Naval vessels. There will be minimal effect on routine navigation.

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231: 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6, and 33 CFR 160.5.

2. In Part 165, a new § 165.1101 is added to read as follows:

§ 165.1101 Security Zone: Pacific Ocean off Mission Beach, San Diego, California.

(a) *Location.* The following area is a security zone: The water area within 100 yards (92 meters) of the Naval Ocean Systems Center Research Tower (Light List Number 6) located approximately 0.9 mile off Mission Beach, San Diego, California at latitude 32°46.4′ N, longitude 117°16.1′ W.

(b) *Regulations.* In accordance with the general regulations in § 165.33 of this part, entry into the area of this zone is prohibited unless authorized by the Captain of the Port, the Commander, Naval Base, San Diego, or the Commander, Naval Ocean Systems Center, San Diego. Section 165.33 also contains other general requirements.

Dated: February 24, 1986.

Proposed Rules

Federal Register

Vol. 51, No. 46

Monday, March 10, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 982 and 999

Filberts/Hazelnuts Grown in Oregon and Washington; Filbert Imports; Grade Requirements for Domestic and Imported Shelled Filberts

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rules.

SUMMARY: The proposed rules would amend the grade requirements under Marketing Order No. 982 for domestic shelled filberts, by reducing from two percent to one percent the tolerance for mold, insect injury, rancidity, or decay. The proposal would make the same changes in the grade requirements for imported shelled filberts under § 999.400. The proposed amendments were developed by the Filbert Marketing Board and submitted to the Department for evaluation and approval. Public comments on the Board's proposal, and related alternatives thereto, are invited.

DATE: Comments due April 9, 1986.

FOR FURTHER INFORMATION CONTACT: James B. Wendland, Acting Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, DC, 20250, (202) 447–5053.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Docket Clerk, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2069, South Building, Washington, DC 20250. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the office of the Docket Clerk during regular business hours.

SUPPLEMENTARY INFORMATION: This proposal has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities for their own benefit. Thus, both statutes have small entity orientation and compatibility.

This rule proposes amendment of the grade requirements for domestic shelled filberts under Marketing Order No. 982 and grade requirements for imported shelled filberts under § 999.400.

It is estimated that approximately 14 handlers and 22 importers of filberts/hazelnuts will be subject to regulation under the marketing order for filberts/hazelnuts grown in Oregon and Washington during the course of the current season and that the great majority of this group may be classified as small entities. While regulations issued during the season impose some costs on affected handlers and the number of such firms may be substantial, the added burden on small entities if present at all is not significant.

Notice is hereby given of a proposal to amend Subpart—Grade and Size Regulation (7 CFR 982.101), by amending § 982.101, Exhibit A. This subpart is issued under the marketing agreement, as amended, and Order No. 982, as amended (7 CFR 982), regulating the handling of filberts grown in Oregon and Washington. The marketing agreement and order are collectively referred to in this document as the "order". The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act".

Notice also is given of a proposal to amend the grade requirements for imported shelled filberts in § 999.400; Exhibit A. That section is issued pursuant to section 8e (7 U.S.C. 608e-1) of the Act. Section 8e provides, in part, that whenever a marketing order issued by the Secretary of Agriculture pursuant to section 8c of the Act contains any terms and conditions regulating the grade, size, quality, or maturity of filberts produced in the United States the importation of filberts into the United States shall be prohibited unless the commodity complies with the grade, size, quality, and maturity provisions of the order or comparable restrictions promulgated under section 8e.

The current requirements for domestic shelled filberts under the order and imported shelled filberts under the import regulation were published in the **Federal Register** March 24, 1982 (47 FR 12609; 13504). These requirements include a tolerance of two percent for mold, rancidity, insect injury, or decay, but not more than one percent for mold, rancidity, or insect injury. They became effective May 24, 1982, and were scheduled to continue in effect until July 31, 1983. During this time, interested parties were given an opportunity to review and evaluate the effects of the standards on quality improvement, trade, and consumption, and to determine whether a further reduction of the tolerance levels was justified. Prior to May 24, 1982, the requirements for both imported and domestic shelled filberts allowed a five percent tolerance for serious defects including decay, but not more than one percent for mold, rancidity, or insect injury.

When it became apparent that the review and evaluation could not be completed by July 31, 1983, this date was suspended (48 FR 34014) to keep the standards from reverting to those standards in effect prior to May 24, 1982, which would have caused unnecessary confusion and disruption in the marketplace for both domestic and imported shelled filberts. It has not been proposed by the domestic filbert industry that the current tolerances for domestic and imported shelled filberts be reduced.

With respect to the standards for domestic shelled filberts, the Filbert/Hazelnut Marketing Board, which works with the Department in administering the filbert/hazelnut marketing program, recommended tightening the two percent tolerance in those standards for mold, insect injury, rancidity, or decay to one and one-half percent for one year. It

VOL 51 ISS 46 MR 10 1986 UMI

further proposed that one year after this tolerance becomes effective, the total tolerance for these four defects would be reduced automatically to one percent.

The Board indicated that domestic packers currently pack at better than the one percent overall defect level. The domestic industry believes that if the less restrictive standards continue in effect, some handlers in the industry will begin packing at the higher tolerance level to decrease processing costs.

The Board states that if that occurred, the high quality image associated with the domestic shelled filberts could suffer which could have an adverse effect on the domestic consumption of shelled filberts. The Board indicated that some brokers, confectionery manufacturers, and other potential users have already expressed concern about inconsistent filbert quality and have therefore been reluctant to develop new bakery and confectionery products containing shelled filberts.

Pursuant to section 8e, the same change in defect tolerances is proposed to be applied to filberts offered for importation. However, the proposed change in the import regulation requirement has been met by serious objections from filbert importers and users of imported filberts. Importers have expressed concern that any further reduction of the tolerance, especially to the one percent level, would have a severe adverse effect on their ability to import shelled filberts. They state that while imported shelled filberts have generally been able to meet the tolerance level in effect since May 1982, a large quantity of the imported filberts would have failed to meet import requirements if the proposed reduced tolerances were in place. A survey of imports indicates that 15 percent of the lots which passed the current requirements would have failed at the one and one-half percent tolerance level and 34 percent would have failed at the one percent tolerance level during the period August 1983 through November 1985. For these reasons, some importers have proposed that the current two percent defect tolerance be established as the permanent standard for both domestic and imported filberts. On the other hand, the major user of imported filberts processed into filbert paste has suggested the establishment of an industrial standard for filberts that would raise the tolerance for mold, insect injury, rancidity, or decay to three percent but not more than one percent for mold, insect injury, or rancidity.

Most of the imported shelled filberts are solar dried and stored in non-refrigerated facilities as opposed to domestically produced filberts which are mechanically dried and held in refreigerated storage.

Because of the divergent positions that exist on this issue, namely (1) the domestic industry represented by the Board which proposed to reduce the defect tolerance to one percent, (2) the importers which proposed to retain the current two percent defect tolerance, and (3) the major user of imported filberts which proposed to establish an industrial grade with a three percent defect tolerance, the Department is not only interested in receiving comments on the proposed rule, but on all possible alternatives to the proposal set forth in this notice as well. For instance, one alternative that has not been specifically suggested but would address the different positions expressed by the domestic filbert industry and the importers would be to establish a tolerance for defects applicable to both domestic and imported shelled filberts at not more than one and one-half percent for mold, rancidity, decay, or insect injury, with no more than one percent for mold, rancidity, or insect injury. Adoption of such a compromise tolerance level would assure that the domestic industry could continue to maintain a supply of filberts that meet the high quality standards it has achieved, would allow for a supply of imported shelled filberts as necessary to meet the needs of importers and would give the Department, the Board, and the importers time to evaluate the effects of the reduced tolerances before consideration of any further reduction in tolerance levels is considered. Of course, other alternatives may exist that would likewise accommodate both points of view, and the Department reiterates that comments on such alternatives would likewise be welcomed.

List of Subjects

7 CFR Part 982

Marketing agreements and orders, Filberts, Hazelnuts, Oregon, Washington.

7 CFR Part 999

Food grades and standards, Imports, Dates, Walnuts, Prunes, Raisins, Filberts.

1. The authority citation for 7 CFR Parts 982 and 999 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31 as amended; 7 U.S.C. 601–674.

Therefore, §§ 982.101 and 999.400, for domestic and imported filberts, respectively, are proposed to be amended as follows:

PART 982—FILBERTS GROWN IN OREGON AND WASHINGTON

1. The tolerances in subparagraph (2) of Exhibit A of § 982.101 of Subpart—Grade and Size Regulation are revised to read as follows:

§ 982.101 Grade requirements for shelled filberts.

* * * * *

Tolerances

* * * * *

(2) *For Defects:* Five percent for kernels or portions of kernels which are below the requirements of this grade, including not more than the following: One and one-half percent for mold, rancidity, decay, or insect injury, with no more than one percent for mold, rancidity, or insect injury: *Provided,* That there shall be no more than one percent for mold, rancidity, decay, or insect injury beginning one year after the date such one and one-half percent tolerance becomes effective.

* * * * *

PART 999—SPECIALTY CROPS; IMPORT REGULATIONS

2. The tolerances in subparagraph (2) of Exhibit A of § 999.400 are revised to read as follows:

§ 999.400 Regulation governing importation of filberts.

* * * * *

Tolerances

(2) *For Defects:* Five percent for kernels or portions of kernels which are below the requirements of this grade, including not than the following: One and one-half percent for mold, rancidity, decay, or insect injury, with no more than one percent for mold, rancidity, or insect injury; *Provided,* That there shall be no more than one percent for mold, rancidity, decay, or insect injury beginning one year after the date such one and one-half percent tolerance becomes effective.

* * * * *

BILLING CODE 3410-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 510

[Docket No. 85N–0373]

New Animal Drugs; Proposed Amendment

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend the animal drug regulations by consolidating the exemptions from certification requirements for certain antibiotic drugs. The proposal would revoke the regulation providing for exemption from certification for antibiotic drugs for treating fish disease and would amend another regulation to cover the products that are subject to the regulation to be revoked.

DATE: Comments by April 9, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Frank Pugliese, Center for Veterinary Medicine (HFV–102), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4500.

SUPPLEMENTARY INFORMATION: The Federal Food, Drug, and Cosmetic Act (the act), requires that antibiotic drugs for human use and certain antibiotics for animal use (i.e., antibiotic drugs composed wholly or partly of any kind of penicillin, streptomycin, chlortetracycline, chloramphenicol, or bacitracin, or any derivative thereof) be batch certified before being marketed unless FDA determines that certification is not necessary. When FDA finds that certification is not necessary, it is required to publish a regulation exempting the drug or class of drugs from certification. A prerequisite for exempting an antibiotic from the certification requirements is that the antibiotic meet the premarket approval requirements for new drugs or for new animal drugs. (See sections 507 and 512(n) of the act (21 U.S.C. 357, 360b(n).)

FDA determined that certification was not necessary for certain classes of antibiotic drugs for treating fish diseases if the fish so treated are not intended for human consumption. FDA exempted such products from the certification requirements of the act in § 510.505 *Antibiotic drugs subject to section 512(n) of the act for fish diseases* (originally § 146.72 *Antibiotics for fish diseases;* 17 FR 2359, March 19, 1952). On September 7, 1982, FDA published regulations (47 FR 39155) exempting all classes of antibiotic drugs from the certification requirements of the act. The regulations included new § 510.520 *Exemption from batch certification requirements for antibiotic drugs for animal use subject to section 512(n) of the act* which exempts from certification all antibiotic animal drugs not previously exempted.

FDA has reviewed §§ 510.505 and 510.520 and concludes that they can be consolidated. This change would make the animal drug regulations more concise. The agency is, therefore, proposing to revoke § 510.505 and to amend § 510.520 so that it covers antibiotic drugs for treating fish diseases.

Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Economic Impact

The agency has examined the economic effects of this proposed rule and has determined that it does not require either a regulatory impact analysis, as specified in Executive Order 12291, or a regulatory flexibility analysis as defined in the Regulatory Flexibility Act (Pub. L. 96–354). The proposed rule does not impose new or different requirements on industry, as it consolidates into one regulation the exemptions from the certification requirements of the Federal Food, Drug, and Cosmetic Act that are currently contained in two regulations. The agency therefore concludes that the proposed rule is not a major rule as defined in Executive Order 12291. Furthermore, the agency certifies that the proposed rule will not have a significant impact on a substantial number of small business entities, as defined in the Regulatory Flexibility Act.

Comments

Interested persons may, on or before April 9, 1986, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act, it is proposed that Part 510 be amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR Part 510 continues to read as follows:

Authority: Secs. 512, 701(a), 52 Stat. 1055, 82 Stat. 343–351 (21 U.S.C. 360b, 371(a)); 21 CFR 5.10.

§ 510.505 [Removed]

2. By removing § 510.505 *Antibiotic drugs subject to section 512(n) of the act for fish diseases.*

§ 510.520 [Amended]

3. In § 510.520 *Exemption from batch certification requirements for antibiotic drugs for animal use subject to section 512(n) of the act,* paragraph (a) is amended by revising the phrase "in §§ 510.505, 510.510, and 510.515" to read "in §§ 510.510 and 510.515."

Dated: February 3, 1986.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-10-FRL-2981-1]

Approval and Promulgation of State Implementation Plan; Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: By this Notice, EPA is proposing approval of the Alaska State Implementation Plan (SIP) revision pertaining to the carbon monoxide (CO) attainment plan for the Anchorage area. The SIP revisions were submitted to EPA by the Alaska Department of Environmental Conservation (ADEC) on September 29, 1982, resubmitted on November 15, 1983, and updated on May 31, 1985. Successful implementation of the plan will result in attainment of the CO standard prior to the statutorily required date of December 31, 1987. The plan relies heavily upon the aggressive implementation of a vehicle inspection and maintenance (I/M) program and check for tampering. When approved, this plan will become a federally enforceable part of the SIP.

EPA is also proposing with this notice to remove all conditions of approval on

VOL 51
ISS 46
MR 10
1986
UMI

the 1979 Anchorage CO SIP published on December 30, 1980 (45 FR 85744), based upon the original CO SIP revision submitted to EPA on September 29, 1982.

DATE: Comments must be postmarked on or before April 9, 1986.

Comments should be addressed to: Laurie M. Kral, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

ADDRESSES: Copies of the materials submitted to EPA may be examined during normal business hours at:

Air Programs Branch, (10A–82–9), Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.
Alaska Department of Environmental Conservation, 3220 Hospital Drive, Juneau, Alaska 99871.

FOR FURTHER INFORMATION CONTACT: Loren C. McPhillips, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone: (206) 442–4233, FTS: 399–4233.

SUPPLEMENTARY INFORMATION:

I. Background

The original Anchorage CO SIP was submitted in June 1979 to satisfy the requirements of Part D of the Clean Air Act. At that time an extension of the attainment date was requested. EPA conditionally approved the plan with the understanding that the Municipality of Anchorage (MOA) would (1) expand its 1980 emission inventory to include emissions from off-street parking, and (2) verify that population projections for air and water planning activities are consistent.

On February 3, 1983 (48 FR 5135), EPA proposed to remove the two conditions of approval based upon a SIP revision submitted on September 29, 1982. However, there was a disagreement between the EPA analysis and the Anchorage analysis as to the value of the design concentration and the location of the representative CO monitor as chosen by MOA. A CO design value verification study with saturation monitoring was then required and was completed in Spring, 1983.

Results of this study showed that the monitor at Spenard and Benson was more representative of the CO problem than the monitor at 7th and C Streets. A design value of 18.1 parts per million (ppm) was selected, and revisions of traffic control strategies were made, and submitted to EPA showing attainment in all areas by December 31, 1987.

On the February 3, 1983 (48 FR 5135), EPA also requested that if the results of the cold climate study conducted by EPA and the Alaska Department of Environmental Conservation (ADEC) determines that an inspection/maintenance (I/M) program is effective in cold climates, then Anchorage must make the commitment to implement an I/M program in order to attain the CO standard prior to December 31, 1987.

The cold climate definitely concluded that the I/M program results in significant reduction of CO emission levels in cold temperatures and specifically during cold starts. The program effectiveness is significantly increased when a check or vehicular tampering is incorporated into the program. The Anchorage Assembly adopted the necessary ordinances and legal authority, thus showing their commitment to implement the I/M program in their May 31, 1985, amendment to the CO plan.

II. Plan Review

The 1985 Anchorage CO Plan contains several control measures and elements which were originally proposed for approval as part of the 1982 SIP revision. Those measures and elements are briefly described in the next subsection. For additional information, see the February 3, 1983 **Federal Register** (48 FR 5135). Two new components, I/M and Attainment Demonstration, are discussed in Section B.

A. Original Elements of the SIP

EPA is proposing to approve the following control strategies that were contained in the original 1982 SIP revision. The following is a list of these control measures:

1. Mechanics training;
2. Public transit improvement and expansion;
3. Traffic flow improvements;
4. Carpool program; and
5. Staggered work hours.

The commitment to these measures ensures that the requirements for basic transportation needs are met and that improved mobility will be emphasized. Therefore, EPA is proposing to approve the element pertaining to basic transportation needs.

Additionally, the SIP revision contains procedures to ensure that federal actions will be reviewed for conformity with the SIP in a manner consistent with the criteria contained in the April 1, 1980 (45 FR 21590) notice on conformity. Procedures for specifically evaluating Department of Transportation plans and programs are included in the SIP. After determining conformity of the plans and programs, all federal aid projects will still be evaluated in accordance with procedures specified in the National Environmental Policy Act. If the analysis indicates that the project will create new violations or exacerbate existing violations, then the project will not be constructed without modifications to the project or plan sufficient to maintain reasonable further progress toward attainment. It should be noted that the most recent EPA emissions factors must be used in these analyses.

Therefore, EPA is also proposing to approve the element of the plan pertaining to conformity of federal actions with the SIP.

B. New Elements of the SIP

1. Attainment Demonstration

Numerous violations of the 8-hour CO standard of 9 ppm have been recorded in the Anchorage area. Based upon an analysis of ambient air quality monitoring data for the latest full three years, the adjusted CO design concentration is 18.1 ppm, which corresponds to a required emission reduction of 50.8 percent in order to meet the standard. To offset the anticipated growth, emissions would have to be reduced by an additional 4.2 percent or a total of 55.0 percent.

A rollback model was used to predict air quality concentrations. The analysis shows that the controls adopted in this plan will more than achieve the 55.0 percent reduction and bring the area into attainment by December 31, 1987. More specifically, transportation control measures such as carpooling, traffic improvements, and transit improvements will reduce emissions 10.7 percent; the federal motor vehicle emission control program, 24.5 percent; and the I/M program, 20.4 percent, for a total of 55.6 percent, slightly more than enough to attain. In order to help ensure attainment of the National Ambient Air Quality Standard by December 31, 1987, local officials also adopted a tampering check as a part of the I/M program. Because cost waiver provisions apply to the required replacement of emission control devices, the actual effectiveness of the tampering check is uncertain.

2. Inspection and Maintenance (I/M) Program

Anchorage began its I/M program on July 1, 1985. Owners of model year 1970 and newer cars and trucks are required to have their vehicles annually inspected for emissions problems, or upon initial registration in the state. The model year of vehicles subject land to the program changes over time because inspections are not required for vehicles that are more than 15 years old. Vehicles determined to have excessive

pollution levels are required to be repaired prior to renewal of registration by the Alaska Division of Motor Vehicles (DMV). A tampering check is also conducted as part of the I/M program. Basically the tampering test includes a visual check for the catalytic converter, fuel restrictor, air pump, PCV valve, hose and wire connections, and a plumbtesmo (lead) test.

Since the program is decentralized, inspections required under the I/M program must be made at a Certified I/M Station. Up to a $50.00 fee may be charged for the inspections, and vehicles which fail the inspection because of defects in their emission control system must be repaired and then retested by a Certified I/M Station. The program incorporates the use of Bar–84 analyzers which are calibrated on a regular basis.

Repairs required under the I/M program may be performed by anyone, including vehicle owners. However, incentives are provided for the repair of vehicles by Certified I/M Mechanics working at Certified I/M Stations. Except for certain Fleet Operator owned vehicles, vehicle owners are guaranteed of either passing the retest or receiving a waiver if they have repairs performed at a Certified I/M Station. A cost waiver is available if repairs exceed $150.00 during the first year. The cost limit will gradually be increased to $500.00 by January 1, 1987. Work done or parts purchased and installed by vehicle owners or at uncertified facilities will not count toward this cost ceiling.

The MOA is responsible for conducting quality assurance tests at the individual stations. Currently there are approximately 100 independent, certified stations. The MOA is also responsible for collecting data and ensuring program effectiveness.

C. Removal of Previous Conditions

As proposed in the February 3, 1983 **Federal Register** (48 FR 5135), EPA is again proposing to remove all conditions of approval published December 30, 1980 (45 FR 85744), dealing with emission inventory omissions, population projection consistency, and a procedure for determining conformity of federal projects with the SIP.

III. Proposed Rulemaking

EPA is proposing to approve the Anchorage CO attainment plan and its attainment date of December 31, 1987. This proposed approval is based upon plan revisions submitted by the ADEC to EPA on September 29, 1982, and May 31, 1985. EPA is also proposing to remove all conditions of approval on the 1979 Anchorage CO SIP published on December 30, 1980 (45 FR 85744).

Interstated parties are invited to comment on all aspects of this proposed approval of the Alaska SIP revision. Comments should be submitted in triplicate, to the address listed in the front of this Notice. Public comments postmarked by April 9, 1986 will be considered in any final action EPA takes on this proposal.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have significant economic impact on a substantial number of small entities (46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

[AD-FRL-2981-6]

National Emissions Standards for Hazardous Air Pollutants: Standard for Radon-222 Emissions From Licensed Uranium Mill Tailings; Rescheduled Hearing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Announcement of new date for public hearing.

SUMMARY: The hearing date, previously announced by EPA to consider a proposed emission standard for radon-222 emissions from licensed uranium mill tailings, has been changed to March 25–26, 1986.

DATES: A public hearing on the proposed rule will be held on March 25–26, 1986, in Denver, Colorado. Interested parties are invited to testify. Requests to participate in the hearing should be make in writing by March 21, 1986. Written statements and comments on the proposed rule may be entered into the record by April 28, 1986.

ADDRESSES: The hearing will be held at the Holiday Inn, 1450 Glenarm Place, Denver, Colorado, from 9:00 a.m. to 5:00 p.m. each day. Requests to participate in the hearing should be made in writing to Richard J. Guimond, Director, Criteria and Standards Division (ANR–460), U.S. Environmental Protection Agency, Washington, DC 20460. All requests should include an outline of the topics to be addressed in the opening statements and the names of the participants. Presentations should be limited to 30 minutes. Please indicate a preferred date for testimony

Written comments should be submitted to: Central Docket Section (LE–131), U.S. Environmental Protection Agency, Washington, DC 20460, Attention: Docket No. A–79–11. The rulemaking docket, containing information used by EPA in developing the proposed standard, is available for public inspection between 8:00 a.m. and 4:00 p.m., Monday through Friday at EPA's Central Docket Section, West Tower Lobby, Gallery One, Waterside Mall, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Terrence A. McLaughlin, Chief, Environmental Standards Branch, Criteria and Standards Division (ANR–460), Office of Radiation Programs, U.S. Environmental Protection Agency, Washington, DC 20460, (703) 557–8977.

SUPPLEMENTARY INFORMATION: The previous date was the result of a Court-ordered schedule (Civil No. C–84–0656 WHO, In the United States District Court for the Northern District of California). The revised date is the result of a tentative agreement between the Sierra Club and EPA to revise the schedule. The revised schedule must still be submitted to and approved by the Court. However, EPA is rescheduling the public hearing and the comment period based on the tentative agreement.

The proposed standard was announced in the **Federal Register** on February 21, 1986 (51 FR 6382), and considers alternative work practices for limiting radon-222 emissions from tailings at licensed uranium mill sites. This action is being taken because EPA has preliminarily concluded that radon-222 emissions from uranium mill tailings cause significnt risks to nearby people and to populations. The proposed rule is intended to reduce these risks to levels that are protective of public health with an ample margin of safety.

VOL 51 ISS 46 MR 10 1986 UMI

Dated: March 5, 1986.

Charles L. Elkins,

Assistant Administrator for Air and Radiation.

40 CFR Parts 261

[SWN-FRL-2961-3]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Notice of data availability and request for comments.

SUMMARY: On November 29, 1985, the Agency proposed under Subtitle C of the Resource Conservation and Recovery Act (RCRA) to amend its regulations by listing used oil as a hazardous wase. At the same time, EPA proposed special management standards for used oil that is recycled. During the public hearings on these proposed rules, a number of commenters suggested that EPA consider a regulatory option of only listing used oil as a hazardous waste when disposed, while retaining the proposed special management standards for used oil that is recycled. EPA is making the transcripts of these hearings available for public inspection and requesting comments on this regulatory option. EPA also is requesting public comments on additional data that the Agency has obtained as well as certain other issues that have been raised during the public comment period.

DATE: EPA will accept public comment on this notice until April 9, 1986.

ADDRESSES: Comments on this notice should be addressed to the Docket Clerk (Docket No. 3001/Listing of Used Oil), Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Comments received by EPA may be inspected in Room S–212, U.S. Environmental Protection Agency, 401 Street SW., Washington, D.C. from 9:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline, call toll-free at (800) 424–9346 or (202) 382–3000. For technical information contact Robert Scarberry, Office of Solid Waste (WH–562B), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382–7735.

SUPPLEMENTARY INFORMATION:

I. Background

On November 29, 1985, the Agency proposed to amend the hazardous waste regulations by listing used oil as a hazardous waste (50 FR 49258). The Agency evaluated this waste against the criteria for listing (§ 261.11(a)(3)) and determined that used oil typically and frequently contains highly toxic contaminants in significant quantities, that these contaminants are mobil and persistent in the environment, and that used oil is generated is large quantities. Thus, these wastes may pose a substantial present or potential threat to human health or the environment if improperly managed. This notice also proposed a regulatory definition of used oil and proposed to exempt certain mixtures containing used oil from the mixture rule. See proposed § 261.3(a)(2)(iv) (F) and (e)(1) at 50 FR 49269, 49270. The effect of this proposal, if promulgated, would be to control used oil that is disposed of (including its generation, transportation, accumulation, storage, treatment, or disposal), by subjecting it to the full hazardous waste regulations under Subtitle C of RCRA. At the same time, used oil that is recycled would be subject to the special management standards for recycled oil that were also proposed on November 29, 1985 (see 50 FR 49212–49258).

II. Notice of Data Availability

A. Listing of Used Oil as a Hazardous Waste

Public hearings were held in Dallas, TX; San Francisco, CA; and Washington, DC on January 8, 10, and 16, respectively, to discuss the used oil rules were proposed on November 29, 1985. The vast majority of speakers urged the Agency *not* to list used oil as a hazardous waste when the oil is recycled. The commenters argued that if used oil were listed as a hazardous waste, it could discourage its recylcing because of concerns associated with the term "hazardous waste." For a number of reasons which are discussed in detail in the hearing transcripts, the commenters argued that by calling used oil which is recycled a hazardous waste, it would lead to increased disposal and dumping of used oil (especially uncontrolled do-it-yourself (DIY) used oil) and, therefore, could lead to increased harm to human health and the environment. In addition, commenters argued that if used oil were listed as hazardous waste, generators, transporters, collectors, processors, and users of the used oil would become subject to Superfund liability which would further discourage the recycling of used oil (i.e., joint and several liability and increased insurance costs). It should be noted, in this regard, that even if used oil were not listed as a hazardous waste, but contained hazardous substances at levels exceeding those normally found in petroleum, the used oil would be (and currrently is) subject to Superfund liability. Therefore, we wonder whether this argument is really valid or whether this is a perception problem. The Agency specifically solicits comment on this point.

The Agency is inviting the public to further comment and provide specific documentation on the issue of whether or not, and to what extent, listing used oil as a hazardous waste when recycled will have a discouraging effect on used oil recycling activities. The Agency is requesting comment on the regulatory option of listing used oil as a hazardous waste only when disposed, but retaining the proposed management standards for used oil that is recycled. We specifically request comments and data on the following points:

1. Will insurance costs increase if recycled used oil is listed as hazardous waste? If so, given that used oil contains hazardous substances and therefore is subject to Superfund liability, what is the incremental cost associated with listing used oil as a hazardous waste?

2. The Agency also solicits information on non-Superfund liabilities. How do generators, transporters, processors, and burners perceive potential liabilities from used oil mismanagement (including on-site and off-site mismanagement)? How would the proposed special management standards change this?

3. If recycled used oil is listed a hazardous waste, to what extent will burners stop using it and use some other fuel? In particular, how much used oil fuel that is used by burners will be sold as specification fuel, and off-specification fuel? What is the price differential between burning used oil (both specification and off-specification fuel) and other fuels? How is the price differential likely to change over the next few years? What other factors (other than cost) will burners consider in deciding whether to accept used oil as a fuel? (The Agency's predictions of burners' response to the proposed rules appears in the Used Oil Regulatory Impact Analysis (RIA), which is available in the public docket at the address cited above.)

4. If recycled used oil is listed as a hazardous waste, what impact will it have on service stations, oil change stations, and retailers who perform oil

changes? If compliance with the special management standards will result in an increase in costs, provide documentation which supports what this increase will be. Are there data to support whether this impact or cost will significantly reduce the number of stations that change used oil? Are there data to indicate what percentage of oil change service operators will become unwilling to accept DIY used oil? (The Agency's evaluation of the proposed rules' impact on non-industrial generators appears in the Used Oil RIA, which is available in the public docket at the address cited above.)

5. Approximately 12 states currently list used oil as a hazardous waste or subject it to special management standards. What impact have these rules had on the recycling of used oil in these states? In particular, has there been a significant change in the quantity of used oil managed in the recycled oil system? How has the recycling of DIY used oil been affected by these rules? Have the used oil regulations in these states affected liabilities and insurance rates? [1]

6. If used oil is not listed as a hazardous waste when recycled, then the proposed special management standards for recycled used oil would be promulgated under authority of Section 3014(a). This approach has a number of implications on which we invite comment. Section 3014(a) does not explicitly provide for delegation of a regulatory program to States under the established 40 CFR Part 271 authorization procedures. Also, EPA's criminal enforcement under Section 3008 (d) and (e) would be limited. In addition, if used oil is not listed as a hazardous waste, there is no delisting mechanism in these proposed management standards that would be available to generators who feel that their wastes do not contain significant levels of toxic constituents and, therefore, should not be subject to the special management standards for recycled used oil.

B. Other Issues Raised During the Public Comment Period

In addition to the general listing issue, several other points were raised during the public comment period on which the Agency requests further comment. These comments can be separated into three major categories: (1) Mixture rule exemptions, (2) halogen testing, and (3) analytical data to support exemptions from the used oil regulations for certain used oils or residues from used oil recycling.

1. Mixture Rule Exemptions

EPA's general policy concerning mixtures has been incorporated into the recycled oil rules. If used oil is listed as a hazardous waste, then a mixture of used oil and other solid waste will be considered a hazardous waste subject to all applicable requirements under Parts 262–265 when it is disposed. See 40 CFR 261.3. The November 29 **Federal Register** notice, however, proposed an amendment to the mixture rule that would exempt from regulatory control (1) industrial wipers [2] that are contaminated with small amounts of used oil and (2) wastewaters that are contaminated with small amounts of used oil, which are subject to regulation under section 402 or 307(b) of the Clean Water Act. During the public comment period, the Agency received requests to exempt from the mixture rule sorptive minerals [3] that are placed on the floors of industrial establishments primarily to clean up spills of used oil resulting from incidental or routine drips, sprays, or seepages. The Agency specifically requests comment as to whether oil-soaked sorbent minerals also should be exempt from regulation. In particular, the Agency requests any technical data to support such exemptions. For examle, what is the basis for exempting these oil-soaked materials from regulations? Do the toxic contaminants become irreversibly bound up in the sorptive minerals? What percentage of the sorptive minerals will the oil comprise? Should there be a quantitative limit (either total amount of used oil cleaned up or a per spill limit) placed on such an exemption? The Agency will consider exempting these sorptive minerals from regulations based on the additional information provided.

2. Test Method for Determining Halogen Level

In the proposed used oil management standards, the Agency proposed to exempt used oil fuel meeting certain specifications from most requirements (see § 266.40(a)(2)(i)). (This specification standard has already been adopted in the final burning and blending rules—Phase I (see 50 FR 49161, November 29, 1985).) Among other things, the specification standard includes a specification for total halogens of 4,000 ppm. In addition, the Agency is proposing to adopt a rebuttable presumption that *any* recycled oil containing an excess of 1,000 ppm total halogen will be presumed to be mixed with a hazardous waste and, thus, the resulting mixture will be a hazardous waste.[4] Several used oil processors and re-refiners have claimed that the test method currently recommended by EPA to test for total halogen (ASTM D808–81) has a number of problems.[5] Therefore, we are today making available for comment other test methods that EPA is evaluating as possible alternate methods. One method is a modification of ASTM Method D808–81 which employs a closed system (bomb) to combust the oil sample. The modified procedure would analyze the combustate for chlorine, bromine, and fluorine anions by ion chromatography to avoid the difficulties encounterd when carrying out gravimetric determinations. Another method, X-ray fluorescence, is suitable for the determination of chlorine in used oils. The sample is placed in an X-ray beam and the intensity of the appropriate fluorescence X-ray is measured with correction to its background.[6]

The Agency further intends to propose additional procedures employing pyrolysis/microcoulometric, flame photometric, and visible spectrophotometric methods upon completion of our evaluation of these procedures. Comments and information are requested on these methods and any others that may be available.

3. New data on the Composition of Used Oil and Used Oil Processing Residues

EPA has obtained certain new information on the composition of certain types of used oil as well as residues which may result from the recycling used oils. These new data are

---

[1] The Agency has conducted preliminary discussions with State officials from California, Delaware, Illinois, Massachusetts, Michigan, Missouri, New Jersey, New York, Oklahoma, South Carolina, Texas, and Vermont to assess the impact from their used oil regulatory programs. Their comments are available for public inspection in the RCRA docket at the address cited above.

[2] The term industrial wipers (as discussed in this regulation) includes shop towels, rags, and disposable wipers.

[3] The term "sorptive minerals" includes absorbent clay or absorbant diatomaceous earth.

[4] EPA has already adopted this presumption in the final Phase I burning rule to determine when hazardous waste has been mixed with used oil fuel (see 50 FR 49170–49178 (November 29, 1985). The presumption can be rebutted if it can be shown that hazardous waste (e.g., spent halogenated solvents) have not been mixed with the used oil.

[5] A method to detect total halogen in new and used petroleum products (bomb method).

[6] The reader should note that this method measures chlorine, not halogen. However, EPA would allow chlorine measurement in lieu of halogen because we are not aware of hazardous bromine or fluorine compounds in used oil. In fact, we only promulgated a halogen limit because we were not aware of methods to measure chlorine only. See 50 FR 49178, November 29, 1985. In the event that the X-ray fluorescence method is approved by EPA, the specification for chlorine would be 1,000 ppm.

VOL 51
ISS 46

available for public inspection in the RCRA docket at the address listed above.

III. Availability of Documents

Copies of the transcripts for the three public hearings, the summary of discussions with State officials regarding their used oil regulations, documentation for the evaluation of halogen test methods, and additional data on the composition of used oils and used oil processing residues are available for public inspection in the RCRA Docket, Room S-212. In addition, copies of all comments received by the Agency as of February 21, 1986, on the used oil proposals also are available for inspection.

Comments on the issues raised in this notice of data availability must be received by EPA on or before April 9, 1986 to ensure their consideration. It should be noted that we are reopening the comment period for only those issues discussed in this notice. Any comments received on any other issues will be considered as late.

[BERC-326-P]

Medicare Program; Clarification of Policy on Adjusting the Hospital-Specific Portion of the Prospective Payment Rate

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would clarify Medicare's policy regarding changes to the hospital-specific portion of the prospective payment rate for inpatient hospital services. We would clarify that exemptions, exceptions, and adjustments to base year costs permitted under the Medicare cost limits and rate-of-increase ceiling authority will affect the hospital-specific portion of the prospective payment rate.

DATE: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on April 19, 1986.

ADDRESS: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC-326-P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC.;
or
Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland

In commenting, please refer to file code BERC-326-P.

Comments will be available for public inspection as they are received, beginning approximately three weeks after publication of this document in Room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Edward Rees (301) 597-6403.

SUPPLEMENTARY INFORMATION:

I. General Background

Under section 1886(d) of the Social Security Act (the Act), enacted by the Social Security Amendments of 1983 (Pub. L. 98-21) on April 20, 1983, a prospective payment system for Medicare payment of inpatient hospital services was established effective with hospital cost reporting periods beginning on or after October 1, 1983. Under this system, Medicare payment is made at a predetermined, specific rate for each hospital discharge. All discharges are classified according to a list of diagnosis-related groups (DRGs). This list currently contains 471 specific categories.

In order to implement the prospective payment system for inpatient hospital services as required by section 1886(d) of the Act, we published the following documents in the **Federal Register**.

- On September 1, 1983, we published an interim final rule with comment period (48 FR 39752), effective for hospital cost reporting periods beginning on or after October 1, 1983. Technical corrections were issued on October 19, 1983 (48 FR 48467).
- On January 3, 1984, we published a final rule (49 FR 234) that made changes to the regulations as the result of our consideration of the public comments that were received in response to the interim final rule. Technical corrections for this document were issued on June 1, 1984 (49 FR 23010).
- In order to update the prospective payment rates for Federal fiscal year 1985, we published a proposed rule on July 3, 1984 (49 FR 27422) and a final rule on August 31, 1984 (49 FR 34728), for which technical corrections were issued on October 15, 1984 (49 FR 40167).
- On March 29, 1985, we published a final rule (50 FR 12740) redesignating the prospective payment regulations, originally set forth in 42 CFR Part 405 (§§ 405.470 through 405.477), to a new 42 CFR Part 412 (§§ 412.1 through 412.125). That final rule was a technical document, the purpose of which was to make the prospective payment regulations easier to use.
- In order to update the prospective payment rates for Federal fiscal year 1986, we published a proposed rule June 10, 1985 (50 FR 24366) and a final rule on September 3, 1985 (50 FR 35646), for which technical corrections were issued on October 28, 1985 (50 FR 43570). However, section 5 of Pub. L. 99-107, as amended by section 2 of Pub. L. 99-201, postponed implementation of the revised Medicare payment rules through March 14, 1986. (See the February 3, 1986 **Federal Register** notice (51 FR 4166).)

As a result of our experience with the prospective payment system to date, we are now proposing to clarify 42 CFR 412.72 (formerly § 405.474(b)), which describes modifications to base year costs.

II. Current Policy and Proposed Clarification

A. Background

Section 1886(d)(1)(A) of the Act provides for a three-year transition period during which a declining portion of a hospital's total prospective payment amount (that is, the "hospital-specific portion") is based on a hospital's historical Medicare costs in a given base year, and a gradually increasing portion of the payment (that is, the "Federal portion") is based on a regional rate per discharge in the first year and a blend of regional and national rates per discharge in the second and third years. Beginning with the fourth year, and continuing thereafter (that is, for hospital cost reporting periods beginning on or after October 1, 1986), Medicare payments for inpatient hospital services will be determined under a national DRG payment methodology.

The hospital-specific portion of the prospective payment rate paid during the transition period is calculated in

accordance with section 1886(d)(1)(A)(i)(I) of the Act for cost reporting periods beginning in Federal fiscal year 1984, and in accordance with section 1886(d)(1)(A)(ii)(I) of the Act for cost reporting periods beginning in Federal fiscal years 1985 and 1986. Under these provisions, the hospital-specific portion of the rate is a specified percentage of the hospital's "target amount" for the cost reporting period, as defined in section 1886(b)(3)(A) of the Act.

The "target amount" is a concept introduced into the Act for purposes of the reimbursement system that preceded the prospective payment system. The Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248) established limits on the permissible rate of increase of Medicare reimbursement for hospital operating costs during cost reporting periods beginning in fiscal year (FY) 1983 through FY 1985. These limits were defined in terms of a target amount, which, under section 1886(b)(3) of the Act, was in turn defined for each hospital as the allowable operating costs per case incurred by the hospital during the cost reporting period immediately preceding the first cost reporting period subject to the rate-of-increase ceiling (that is, generally, cost reporting periods beginning between October 1, 1981 and September 30, 1982), adjusted by a specified annual update factor. Thus, for example, the target amount for a hospital whose cost reporting period began October 1, 1982, was determined by reference to the hospital's operating costs per case during the year beginning October 1, 1981 (its "base year"). Under section 1886(b)(3) of the Act, the target amount for each succeeding year is determined by applying the specified increase factor to the previous year's target amount. For a further explanation, see our regulations at 42 CFR 405.463, which explain the ceiling on the rate of hospital cost increases.

For most hospitals, the rate-of-increase limitations were in effect for only one year when they were superseded by the prospective payment system. However, in accordance with §§ 405.463(a)(2) and 412.22(b) (formerly § 405.471(b)), the rate-of-increase limits continue to apply to those hospitals that are excluded from the prospective payment system. Because the prospective payment system bases the hospital-specific portion on a percentage of the hospital's "target amount" (determined using its base year costs), each hospital's costs during its base year continue to be relevant under the prospective payment system.

B. Current Policy

Although section 1886(d)(1)(A) of the Act bases the hospital-specific portion of the prospective payment rate on the target amount without any reference to adjustments or modifications of that amount, our implementing regulations at § 412.71(b) (formerly § 405.474(b)) provide for a number of modifications to base year costs that affect the amount of the hospital specific portion of the prospective payment rate. These regulations were issued in accordance with section 1886(d)(5)(C)(iii) of the Act, which authorizes the Secretary to provide by regulation for such exceptions and adjustments to the prospective payment rates as the Secretary deems appropriate.

In determining what changes are appropriately made to base year costs (and hence to the hospital-specific portion of the prospective payment rate), we must be consistent with the statute's reliance on a particular base year as the foundation for determining the amount of the hospital-specific portion of the rate. The hospital-specific portion of the rate was not intended to reflect a hospital's actual current per-case costs, but rather its per-case costs during the designated base year, increased by an annual update factor. The legislative history for Pub. L. 98-21 explains in the House Committee on Ways and Means report that, "the payment amount, like the target amount under present law, is projected from the hospital's cost base. Because the payment can be determined without reference to the hospital's costs in the current year, it can be prospectively determined." (See H.R. Rep. No. 98-25 Part 1, 98th Cong., 1st Sess., 136 (1983).) Similarly, the conference committee report for Pub. L. 98-21 noted that the hospital-specific portion is related to each hospital's own experience in a base cost reporting year. (See H.R. Rep. No. 98-47, 98th Cong., 1st Sess., 181 (1983).)

The statute's use of base year per-case costs rather than more current information is not surprising in light of the limited purpose of the hospital-specific portion of the rate. For hospitals other than sole community providers, the hospital-specific portion of the prospective payment rate exists for transitional purposes only, and is completely eliminated after a hospital has been subject to the prospective payment system for three years. Many hospitals have per-case costs that differ significantly from the Federal rates that will apply when the transition is complete and that form an increasingly large portion of a hospital's payments during the transition period. In light of the potentially poor correlation between a hospital's current costs and the important national (and regional) rates, it is not plausible that Congress intended for the hospital-specific portion of the rate to be finely adjusted to reflect the hospital's current situation. Rather, the hospital-specific portion of the rate was designed simply to cushion, to some degree, the transition to a prospective payment system based on Federal rates. The Senate report on Pub. L. 98-21 states that "the phase-in of national DRG rates over the three-year period is designed to minimize disruption that might otherwise occur because of sudden changes in reimbursement levels." (See S. Rep. No. 98-23, 98th Cong., 1st Sess., 53 (1983).)

Thus, the regulations governing modifications to base year costs authorize only those adjustments that do not undermine the statute's reliance on a particular year of hospital operations as the basis for the amount of the hospital-specific portion of the payment rate. Modifications are limited to those necessary to make the hospital's base year experience comparable to costs that will be paid under the prospective payment system. In other words, the modifications currently authorized in § 412.71(b) of our regulations are made for the purpose of more accurately estimating the costs that would be incurred in the future by a hospital that carried on the same operations that it did in the base year. This approach is consistent with the conference committee managers' statement expressed in the Conference Committee Report on Pub. L. 98-21 that "the managers recognize that, in some cases, the Secretary will have to use estimates to adjust some portions of the hospital's base year experience to make it comparable to inpatient operating costs that will be paid under the prospective system—e.g., FICA taxes that would have been paid if the hospital had been in the Social Security system or the adjustment needed to exclude the nursing differential which is no longer payable." (See H.R. Rep. No. 98-47, noted above, at 181-182.)

C. Proposed Clarification of Current Policy

Since the hospital-specific portion relates to the target amount under the rate-of-increase ceiling, some hospitals have questioned whether changes to inpatient operating costs permitted under §§ 405.460 and 405.463 of our regulations will affect the hospital-specific portion of the rate under the prospective payment system. Because the regulations do not address this

VOL 51
ISS 46
MR 10
1986
UMI

question specifically, this proposal would clarify our position on this issue.

Our current policy is to revise the hospital-specific portion of the prospective payment rate to take into account exceptions, exemptions and adjustments granted under §§ 405.460 and 405.463 to the extent that they apply to base year costs. Exceptions, exemptions, or adjustments granted for periods subsequent to the base year do not change the hospital-specific portion of the prospective payment rate since neither base year costs nor the target amount itself is altered by such action.

Under current operating procedures, it is the onset of the event that caused the distortion that dictates which period's costs are adjusted. Thus, if a cost distorting event occurs in the base year, operating costs in the base year (for purposes of application of the rate-of-increase ceiling) are adjusted.

Since the target amount is defined as base year operating costs increased by a target percentage, an adjustment due to an event that occurs in the base year would result in an increase in the target amount. Likewise, since section 1886(d)(1)(A) of the Act, which defines the hospital specific portion of the prospective payment rate, references the target amount, the hospital-specific portion of the rate would also be revised. Because at least a portion of the cost for the service that gives rise to the adjustment occurred in the base year, we believe this policy is consistent with the legislative history of Pub. L. 98–21, which states that "during the phase-in period, some portion of the prospective payment rate will be related to each hospital's own experience in a base cost reporting year." (See H.R. Rep. No. 98–47, 98th Cong., 1st Sess., 181 (1983).) This is also consistent with the position, previously discussed in this preamble, that modifications of base year costs be limited not those necessary to make the hospital's base year experience comparable to the inpatient operating costs that will be incurred under the prospective payment system by a hospital that carried on the same operations that it did in the base year.

In granting an exception or adjustment for a cost distorting event that occurs in a period subsequent to the base year, operating costs of that period would be adjusted downward for purposes of comparison to the target amount. In this situation, however, the target amount is not altered, and therefore would not give rise to a change in the hospital-specific portion of the rate. Thus, we believe that neither the statutory language, which references the target amount, nor the committee reports, which reference the hospital's experience in the base year, contemplates that costs arising from a change in operations subsequent to the base year would be recognized in the prospective payment rates.

Moreover, we believe any policy of allowing rate-of-increase adjustments for post-base year experience to affect the hospital-specific portion of the prospective payment rate would create difficult problems. If changes were limited to those resulting in increased hospital reimbursement, there would be an unwarranted upward bias in Medicare expenditures. If, however, HCFA pursued a policy of reducing rate-of-increase target amounts to account for lowered hospital costs, the result might unfairly penalize hospitals throughout the prospective payment transition period for cost-reduction efficiencies introduced in anticipation of the prospective payment system.

Accordingly, for all these reasons, we are proposing to amend § 412.72(a)(3) (formerly § 405.474(b)(3)) of the regulations to make clear that any exemptions, exceptions, or adjustments granted under §§ 405.460 and 405.463 of the regulations for the base year would result in a change in the hospital-specific portion of the prospective payment rate.

In view of the prospective nature of the payment system and the conference committee's expectation that determinations would be made on the basis of the best information available at a time prior to a hospital's entering the system (See H.R. Rep. No. 98–47 Part 1, 98th Cong., 1st Sess., 182 (1983)), we believe that changes to base year costs arising from the granting of an exception, exemption, or adjustment to base year costs should affect the hospital-specific portion of the rate only on a prospective basis. Since the hospital-specific portion of the rate was to be determined by an intermediary in accordance with the regulations, based on its assessment of the best information available for a base period, we do not believe that a subsequent change to the base period costs that occurs as the result of HCFA granting an exception, or adjustment under §§ 405.460 and 405.463 would impugn the validity of the intermediary's efforts to make a good faith assessment of the data available to it. Therefore, a retroactive revision would be inappropriate. However, we believe a prospective revision for subsequent years would be appropriate. Therefore, the proposed regulation specifies that changes to the hospital-specific portion of the rate that result from exemptions, exceptions or adjustments granted under §§ 405.460 and 405.463 would be made on a prospective basis effective with the first day of the hospital's first cost reporting period beginning on or after the date of a favorable determination by HCFA on the hospital's exemption, exception or adjustment request.

We have also considered whether additional regulations should be issued under section 1886(d)(5)(C)(iii) of the Act, the general authority for the prospective payment system exceptions and adjustments, to recognize changes (other than those already permitted in § 412.72 (formerly § 405.474) in a hospital's cost per case after the base period. For the same reasons stated above in connection with statute's and legislative history's dependence upon base year costs, we do not believe that, in general, it would be appropriate to adjust base year costs to reflect changes in a hospital's operations subsequent to the base year.

We have, however, considered it appropriate to recognize certain changes in operations for sole community hospitals. We intend to propose to these adjustments in a separate proposed notice.

III. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 requires us to perform and publish a regulatory impact analysis for any major rule. A major rule is any regulation that is likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based ones.

We have determined that this proposed rule does not meet any of the criteria for a major rule. This proposal would clarify our current policy and practice, not change it, and would not affect the level of payments that hospitals receive under existing regulations. Therefore, it would not have an effect that would meet any of the major rule criteria of E.O. 12291. For these reasons, a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), 5 U.S.C. 601 through 612, requires us to perform and publish an initial regulatory flexibility analysis for any proposed rule unless the Secretary certifies, in accordance with 5 U.S.C. 605(b), that the

rule would not, if promulgated, have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we treat all hospitals as small entities. However, as discussed above with reference to E.O. 12291, this proposed rule would merely clarify our current policy, not change it. We do not expect this proposal to significantly affect hospitals, since they will continue to be paid at the same level as they are paid under existing reguations. Therefore, we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

This proposed change would not impose information collection requirements; consequently, it need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

IV. Other Required Information

A. Public Comment

Because of the large number of pieces of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments that we receive by the date specified in the "Dates" section of this preamble, and, if we decide to proceed with a final rule, we will respond to the comments in the preamble of that rule.

List of Subjects in 42 CFR Part 412

Health Facilities, Medicare.

42 CFR Part 412 would be amended as set forth below:

PART 412—PROSPECTIVE PAYMENT SYSTEM FOR INPATIENT HOSPITAL SERVICES

1. The authority citation for Part 412 continues to read as follows:

Authority: Secs. 1102, 1871, and 1886 of the Social Security Act (42 U.S.C. 1302, 1395hh, and 1395ww).

2. In § 412.72, the introductory language of paragraph (a) is reprinted unchanged for the convenience of the reader; a new paragraph (a)(3)(ii) is added; and current paragraph (a)(3)(ii) is revised and redesignated as paragraph (a)(3)(iii) to read as follows:

§ 412.72 Modification of base-year costs.

(a) *Bases for modification of base-year costs.* Base-year costs as determined under § 412.71(d) may be modified under the following circumstances:

* * * * *

(3) *Recognition of additional costs.* * * *

(ii) The intermediary may adjust base year costs to take into account any exception, exemption, or adjustment to base year costs granted under §§ 405.460 or 405.463 of this chapter. Exceptions, exemptions or adjustments to a hospital's operating costs for a period subsequent to the base year that arise from an event that occurs after the base year may not be used for the purposes of changing the base year costs used in determining the hospital-specific rate.

(iii) The intermediary will recalculate the hospital's base-year costs, incorporating the additional costs recognized as allowable for the hospital's base-year. Adjustments to base-year costs to take into account these additional costs and any exceptions, exemptions, or adjustments permitted under paragraph (a)(3)(ii) of this section—

(A) Will be effective with the first day of the hospital's first cost reporting period beginning on or after the date of the revision, order, finding, review decision, or granting of the exception, exemption or adjustment.

(B) Will not be used to recalculate the hospital-specific portion as determined for fiscal years beginning before the date of the revision, order, finding, review decision, or granting of the exception, exemption, or adjustment.

Medicare Program; Payment Adjustments for Sole Community Hospitals

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would change Medicare prospective payment regulations for inpatient hospital services in order to allow an adjustment (if warranted) of the hospital-specific portion of the prospective payment rate for sole community hospitals.

DATE: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on April 9, 1986.

ADDRESS: Mail comments to: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC-329-P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey
Building, 200 Independence Ave., SW.,
Washington, DC;
or
Room 132; East High Rise Building, 6325
Security Boulevard, Baltimore,
Maryland

In commenting, please refer to file code BERC-329-P.

Comments will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202-245-7890).

FOR FURTHER INFORMATION CONTACT: Ed Rees, (301) 597-6403.

SUPPLEMENTARY INFORMATION:

I. General Background

Section 1886(d) of the Social Security Act (the Act), enacted by the Social Security Amendments of 1983 (Pub. L. 98–21) on April 20, 1983, established a prospective payment system for Medicare payment of inpatient hospital services, effective with hospital cost reporting periods beginning on or after October 1, 1983. Under this system, Medicare payment is made at a predetermined, specific rate for each hospital discharge. All discharges are classified according to a list of diagnosis-related groups (DRGs). This list contains 470 specific categories.

In order to implement the prospective payment system for inpatient hospital services as required by section 1886(d) of the Act, we published the following documents in the **Federal Register**.

- On September 1, 1983, we published an interim final rule (48 FR 39752), effective for hospital cost reporting periods beginning on or after October 1, 1983. Technical corrections were issued on October 19, 1983 (48 FR 48467).

VOL
51
ISS
46
MR
10
1986
UMI

- On January 3, 1984, we published a final rule (49 FR 234) that made changes as the result of our consideration of the public comments that were received in response to the interim final rule. Technical corrections were issued for this document on June 1, 1984 (49 FR 23010).
- In order to update the prospective payment rates for fiscal year 1985, we published a proposed rule on July 3, 1984 (49 FR 27422) and a final rule on August 31, 1984 (49 FR 34728), for which technical corrections were issued on October 15, 1984 (49 FR 40167).
- On March 29, 1985, we published a final rule (50 FR 12740) to redesignate the prospective payment regulations under a new Part 412. These regulations were previously located in 42 CFR 405.470 through 405.477.
- In order to update the prospective payment rates for fiscal year 1986, we published a proposed rule on June 10, 1985 (50 FR 24366) and a final rule on September 3, 1985 (50 FR 35646), for which technical corrections were issued on October 28, 1985 (50 FR 43570). However, section 5 of Pub. L. 99–107 as amended by section 2 of Pub. L. 99–201 postponed implementation of the revised Medicare payment rules through March 14, 1986 (51 FR 4166).

As a result of our experience with the prospective payment system to date, we are proposing in this document, to amend the Medicare rules that provide for special treatment of certain facilities under the prospective payment system, to allow an adjustment of the hospital-specific rate for sole community hospitals. We are also proposing to make other technical conforming changes to the prospective payment regulations.

II. Provisions for Sole Community Hospitals

A. Background

Section 1886(d)(5)(C)(ii) of the Act requires that the special needs of sole community hospitals (SCHs) be taken into account under the prospective payment system. The statute specifies a special payment formula for hospitals so classified and further provides for additional payments to SCHs experiencing a significant volume decrease because of extraordinary circumstances beyond their control. This section of the Act defines SCHs as those hospitals that, by reason of factors such as isolated location, weather conditions, travel conditions or absence of other hospitals (as determined by the Secretary), are the sole source of impatient hospital services reasonably available to individuals in a geographic area, who are entitled to benefits under Part A of Medicare. Regulations regarding the special treatment of SCHs under the prospective payment system are set forth in 42 CFR 412.92.

B. Current Policy

As noted above, section 1886(d)(5)(C)(ii) of the Act provides that unlike other short term, acute care hospitals that are paid under the prospective payment system, SCHs are to be paid under a unique payment formula. Generally, under section 1886(d)(1)(A) of the Act, hospitals paid under the prospective payment system progress through a three-year transition period during which a declining portion of their prospective payment rate is based on their historical Medicare costs, and an increasing portion is based on a Federal rate. However, rather than progressing through the transition period to fully national payment rates, SCHs continue to receive payment rates comprised primarily from their individual historical cost base (that is, 75 percent of the hospital-specific rate and 25 percent of the Federal rate) adjusted by an update factor. Therefore, the hospital-specific portion of the prospective payment rate has a unique significance for SCHs, when compared to other hospitals under the prospective payment system in which the hospital-specific portion of the rate rapidly declines in importance during a relatively short transition period.

C. Proposed Changes

In enacting the Social Security Amendments of 1983 (Pub. L. 98–21), Congress clearly acknowledged the unique contribution and vulnerability of SCHs by providing a special payment formula that places a continuing, heavy reliance on the hospital-specific rates calculated from Medicare costs in the base year, generally the 12-month hospital cost reporting period that ended on or after September 30, 1982 and before September 30, 1983. The legislative history of Pub. L. 98–21 expresses Congressional intent that the Secretary provide exceptions and adjustments under the prospective payment system to take into account the special circumstances faced by SCHs. (See Senate Report No. 98–23, 98th Cong., 1st Sess., p. 54 (1983) and House Report No. 98–25 Part I, 98th Cong. 1st Sess., p. 141 (1983)). Congress provided in section 1886(d)(5)(C)(iii) of the Act that, "the Secretary shall provide by regulation for such other exceptions and adjustments to such payment amounts as the Secretary deems appropriate." Thus, additional adjustments under the prospective payment system for SCHs are authorized as the Secretary believes appropriate.

Generally, SCHs tend to be small hospitals in rural areas furnishing a limited range of services. However, the payment mechanism for SCHs, relying as it does on historic costs, clearly discourages the addition or expansion of services in a group of hospitals that are most likely to need to respond to changing local circumstances. However, for these hospitals there are no provisions for the recognition of such changes other than additional payments for SCHs experiencing a decline in the volume of discharges due to extraordinary circumstances (available for cost reporting periods beginning on or after October 1, 1983 and before October 1, 1986, as described in § 412.92(e)). Consequently, we believe it appropriate to utilize the Secretary's authority under section 1886(d)(5)(C)(iii) of the Act to provide for an additional adjustment for SCHs under certain circumstances. Without such an adjustment, we believe that the current payment mechanism for SCHs would not fully respond to the obvious congressional intent that these unique providers be accorded special recognition.

Because such a large portion of the payment to SCHs is based on the hospital's individual historical cost experience, we believe SCHs should be afford the opportunity to request an adjustment of the hospital-specific portion of the payment rate. Consequently, we are proposing to amend § 412.92 to allow SCHs experiencing certain significant cost distortions to request an adjustment of the hospital-specific portion of their prospective payment rate. The SCHs would be required to submit documentation to their fiscal intermediaries of the circumstances that give rise to the cost distortion, the community need for the additional health care services or change in circumstances that has occurred and its resulting cost impact. Adjustments would not be granted if the cause of the cost distortion is not related to community medical needs. For example, an adjustment would not be authorized for any additional costs arising from entering a management contract or for expansion of beds in a hospital operating at low occupancy levels, regardless of the fact that a certificate of need had been granted for the expansion, because the changes are not required for purposes of the delivery of patient care.

The intermediary would forward, within 90 days of receipt of the necessary information, all submitted documentation, its analysis of the provider's claims, a copy of the overall cost data for the base year and the year in which the the distortion occurs, and its recommendation for acceptance or rejection of the request to our central office for processing. We would determine if an adjustment to the hospital-specific portion is justified based on the overall costs in the year of the cost distortion as compared to the overall base-year costs and, if so, the amount of the adjustment granted. We would notify the intermediary of our decision within 90 days of receiving all the necessary information. Adjustments granted under this provision would be made on a *prospective basis* beginning with the first day of the first cost reporting period after a favorable determination.

Generally, when hospital adds to or expands existing services there may be significant cost distortions arising from the initiation of the services (that is, start-up costs). Additionally, there is likely to be an initial period of abnormally low utilization until the availability of the new services becomes well known in the medical community. This combination of abnormally high costs and minimal utilization is likely to result initially in cost per treatment that does not represent costs that the hospital would incur in future cost reporting periods.

Because the adjustment made to the hospital-specific portion of the prospective payment rate under this proposed provision would carry forward to future cost reporting periods (when utilization should be higher and start-up costs no longer exist), we believe it would be inappropriate to establish an amount to be used for all future cost reporting periods that represents mainly start-up costs and intital low utilization. Similarly, we believe the costs recognized must be subject to a test of reasonableness. Consequently, if we determine that an adjustment is warranted, we would calculate the per discharge adjustment amount recognizing reasonable costs and utilization levels appropriate to the time period involved. At the end of a year from the effective date of the final rule, we would evaluate the adjustment process to assess whether revisions are necessary or appropriate. If changes are warranted, we would propose appropriate changes in the Federal Register.

III. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 requires us to prepare and publish a regulatory impact analysis for any regulations that are likely to have an annual effect on the economy of $100 million or more, cause a major increase in costs or prices, or result in significant adverse effects on competition, employment, investment, productivity, or innovation. As of October 1, 1985, 363 hosptials were classified as sole community hospitals. We expect that a small number of these hospitals would meet the criteria for an adjustment based on factors resulting in significant distortions in operating costs. Additionally, we expect that in most cases the amounts of adjustments would be small relative to total payment for all hospitals. Therefore,—

- We do not expect an annual effect on the economy to approach the $100 million threshold.
- The effects on costs or prices for consumers, hospitals and the Medicare program would be small.
- While it is possible that there may be a small effect on employment, for those hospitals that qualify for an adjustment, the effect would not be adverse.

In summary, the provisions of this proposal are not likely to bring about effects that would qualify it as a major rule under section 1(b) of Executive Order 12291. Therefore, an impact analysis is not required.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 through 612) requires us to prepare and publish a regulatory flexibility analysis for proposed regulations unless the Secretary certifies that the regulations would not have a significant economic impact on a substantial number of small entities. For purposes of the Regulatory Flexibility Act, we treat all hospitals as small entities. However, we expect that a relatively small number of hospitals will apply and qualify for an adjustment under this regulation. Therefore, the Secretary certifies under 5 U.S.C. 605(b) that this proposed rule would not result in a significant impact on a substantial number of small entities.

C. Paperwork Reduction Act

Section 412.92(f) of this proposed rule contains information collection requirements. As required by the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), we have submitted a copy of this rule to the Office of Management and Budget (OMB) for its review of these requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Agency address stated earlier in this preamble, and to the Office of Information and Regulatory Affairs, OMB New Executive Office Building (Room 3208), Washington, DC 20503, Attn: Desk Officer for HCFA.

IV. Other Required Information

A. Public comment

Because of the large number of comments we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments that we receive by the date specified in the "Date" section of this preamble, and, if we decide to proceed with a final rule, we will respond to the comments in the preamble of that rule.

List of Subjects in 42 CFR Part 412

Cancer hospitals, Christian Science sanatoria, Discharges and transfers, Inpatient hospital services, Medicare, Outlier cases, Prospective payment, Referral centers, Renal transplantation centers, Sole community hospitals.

We are proposing to amend 42 CFR Part 412 as set forth below:

PART 412—PROSPECTIVE PAYMENT SYSTEM FOR INPATIENT HOSPITAL SERVICES

1. The authority citation for Part 412 continue to read as follows:

Authority: Secs. 1102, 1871, and 1886 of the Social Security Act as amended (42 U.S.C. 1302, 1395hh, and 1395ww).

2. Section 412.72 is amended by adding a new paragraph (a)(6) to read as follows (the introductory language of paragraph (a) is being reprinted without change for the convenience of the reader):

§ 412.72 Modification of base-year costs.

(a) *Base for modification of base-year costs.* Base-year costs as determined under § 412.71(d) may be modified under the following circumstances: * * *

(6) *Adjustments for sole community hospitals.* (i) For sole community hospitals, to take into account factors necessary for delivery of patient care that result in significant cost distortions subsequent to the base year, in accordance with § 412.92(f). Adjustments that are authorized by HCFA under § 412.92(f), or that are based on an administrative decision (§ 405.1871 of this chapter) or judicial review decision (§ 405.1877 of this chapter) that is no longer subject to

VOL
51
ISS
46
MR
10
1986
UMI

reveiw by a higher reviewing authority, are effective beginning with the first day of the first cost reporting period after a final determination on a sole community hospital's request is made.

(ii) Adjustments granted are effective for one cost reporting period and may be renewed by HCFA, in whole or in part, based upon the submission of such information as HCFA may require. In addition, HCFA may—

(A) Request information from the hospital at any time to determine whether an adjustment previously granted remains appropiate; and

(B) Terminate or revise an adjustment upon 30 days' notice to the hospital whenever HCFA determines that such action is appropriate.

* * * * *

3. Section 412.92 is amended by adding a new paragraph (f) to read as follows:

§ 412.92 Special treatment: Sole community hospitals.

* * * * *

(f) *Adjustment of the hospital-specific rate for sole community hospitals*—(1) *General rule.* HCFA may adjust the amount of operating costs considered in establishing the hospital-specific base payment rate for SCHs (as determined under § 412.71) to take into account factors necessary for patient care that would result in a significant distortion in the operating costs of inpatient hospital services. These factors may include, but are not limited to, the addition of needed health care services that were not available in the hospital during its base year.

(2) *Documentation.* To qualify for an adjustment to its hospital-specific rate under this section, an SCH must submit documentation, including cost information as requested by HCFA, to the intermediary demonstrating the—

(i) Occurrence responsible for the cost distoration;

(ii) Necessity of, and justification for, the occurrence; and

(iii) Amount of the distortion that results from the specified event.

(3) *Intermediary recommendation.* The intermediary forwards the hospital's submittal, along with its analysis and recommendation, to HCFA within 90 days of receipt of the necessary documentation.

(4) *Determination by HCFA.* HCFA determines, within 90 days of receiving all the necessary information from the intermediary, whether a per discharge payment adjustment amount is justified based on—

(i) The needs of the SCH and of the community;

(ii) The increase in the SCH's operating costs arising from the additional health care service or other change; and

(iii) Reasonable utilization of the services, if the cost distortion is caused by the addition or expansion of services.

(Catalog of Federal Domestic Assistance Programs No. 13.773, Medicare—Hospital Insurance Program)

Dated: March 15, 1985.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

Approved: May 22, 1985.

BILLING CODE 4120-01-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 252

[Docket R-102]

Operating-Differential Subsidy for Bulk Cargo Vessels Engaged in World-Wide Services

AGENCY: Maritime Administration, DOT.

ACTION: Notice of public hearing.

SUMMARY: On December 23, 1985, the Maritime Administration (MARAD) published a Notice of Proposed Rulemaking (NPRM) on Operating-Differential Subsidy (ODS) for Bulk Cargo Vessels Engaged in World-Wide Services. (50 FR 52338) The proposed rule would expedite and simplify the determination of final amounts for all ODS items. The notice provided a period of public comment that expired on February 21, 1986. Based on a request from law firms representing affected subsidized operators, MARAD extended the comment period until March 26, 1986. MARAD has now decided to hold a public hearing, pursuant to an informal request by counsel for three of the subsidized operators.

DATE: The meeting will be held on Tuesday, March 18, 1986, at 10:00 a.m.

ADDRESS: Room 8442, Nassif Building, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Arthur B. Sforza, Director, Office of Ship Operating Costs, Maritime Administration, 400 Seventh Street SW., Washington, DC 20590 Tel. (202) 382-6036. Persons desiring to particiapte in this hearing should notify the contact person by March 13, 1986. Prepared statements and comments may be submitted by persons unable to be at the hearing. MARAD should receive these submissions by March 13, 1986, to facilitate their reproduction and availabity at the hearing.

SUPPLEMENTARY INFORMATION: MARAD is responsible for administering provisions in Title VI of the Merchant Marine Act 1936 (46 U.S.C. 1173, 1176), concerning the determination of ODS rates and the payment of ODS. The Act is specific in prescribing the method for determining ODS wage rates, but provides no guidance for the determination of other subsidizable expenses of the subsidized ship operator, namely, maintenance and repair (M&R), hull and machinery premiums (H&M) and protection and indemnity insurance premiums and deductible (P&I). MARAD now determines ODS for wages on a fiscal period basis, paid as a daily rate, while ODS for other expenses is paid for calendar periods and based on estimated expenses accrued by the operators. This system of calculation and payment is reflected in existing MARAD regulations at 46 CFR Part 252. The NPRM proposes to provide for the payment of all components of ODS as a fixed and final daily amount under ODS contracts currently in force. The NPRM provided a comment period of 60 days that expired on February 21, 1986. During that comment period MARAD received written requests from two law firms that represent subsidized operators, for a 30-day extension of the comment period. One law firm cited the complexity of the issues involved and the inability to schedule a meeting with its clients as reasons for the extension. By notice published in the **Federal Register** on February 26, 1986, MARAD extended the comment period to March 26, 1986. (51 FR 6760) MARAD has now decided, based on representations made by a law firm representing three subsidized operators, to hold a public hearing. The purpose is to clarify the procedure for calculating ODS for wages and enhance the understanding of the methodology being proposed to calculate the final daily ODS rate.

E.O. 12291, Statutory and DOT Requirements

The Maritime Administrator has determined that this proposed rulemaking is not major, as defined in E.O. 12291, and is significant under DOT regulatory policies and procedures due to considerable public interest (49 FR 11034); February 26, 1979. This rulemaking would place the ODS receipts of the operators and the obligations of the government on a current basis, with no appreciable overall change in such receipts and obligations. Since it would only facilitate the payment of final ODS amounts in a more timely manner, the economic impact of this proposal has been found to be minimal and further evaluation is unnecessary.

Since this proposal would affect principally ship operators with substantial annual revenues, the Maritime Administrator certifies that, if finalized, this rulemaking would not exert a significant economic impact on a substantial number of small entities under The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.). It does not include new information collection requirements, but maintains existing information requirements which have been approved by OMB under control numbers 2133-0004 and 2133-0024, pursuant to the Paperwork Reduction Act (44 U.S.C. 3501 et seq.).

Dated: March 5, 1986.

By Order of the Maritime Administrator.

Murray A. Bloom,

Assistant Secretary.

BILLING CODE 4910-81-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Notice of Withdrawal of Proposed Rule To List the Fish Creek Springs Tui Chub as Threatened

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of withdrawal.

SUMMARY: The Service is withdrawing the proposed rule published in the **Federal Register** of June 6, 1984 (49 FR 23409), that the Fish Creek Springs tui chub (*Gila bicolor euchila*) be listed as a threatened species with critical habitat. New data indicate that the Fish Creek Springs tui chub is presently more abundant and widely distributed in its habitat, and subject to less threat, than believed at the time of the propose rule. The species is not considered likely to become threatened or endangered in the foreseeable future.

DATES: The withdrawal is effective March 10, 1986.

ADDRESSES: The complete file for this notice is available for inspection, by appointment, during normal business hours at the Regional Office, U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 NE. Multnomah Street, Suite 1692, Portland, Oregon 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne White, Chief, Division of Endangered Species, U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 NE. Multnomah Street, Suite 1692, Portland, Oregon 97232. (503/231-6131 or FTS 429-6131).

SUPPLEMENTARY INFORMATION:

Background

The Service is withdrawing the proposed rule to list the Fish Creek Springs tui chub (*Gila bicolor euchila*) as a threatened species. On December 30, 1982, the Service published a Notice of Review of Vertebrate Wildlife for Listing as Endangered or Threatened Species (47 FR 58453), which included the Fish Creek Springs tui chub as a category 1 taxon. Such inclusion indicated that the Service had substantial information on hand to support the proposal of this fish for listing under provisions of the Endangered Species Act. Subsequently, the Service received a petition from the Desert Fishes Council on April 12, 1982, to list 17 species of southwestern fishes, including the Fish Creek Springs tui chub. The Service reviewed the petition and determined that it did present substantial information indicating that the petitioned action was warranted. On June 6, 1984, the Fish Creek Springs tui chub was proposed for listing as a threatened species with critical habitat. The only known population of this species occurs in Fish Creek Springs, located entirely within private land in Little Smoky Valley of southeastern Eureka County, Nevada. The proposed listing was undertaken because the range and numbers of this species appeared to have substantially decreased since collections of the fish were first made in 1938. Primary threats identified in the proposed rule included predation by introduced trouts, and overgrazing of adjacent lands. Critical habitat was included with the proposed rule, as were special rules to allow take of the Fish Creek Springs tui chub for certain purposes in accordance with Nevada State laws and regulations.

The Service sought data and comments from the public, and from State, local, and Federal agencies on the proposal, and received five written letters of comment. Additionally, a status report on the Fish Creek Springs tui chub funded under Section 6 of the Endangered Species Act, was completed in July 1984 by University of Nevada, Las Vegas, personnel. Also in July 1984, Service biologists from the Great Basin Complex, Reno, Nevada, and Region I office in Portland, Oregon, conducted field observations at Fish Creek Springs.

Of the written comment letters received, none provided additional data regarding the status of the Fish Creek Springs tui chub. The Nevada Department of Wildlife (NDOW) and the Nevada Division of State Parks opposed the listing on the basis of adverse effects to the recreational fishery. Letters supporting the proposed listing came from the Desert Fishes Council and the International Union for Conservation of Nature and Natural Resources. The Eureka County Planning Commission voiced concern for the rights of the private landowner but neither supported nor opposed listing.

Tui chub (*Gila bicolor*) were originally observed and documented from Fish Creek Springs in 1938, but the population was not described as a unique subspecies, *Gila bicolor euchila*, until 1972 (Hubbs and Miller 1972). Fish Creek Springs historically consisted of a series of four interconnected springs which formed the headwaters of Fish Creek. In 1938, tui chub range included all four springs and associated outflow creeks (Hubbs, *et al.* 1974). Since the original field work in 1938, the Fish Creek Springs habitat, primarily the spring outflow channels, has been modified for livestock, irrigation, and domestic uses. In addition, rainbow (*Salmo gairdneri*) and brown trout (*Salmo trutta*) were introduced to provide sport fishing. Surveys conducted in 1978 and 1979 recorded tui chub from only one of the four springheads and reported no chub present in any of the outflows or in the creek (Hardy 1980a, 1980b). In addition, livestock had trampled the surrounding area and caused the elimination of most riparian vegetation.

In July 1984, biologists from the University of Nevada, Las Vegas (UNLV), under contract to the NDOW, conducted a status survey of Fish Creek Springs tui chub. UNLV biologists reported the presence of large numbers of both *Gila bicolor euchila* adults and fry throughout the spring system (Deacon 1984). In addition, the species was found 3 to 4 miles further downstream than previously reported. No trout were seen or captured although stocking of rainbow trout by NDOW occurred each spring. Deacon (1984) reported that channelization of Fish Creek had proceeded from the Fish Creek Ranch headquarters upstream to a point approximately 1 mile below the springhead.

Also, in late July 1984, Service personnel from Reno, Nevada and

BEST COPY AVAILABLE

VOL 51 ISS 46 MR 10 1986 UMI

Portland, Oregon visited the site and observed large numbers of chub, especially fry, throughout the headwater system. Though livestock use of the area was evident, substantial riparian vegetation was present and no evidence of bank trampling, erosion, or visible pollution was observed except around the westernmost springhead which had been modified to serve as a livestock watering pond. Thousands of chub fry were present in all vegetated spring outflows, including the outflow from the westernmost spring. Because of the obvious conflict between information presented in the proposed rule and information received during the comment period, the Service requested a 6-month extension of the proposed rule. The notice of such extension was published in the **Federal Register** on June 18, 1985 (50 FR 25283).

UNLV biologists surveyed the Fish Creek Springs system again in June 1985 and reported similar numbers as in 1984 including fish 3 to 4 miles downstream from the originally described limit of occurrence (Pedretti *et al.* 1985). Catch per trap-hour was greater at all sites sampled in 1985 than in 1984 even though additional channeling and deepening of spring pools and outflows had occurred during winter and spring, 1985.

NDOW stocking records from 1973 to 1985 report that between 620 and 3195 rainbow trout have been stocked annually into the waters at Fish Creek Springs. Apparently more important, however, brown trout were stocked in 1973, 1976–1978, and in 1981. From 1976–1978, a total of over 7,000 catchable-sized brown trout were released in the springheads, which collectively cover less than one-half acre of open water. Since 1979, brown trout have been stocked only once, in 1981. Rainbow trout have continued to be stocked annually, but at much reduced levels when compared with stocking rates in the mid-to-late 1970's. The dramatic increase in tui chub numbers and range corresponds with the cessation of brown trout stocking in the springheads. As brown trout grow larger, they tend to become more and more piscivorous (Staley 1966, Minckley 1973, Moyle 1976). Rainbow trout, on the other hand, tend to feed more heavily on aquatic invertebrates, and are not generally regarded as being piscivorous, even at large sizes (McAfee 1966, Minckley 1973, Moyle 1976).

Because of considerable evidence that the observed decrease in tui chub abundance in the late 1970's and early 1980's was due to presence of brown trout, the Service met with NDOW to discuss trout stocking procedures at Fish Creek Springs. NDOW (1985) has subsequently agreed "not to stock brown trout in Fish Creek Springs to enhance the protection of the tui chub in that locale." Additionally, NDOW stated that the rainbow trout "is not a significant predator and anglers remove a large percentage of the annual planting within 3 months. We consider this practice compatible with the Fish Creek Springs tui chub population and plan to continue to stock this water with low levels of rainbow trout, similar to what has occurred from 1980 through 1985." The Service concurs that continued stocking of rainbow trout at current levels will not detrimentally affect the tui chub population.

The Service believes that the documented large numbers of individuals and different age classes of tui chubs, combined with the cessation of brown trout stocking, and stocking of rainbow trout only at current low levels, insures that the major threat to the Fish Creek Springs tui chub has been eliminated. Data and observations do not indicate that overgrazing of riparian vegetation or livestock trampling of pool and outflow banks causing siltation problems is an identifiable threat, at this time, nor has channelizing and deepening of portions of the system by the landowner appeared to have detriminentally affected the tui chub range or abundance. In actuality, the range of the species now appears to be larger than when initial collections were made by Hubbs and Miller in 1938 (Deacon 1984, Pedretti *et al.* 1985).

For the above stated reasons, the Service concludes that listing the Fish Creek Springs tui chub or delineating critical habitat under authority of the Endangered Species Act of 1973, as amended is not warranted at this time. The Service will continue to monitor the species and its habitat. Listing would be appropriate in the future if any of the previously identified or additional threats are identified and documented.

Findings and Withdrawal

In compliance with Sections 4(b)(6)(A)(i)(IV) and 4(b)(6)(B)(ii) of the Endangered Species Act, as amended, the Service hereby withdraws its proposed rule of June 6, 1984 (49 FR 23409), to list the Fish Creek Springs tui chub (*Gild bicolor euchila*) as threatened with critical habitat. Recent data document the presence of a large population of different age classes of the tui chub throughout its historical habitat, and indicate that the primary threats upon which the proposal was based are no longer present.

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposal To Determine Trifolium Stoloniferum (Running Buffalo Clover) To Be an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to list a plant, *Trifolium stoloniferum* (running buffalo clover) as an endangered species. Until perhaps the mid-1800's, this clover ranged from eastern Kansas to West Virginia and was apparently abundant in certain locations. Presently, only two extant populations of *T. stoloniferum* are known. Both occur in West Virginia on private land and are very small, totalling 22 individuals. The status of one of these populations is uncertain. This species is endangered by its rarity alone; additional threats include trampling and other inadvertent destruction by humans and livestock, crushing by off-road vehicles, and competition from weedy species. This proposal, if made final, will implement the protection provided by the Endangered Species Act of 1973, as amended, for *Trifolium stoloniferum*. Critical habitat is not being proposed at this time. The Service seeks data and comments from interested parties on this proposal.

DATE: Comments from all interested parties must be received by May 9, 1986. Public hearing requests must be received April 24, 1986.

ADDRESS: Comments and materials concerning this proposal should be sent to the Annapolis Field Office, U.S. Fish and Wildlife Service, 1825 Virginia Street, Annapolis, Maryland 21401. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Jacobs, at the above address (301/269–6324 or FTS 922–4197).

SUPPLEMENTARY INFORMATION

Background

Running buffalo clover, *Trifolium stoloniferum*, a member of the pea family (Fabaceae), is one of four species of clover native to the eastern United States. This short-lived perennial forms long runners from the base. The flowerheads are terminal and large, up to an inch in diameter. Flowers are white tinged with purple. Flowering normally occurs from mid-April to June and fruits (seed heads) are present into July.

Trifolium stoloniferum was originally named by Henry Muhlenberg in 1813; however, the name was invalid, since it was published without a description. The name was validiated by Amos Eaton in his *Manual of Botany for the Northern and Middle States*, published in 1818. *T. stoloniferum* is morphologically similar to the native buffalo clover, *T. reflexum*, but, as the name implies, the former species is stoloniferous (i.e. produces prostrate stems from the base of the plant) while the latter is not. *T. stoloniferum* has also been considered very similar to the introduced stoloniferous species, *Trifolium repens*; however, the former has a chromosome number of $n=16$, while the number for *T. repens* is $n=32$ (Norman Taylor, University of Kentucky Herbarium, pers. comm.).

A detailed character analysis by Brooks (1983) reveals further differences among these three species in growth habitat and flower and seed morphology.

Documented specimens of *Trifolium stoloniferum* are available from the states of Arkansas, Illinois, Indiana, Kansas, Kentucky, Missouri, Ohio, and West Virginia, indicating the original range of this plant (Brooks 1983). A recent review of historical accounts indicates that before the arrival of European settlers, this species was abundant in several areas of the Ohio Valley and adjacent regions, and may have been a local dominant within the "bluegrass region" of Kentucky. Running buffalo clover was apparently adapted to rich soils in "relatively stable ecotones, with continual, moderately intense disturbance," between open forest and pastures or prairies (Campbell 1985). Campbell speculates that the vegetation of these areas was likely maintained by "buffalo" (*Bison bison bison*). After the extirpation of bison from the East, the abundance of *T. stoloniferum* apparently decreased. Brooks (1983) indicates that by the late 19th century, populations of running buffalo clover were "limited and widely scattered . . . shortly thereafter . . . the number of collections dwindled rapidly, with a mere five sites documented after 1900." Brooks field checked all the documented locations as well as other likely habitat for *T. stoloniferum* in Missouri and Kansas, without finding any extant populations (R. Brooks, pers. comm.). Extensive field work in Kentucky has also revealed no extant populations of *T. stoloniferum* (J. Campbell, pers. comm.). The plant is also believed to be extirpated in Arkansas, Illinois, Indiana, Missouri and Ohio (pers. comms. with Heritage Programs of the affected States). Based on this information and his conversations with field botanists, Brooks (1983) concluded that *T. stoloniferum* was possibly extinct.

In 1983 and 1984, two small populations of running buffalo clover were discovered in West Virginia (Bartgis 1985). One of these, a relocation of the most recent historical record (Webster County, 1940), occurs at the margin of a mowed field and in 1984 contained only four plants. During a recent field inspection (summer, 1985), these plants could not be relocated. Therefore the status of this population is questionable; the plants may or may not reappear next spring. The other population, located along an off-road vehicle trail adjacent to the New River in Fayette County, presently contains 18 plants. The Fayette County site, which may be the only remaining population of this species, occurs within the area of an existing hydropower project licensed by the Federal Energy Regulatory Commission. At present, *T. Stoloniferum* is not impacted by any aspect of the hydropower facility. A live shoot from the Fayette County population was sent to the University of Kentucky, where it has been vegetatively propagated; the greenhouse population presently contains some 40 plants. To summarize, based on current information, *T. stoloniferum* is indeed "one of the rarest members of the North American flora" (Bartgis 1985).

Trifolium stoloniferum was first recognized by the Service in the *Federal Register* notice of review published on November 28, 1983 (48 FR 53641). That notice, which covered plants being considered for classification as endangered or threatened, included *Trifolium stoloniferum* in category 2*. Category 2 comprises those taxa for which proposed listing is possibly appropriate but for which conclusive data on biological vulnerability are not currently available to support a proposed rule. The asterisk (*) indicates taxa that are possibly extinct. The Service was informed of the extant populations of this species in December of 1984.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (50 CFR Part 424) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and

VOL 51 ISS 46 MR 10 1986 UMI

their application to *Trifolium stoloniferum* Muhl. *ex.* Eaton are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* It is difficult to determine the original extent and abundance of running buffalo clover, since elimination of the natural ground cover within its range began during the 1790's, before *T. stoloniferum* was even described, and long before the area was adequately botanized. By 1850, native vegetation of the Kentucky Bluegrass region had been largely replaced by pasture plants, including bluegrass (*Poa pratensis*) and introduced white clover (*Trifolium repens*) (Campbell 1985). Therefore, we must rely on early, nontechnical accounts, such as those summarized by Campbell (1985) to infer the original extent of running buffalo clover. Quotations from early observers in the Kentucky Bluegrass region indicate at least localized abundance: "rich soil . . . adorned with great patches of fine white clover" (Ranck 1901, re 1775), "covered with clover in full bloom" (Walker 1924, re 1775), "a turf of white clover" (Henderson 1775) "an abundance of wild rye, clover and buffalo grass covering vast tracts of country" (Filson 1784) (all quoted in Campbell 1985). Campbell argues that these and other accounts could only have referred to *Trifolium stoloniferum*, the only clover known to have been native to the region. By the late 1800's, when the majority of collections were made, the species was known only from localized, widely scattered localities. Today, *T. stoloniferum* is believed to be extirpated throughout its range, with the exception of the two recently discovered West Virginia populations.

The precise reasons for this striking decline are unclear. It is likely that running buffalo clover was to some extent dependent on bison for soil enrichment, periodic intense disturbance, and seed dispersal (Campbell 1985, Larson 1940, Reynolds *et al.* 1982). In this regard it is interesting that one of the extant West Virginia populations is in the immediate vicinity of the last recorded site for bison in the State, and all other West Virginia records are in the immediate vicinity of known buffalo traces (Bartigis 1985). Other factors contributing to the species' demise could include clearing of its habitat for pasture and agriculture, competiton with introduced species, and other habitat changes subsequent to the industrial revolution (Brooks 1983).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Running buffalo clover is not known to be used for any commercial or recreational purpose. Because of its rarity, it is subject to collection by botanists and/or curiosity seekers. Given the fact that fewer than thirty individuals of this species are known to exist in the wild, any collection could be considered overutilization. The species could also be largely eliminated in the wild by a single act of vandalism.

C. *Disease or predation.* While *T. stoloniferum* may once have been maintained by grazing, the extant populations are so small that they could easily be eliminated by deer, cattle, or any other herbivore. Similarly, any disease, even if localized in extent, could now virtually render the species extinct.

D. *The inadequacy of existing regulatory mechanisms.* The extant populations of *T. stoloniferum* presently receive no protection under any Federal, State, or local law or regulation.

E. *Other natural or manmade factors affecting its continued existence.* The Fayette County population of running buffalo clover, covering approximately one square yard, is located immediately adjacent to an off-road vehicle path that provides the only public access to a 10-mile stretch of the New River. Due to its location, the population is extremely vulnerable to being run over, trampled, covered by trash, or killed by petroleum pollutants.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list the running buffalo clover as endangered. The Act defines an endangered species as ". . . any species which is in danger of extinction throughout all or a significant portion of its range. . ."

Due to the very small population numbers and vulnerability of *Trifolium stoloniferum*, endangered status is most appropriate. The reasons for not designating critical habitat are discussed below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for *Trifolium stoloniferum* because its very restricted distribution makes it vulnerable to extinction from taking. Public access to published habitat descriptions and precise maps could result in vandalism, which could easily cause the extinction of this species. Therefore, it would not be prudent to determine critical habitat for *Trifolium stoloniferum.*

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States, and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection requireed of Federal agencies and the prohibition against collection are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critial habitat, the responsible Federal agency must enter into consultation with the Service. The Federal Energy Regulatory Commission has permit jurisdiction over the project area on which the Fayette County population of *T. stoloniferum* offurs. The existing project does not directly impact *T. stoloniferum;* however, any future project developments possibly impacting this species would require section 7 consultation to ensure protection for this species and its habitat.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62,

and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Trifolium stoloniferum* all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endngered species under certain circumstances. It is anticipated that few trade permits would ever be sought or issued since the species is not common in cultivation or in the wild.

Section 9(a)(2)(B) of the Act, as amended in 1982, prohibits the removal and reduction to possession of endangered plant species from areas uder Federal jurisdiction. This prohibition would apply to running buffalo clover. Regulations regarding permits for exceptions to this prohibition were published on September 30, 1985 (50 FR 39681). Because this species is not known to occur on Federal land, it is anticipated that few collecting permits for the species would ever be requested. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235–1903).

Public Comments Solicited

The Service intends that any final rule adopted will be accurated and as effective as possible in the conservation of endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposed rule are hereby solicited. Comments particularly are sought concerning the following:

(1) Biological, commerical trade, or other relevant data concerning any threat (or the lack thereof) to *Trifolium stoloniferum*;

(2) The location of any additional populations of *Trifolium stoloniferum* and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range and distribution of this species; and

(4) Current or planned activities in the subject area and their possible impacts on *Trifolium stoloniferum.*

Final promulgation of a regulation on *Trifolium stoloniferum* will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusette 02158.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of chapter I, Title 50 of the Code of Federal Regulations, as set forth below.

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*)

2. It is proposed to amend § 17.12(h) for plants by adding the following, in alphabetical order under the family Fabaceae, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 649

[Docket No. 60326-6036]

American Lobster Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule..

SUMMARY: NOAA issues a proposed rule to implement conservation and management measures as prescribed in the proposed Amendment 1 (amendment) to the Fishery Management Plan for the American Lobster Fishery (FMP). This rule: (1) Institutes a uniform lobster fishing gear marking requirement for the offshore lobster fishery; (2) exempts all fish trap fishermen including Mid-Atlantic black sea bass fishing gear from the escape vent requirement in a specified fishing area; (3) provides the Regional Director the authority to grant research exemptions from any lobster FMP regulations and/or establish closed areas for research purposes; and (4) distinguishes red crab fishing gear from gear capable of taking lobster. The intended effect is to promote fishing efficiency by reducing the incidence of gear conflicts and ensuring that black sea bass and red crab gear are not unnecessarily included in measures intended for the lobster fishery.

DATE: Comments on the proposed rule must be received on or before April 18, 1986.

ADDRESSES: Comments on the proposed rule, the amendment, or supporting documents should be sent to Mr. Richard Schaefer, Acting Regional Director, National Marine Fisheries Service, Northeast Regional Office, 14 Elm Street, Gloucester, MA 01930-3799. Mark the outside of the envelope "Comments on Amendment 1 to the Lobster FMP".

Copies of the amendment, the environmental assessment, and the draft regulatory impact review are available from Mr. Douglas G. Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway, Saugus, MA 01906.

FOR FURTHER INFORMATION CONTACT: Kathi L. Rodrigues, Resource Management Specialist, 617-281-3600, ext. 324, or Carol J. Kilbride, Resource Policy Analyst, 617-281-3600, ext. 331.

SUPPLEMENTARY INFORMATION: Final regulations implementing the Fishery Management Plan for the American Lobster Fishery were implemented on September 7, 1983 (48 FR 36266, August 10, 1983). A notice of availability for the proposed amendment was published on February 6, 1986 (51 FR 4640).

Amendment 1 proposes to establish a consistent and identifiable gear marking system that will afford mobile gear operators a chance to avoid fixed lobster gear. The need for a gear marking system arises from the increase in utilization of fishery resources by different gear types which, in turn, increases competition and congestion on fishing grounds and results in a greater incidence of gear conflicts. The number of vessels participating in the offshore lobster fishery has increased by 47 percent from 1982 to 1984.

Gear conflicts are costly in terms of lost fishing gear and fishing time. The replacement cost of pot/trap gear reported lost or damaged as a result of gear conflicts, and for which claims were filed, averaged almost $265,000 from 1980 to 1982. Attempts to retrieve and disentangle gear can be dangerous to the vessel and crew.

The minimum marking standards consist of the following: (1) The westernmost end of a lobster trawl must be marked by at least an 8 inch standard tetrahedral corner radar reflector and a single flag or pennant; (2) the easternmost end of a trawl must be marked by at least an 8 inch standard tetrahedral corner radar reflector only. In addition, lobster trawls would be limited to a length of 1½ miles.

Also included in the amendment is an exemption designed to redress what the Council considers an unnecessary restriction that may have the effect of reducing revenues for the black sea bass fishery. In the present FMP, sea bass traps must be vented according to the same specifications for lobster traps. The exemption, limited to all fish trap fishermen including black sea bass trap fishermen operating south of Barnegat Light, NJ, and shoreward of the 30 fathom contour, would alleviate the unintended and potentially negative impact of the FMP on a fishery outside the management until. The Council has determined that this exemption would have no significant effect on the conservation of the lobster resource.

The Council's determination in favor of this exemption is based on landings data that show that the lobster bycatch from sea bass traps is 1.3 percent of the total lobster landings taken for the three States involved (New Jersey, Maryland and Virginia). The Council believes that because the amount of lobster bycatch is insignificant compared to directed lobster fishery landings, the impact on the lobster resource as a whole would also be insignificant were black sea bass fishermen allowed to retain their bycatch as before.

Calculations of potential revenue loss to the sea bass fishery are primarily derived from public testimony and State landings records from New York, New Jersey, and Maryland. The landing records reveal a small market category of black sea bass of 7 to 11½ inches that represents 24 percent of the landings and 8 percent of the revenue of this fishery. Public testimony from black sea bass fishermen suggests that this entire small market category would be lost if the venting requirement were to be imposed on the fishery.

The exemption as proposed would allow all fish trap fishermen and especially black sea bass trap fishermen, operating south of Barnegat Light and shoreward of the 30 fathom contour, to be exempt from the escape vent requirement provided that: (1) They possess a valid federal lobster permit; (2) their total lobster landings do not exceed 100 pounds per trip; and (3) their traps are fished in an unbaited condition and all traps are marked so as to identify the owner.

The amendment further provides authority to the Regional Director, upon the recommendation of the New England Fishery Management Council, to allow exemptions to any of the provisions of the FMP. In addition, the amendment provides authority to the Regional Director, upon the recommendation of the appropriate council, to close areas for the purpose of research that will be beneficial to the lobster resource. Such closures are to be implemented through a regulatory amendment.

The amendment also draws a distinction between red crab fishing gear which is operated deeper than 200 fathoms, and gear capable of taking lobsters. All available evidence indicates that the red crab fishery is devoid of any lobster bycatch and operates in an area where there is no mobile gear. Therefore, it should not be subject to the regulations of the FMP. Such restrictions would preclude the operation of an economically viable red crab fishery.

Classification

Section 304(a)(1)(C)(ii) of the Magnuson Act, as amended, requires the Secretary of Commerce (Secretary) to publish regulations proposed by the Council within 30 days of receipt of an amendment and proposed regulations. At this time the Secretary has not determined that the amendment proposed to be implemented by these rules is consistent with the National Standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making that determination, will take into account the data, views and comments received during the comment period.

The Council prepared an environmental assessment for this amendment and concluded that there will be no significant impact on the environment as a result of this rule. A copy of the environmental assessment may be obtained from the Council at the address given above.

The NOAA Administrator determined that the proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. The proposed rule will result in a net benefit of $143,000 or more to the lobster industry each year. This figure was obtained by subtracting the worst case fishery-wide initial cost of $121,000 from the $264,000 average replacement cost of gear reported lost or damaged in gear conflicts. The venting exemption for sea bass fisherman will prevent an 8 percent decline to that fishery's revenue. The lobster fishery may experience an increase in landing due to increased efficiency; however, prices and employment should remain the same. Administrative enforcement, paperwork, and record-keeping requirements are also expected to remain unchanged, and therefore, there will be no increase in costs to Federal, State, or local government agencies. The Council prepared a regulatory impact review which concludes that the industry will not be adversely affected by the proposed rule. Instead, the Council believes that the rule will enhance competition, productivity, and thus potentially promote investment and innovation in the fishery. A copy of this review may be obtained from the Council at the address listed above.

The proposed rule is exempt from the review procedures of E.O. 12291 under section 8(a)(2) of that order. Deadlines imposed under the Magnuson Act, as amended by Pub. L. 97-453, require the Secretary to publish this proposed rule within 30 days of its receipt. The proposed rule is being reported to the Director of the Office of Management and Budget with an explanation of why it is not possible to follow the review procedures of that order.

The General Counsel of the Department of Commerce certified to the Small Business Administration that this proposed rule, if adopted, will have a significant economic impact on a substantial number of small entities because the requirement to mark the westernmost end of a lobster trawl with a radar reflector and a single flag or pennant would only involve a maximum, one-time cost of $1,173 per vessel (less than one percent of average gross revenues of $227,757) and would be more than offset by savings in the reduction of lost gear estimated to be about $2,563 per vessel.

The proposed rule to eliminate escape vents in all fish traps including black bass traps will impose no new costs on the fishery because it does not require adjustments in equipment or fishing practice but merely allows fisherman to eliminate escape vents at their discretion. At the same time the action allows retention of smaller size, marketable sea bass that would otherwise escape through the vents. As a result, a regulatory flexibility analysis was not prepared.

This proposed rule does not contain a collection of information requirement for the purposes of the Paperwork Reduction Act.

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management programs of Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island, Delaware, Maryland, North Carolina, and Virginia. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

List of Subjects in 50 CFR Part 649

Fisheries, Reporting and recordkeeping requirement.

Dated: March 5, 1986.

Joseph W. Angelovic,

Deputy Assistant Administrator for Science and Technology, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Part 649 is proposed to be amended as follows:

PART 649—[AMENDED]

1. The authority citation for 50 CFR Part 649 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. The Table of Contents is amended by revising the title of § 649.21 to read "Gear identification, marking, and escape vent requirement.", and adding a new section title that reads "§ 649.22 Exemption and area closure.".

3. Section 649.1 is amended by adding a new sentence at the end of the paragraph to read as follows:

§ 649.1 Purpose and scope.

"* * * Red crab fishing gear which is fished deeper than 200 fathoms is not gear capable of taking lobsters, and not subject to the provisions of these regulations."

4. Section 649.21 is revised to read as follows:

§ 649.21 Gear identification, marking, and escape vent requirements.

(a) *Identification.* All lobster gear deployed in the FCZ or possessed by a person whose vessel is permitted for fishing in the FCZ, and not permanently attached to the vessel, must be legibly and indelibly marked with one of the following codes of identification:

(1) The vessel's Federal fishery permit number; and/or

(2) Whatever positive identification marking is required by the vessel's homeport State.

(b) *Marking.* In the area of the FCZ described in paragraph (b)(4) below, lobster pot trawls are to be marked as follows:

(1) Lobster pot trawls of three or less pots must be marked with a single buoy.

(2) Lobster pot trawls consisting of more than three pots must have a radar reflector and a single flag or pennant on the westermost end (marking the half compass circle from magnetic south through west to and including north), while the easternmost end (meaning the half compass circle from magnetic north through east to and including south) of a lobster trawl must be marked with a radar reflector only. Standard tetrahedral corner radar reflectors (see figure 1) of at least 8 inches must be employed.

(3) No lobster pot trawl shall exceed 1.5 miles in length as measured from buoy to buoy.

(4) Gear marking requirements apply in the following areas:

(i) *Gulf of Maine.* All waters of the FCZ north of 42°20′ N. latitude seaward of a line drawn 12 miles from the baseline of the territorial sea;

(ii) *Georges Bank.* All waters of the FCZ south of 42°20′N. latitude and east of 70°00′ W. longitude and seaward of the 25 fathom depth contour;

(iii) *Southern New England.* All waters of the FCZ west of 70°00′ W.

VOL 51
ISS 46
MR 10
1986
UMI

longitude, east of 71°30′ W. longitude and seaward of the 25 fathom depth contour; and

(iv) *Mid-Atlantic.* All waters of the FCZ west of 70°30′ W. longitude and seaward of the 40 fathom depth contour.

(c) *Escape vents.* All lobster traps or traps capable of taking lobster that are deployed in the FCZ or possessed by a person whose vessel is fishing in the FCZ, unless exempted as described in paragraph (c)(2) below, must be constructed to include one of the following escape vents in the parlor section of the trap. The vent must be located in such a manner that it would not be blocked or obstructed by any portion of the trap, associated gear, or the sea floor in normal use.

(1)(i) A rectangular portal with an unobstructed opening not less than 1¾ inches (44.5 mm) by 6 inches (152.5 mm);

(ii) Two circular portals with unobstructed openings not less than 2¼ inches (57.2 mm) in diameter; or

(iii) Any other vent certifed by the Regional Director to release a substantial number of lobsters under 3-3/16 inches carapace length from the trap.

(2) Traps capable of taking lobster, either being fished or in possession, are exempt from the venting requirement under the following conditions—

(i) The traps are fished in an unbaited condition; and

(ii) The traps are deployed in the area south of Barnegat Light, NJ (south of LORAN C 9960–Y–43300), seaward of the outer boundary of the territorial sea, and within the 30 fathom depth contour; and

(iii) The bycatch of lobster may not exceed 100 pounds per trip.

(d) *Enforcement action.* Unmarked, unvented, or improperly vented traps, unless exempted under the terms of paragraph (c)(2) of this section, will be seized and disposed of in accordance with the provisions of 50 CFR Part 219.

5. A new § 649.22 is added to read as follows:

§ 649.22 Exemption and area closure.

(a) *Exemption.* (1) Upon the recommendation of the New England Fishery Management Council, the Regional Director may exempt any person or vessel from the requirements of this part for the conduct of research or education beneficial to the lobster resource or lobster fishery.

(2) The Regional Director may not grant such exemption unless he determines that the purpose, design, and administration of the exemption is consistent with the objectives of the American Lobster Fishery Management Plan, the provisions of the Magnuson Act and other applicable law, and that granting the exemption will not—

(i) Have a detrimental affect on the lobster resource and fishery; or

(ii) Create significant enforcement problems.

(3) Each vessel participating in any exempt activity is subject to all provisions of this part except those necessarily relating to the purpose and nature of the exemption. The exemption will be specified in a letter issued by the Regional Director to each vessel participating in the exempted activity. This letter must be carried aboard the vessel seeking the benefit of such exemption.

(b) *Area closure.* Upon the recommendation of a Council, the Regional Director may close, through a regulatory amendment, an area of the FCZ within that Council's area of authority to fishing for the conduct of scientific research provided that such closure will not—

(1) Increase gear conflicts; or

(2) Interfere significantly with common fishing practices.

DEPARTMENT OF AGRICULTURE

Cooperative Agreement With International Rice Research Institute

AGENCY: Office of International Cooperation and Development, USDA.

ACTION: Notice of intent to award a cooperative agreement.

Activity

The Office of International Cooperation and Development intends to enter into a cooperative agreement with the International Rice Research Institute to provide assistance in the development of socio-economic training modules and a training manual for use in Farming Systems Research (FSR) programs in developing countries.

Authority: Sec. 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

The Office of International Cooperation and Development announces the availability of funds for fiscal year 1986 to enter into a cooperative agreement with the International Rice Research Institute (IRRI) in the amount of $30,000. Using its own resources, IRRI has conducted extensive preliminary research in development of a training manual and audio-visual module for using in strengthening the economic and other social science elements of Farming Systems Research (FSR) programs in developing countries. Funding to be provided by OICD will facilitate the printing, production and distribution of the training manual and audio-visual module.

Assistance will be provided only to IRRI which has the requisite resources, as well as a long experience in FSR endeavors, and has close working relationships with FSR programs in the South East Asia region through its development and coordination of the Asian Farming Systems Research Network.

Based on the above, this is not a formal request for applications. It is estimated that approximately $30,000 will be available in fiscal year 1986 to support this work. It is anticipated that the cooperative agreement will be funded over a budget period of 12 months.

Information may be obtained from: Ms. Kay Hatch, Technical Assistance Division, Office of International Cooperation and Development, U.S. Department of Agriculture (58–319R–6–024).

Dated: March 5, 1986.

Allen Wilder,

Chief, Management Services Branch.

BILLING CODE 3410-DP-M

Forest Service

Environmental Impact Statement; Chevron USA Oil and Gas Well Application for Permit to Drill; Lewis and Clark National Forest, Great Falls, MT

The U.S. Department of Agriculture, Forest Service as lead agency and the U.S. Department of the Interior, Bureau of Land Management as cooperating agency, will prepare an environmental impact statement for a proposal to drill an exploratory oil and gas well on the Rocky Mountain Ranger District.

Chevron USA, Inc., Casper, Wyoming, has filed an application for a permit to drill an exploratory well on lease No. M–25173. The proposed well site is located in the SW¼,NE¼ of Section 35, T. 29 N., R. 12 W., Pondera County, Montana.

A range of alternatives for this proposal will be considered. One of these will be the no action alternative. Other alternatives will analyze approval of the permit considering different access means and/or route locations and examining scenarios using different timing and location guidelines.

Federal, State and local agencies and other individuals or organizations who may be interested in or affected by the decision will be invited to participate in the scoping process. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a previous environmental review.
4. Determination of potential cooperating agencies and assignment of responsibilities.

The Fish and Wildlife Service, Department of the Interior, will be informally consulted throughout the analysis. To meet the requirements of the Endangered Species Act, the Fish and Wildlife Service will review the EIS and biological evaluation and if necessary, render a formal Biological Opinion on the effects of Threatened and Endangered Species, including on the grizzly bear and gray wolf.

The responsible officials are: John D. Gorman, Lewis and Clark Forest Supervisor and Nancy Cotner, Great Falls Resource Area Manager for the Bureau of Land Management.

The Forest Supervisor will hold three open house meetings:

April 3—Rocky Mountain Ranger District Office, Choteau, Montana. 10 AM–4 PM and 7 PM–9 PM
April 9, Lewis and Clark Forest Supervisor's Office, Great Falls, Montana. 10 AM–4 PM and 7 PM–9 PM
April 10—CCD Center, Little Flower Parish, Browning, Montana. 3 PM–5 PM and 7 PM–9 PM

The public is invited to comment. Written comments should be mailed by April 16, 1986, to John D. Gorman, Forest Supervisor, Lewis and Clark National Forest, Running Owl APD, P.O. Box 871, Great Falls, MT 59403.

The analysis is expected to take about 12 months. The draft environmental impact statement should be available for public review by March 1987. The final environmental impact statement is scheduled to be completed by July 1987.

Questions about the proposed action and environmental impact statement should be directed to Norman Yogerst, Team Leader, Lewis and Clark National Forest, P.O. Box 871, Great Falls, MT 59403. Phone (406) 727–0901.

Dated: March 4, 1986.

John D. Gorman,

Forest Supervisor.

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

Meeting

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of ATBCB Meeting.

SUMMARY: The Architectural and Transportation Barriers Compliance Board (ATBCB) has scheduled a meeting to be held from 10:00 AM to 1:30 PM, on Wednesday, March 12, 1986, to take place in Department of Transportation Conference Room 2230, 400 Seventh Street, SW., Washington, DC.

Item on the agenda: Publication of proposed advisory standards on aircraft boarding chairs for a 60 day public comment in the **Federal Register**; approval of draft ATBCB 504 rule; approval of the preamble to the revised ATBCB Authorities and Delegations, for publication in the **Federal Register**; approval of the proposed amendment to 36 CFR 1150.41(f), Practices And Procedures For Compliance Hearings; revisions to Rehabilitation Act of 1973; FY 1986 research contracts; discussion of proposal that the positions of Executive Director and General Counsel be combined into a single position; approval of candidate for ATBCB General Counsel position.

The portion of the meeting relating to FY 1986 research contracts will be closed to all non-government employees and the portion dealing with personnel matters will be closed to non-Board members.

DATE: Wednesday, March 12, 1986, 10:00 AM–1:30 PM.

ADDRESS: Department of Transportation, Conference Room 2230, 400 Seventh Street SW., Washington, DC.

All other committees of the ATBCB will meet on Monday and Tuesday, March 10 and 11, 1986, at the Department of Transportation, Conference Room 2230, 400 Seventh Street, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Larry Allison, Special Assistant for External Affairs (202) 245–1591 (voice or TDD).

Margaret Milner,

Executive Director.

COMMISSION ON CIVIL RIGHTS

Maryland Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Education Subcommittee of the Maryland Advisory Committee to the Commission will convene at 6:00 p.m. and adjourn at 9:00 p.m. on March 20, 1986, at the Baltimore-Washington International Airport Terminal, Conference Room, Baltimore, Maryland 21240. The purpose of the subcommittee meeting is to review a transcript of the community forum on equity issues in special education programs in preparation to draft a briefing memorandum on the subject.

Person desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Lorretta Johnson or John Binkley, Director of the Mid-Atlantic Regional Office at (202) 254–6717 (TDD 202/254–5461). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 5, 1986.

Donald A. Deppe,

Program Specialist for Regional Programs.

COPYRIGHT ROYALTY TRIBUNAL

[Docket Nos: CRT 80–4, 81–1, 82–1, and 83–1]

Order Granting Final Distribution of 1979–1982 Cable Royalty Fees

On February 24, 1986, the Supreme Court denied the petition for writ of certiorari filed by Christian Broadcasting Network, Inc. There is no longer any controversy with respect to the distribution of the 1979, 1980, 1981 and 1982 cable copyright royalty funds.

Accordingly, distribution of the remainder of the 1979–1982 cable royalty funds is hereby ordered for March 20, 1986 in the same percentage amounts identified at 50 FR 9112 (March 6, 1985).

FOR FURTHER INFORMATION CONTACT: Edward W. Ray, Chairman, Copyright Royalty Tribunal, 1111 20th Street, NW., Washington, DC 20036, (202) 653–5175.

Dated: March 5, 1986.

Edward W. Ray,

Chairman.

BILLING CODE 1410-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Limits for Certain Man-Made Fiber Textile Products Produced or Manufactured in Sri Lanka

March 5, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 5, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

A CITA directive dated May 24, 1985 (See 50 FR 21923) established restraint limits for specified categories of cotton, wool and man-made fiber textile products, including men's and boy's outer coats of man-made fibers in Category 634, and women's girls' and infants'man-made fiber sweaters in Category 646, produced or manufactured in Sri Lanka and exported during the twelve-month period which began on June 1, 1985 and extends through May 31, 1986. In the CITA directive published below the limit for Category 646 is being increased to 78,877 dozen to account for carryforward and swing according to the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983 between the Governments of the United States and Sri Lanka. The limit for Category 634 is being reduced to 107,263 dozen to account for the swing applied to Category 646.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF

SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreement.

March 5, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of May 24, 1985 from the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Sri Lanka.

Effective on March 5, 1986, you are directed to adjust the restraint limits established for the following categories in the directive of May 24, 1985 to the limits indicated, according to the terms of the Bilateral Cotton, Wool and Men-Made Fiber Textile Agreement of May 10, 1983 between the Governments of the United States and Sri Lanka:[1]

Category	Adjusted 12-mo. limit [1] (dozen)
634	107,263
646	78,877

[1] The limits have not been adjusted to account for any imports exported after May 31, 1985.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86–5217 Filed 3–7–86; 8:45 am]

BILLING CODE 3510-DR-M

---

[1] The agreement provides, in part, that: (1) Specific limits may be exceeded by designated percentages, provided on equal amount in equivalent square yards is deducted from another specific limit; (2) specific limits may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

DEPARTMENT OF DEFENSE

Department of the Navy

Privacy Act of 1974; Amended System of Records

AGENCY: Department of the Navy, DOD.

ACTION: Notice of amended system of records.

SUMMARY: The Department of the Navy proposes to amend one system of records in its inventory of systems of records subject to the Privacy Act of 1974.

DATE: The proposed action will be effective without further notice April 9, 1986, unless comments are received which would result in a contrary determination.

ADDRESS: Send any comments to the system manager identified in the system notice.

FOR FURTHER INFORMATION CONTACT: Mrs. Gwendolyn R. Aitken, Privacy Act Coordinator, Office of the Chief of Naval Operations (Op–09B30), Department of the Navy, The Pentagon, Washington, DC 20350. Telephone: (202) 697–1459.

SUPPLEMENTARY INFORMATION: The Department of the Navy systems notices for records systems subject to the Privacy Act of 1974 (5 U.S.C. 552a) Pub. L. 93–579 were published in the **Federal Register** as follows:

FR Doc 85–10237 (50 FR 22735) May 29, 1985
FR Doc 85–16564 (50 FR 28442) July 12, 1985
FR Doc 85–20719 (50 FR 35290) August 30, 1985
FR Doc 85–21577 (50 FR 36914) September 10, 1985
FR Doc 85–30586 (50 FR 52997) December 27, 1985
FR Doc 86–4185 (51 FR 6777) February 28, 1986

The proposed amendment is not within the purview of the provision of 5 U.S.C. 552a(o) which requires the submission of an altered system report.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

March 4, 1986.

DEPARTMENT OF EDUCATION

Information Collection Requests; Request for Comments

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Resources Management Service invites comments on the proposed information

VOL 51
ISS 46
MR 10
1986
UMI

collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before April 9, 1986.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 426–7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Information Resources Management Service publishes this notice containing proposed information collection requests to the submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: March 5, 1986.

George P. Sotos,

Director, Information Resources Management Service.

Office of Conservation and Renewable Energy

[Case No. WH–005]

Energy Conservation Program for Consumer Products; Petition for Waiver of Water Heater Test Procedure From Lochinvar Water Heater Corp.

AGENCY: Conservation and Renewable Energy Office, Energy.

SUMMARY: Today's notice publishes a "Petition for Waiver" from Lochinvar Water Heater Corporation (Lochinvar) of Nashvile, Tennessee, requesting a waiver from the Department of Energy (DOE) test procedure for water heaters. Lochinvar manufactures a Model BRE030 oil-fired water heater which has a high mass heat exchanger. The petition requests DOE to grant Lochinvar relief from the DOE test procedure for water heaters for its Model BRE030 oil-fired water heater on the basis that the existing test procedure yields materially inaccurate estimates of the energy consumption of this unit. DOE is soliciting comments, data, and information regarding the petition.

DATE: DOE will accept comments, data, and information not later than April 9, 1986.

ADDRESSES: Written comments and statements shall be sent to: Department of Energy, Office of Conservation and Renewable Energy, Test Procedures for Consumer Products, Case No. WH–005, Mail Station CE–132, Forrestal Building, 1000 Indepedence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Michael J. McCabe, U.S. Department of Energy, Mail Station CE–132, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–12, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–9513.

Background

The Energy Conservation Program for Consumer Products was established pursuant to the Energy Policy and Conservation Act (EPCA) (Pub. L. 94–163, 89 Stat. 917), which was subsequently amended by the National Energy Conservation Policy Act (NECPA) (Pub. L. 95–619, 92 Stat. 3266). This program requires DOE to prescribe standardized test procedures to measure the energy consumption of certain cosumer products, including water heaters. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR Part 430, Subpart B.

DOE has also prescribed procedures by which manufacturers may petition for waiver of test procedure requirements for a particular basic model of a product covered by a test procedure and the Department may temporarily waive such test procedure requirements for such basic model. Waivers may be granted when one of more design characteristics of a basic model either prevent testing of the basic model according to the prescribed test procedure or lead to results so unrepresentative of the model's true energy consumption as to provide materially inaccurate comparative data. These waiver procedures appear at 10 CFR 430.27. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

Water heaters are some of the products covered by the Federal Trade Commission's (FTC) Applicance Labeling Program. The energy consumption of water heaters, as determined using DOE's test procedure, forms the basis of the estimated annual operating cost figures which the FTC requires manufacturers of water heaters to disclose on an Energy Guide label on each unit to assist consumers in making a purchasing decision.

By letter dated January 2, 1986, Lochinvar filed a petition for waiver from the DOE test procedure for water heaters on the grounds that the procedure yields materially inaccurate estimates of the energy consumed by its Model BRE020 oil-fired water heater. Lochinvar states that the high mass of the water heater results in a penalty when testing the water heater in accordance with the DOE test procedures.

Lochinvar requests a "hot start" test method instead of "cold start" test method prescribed by the DOE test procedure. The DOE test procedure requires that the mass of a water heater plus the water in its tank be in thermal equilibrium at a temperature of 70 °F at the beginning of the test. The water heaters then heat the tank of water through a 90 °F temperature rise (i.e. to 160 °F). The amount of energy consumed by the water heater is measured directly. Lochinvar states that this period of time during which the tank is heated from "cold" to "hot" only occurs during the start-up period after installation and, therefore, does not result in a true measure of the water heater's efficiency.

Lochinvar mistakenly requests to be allowed to use a "hot start" test method granted to Bock Water Heaters Inc. (Bock) (Case No. WH–002). The test procedure waiver granted Bock on November 15, 1985, for its Model 32E oil-fired water heater specified a "simulated use", not a "hot start" test method. 50 FR 47108. The simulated use test method involves withdrawing water from the hot water outlet in three separate consecutive water draws. The recovery efficiency is then calculated based upon the total energy consumed over the three consecutive water draws.

VOL 51
ISS 46
MR 10
1986
UMI

In addition to comments for or against DOE granting Lochinvar's request for a waiver, DOE invites comments on the efficacy of the simulated use test method, the "hot start" test method or any other test methodology which a commenter may wish to advance.

Pursuant to paragraph (b) of 10 CFR 430.27, DOE is hereby publishing the "Petition for Waiver" in its entirety. The petition contains no confidential information. DOE solicits comments, data and information respecting the petition.

Issed in Washington, DC, February 28, 1986.

Donna R. Fitzpatrick,

Assistant Secretary, Conservation and Renewable Energy.

January 2, 1986.

Assistant Secretary of Conservation and Renewable Energy,

Department of Energy, Washington, D.C. 20585.

Re A Petition for Waiver, Reference Case Nos. HEL-0188, WH-002.

Dear Sir: Please accept this letter as our Petition for Waiver, to the current D.O.E. method of testing oil-fired water heater for efficiency.

We are aware that other manufacturers have applied, and have been given a waiver from, what is referred to as the "cold start" method of testing.

We at Lochinvar feel that the "cold start" method currently used in D.O.E. efficiency testing penalizes the "high mass" type water heater when determining its reality. The period of time during which the energy from the burner is used to heat the tank from "cold" to "hot" only occurs during the start-up period after installation. Therefore this is not a true efficiency the customer would receive on an ongoing basis.

The design of our heater, Lochinvar BRE030, is that of a tank type water heater which contains several pounds of steel in the tank refractory which must be heated to equilibrium before the water efficiency can be obtained correctly.

The method of test that we desire is the "hot start" method which as I mentioned earlier has been granted to other manufacturers of a like product.

Thank you for your consideration in this matter.

Lochinvar Water Heater Corporation.

Al Gatlin,

Vice President, Manufacturing and Engineering.

Economic Regulatory Administration

[Docket No. ERA–FC–85–018; OFP Case No. 63028–9281–21–22]

Powerplant and Industrial Fuel Use Exemption Requests; Golden Valley Electric Association

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Notice of Extension of Decision Period on Peitition for Exemption by Golden Valley Electric Association near The Seward Meridian, Alaska.

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby extends by ninety (90) days to May 28, 1986, the Decision Period within which to either grant or deny the request for a permanent reliability of service exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) (FUA) filed by Golden Valley Electric Association for a proposed 80 MW gas turbine powerplant to be located west of The Seward Meridian, Alaska.

Section 501.68(a)(2) of 10 CFR Part 501.—Administrative Procedures and Sanctions, Subpart F—allows for the extension of the decision period on an exemption petition to a date certain by publishing such notice in the Federal Register and stating the reasons for such extension.

This extension by ERA of the decision period to grant or deny the petition is necessary due to required additional analysis of environmenal data submitted by the petitioner.

Issued in Washington, DC on March 3, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

American Statistical Association Committee on Energy Statistics; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: American Statistical Association's Committee on Energy Statistics, a utilized Federal Advisory Committee

Date and Time: Thursday, April 10, 1986, 1:30 p.m.–5:30 p.m.; Friday, april 11, 1986, 9:00 a.m.–3:30 p.m.

Place: Dupont Plaza Hotel, 1500 New Hampshire Avenue, NW., Washington, DC 20036.

Contact: Ms. Renee Miller, EIA Committee Liaison, U.S. Department of Energy, Energy Information Administration, EI–74, Washington, DC 20585, Telephone : (202) 252–2088.

Purpose of Committee: To advise the Department of Energy, Energy Information Administration (EIA), on EIA technical statistical issues and to enable the EIA to benefit from the Committee's expertise concerning other energy statistical matters.

Tentative Agenda

Thursday, April 10, 1986

A. Opening Remarks.
B. Major Topics:
1. The View from OMB.
2. Alternative Long-Range Forecasts of Nuclear Output.
3. Validation of Uranium Financial Statistics.
4. Public Comments.

Friday, April 11, 1986

5. User Needs for State Energy Data System (SEDS)/State Energy Price and Expenditure Data System (SEPEDS).
6. State-of-the Data: Reconciling SEDS and Consumption Estimates.
7. Use of Models in Evaluating Natural Gas Data.
8. Adjustments to Crude Oil Price Data.
9. The Office of Statistical Standards.
10. Public Comments.
C. Topics for Future Meetings.

Public Participation: The meeting is open to the public. The chairperson of the panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Written statements may be filed with the committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Renee Miller, EIA Committee Liaison, at the address or telephone number listed above. Requests must be received at least five days prior to the meeting. Reasonable provisions will be made to include such presentations on the agenda.

Transcripts: Available for public review and copying at the Public Reading Room, (Room 1E–190), 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–6025, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday.

Issued at Washington, D.C., on March 5, 1986.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. RP86–50–000]

Arkla Energy Resources, a Division of Arkla, Inc., Tariff Filing

March 4, 1986.

Take notice that on February 24, 1986, Arkla Energy Resources, a division of Arkla, Inc., hereinafter referred to as "AER" tendered for filing six (6) copies of the following tariff sheets to its FERC Gas Tariff, Revised Volume No. 2, to be effective on March 1, 1986.

Original Sheet Nos. 227, 228, 229, 230, 231, 232, and 233.

AER states that these sheets provide for interim rates for firm and certain interruptible self-implementing transportation services to be offered pursuant to Order No. 436 that are not covered by AER's existing transportation tariffs. AER further states that the proposed rates are based on its jurisdictional costs of service approved in Docket No. RP84–107 and that it, therefore, is not proposing any increase in its presently allowed revenues by the instant filing. AER requests such approvals and waivers as may be necessary to permit these tariff sheets to become effective March 1, 1986.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before march 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of AER's filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–5133 Filed 3–7–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA86–1–22–002]

Consolidated Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

March 4, 1986.

Take notice that Consolidated Gas Transmission Corporation (Consolidated) on February 14, 1986, tendered for filing revised tariff sheets to remove the effect of concurrent exchange imbalances from the calculation of the Account No. 191 balance in compliance with the Commission's order issued August 30, 1985, in Docket No. TA85–3–22. According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until February 21, 1986.

Consolidated states that Substitute Eighth Revised Sheet No. 31 to Original Volume No. 1 of its tariff revises Consolidated's semiannual PGA to be effective March 1, 1986. Consolidated further states that revisions to Sheet Nos. 128 and 129 of the General Terms and Conditions of its tariff change the PGA clause to reflect the change in treatment of exchange imbalances.

Consolidated indicates that copies of this filing were served upon its jurisdictional customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1985)). All such motions or protests should be filed on or before March 12, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA 86–4–34–000, 001]

Florida Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

March 4, 1986.

Take notice that on February 28, 1986, Florida Gas Transmission Company (FGT), P.O. Box 1188, Houston, Texas 77001 tendered for filing the following tariff sheets to its FERC Gas Tariff.

First Revised Volume No. 1

7th Revised Sheet No. 8
8th Revised Sheet No. 8
4th Revised Sheet No. 9

Original Volume No. 2

30th Revised Sheet No. 128
31st Revised Sheet No. 128

Reason for Filing

7th Revised Sheet No. 8 and 30th Revised Sheet No. 128 contain revisions to FGT's Rate Schedules G and I and Rate Schedule T–3 respectively to adjust the Primary Adjustment to reflect reductions in FGT's average cost of gas purchased for sale and company use, net of amounts to be recovered through Incremental Pricing Surcharges. FGT requests the Commission to waive such parts of its Regulations and FGT's FERC Gas Tariff as it deems necessary to allow FGT to make such tariff sheets effective March 1, 1986 in order to allow these reductions in gas costs to be passed through to FGT's jurisdictional customers on March 1, 1986 in lieu of the scheduled effective date of April 1, 1986.

8th Revised Sheet No. 8 and 31st Revised Sheet No. 128 contain revisions to FGT's Rate Schedules G and I and Rate Schedule T–3, respectively to adjust: (i) The Primary Adjustment consistent with the adjustments reflected in 7th Revised Sheet No. 8 and 30th Revised Sheet No. 128; and, (ii) the Balancing Adjustment to amortize over the six-month adjustment period (April 1, 1986 through September 30, 1986), the balance in the current period Unrecovered Purchase Gas Cost Account as of December 31, 1985.

4th Revised Sheet No. 9 contains the estimated Incremental Pricing Surcharges for the adjustment period.

8th Revised Sheet No. 8, 4th Revised Sheet No. 9 and 31st Revised Sheet No. 128 are to be effective on April 1, 1986.

The above-mentioned changes to the Primary and Balancing Adjustments are being made pursuant to Section 15 (Purchase Gas Adjustment and Incremental Pricing Provision) of the

VOL 51
ISS 46
MR 10
1986
UMI

General Terms and Conditions of FGT's FERC Gas Tariff, First Revised Volume No. 1 and §154.38 *et seq.*, of the Commission's Regulations (18 CFR 154.38, *et seq.*).

The net effect of the adjustments being filed for Rate Schedules G and I, and for Rate Schedule T-3 are summarized below.

	Rate schedules		
	G (cents per therm)	I (cents per therm)	T-3 (cents per 1,000 ft ³)
Currently effective rates ¹	29.197	27.424	47.37
Primary adjustment (to be effective March 1, 1986)	(5.476)	(5.476)	(1.65)
March 1, 1986 rates	23.721	21.948	45.72
Balancing adjustment (to be effective April 1, 1986)	1.840	1.840	.52
April 1, 1986 rates	25.561	23.788	46.24

¹ Reflects rates filed by FGT to be effective February 1, 1986 pursuant to Docket No. TA86-3-34-000.

FGT states that a copy of its filing has been served on all customers receiving gas under its FERC Gas Tariff, First Revised Volume No. 1 and Original Volume No. 2 and interested state commissions and is being posted.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 12, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-5135 Filed 3-7-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP85-37-005]

High Island Offshore System; Tariff Filing

March 4, 1986.

Take notice that on February 20, 1986, High Island Offshore System ("HIOS") tendered for filing Thirteenth, Fourteenth and Fifteenth Revised Sheet Nos. 4 to be included in the High Island Offshore System FERC Gas Tariff, Original Volume No. 1 to be effective on October 1, 1985, December 1, 1985 and January 1, 1986, respectively.

HIOS states that the tariff sheets are being filed in compliance with Article IV of the Stipulation and Agreement submitted by HIOS on May 15, 1985 at Docket No. RP85-37, which was approved by the Federal Energy Regulatory Commission ("Commission") on July 22, 1985. Article IV provides for the adjustment of the demand portion of HIOS rates relating to reductions in charges HIOS is paying for measurement, dehydration and separation at the Grand Chenier and Cameron Meadows facilities, subject to refund under ANR Pipeline Company's Rate Schedule X-64 and under U-T Offshore System's Rate Schedule X-1, respectively.

Also included are various revised tariff sheets to update the Table of Contents in both Original Volume Nos. 1 and 2 of HIOS's FERC Gas Tariff and a corresponding update to the Schedule of Shippers and List of Contract Demands in Original Volume No. 1 of HIOS's FERC Gas Tariff. The aforementioned updates reflect the Commission's approval on October 25, 1985, in Docket No. CP75-104-047, of Rate Schedule T-17 to Original Volume No. 2 of HIOS's FERC Gas Tariff. HIOS has requested that these sheets be made effective January 1, 1986.

Any person desiring to be heard or to protest said filing should file a motion to intervene or to protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington DC 20426, in accordance with Rule 211 or Rule 214 of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 12, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ID-1871-002]

Edwin A. Lupberger; Application

March 3, 1986.

Take notice on February 5, 1986, Edwin A. Lupberger filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Director, Arkansas Power & Light Company
Director, Louisiana Power & Light Company
Chairman, President, and Director, Middle South Energy, Inc.
Director, Mississippi Power & Light Company
Director, New Orleans Public Service Inc.

Any person desiring to be heard or to protest said application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 211 and 214 of the Commission's rules and practice and procedures (18 CFR §§ 385.211 and 385.214). All such motions or protests should be filed on or before March 14, 1986. Protests wil be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc. 86-5137 Filed 3-7-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP84-87-003]

United Gas Pipe Line Co.; Proposed Changes in FERC Gas Tariff

March 4, 1986

Take notice that United Gas Pipe Line Company (United), on February 20, 1986, tendered for filing Sixteenth Revised Sheet No. 99-A to its FERC Gas Tariff, First Revised Volume No. 1.

United states that this tariff sheet reflects a reduction in the maximum daily quantity and minimum billing demand volumes for Mississippi River Transmission Corporation as approved by the Commission's Order of December 11, 1985, in *Mississippi River Transmission Corporation* v. *United Gas Pipe Line Company*, Docket No. RP84-87. The tariff sheet is proposed to become effective on February 1, 1986 and will confirm United's presently effective tariff with the Commission's Order.

Copies of the filing will be served upon United's jurisdictional customers and the public service commissions of the States of Alabama, Florida, Louisiana and Mississippi, and the Texas Railroad Commission.

Any person desiring to be heard or to protect said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of this chapter. all such motions or protests should be filed on or before March 12, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intevene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc. 86-5138 Filed 3-7-86; 8:45 am]

BILLING CODE 6717-01

[Docket Nos. EL86-25-000 et al.]

Electric Rate and Corporate Regulation Filings; Arkansas Power & Light Co. et al.

March 3, 1986.

Take notice that the following filings have been made with the Commission:

1. Arkansas Power & Light Co.

[Docket No. EL86-25-000]

Take notice that on February 24, 1986, Arkansas Power & Light Company (AP&L) tendered for filing a petition for Declaratory Order, pursuant to Rule 207 of the Commission's Rules of Practice and Procedure. AP&L seeks a declaratory order stating that AP&L is not required to provide transmission service, pursuant to section 211 and 212 of the Federal Power Act (FPA or Act), for the City Water and Light Plant of Jonesboro, Arkansas (Jonesboro) or Farmers Electric Cooperative Corporation (Farmers) in connection with the September 24, 1985, Wholesale Power Contract between Jonesboro and Farmers pursuant to which Jonesboro intends to supply all of Farmer's power and energy requirements. Such requirements are now being met by AP&L, which has supplied power and energy to Farmers for over 20 years. If AP&L is required to provide the requested transmission service, AP&L says it will result in the total loss of sales to one of its existing customers.

Comment date: March 17, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Central Illinois Light Company

[Docket No. ER86-275-000]

Take notice that on February 25, 1986, Central Illinois Light Company (CILCO) tendered for filing proposed amendments to its filing of January 31, 1986 of an executed transmission agreement with the Illinois Municipal Electric Agency (IMEA) providing for specified transmission service to a designated interconnection point between CILCO and the Village of Chatham, Illinois. CILCO, with the support of IMEA and Chatham, requests waiver of the Commission's notice requirements to permit an effective date fo February 1, 1986.

Comment date: March 14, 1986, in accordance with Standard Paragraph E at the end of this document.

3. Delmarva Power & Light Company

[Docket No. ER86-322-000]

Take notice that Delmarva Power & Light Company (Delmarva) on February 25, 1986, tendered for filing proposed Supplement Nos. 10 and 11 to its FERC Rate Schedule No. 66. Under the Supplements, Delmarva would provide partial requirements service at 138 kV instead of 12 kV when The Board of Water and Light Commissioners of New Castle, Delaware, (New Castle) completes its 138 kV/4 kV substation and would also provide transformer firming service to New Castle for a 5-year period. Completion of the 138 kV/4 kV substation is scheduled to take place on or about March 3, 1986. Copies of the filing were served upon New Castle and the Delaware Public Service Commission.

Comment date: March 14, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Northern States Power Company

[Docket No. ER86-101-002]

Take notice that on January 29, 1986, Northern States Power Company (NSP) tendered for filing revised Step II requirements rates pursuant to the Commission's Order of December 30, 1985. As set forth in that Order, the proposed coordination sales adjustment clause has been deleted and the revised rates reflect all off-system revenues as a revenue credit.

Comment date: March 13, 1986, in accordance with Standard Paragraph H at the end of this notice.

5. Wisconsin Power & Light Company

[Docket No. ER86-321-000]

Take notice that on Feb. 25, 1986, Wisconsin Power & Light Company (WPL) tendered for filing an electric temporary, normally open, distribution voltage, interconnection and power supply agreement dated December 9, 1985, between the Commonwealth Edison Company (Edison), South Beloit Water, Gas & Electric Company (a WPL subsidiary), and WPL. WPL states that this temporary agreement shall be effective for three years from the date service is first available which is expected to be on or about April 1, 1986.

The purpose of this temporary interconnection is to provide an alternate power source to certain retail Edison customers when those customers are separated from their normal Edison source is times of emergency. WPL states that emergency power will be provided to Edison on essentially the same rate as provided currently under their transmission interconnection agreement, except that the rate will be slightly higher to adjust for 2% additonal losses for delivery at the distribution voltage level.

WPL requests that an effective date concurrent with the contract effective date, be assigned this filing based upon the parties' mutual consent to the agreement. WPL states that copies of the agreement and the filing have been provided to Edison, the Illinois Commerce Commission, and the Wisconsin Public Service Commission.

Comment date: March 14, 1986, in accordance with Standard Paragraph E at the end of this notice.

6. Gulf States Utilities Company

[Docket No. ER84-566-000]

Take notice that Gulf States Utilities Company (Gulf States), on February 21, 1986, pursuant to the order issued January 22, 1986 in Docket No. ER84-568-000 and the settlement agreement approved therein, tendered for filing Amendments, executed as of February 20, 1986, to its Agreements for Wholesale Electric Service with the Cities of Erath, Gueydan and Kaplan (the Cities) dated March 15, 1983, for the Cities of Erath and Gueydan and dated February 14, 1983, for the City of Kaplan. The Amendment does not provide for a rate increase.

The Amendment provides that a portion of the Cities' loads that would otherwise be supplied by purchases of wholesale electric service from Gulf States shall instead be served by power purchased from others and delivered to the Cities by transmission service provided by Gulf States. The power the Cities will purchase from others will be power Gulf States has contracted for or will contract for with other utilities and will share, by assignment, with the Cities.

The Amendments would remain in effect for four (4) years from May 1, 1985, unless terminated earlier pursuant to rights reserved in the Amendments.

Gulf States requests that any necessary waivers be granted so that the Amendments, Rate Schedule WST

VOL 51 ISS 46 MR 10 1986 UMI

and Rider A thereto can become effective on May 1, 1985, and so that the purchased power provisions can become effective on the date they are accepted or approved by the Commission without conditions which are unacceptable to Gulf States or the Cities.

Copies of the filing have been served upon the Cities, and upon the Louisiana Public Service Commission and the Public Utility Commission of Texas.

Comment date: March 14, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CP86-312-000 et al.]

Consolidated Gas Transmission Corp. et al. Natural Gas Certificate Filings;

Take notice that the following filings have been made with the Commission:

1. Consolidated Gas Transmission Corporation

[Docket Nos. CP86-312-000]

February 28, 1986.

Take notice that on February 10, 1986, Consolidated Gas Trasmission Corporation (Consolidated), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket Nos. CP86-312-000, pursuant to sections 7(b) and 7(c) of the Natural Gas Act, for (1) an order authorizing the temporary abandonment of certain natural gas produced by Consolidated, and (2) a blanket certificate of public convenience and necessity authorizing the sale for resale of such gas in interstate commerce, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Consolidated seeks Commission authorization on a blanket basis for (1) the abandonment, on a temporary basis, of the company-produced gas that is subject to the Commission's Natural Gas Act jurisdiction, to the extent such gas is sold by Consolidated, and (2) for sales of gas for resale in interstate commerce, without supply or market limitations, of such company-produced gas.

Consolidated states that its company-owned production is surplus to the needs of its customers and proposes to sell such gas in the spot market. It is also stated that the proposed spot sales of company production would be for short terms and would not involve the dedication of specific gas reserves. Consolidated also states that title to the gas would pass at or near the wellhead and that other particulars would vary.

Consolidated states the application is made pursuant to a stipulation and agreement filed contemporaneously by Consolidated in Docket Nos. RP85-169-000, RP82-115-000 and RP81-80-000. Consolidated indicates that it is also applying contemporaneously for a certificate of public convenience and necessity authorizing transportation services for others on a blanket basis and that any transportation of gas by Consolidated necessary to effect deliveries of the proposed sales would be peformed pursuant to such blanket authorization.

Consolidated states that if it needs to replace its company-owned production, such additional quantities would be acquired at a price equivalent to or lower than the price which would otherwise be required under the above-described stipulation and agreement.

Consolidated requests that the authorizations commence March 1, 1986, and continue until February 28, 1989, and indicates that it does not anticipate the construction of any new or additional facilities.

Comment date: March 21, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. El Paso Natural Gas Company

[Docket No. CP86-309-000]

February 27, 1986.

Take notice that on February 7, 1986, El Paso Natual Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP86-309-000 a request pursuant to § 157.205 of the Regulations under the Natual Gas Act (18 CFR 157.205) for authorization to construct and operate facilities to upgrade an existing sales tap for the delivery of gas to Southwest Gas Corporation (Southweste) for resale under the certificate issued in Docket No. CP82-435-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

El Paso proposes to construct a dual 4½-inch sales meter station on its exisiting 12¾-inch Rivers transfer line in Pinal County, Arizona. It is stated that the upgraded sales station would permit El Paso to sell 618,697 Mcf of gas per year to Southwest for resale to residential, commercial, and industrial customers in Pinal County Arizona. El Paso estimates the cost of the facilities to be $72,000 which cost would be financed from internally generated funds.

Comment date: April 14, 1986, in accordance with Standard Paragraph G at the end of this notice.

3. Southern Natural Gas Company

[Docket No. CP86-306-000]

February 28, 1986.

Take notice that on February 4, 1986, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP86-306-000 an application pursuant to section 7 of the Natural Gas Act for a limited term certificate of public convenience and necessity authorizing best-efforts transportation service for Atlanta Gas Light Company (Atlanta) and for permission and approval to abandon such transportation service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern states that Atlanta has requested transportation service in accordance with the terms and conditions of a transportation agreement between Atlanta and Southern, dated January 29, 1986 (agreement). Southern has agreed to transport on an interruptible basis up to 310 billion Btu of natural gas per day that Atlanta has arranged to purchase from SNG Trading Inc. (SNG Trading). Southern states that such transportation service would continue for a term of two years

commencing from the date of Commission authorization.

The agreement provides that Atlanta would cause gas to be delivered to Southern for transportation at 70 existing points of delivery on Southern's contiguous system. Southern states that it would redeliver to Atlanta at the existing Atlanta area delivery points as set forth in the service agreement between Atlanta and Southern dated September 23, 1969, an equivalent quantity of gas less 3.25 percent of such amount which would be deemed to have been used as compressor fuel and company-use gas (including system unaccounted-for gas losses); less any and all shrinkage, fuel or loss resulting from or consumed in the processing of gas; and less Atlanta's account which is lost or vented for any reason.

Southern states that Atlanta has agreed to pay the following transportation charge:

(a) Where the aggregate of the volumes transported and redelivered by Southern on any day to Atlanta under any and all transportation agreements with Southern, where added to the volumes of gas delivered under Southern's Rate Schedule OCD on such day to Atlanta do not exceed the daily contract demand of Atlanta, the transportation rate would be 48.2 cents per million Btu; and

(b) Where the aggregate of the volumes transported and redelivered by Southern on any day to Atlanta under any and all transportation agreements with Southern, when added to the volumes of gas delivered under Southern's Rate Schedule OCD on such day to Atlanta, the transportation rate for the excess volumes would be 77.6 cents per million Btu.

Southern would collect from Atlanta the GRI surcharge of 1.35 cents per Mcf or any such other GRI funding unit or surcharge as hereafter prescribed.

Southern also requests flexible authority to provide transportation from additional delivery points in the event Atlanta obtains alternative sources of supply of natural gas.

Comment date: March 21, 1986, in accordance with Standard Paragraph F at the end of this notice.

4. Northwest Pipeline Corporation

[Docket No. CP86-289-000]

March 3, 1986.

Take notice that on January 24, 1986, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84110, filed in Docket No. CP86-289-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval for the abandonment of certain leasehold properties, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest requests permission to abandon by transfer to T. H. McElvain, *et al.* (McElvain), effective January 1, 1985, 100 percent of its working interest in the gas and gas rights under leases which originally were acquired by Pacific Northwest Pipeline Corporation (Pacific Northwest), a predecessor of Northwest, from McElvain. It is explained that the proposed transfer of working interest would be effectuated in accordance with a settlement agreement between Northwest and McElvain dated December 17, 1985. Northwest states that under the settlement agreement Northwest agreed, upon receiving Commission approval, to assign to McElvain effective as of January 1, 1985, 100 percent of its working interest conveyed by McElvain to Pacific Northwest under the PLA-4 agreements to the extent such working interest is now owned by Northwest.

Northwest further states that the PLA-4 Agreements cover approximately 31,000 gross acres in Rio Arriba and San Juan Counties, New Mexico. It is stated that there are approximately 360 gas wells associated with the PLA-4 leases in which Northwest has an ownership interest and that for the 12-month period ending November 30, 1985, Northwest's PLA-4 production from these wells was approximately 0.46 Bcf of gas.

Northwest avers that the subject leasehold production properties are not included in Northwest's rate base and the production therefrom has been deemed to be sold to the transmission division of the Company at the wellhead. It is asserted that each of the PLA-4 wells in which Northwest has an interest either has received or is pending final Commission approval for a maximum lawful price under section 103 or section 108 of the Natural Gas Policy Act of 1978 (NGPA) or presently is subject to a ceiling price under section 104 of the NGPA.

It is stated that Northwest and McElvain have entered into a gas purchase contract, dated December 17, 1985, to provide for the continued purchase by Northwest of volumes of gas to be produced from the PLA-4 interests proposed to be transferred to McElvain. Northwest states that the price to be paid by it for gas purchased under the gas purchase contract would be the lower of the applicable NGPA maximum lawful price of the current alternate fuel price. The alternate fuel price is defined in the gas purchase contract to be 85 percent of the price of No. 6 fuel oil at Seattle, Washington, less Northwest's average gathering, processing and transportation costs, it is said.

Northwest asserts that the assignment described above is consistent with the public convenience and necessity and that the settlement agreement represents a fair and reasonable compromise by the parties of disputed issues which would conclude long and costly litigation. Northwest states that the PLA-4 leasehold production which is currently committed to Northwest and its customers, including potential future development of the subject leases, would remain committed to Northwest and its customers under the gas purchase contract between McElvain and Northwest. Further, Northwest states that the price to be paid for the gas purchased under the gas purchase contract does not exceed the value which Northwest otherwise would have placed on the gas as pipeline production in its purchased gas adjustment filings and that the transfer of the assigned interest to McElvain would not increase the cost of gas produced from the assigned interest in the PLA-4 properties to Northwest's customers.

Comment date: March 24, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within

VOL 51
ISS 46
MR 10
1986
UMI

the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Determinations Under the Natural Gas Policy Act for OCS Leases

Issued: March 3, 1986.

On September 27, 1983, the Federal Energy Regulatory Commission (Commission) issued Order No. 336 under Docket Nos. RM83-3 and RM81-12 (48 FR 44508, September 28, 1983). In that order, the Commission amended its regulations relating to filing requirements for well category applications under the Natural Gas Policy Act of 1978 (NGPA). The determination process for natural gas produced from a new lease, i.e., a lease entered into on or after April 20, 1977, on the Outer Continental Shelf (OCS), and qualifying as new natural gas under section 102 of the NGPA, was amended in two respects. First, the Commission eliminated the requirement that a determination be made for each well producing gas from a new OCS lease. Second, in lieu of filing an application for each well, the Commission now permits the grant of a new OCS lease to constitute the requisite jurisdictional agency determination that the gas is produced from a new OCS lease.

Under the new procedures, the U.S. Department of Interior, Minerals Management Service (MMS), must file within 60 days of the grant of the lease a notice of determination which includes the lease number, the area and block number, and the date on which the OCS lease was issued by the Secretary of the Interior. This determination is subject to Commission review in the same manner as other jurisdictional agency determinations.

On February 13, 1986, the Commission received notice from MMS, Gulf of Mexico OCS Region, that 195 leases were issued as a result of OCS Sale 102 for the Western Gulf of Mexico on August 14, 1985. Included in this offering were lease numbers OCS-G 8065 through OCS-G 8274. Bids were rejected for lease numbers OCS-G 8088, 8102, 8106, 8107, 8112, 8118, 8119, 8122, 8152, 8158, 8173, 8178, 8182, 8191, and OCS-G 8196. Gas produced from the following leases has been determined to be gas produced from a new OCS lease under NGPA secion 102:

Outer Continental Shelf, Western Gulf of Mexico Oil and Gas Lease Sale 102 (August 14, 1985).

A. Effective Dates and Expiration Dates: 10/1/85-9/30/90.

8129	8160	8218

For each oil and gas lease in the 400-meter to 900-meter water-depth range, the lessee must commence the drilling of an exploratory well within 5 years of the date the lease becomes effective. The exploratory well shall meet the depth and other criteria established in an approved exploration plan.

The complete list of OCS leases submitted by the MMS for this sale, with area and block descriptions, is available for inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, DC. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within twenty days after this notice is issued by the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals Applications for Exception; Cases Filed; Week of January 31 Through February 7, 1986

During the Week of January 31 through February 7, 1986, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs fist. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585

George B. Breznay,

Director, Office of Hearings and Appeals.

February 27, 1986.

List of Cases Received by the Office of Hearings and Appeals

[Week of Jan. 31 through Feb. 7, 1986]

Date	Name and location of applicant	Case No.	Type of submission
Feb. 3, 1986	Roger Dingman, Los Angeles, CA	KFA-0016	Appeal of an Information Request Denial. If granted: The November 15, 1985 Freedom of Information Request Denial issued by the Office of Classification would be rescinded, and Roger Dingman would receive access to deleted portions of General George C. Stratemeyer's papers (168-7018-16, Vol. 1, Annex, June 1950 through May 1951).
Feb. 4, 1986	Palo Pinto/Nevada, Carson City, NV	RM5-15	Request for Modification/Rescission in the Palo Pinto Second Stage Refund Proceeding. If granted: The August 18, 1983 Decision and Order (Case No. RQ5-8) issued to Nevada would be modified regarding the state's application for refund submitted in the Palo Pinto Second Stage Refund Proceedings.
Do	Palo Pinto-Georgia, Atlanta, GA	RM5-16	Request for Modification/Rescission in the Palo Pinto Second Stage Refund Proceeding. If gmated: The January 10, 1985, Decision and Order (Case No. RM5-2) issued to Georgia would be modified regarding the state's application for refund submitted in Palo Pinto Refund Proceedings.
Feb. 5, 1986	Dearybury Oil Company, Cowpens, SC	KEE-0020	Exception to the Reporting Requirements. If granted: Dearybury Oil Company would no longer be required to file form EIA-782B "Reseller/Retailers' Monthly Petroleum Product Sales Report".
Feb. 6, 1986	Rek-Chem Manufacturing Corporation, Albuquerque, NM	KFA-0017	Appeal of an Information Request Denial. If granted: The January 28, 1986 Freedom of Information Request Denial issued by the Albuquerque Operations Office would be rescinded, and Rek-Chem Manufacturing Corporation would receive access to information on RFQ No. 60-6002.
Feb. 7, 1986	Economic Regulatory Administration, Washington, DC	KRZ-0019	Interlocutory. If granted: The Exhibit D of the Economic Regulatory Administration November 28, 1983 Response to the Statement of Objections filed by the National Hydrocarbons Group, Inc. (Case No. HRO-0164) would be placed under seal.
Do	Economic Regulatory Administration and Atlantic Richfield Company, Washington, DC.	KRS-0170	Request for Stay. If granted: The Economic Regulatory Administration and Atlantic Richfield Company would receive a stay of the Proposed Remedial Order issued to Atlantic Richfield Company by the Economic Regulatory Administration pending a final determination on the Proposed Consent Order.
Do	W.D. Brooks, Inc., Whiteville, NC	KEE-0021	Exception to the Reporting Requirements. If granted: W.D. Brooks, Inc, would no longer be required to file form EIA-782B "Reseller/Retailers. Monthly Petroleum Product Sales Report."

Applications, for Exception; Cases Filed; Week of February 7 Through February 14, 1986

During the Week of February 7 through February 14, 1986, the applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. A submission inadvertently omitted from an earlier list has also been included.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be apprieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

George B. Breznay,

Director, Office of Hearings and Appeals.

March 3, 1986.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of Feb. 7 through Feb. 14, 1986]

Date	Name and location of applicant	Case No.	Type of submission
Dec. 20, 1985	Economic Regulatory Administration, Washington, DC	KRZ-0020 through KRZ-0024	Interlocutory. If granted: The three Proposed Remedial Orders issued to Barkett Oil Co. and the Proposed Remedial Orders issued to Lawrence Oil Co. and Anchor Distributors (Case Nos. BRO-1352, BRO-1357, HRO-0033, HRO-0034 and HRO-0036) would be revised to reflect recalclations performed by the Economic Regulatory Administration in accordance with the September 17, 1985 Decision and Order.
Feb. 10, 1986	Burlile Oil Company, Gallipolis, OH	KEE-0022	Exception to the Reporting Requirements. If granted: Burlile Oil Company would not be required to file Form EIA-782B "Resellers/Retailers' Monthly Petroleum Product Sales Report."
Feb. 12, 1986	Bublitz Oil Company, Tawas City, MI	KEE-0023	Exception to the Reporting Requirements. If granted: Bublitz Oil Company would no longer be required to file Form EIA-782B "Resellers/Retailers' Monthly Petroleum Product Sales Report."
Do	Martin-Eagle Oil Company, Denton, TX	KEE-0024	Exception to the Reporting Requirements. If granted: Martin-Eagle Oil Company would no longer be required to file Form EIA-782B "Resellers/Retailers' Monthly Petroleum Product Sales Report."
Feb. 13, 1986	M&M Minerals Corporation, et al., Jackson, MS	KRX-0010	Supplemental Order. If granted: The Proposed Remedial Order issued to M&M Minerals Corporation, *et al.*, (Case No. HRO-0018) would be remanded to the Economic Regulatory Administration to enable the Economic Regulatory Administration to recalculate any overcharges consistent with the finding that the firm produced from four properties during the audit period.
Feb. 14, 1986	Economic Regulatory Administration, Washington, DC	KRZ-0025	Interlocutory. If granted: The Proposed Remedial Order issued to North American Petroleum Company and Mellon Energy Products Company (Case No. HRO-0297) would be amended to delete all allegations against Mellon Energy Products Company.
Do	Schaal Oil Company, Jefferson, IA	KEE-0025	Exception to the Reporting Requirements. If granted: Schaal Oil Company would not be required to file Form EIA-782B "Resellers/Retailers' Monthly Petroleum Product Sales Report."

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPPE-FRL-2979-9]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Nanette Liepman, (202) 382-2740, or FTS 382-2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: New Source Performance Standards (NSPS) for Graphic Arts Industry Survey (EPA ICR #0657). (This is a reinstatement of a previously approved ICR; no changes are proposed.)

Abstract: Sources must notify EPA of construction, modification, startup, shutdowns, malfunctions, and dates and results of performance tests. The initial performance averaging period must be thirty consecutive days, including startups and shutdowns. The amounts of solvent and water used, solvent recovered, and the estimated emission percentage must be recorded monthly. the administrator may request additional performance tests. No periodic reporting is required.

Respondents: Owners or operators of graphic arts and publication rotogravure printing facilities.

Title: New Source Performance Standards (NSPS) for Asphalt Processing and Asphalt Roofing Manufacturing (EPA ICR #0661). (This is a reinstatement of a previously approved ICR; no changes are proposed).

Abstract: Owners/operators must notify EPA of construciton, modifications, startups, shutdowns, malfunctions, and dates and results of performance tests. Owners/operators must continually monitor and record temperature in specified pollution control devices. EPA will determine parameters to be recorded in other control devices upon description of that device by the source. No excess emission reports are required. Information is used to implement and enforce the standard.

Respondents: Owners or operators of asphalt processing and asphalt roofing manufacturing plants.

Title: New Source Performance Standards (NSPS) for Bulk Gasoline Terminals—Information Requirements (EPA ICR #0664). (This is a reinstatement of a previously approved ICR: no changes are proposed.)

Abstract: Owners/operators must notify EPA of construction modifications, startups, shutdowns, malfunctions, and dates and results of peformance tests. Owners/operators must record the tank identification number of each gasoline truck that is loaded, notify the owner/operator of each non-vapor-tight gasoline truck, and record each leak detected during a calendar month. They must inspect control equipment during loading operations. No Excess Emission Reports

are required. Information is used to implement and enforce the standard.

Respondents: Owners or operators of bulk gasoline terminals.

Title: New Source Performance Standards (NSPS) for Emission Monitoring for Nitric Acid Plants (EPA ICR #1056). (This is a reinstatement of a previously approved ICR: no changes are proposed).

Abatract: Owners/operators must nottify EPA of construction, modification startups, shutdowns, malfunctions, and dates and results of performance tests. Owners/operators must record the daily production rate and hours of operation, and must continuously monitor NO_x emissions and submit semi-annual excess emissions reports. The information is used to implement and enforce the standard.

Respondents: Owners or operators of nitric acid plants.

Title: New Source Performance Standards (NSPS) for Primary Aluminum Reduction Plants (EPA ICR #1067). (This is a reinstatement of a previously approved ICR; no changes are proposed.)

Abatract: Owners or operators must monitor and maintain records of daily production rates for aluminum and anode, raw material feed rates, and potline voltages for two years. Monthly performance tests and reports are also required, along with reports of operation and maintenance conditions when tests reveal high emission levels. This information is used to ensure continuing compliance with the standard.

Respondents: Owners or operators of primary aluminum reduction plants.

Title: New Source Performance Standards (NSPS) for Stationary Gas Turbines (EPA ICR #1071). (This is a reinstatement of a previously approved ICR; no changes are proposed.)

Abstract: Owners/operators must notify EPA of construction, modifications, startups, shutdown, malfunctions, and dates and results of performance tests. Periods of excess SO_2 and NO_x emissions will be reported semi-annually. The sulfur and nitrogen content of the fuel must be recorded. Owners/operators using water injection to control NO_x must install a continuous monitoring system to record fuel consumption and the fuel-to-water ratio. Information is used to implement and enforce the standard.

Respondents: Owners or operators of stationary gas turbines.

Office of Pesticides and Toxic Substances

Title: Notice of Arrival of Pesticides or Devices (EPA ICR #0152). (This is a renewal of an expired ICR; no change is proposed.)

Abstract: An importer desiring to import pesticides or pest-mitigating devices into the United States is required by FIFRA Section 17 to notify EPA prior to the arrival of the shipment in the United States.

Respondents: Importers of pesticides or pest-mitigating devices.

Title: Supplemental Registration of a Distributor (EPA ICR #0278). (This is an extension of an approved ICR; no changes are proposed.)

Abstract: The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) provides that any person may obtain a supplemental registration allowing distribution of a Federally registered pesticide product under a private label, provided that the registrant's permission is obtained and EPA is notified of the arrangement.

Respondents: Distributors requesting supplemental registration, and basic registrants.

Office of Research and Development

Title: Non-occupational Pesticide Exposure Study (EPA ICR #1259). (This is a request for a new collection.)

Abstract: The Environmental Protection Agency will use this study to estimate the exposure of consumers/households to selected pesticides and the relative importance of the routes of exposure. The Agency will use these data to evaluate product registrations for home applications of pesticides, and to formulate new requirements.

Respondents: Households.

Comments on all parts of this notice may be sent to:

Nanette Liepman, U.S. Environmental Protection Agency, Office of Standards and Regulations (PM-223), Information and Regulatory Systems Division, 401 M Street, SW., Washington, DC 20460

and

Wayne Leiss (ICRs #0657, #0661, #0664, #1056, #1067, and #1071), Carlos Tellez (ICRs #0152 and #0278), or Rick Otis (ICR #1259), Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building (Room 3228), 726 Jackson Place, NW., Washington, DC 20503.

Dated: March 3, 1986.

Daniel J. Fiorino,

Acting Director, Information and Regulatory Systems Division.

New Source Performance Standards for Residential Wood Combustion Units Negotiated Rulemaking Advisory Committee; Establishment and Open Meeting

As required by section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), we are giving notice of the establishment of an Advisory Committee to negotiate New Source Performance Standards for Residential Wood Combustion Units. We have determined that this is in the public interest and will assist the Agency in performing its duties prescribed in section 111 of the Clean Air Act, as amended.

Copies of the Committee charter will be filed with appropriate committees of Congress and the Library of Congress.

The committee's initial meeting will be held on Thursday, March 20, and Friday morning, March 21, 1986. Due to the need for an expeditious regulation, as a result of a January 1987 court-ordered deadline to issue a proposed rule, notice of this two-day meeting is being given less than 15 days prior to the meeting itself. The Agency issued this Notice promptly once the meeting dates were confirmed. The Committee has notified interested parties on its mailing list of the meeting dates.

Both March 20th and 21st, the meeting will be held at the National Institute for Dispute Resolution, 1901 L Street NW., Suite 600, Washington, DC. On March 20th, the meeting will start at 9:00 a.m. and run until completion; on March 21st, the meeting will start at 9:00 a.m. and run until approximately 12:00 noon.

The purpose of the meeting is to complete any outstanding procedural matters, to determine how best to address the substantive issues, and to begin to address them.

If interested in attending, or in receiving more information, please contact Chris Kirtz at (202) 382-7565.

Dated: March 6, 1986.

Milton Russell,

Assistant Administrator for Policy, Planning and Evaluation.

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. app. § 814).

Interested parties may inspect and may request a copy of each agreement and the supporting statement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 20 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: 113-010892.

Title: South Seas/Polynesia Line Cross Space Charter and Sailing Agreement.

Parties:

South Seas Steamship Co.
Polynesia Line Limited.

Synopsis: The proposed agreement would enable each party to provide approximate fortnightly service to its customers in the trade through more efficient utilization of vessels already serving the trade by having each party charter capacity on the vessel of the other party.

Filing Party: Lawrence N. Minch, Esquire, Lillick McHose & Charles, Two Embarcadero Center, San Francisco, California 94111.

Agreement No.: 102-010893.

Title: Pacific Coast/American Samoa Rate Agreement.

Parties:

South Seas Steamship Company
Blue Star Line Ltd.
Polynesia Line, Ltd.

Synopsis: The proposed agreement would establish a conference agreement between the parties in the trade between ports on the Pacific Coast of the United States and ports in American Samoa.

Filing Party: Lawrence N. Minch, Esquire, Lillick McHose & Charles, Two Embarcadero Center, San Francisco, California 94111.

Dated March 5, 1986.

By order of the Federal Maritime Commission.

John Robert Ewers,
Secretary.

BILLING CODE 6730-01-M

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 024-000015-006.

Title: Board of Commissioners of the Port of New Orleans & Continental Grain Company Terminal Agreement.

Parties:

Board of Commissioners of the Port of New Orleans (Board)
Continental Grain Company (Continental).

Synopsis: The proposed amendment would (1) recognize ownership of and payment by the Board for a wharf extension constructed by Continental adjacent to the already existing wharf; (2) make extension subject to the "First Call on Berth Privilege"; (3) confirm and grant this Board's consent to an assignment to Continental by American Commercial Barge Lines (ACBL) of a First Call on Berth Privilege that had been granted by this Board covering a barge mooring area that will service the wharf facility; and (4) confirm this Board's consent to Continental to the erection of certain grain loading or unloading facilities owned by Continental located in the bed or on the bank of the Mississippi River.

Agreement No.: 021-000861-003.

Title: Port Authority of New York and New Jersey, Flota Mercante Grancolombiana, S.A. and Universal Maritime Service Corp. Lease Assignment Agreement.

Parties:

Port Authority of New York and New Jersey (Port)
Flota Mercante Grancolombiana, S.A. (Grancolombiana)
Universal Maritime Service Corporation (Universal).

Synopsis: The proposed agreement would assign the agreement of lease between the Port and Grancolombiana to Universal in preparation for the leased premises being included in the Red Hook Container Terminal which is under lease to Universal. The parties have requested a shortened review period.

Agreement No.: 221-002582-003.

Title: City of Kodiak Terminal Agreement.

Parties:

City of Kodiak
Sea-Land Service, Inc.

Synopsis: The proposed amendment would modify agreement provisions related to overhead, maintenance and repair charges and provide for a periodic review of such charges.

Agreement No.: 212-009848-015.

Title: U.S. Gulf Ports/Brazil Agreement.

Parties:

Companhia de Navegacao Lloyd Brasileiro
Companhia Maritime Nacional
United States Lines (S.A.), Inc.

Synopsis: The proposed amendment would modify pool accounting procedures to ensure proper accounting for intermodal cargo movements and would increase the carrying rate for bulk cargoes from 50% to 70%.

Agreement No.: 203-009857-003.

Title: Agreement—Florida-Caribbean Cruise Association.

Parties:

Carnival Cruise Line
Chandris Fantasy Cruises
Commodore Cruise Line
Costa Line
Eastern Cruise Lines
Home Lines
Norwegian Caribbean Lines
Pacquet French Cruises
Premiere Cruise Line
Royal Caribbean Cruise Line, Inc.
Ulysses Lines.

Associate Member: Cunard/NAC.

Synopsis: The proposed amendment would restate the agreement to conform to the Commission's regulations concerning form and format.

Agreement No.: 203-010984.

Title: Australia-United States Discussion Agreement.

Parties:

Columbus Line
Associated Container Transportation (Australia) Ltd. (Pace Line)
Pacific Australia Direct Line
Shipping Corporation of New Zealand Limited.

Synoposis: The proposed agreement would permit the parties to exchange data relating to the terms and conditions of designations of carriers by the Australian Meat and Livestock Corporation. The parties have requested a shortened review period.

Agreement No.: 021-010897

Title: City of Kodiak Ground Lease Agreement.

Parties:

City of Kodiak (City)
Sea-Land Service, Inc. (Sea-Land).

Synopsis: The proposed agreement would permit the City to lease to Sea-Land a combined total of 42,300 square feet of its port property for the storage of chassis, containers and tractors. The agreement will remain in effect for a period of five years.

Dated: March 5, 1986.

By Order of the Federal Maritime Commission.

John Robert Ewers,
Secretary.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

Privacy Act of 1974; Notification of New Routine Use

AGENCY: Social Security Administration (SSA), HHS.

ACTION: New routine use disclosure.

SUMMARY: In accordance with the Privacy Act (5 U.S.C. 552a(e)(11)), we are issuing public notice of our intent to establish a new routine use of information in many of the systems of records which SSA maintains. The proposed routine use will permit SSA to provide the General Services Administration (GSA) and the National Archives and Records Administration (NARA) access to the systems of records for the purpose of conducting records management inspections in accordance with 44 U.S.C. 2904 and 2906, as amended by the National Archives and Records Administration Act of 1984 (hereinafter referred to as the NARA Act of 1984). We invite public comments on this publication.

DATE: The proposed routine use will become effective as proposed without further notice on April 9, 1986, unless we receive comments on or before that date which would result in a contrary determination.

ADDRESS: Interested individuals may comment on this proposal by writing to the SSA Privacy Officer, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235. All comments received will be available for public inspection at 3-F-1 Operations Building at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Fran Sikora, Records Administration Branch, Office of Management, Budget and Personnel, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone 301-594-5770.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

The Administration, GSA and the Archivist, NARA are charged by 44 U.S.C. 2904, as amended by the NARA Act of 1984, with promulgating standards, procedures and guidelines with respect to records management and the conduct of records management studies. Section 2906 of this law, also amended by the NARA Act of 1984, provides that GSA and NARA shall have access to Federal agencies' records and that agencies shall cooperate with GSA and NARA. In carrying out these responsibilities, GSA and NARA are planning to conduct a review of SSA's enumeration and Retirement and Survivors Insurance (RSI) claims processes. The review will encompass all records created and processed in a particular case, beginning with the initial application and ending with the final action taken. GSA's portion of the review will focus on records imput, processing and output and will survey such items as mail, forms, reprographics and directives; NARA's portion of the review will focus on records documentation and records retention and disposition.

In conducting the inspection, GSA and NARA wish to review "live" cases (i.e., a sample of RSI claim folders and enumeration records). This will require that they be given access to various SSA systems of records which are utilized in the RSI claims and enumeration processes. The Privacy Act (5 U.S.C. 552a(b)(6)) permits a Federal agency to disclose (without the consent of the subject individual) to the National Archives a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by GSA to determine whether the record has such value. This provision, however, does not apply in this instance since GSA and NARA would be accessing our systems of records for a purpose unrelated to this provision. Therefore, to meet the requirements of the Privacy Act before providing GSA and NARA access to the systems of records, we are proposing to establish the routine use below.

Nontax return information which is not restricted from disclosure by Federal law may be disclosed to the General Services Administration and the National Archives and Records Administration for the purpose of conducting records management studies with respect to their duties and responsibilities under 44 U.S.C. 2904 and 2906, as amended by the National Archives and Records Administration Act of 1984.

The proposed routine use will apply only to Social Security information. It will not apply to any earnings, self-employment or other information which constitutes tax return information as define in section 6103 of the Internal Revenue Code.

The routine use would facilitate disclosure for the review described above as well as for subsequent in which GSA and NARA wish to conduct records management inspections of other SSA processes. We are proposing to include the routine use in the systems of records listed below. Because of the number of systems of records involved and the costs incurred in republishing them, we are publishing only the identification number and name each system and the volume, page number and date of the **Federal Register** issue in which notices of the systems last appeared in the **Federal Register**. The system of records are as follows:

09-60-0001—Commissioner's Correspondence File, HHS/SSA/OC (47 FR 45590 October 13, 1982).
09-60-0002—Automated Document Control and Retrieval System, HHS/SSA/OGA (47 FR 45591 October 13, 1982).

09-60-0216—Indochina Refugee Data System, HHS/SSA/ORR (Formerly named Indochina Refugee, Refugee Financial Assistance System, HHS/SSA/ORR) (47 FR 45657 October 13, 1982).
09-60-0217—Cuban Refugee Data System, HHS/SSA/ORR (Formerly named Cuban Refugee Registration Records, HHS/SSA/ORR) (47 FR 45658 October 13, 1982).
09-60-0219—Representative Disqualification/Suspension Information System, HHS/SSA/ORSI (50 FR 5821 February 12, 1982).

II. Compatibility of the Proposed Routine Use

The Privacy Act (5 U.S.C. 552a(b)(3)) and our diclosure regulation (20 CFR 401.310) both permit us to disclose information for a routine use if the information will be used for a purpose which is compatible with the purpose for which we collected it. Section 401.310 of the regulation permits us to disclose information as a routine use for administering our programs or administering similar income-maintenance or health-maintenance programs of other agencies. In the subject instance, disclosure will assist SSA in its records management. In addition, § 401.205 of the regulation requires us to disclose information when a law specifically requires it. In the subject instance, 44 U.S.C. 2906, as amended by the NARA Act of 1984, requires disclosure to GSA and NARA. Thus, we believe the routine use is compatible and meets the criteria in the regulation.

III. Effect on the Rights of Individuals

The purpose of the GSA/NARA inspection is to review SSA's records management practices and access will be given them only for this purpose. We, therefore, do not anticipate that the routine use would have an unwarranted adverse effect on the privacy or other rights of individuals.

Dated: February 27, 1986.

Martha A. McSteen,

Acting Commissioner of Social Security.

BILLING CODE 4190-11-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

President's Commission on Americans Outdoors; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the President's Commission on Americans Outdoors (Commission) will be held Sunday, March 23, 1986, starting at 9:00 a.m., in the Capitol Room 1, on the lobby level of the MGM Grand Hotel, 2500 East Second Street, Reno, Nevada 89595.

This will be a hearing to obtain information on the kinds of programs that are provided and opportunities afforded in recreation programs in this country. Attendees have been invited by the Commission for this public hearing; however interested parties may request time to testify by contacting the Commission.

This meeting is opened to the public, interested persons may attend. The Commission contact is Mr. James Gasser, and he may be contacted at the President's Commission on Americans Outdoors, P.O. Box 18547, 1111—20th Street NW., Washington, DC 20036-6547, (202) 634-7310.

Dated: March 4, 1986.

Victor H. Ashe,

Executive Director, President's Commission on Americans Outdoors.

[FR Doc. 86-5094 Filed 3-7-86; 8:45 am]

BILLING CODE 4310-70-M

Privacy Act of 1974; Deletion of Notice of System of Records

Pursuant to the provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a), notice is hereby given that the Department of the Interior is deleting a notice describing a system of records maintained by the Minerals Management Service. The notice being deleted is titled "Outer Continental Shelf (OCS) Lease Sale Qualification Files—Interior, EMM-6" and was previously published in the Federal Register on June 2, 1983 (48 FR 24704). A recent review of the recordkeeping practices for the OCS lease sale qualification files indicates that they are not subject to the provisions of the Privacy Act of 1974.

This notice shall be effective March 10, 1986. Additional information regarding this change may be obtained from the Department Privacy Act Officer, Office of the Secretary (PIR), Room 7357, Main Interior Building, U.S. Department of the Interior, Washington, DC 20240.

Dated: February 28, 1986.

Oscar W. Mueller, Jr.

Director, Office of Information, Resources Management.

BILLING CODE 4310-RK-M

Bureau of Land Management

[AA-16620, AA-6689-B]

Alaska Native Claims Selection; Shumagin Corp.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613(a), will be issued to Shumagin Corporation for approximately 175 acres. The lands involved are in the vicinity of Sand Point, Alaska, within T. 55 S., R. 75 W., Seward Meridian.

A notice of the decision will be published once in the *Aleutian Eagle*, and once a week for four (4) consecutive weeks in the *Anchorage Times*. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision shall have until April 9, 1986, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Helen Burleson,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

California Desert District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Meeting of the California Desert District Advisory Council.

SUMMARY: Notice is hereby given in accordance with Pub. L. 92-463 and 94-579 that the California Desert District Advisory Council to the Bureau of Land Management, U.S. Department of the Interior, will meet formally on Thursday, April 10, 9 a.m. to 5 p.m.; Friday, April 11, 8:30 a.m. to 5 p.m.; and Saturday, April 12, 8 a.m. to 5 p.m. at the Holiday Inn, 1200 University Avenue, Riverside, CA 92507

Agenda items for the April 10 session will include comments from the Council on the Draft Environmental Impact Statement covering the 1986 Amendments to the California Desert Plan. The Council will also be presented with a preliminary review of proposed 1986 Amendments to the California Desert Plan which have been received in response to the annual call for proposed amendments.

A two-day Recreation Seminar will be the focus at the April 11 and 12 sessions. Recreation groups throughout Southern California have been invited to attend and to make presentations to the Council on various aspects of such recreation activities as rockhounding, hiking, trailriding, horseback riding, land-sailing, hunting, shooting, all-terrain vehicle use, mountain climbing, four-wheel-drive vehicle use, and ultra-light aircraft flying.

All formal Council meetings are open to the public, with time allocated for public comment. The Recreation Seminar is also open to the public and time has been allotted for public comment during this time. The Council Chairman may allow comment during the presentation of various agenda items.

Written comments may be filed in advance of the meeting with the California Desert District Advisory Council, c/o Bureau of Land Management Public Affairs Office, 1695 Spruce Street, Riverside, CA 92507. Written comments are also accepted at the time of the meeting and, if provided to the recorder, will be incorporated in the minutes of the meeting.

For Further Information and Meeting Confirmation: Contact the Bureau of Land Management, California Desert District Public Affairs Office, 1695 Spruce Street, Riverside, CA 92507, (714) 351-6383.

Dated: February 28, 1986.

Richard M. Barber,

Acting District Manager.

Guidelines for Historic and Archeological Resource Management; Federal Agency Responsibilities Under Section 110 of the National Historic Preservation Act

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with subsection 101(f) of the National Historic Preservation Act ("the Act"), 16 U.S.C. 470 *et seq.*, the Secretary of the Interior, in consultation with the Advisory Council on Historic Preservation, has developed the following guidelines for carrying out Federal agency responsibilities under section 110 of the Act. These guidelines are being published for a 60-day comment period. The Secretary will also conduct an orientation program for Federal agencies that will address the requirements of section 110 and the advice in these Guidelines. Written comments should be submitted to the Chief, Interagency Resources Division, National Park Service, United States Department of the Interior, P.O. Box 37127, Washington, DC 20013-7127.

VOL 51 ISS 46 MR 10 1986 UMI

DATES: Comments should be submitted by April 9, 1986.

FOR FURTHER INFORMATION CONTACT: Stephen M. Sheffield, Preservation Planner, Interagency Resources Division, National Park Service, United States Department of the Interior, P.O. Box 37127, Washington, DC 20013–7127.

Dated: February 20, 1986.

P. Daniel Smith,

Acting Assistant Secretary, Fish and Wildlife and Parks.

III. Definitions
IV. The Secretary of the Interior's Model Historic Preservation Process
V. Developing a Historic Preservation Process

Authority: The National Historic Preservation Act, 16 U.S.C. 470 *et seq.*

I. Purposes

(a) *Section 110 Guidelines.* Section 110 of the Act prescribes general and specific responsibilities of Federal agencies in the identification, evaluation, registration, and protection of properties possessing historic, archeological, architectural, engineering, or cultural significance. These *Guidelines for Historic and Archeological Resource Management: Federal Agency Responsibilities Under section 110 of the National Historic Preservation Act (section 110 Guidelines)* present a model process for use by Federal agencies as a reference standard when establishing, revising, and operating their programs for historic and archeological resource management. These Guidelines assist agencies in carrying out their missions, programs, and projects in a manner consistent with the requirements and purposes of section 110 of the Act, existing regulations, and the *Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation (Secretary's Standards).* Their purpose is to identify the requirements of the Act, to cite, and othewise to guide Federal agencies in implementing successful protection of historic and archeological properties as they perform their respective missions. It is not expected that Federal agencies will employ this model process literally but rather that agencies will ensure that their existing or proposed historic and archeological resource management processes are consistent with this model.

(b) *Relationship of 110 Guidelines to Secretary's Standards.* The project and program standards and guidelines for implementing section 110 are the *Secretary's Standards,* prepared pursuant to 101(h) of the Act. They are the Secretary's performance standards for carrying out historic preservation activities, such as planning, identification, evaluation, documentation, and preservation, and are applicable to all users, public and private. Rather than repeat the informaton in the *Secretary's Standards* in the *Section 110 Guidelines,* the *Secretary's Standards* are frequently referenced. It is, therefore, important for Federal agencies to consult both documents in meeting the responsibilities stated in section 110 of the Act. The *Secretary's Standards* were published in the **Federal Register,** Vol. 48, No. 190, Part IV, pp. 44716–44740, September 29, 1983, and are also available on request from the National Park Service. The Service plans to publish, in revised form if necessary, the *Secretary's Standards* when the *Section 110 Guidelines* are published in final.

(c) *Carrying out programs and projects in accordance with the purposes of the Act.* Section 110(d) requires that all agencies carry out their programs and projects in accordance with the purposes of the Act, and consider programs and projects that will further the Act's purposes. This section includes the definition of agency program and projects "those under which any Federal assistance is provided or any Federal license, permit, or other approval is required." Agency responsibility to act in accordance with the Act's purposes is conditioned upon such actions being "consistent with the agency's mission and mandates."

(1) *Purposes of the Act.* The purposes as stated in Section 2 of the Act are as follows:

Section (2)(1). "Use measures, including financial and technical assistance, to foster conditions under which our modern society and our prehistoric and historic resources can exist in productive harmony and fulfill the social, economic, and other requirements of present and future generations;"

Section (2)(2). "Provide leadership in the preservation of the prehistoric and historic resources of the United States and of the international community of nations;"

Section (2)(3). "Administer federally owned, administered, or controlled prehistoric and historic resources in a spirit of stewardship for the inspiration and benefit of present and future generations;"

Section (2)(4). "Contribute to the preservation of non-federally owned prehistoric and historic resources and give maximum encouragement to organizations and individuals undertaking preservation by private means;"

Section (2)(5). "Encourage the public and private preservation and utilization of all usable elements of the Nation's historic built envrionment; and,"

Section (2)(6). "Assist State and local governments and the National Trust for Historic Preservation in the United States to expand and accelerate their historic preservation programs and activities."

(2) *Balancing mission and purposes of the Act.* In carrying out agency programs and projects in accordance with the purposes stated in section 2 of the Act, agencies should:

(i) Seek ways to harmonize their actions with the preservation of historic properties, and put such properties to productive uses in the public interest;

(ii) Encourage others, including non-Federal agencies and foreign governments with which the agency interacts, to give due consideration to historic properties;

(iii) Identify historic properties owned by the agency, and take steps to protect, preserve, rehabilitate, and properly use them;

(iv) Ensure that their actions, and the actions of those to whom they provide assistance, permits, licenses, or approvals, are preceded by effective planning to identify and mitigate effects on historic properties;

(v) Design their programs and projects to foster the rehabiliation and appropriate use, including re-use, of historic buildings and structures;

(vi) Design their programs and projects to foster the cost effective management of archeological properties eligible for the National Register; and,

(vii) Solicit the opinions of State Historic Preservation Officers and the National Trust for Historic Preservation.

(3) *Programs and projects which further the purposes of the Act.* In addition to the above actions carried out in the course of their missions, agencies are encouraged to consider participating in programs specifically designed to advance the purposes stated in section 2 of the Act, such as:

(i) Provision of financial and technical assistance to historic preservation activities and to the adaptive use of historic properties;

(ii) Demonstration historic preservation projects and cooperative historic preservation programs with non-Federal entities and foreign governments;

(iii) Special projects to study, document, and make productive use of historic properties under the agency's ownership;

(iv) Cooperation with non-Federal entities in the identification, protection, study, documentation, and appropriate use of historic properties;

(v) Use of their programs and financial and technical assistance in the rehabilitation and adaptive use of historic buildings and structures;

(vi) Use of their programs and financial and technical assistance in the effective utilization of archeological information; and,

(vii) Cooperative programs with the State Historic Preservation Officers (SHPOs), the National Trust for Historic Preservation, and Certified Local Governments, if appropriate, in the identification, recordation, study, documentation, and appropriate use of historic properties, specifically including cooperation with the SHPOs in their development and maintenance of statewide inventories of historic properties and comprehensive State historic preservation plans.

II. Authorities

(a) *Legal Requirements of Section 110.* The Legal requirements of section 110 of the Act are as follows:

110(a)(1). "The heads of all Federal agencies shall assume responsibility for the presevation of historic properties which are owned or controlled by such agency. Prior to acquiring, constructing, or leasing buildings for purposes of carrying out agency responsibilities, each Federal agency shall use, to the maximum extent feasible, historic properties available to the agency. Each agency shall undertake, consistent with the preservation of such properties and the mission of the agency and the professional standards established pursuant to section 101(f), any preservation, as may be necessary to carry out this section." These guidelines outline a model historic preservation process that will assist agencies in meeting this requirement.

110(a)(2). "With the advice of the Secretary and in cooperation with the State Historic Preservation Officer for the State involved, each Federal agency shall establish a program to locate, inventory, and nominate to the Secretary all properties under the agency's ownership or control by the agency, that appear to qualify for inclusion on the National Register in accordance with the regulations promulgated under section 101(a)(2)(A). Each Federal agency shall exercise caution to assure that any such property that might qualify for inclusion is not inadvertently transferred, sold, demolished, substantially altered, or allowed to deteriorate significantly." These guidelines outline a model historic preservation process that will assist agencies in meeting this requirement.

110(b). "Each Federal agency shall initiate measures to assure that where, as a result of Federal action or assistance carried out by such agency, a historic property is to be substantially altered or demolished, timely steps are taken to make or have made appropriate records, and that such records then be deposited, in accordance with section 101(a), in the Library of Congress or with such other appropriate agency as may be designated by the Secretary, for future use and reference." The *Secretary's Standards* provide documentation guidance that will assist agencies in meeting this requirement.

110(c). "The head of each Federal agency shall, unless exempted under section 214, designate a qualified official to be known as the agency's "preservation officer" who shall be responsible for coordinating that agency's activities under this Act. Each Preservation Officer may, in order to be considered qualified, satisfactorily complete an appropriate training program established by the Secretary under section 101(g)." Section V(a) of these guidelines addresses this requirement.

110(d). "Consistent with the agency's mission and mandates, all Federal agencies shall carry out agency programs and projects (including those under which any Federal assistance is provided or any Federal license, permit, or other approval is required) in accordance with the purposes of this Act and, give consideration to programs and projects which will further the purposes of this Act." These guidelines outline a model historic preservation process that will assist agencies in meeting this requirment.

110(e). "The Secretary shall review and approve the plans of transferees of surplus federally owned historic properties not later than ninety days after his receipt of such plans to ensure that the prehistorical, historical, architectural, or culturally significant values will be preserved or enhanced." Regulations governing the transfer of federally owned surplus historic property are found in 41 CFR Part 101–47.308–3.

110(f). "Prior to the approval of any Federal undertaking which may directly and adversely affect any National Historic Landmark, the head of the responsible Federal agency shall, to the maximum extent possible, undertake such planning and actions as may be necessary to minimize harm to such landmark, and shall afford the Advisory Council on Historic Preservation a reasonable opportunity to comment on the undertaking." Section IV(a)(8) discusses this requirement further.

110(g). "Each Federal agency may include the costs of preservation activities of such agency under this Act as eligible project costs in all undertakings of such agency or assisted by such agency. The eligible project costs may also include amounts paid by a Federal agency to any State to be used in carrying out such preservation responsibilities of the Federal agency under this Act, and reasonable costs may be charged to Federal licensees and permittees as a condition to the issuance of such license or permit." These guidelines discuss reasonable project costs in section IV(a)(8)(iii).

110(h). "The Secretary shall establish an annual preservation awards program under which he may make monetary awards in amounts not to exceed $1,000 and provide citations for special achievements to officers and employees of Federal, State, and certified local governments in recognition of their outstanding contributions to the preservation of historic resources. Such program may include the issuance of annual awards by the President of the United States to any citizen of the United States recommended for such award by the Secretary." Contributions to the preservation of historic resources are recognized through the Department of the Interior's Conservation Service Award and Public Service Award.

110(i). "Nothing in this Act shall be construed to require the preparation of an environmental impact statement where such a statement would not otherwise be required under the National Environmental Policy Act of 1969, and nothing in this Act shall be construed to provide any exemption from any requirement respecting the preparation of such a statement under such Act."

110(j). "The Secretary shall promulgate regulations under which the requirments of this section may be waived in whole or in part in the event of a major natural disaster or an imminent threat to the national security." Federal regulations entitled, "Waiver of Federal Agency Responsibilities under section 110 of the National Historic Preservation Act," can be found in the Code of Federal Regulations under 36 CFR Part 78, entitled "Waiver of Federal Agency Responsibilities under section 110 of the National Historic Preservation Act."

(b) *Related Requirements.*

VOL 51 ISS 46 MR 10 1986 UMI

The following requirements are referenced elsewhere in these Guidelines:

(1) *Section 101(a)(7) of the National Historic Preservation Act.* Regulations required by section 101(a)(7) concerning the curation of federally owned archeological collections are being prepared by the Secretary and will be included under 36 CFR Part 79, entitled "Curatorial Responsibilities of Federal Agencies."

(2) *Section 106 of the National Historic Preservation Act.* Federal agencies having direct or indirect jurisdiction over a proposed Federal, federally licensed, or federally assisted undertaking shall take into account the effect of the undertaking on any property that is included in or eligible for inclusion in the National Register. As part of this consideration, Federal agencies must provide the Advisory Council with a reasonable opportunity to comment with regard to such undertaking. The procedures for section 106 are found in 36 CFR Part 800. At the earliest stage of planning or consideration of a proposed undertaking, and in all cases prior to agency final decision concerning an undertaking, the agency shall determine the need to comply with section 106 of the Act based on the provisions of Section 110 and consistent with the *Section 110 Guidelines.* The *Section 110 Guidelines* recommend that agencies consult with the Advisory Council early in the review of agency program planning documents so as to facilitate the required commenting process under section 106.

(3) *Section 304 of the National Historic Preservation Act.* These are provisions relative to the disclosure of sensitive locational information on historic or archeological properties. An agency shall not disclose information to the public relating to the location or character of historic or archeological properties if the agency determines that the disclsoure of such information may create a substantial risk of harm, theft, or destruction to such properties or to the area or place where such properties are located. Regulation implementing this requirement are found in 36 CFR Part 60, entitled "National Register of Historic Places."

(4) *The Archeology and Historic Preservation Act (Pub. L. 93–291).* This legislation authorizes Federal agencies to expend regular project funds to recover important scientific, archeological, historic, and prehistoric data that otherwise would be lost as a result of Federal construction projects or federally licensed projects, programs, or activities. Agencies shall notify the Secretary when such activities may result in the loss or destruction of data. The Secretary shall determine whether important data will be lost and shall conduct or cause to be conducted appropriate investigations. Regulations implementing these and other requirements are being prepared by the Secretary and will be included in 36 CFR Part 66, entitled "Guidelines for Recovery of Scientific, Prehistoric, Historic, and Archeological Data: Procedures for Notification, Reporting and Data Recovery."

III. Definitions

(a) "The Act" means the National Historic Preservation Act of 1966, 16 U.S.C. 470 *et seq.*

(b) "Advisory Council" means the agency, fully titled the Advisory Council on Historic Preservation, established pursuant to Title II of the National Historic Preservation Act; that is afforded a reasonable opportunity to comment with regard to proposed Federal, federally licensed, or federally assisted undertakings which may affect properties which are included in or eligible for inclusion in the National Register of Historic Places.

(c) "Agency Official" means the head of the Federal agency, or designee, having responsibility for the agency's historic preservation activities.

(d) "Federal Preservation Officer (FPO)" means the official, or designee, specifically responsible for coordinating an agency's activities under the National Historic Preservation Act of 1966, as amended.

(e) "Historic Preservation Process (HPP)" means the preservation process adopted by Federal agencies outlining strategies for carrying out historic preservation responsibilities. The process organizes information in a way that allows the manager to target surveys and identify, evaluate, register, and protect historic properties.

(f) "Historic property" or "historic resource" means any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register. The term "eligible for inclusion in the National Register" includes both properties formally determined as such and all other propeties which meet National Register listing criteria.

(g) "Historic resource" (see definition for "historic property").

(h) "Historic resource values" means those qualities of a historic property which determine its relative importance in agency decisionmaking. Section IV(a)(5) lists the considerations which should be made in assessing the historic resource values of a property.

(i) "Intensive survey" means a systematic, detailed examination of an area designed to gather information about historic properties sufficient to evaluate them against National Register criteria.

(j) "Inventory" means a list of properties identified during a survey.

(k) "Mitigation" means an action to minimize ameliorate, or compensate for the degradation and/or loss of those characteristics of a property that make it eligible for the National Register.

(l) "National Historic Landmark (NHL)" means a district, site, building, structure or object that the Secretary of the Interior has determined to be of national significance and has so designated.

(m) "National Register" means the inventory of districts, sites, buildings, structures and objects significant in American history, architecture, archeology, engineering, and culture, maintained by the Secretary of the Interior and fully titled the "National Register of Historic Places."

(n) "Professionals" means historians, architectural historians, and historical architects meeting the training and experience criteria set forth in the *Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation,* and archeologists meeting the training and experience criteria set forth in 36 CFR Part 66. Although professional standards for landscape architects, preservationists, or planners are not established in these guidelines, such professionals should have training and experience of a comparable level to that for historians, architectural historians, and historical architects in the *Secretary's Standards.*

(o) "Reconnaissance survey" means an examination of all or part of an area accomplished in sufficient detail to make generalizations about the types and distributions of historic properties that may be present. It should include the identification and location of specific properties to the extent necessary to determine whether more intensive evaluation is appropriate.

(p) "Sectretary" means the Secretary of the Interior.

(q) "Secretary's Standards" means the *Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation,* the project and program standards and guidelines for implementing section 110. They are technical advice concerning archeological and historic preservation activities and methods. The complete *Secretary's Standards* currently address each of the following activities: Preservation Planning, Identification, Evaluation, Registration, Historical Documentation, Architectural and Engineering Documentation, Archeological Documentation, and Preservation Projects (including Rehabilitation).

(r) "State Historic Preservation Officer (SHPO)" means the official designated by the Governor or by State law to administer the State's historic preservation program.

IV. The Secretary of the Interior's Model Historic Preservation Process (HPP).

The Secretary sets forth this model process and the *Secretary's Standards* for use by Federal agencies to ensure adequate consideration of historic properties in carrying out programs. The Secretary recommends that HPPs adopted by Federal agencies contain provisions for the historic preservation activities of planning, identification, evaluation, registration and protection.

(a) *Planning.*

(1) *Level of operation of the HPP.* Federal agencies with land management responsibilities should adopt HPPs or have planning procedures that serve the purposes of the suggested process in these guidlines. Agencies should adopt HPPs as part of ongoing land management responsibilities. Such HPPs must be useable at the different administrative levels within an agency. In some cases, especially for large agencies, HPPs may need to be developed for use at various administrative or regional levels. Where the HPP will be operating at multiple levels, the agency should develop internal guidelines to ensure consistency.

(2) *Relationship to the Secretary's Standards for Preservation Planning.* The HPP should meet the *Secretary's Standards* in that the HPP:

(i) Is based on historic contexts;

(ii) Describes historic contexts;

(iii) Identifies survey needs;

(iv) Identifies known properties and assesses significance;

(v) Identifies property types likely to be present;

(vi) Identifies treatments appropriate to those properties;

(vii) Integrates archeological, as well as historic, values as a routine consideration in agency planning, development and management practices; and,

(viii) Establishes priorities for management and protection of historic resources based on historic resources values.

(3) *Assuming responsibility.* Section 110(a)(1) requires Federal agencies to "assume reponsibility for the preservation of historic properties which are owned or controlled by such agency." In assuming such responsibility, agencies are encouraged to:

(i) Undertake a program to identify historic properties under its jurisdiction or control;

(ii) Maintain a systemmatic body of inventory documentation on properties as well as the overall identification effort;

(iii) Identify opportunities for the effective use and preservation of historic properties;

(iv) Identify potential conflicts between preservation of historic properties and implementation of agency mission requirements;

(v) Identify areas where information is insufficient to make decisions about historic properties.

(vi) Consider the effects of proposed activities on historic properties early in planning activities;

(vii) Give thorough consideration to historic resource values in the use and reuse of historic properties for agency program purposes as alternatives to the construction of new facilities and to the demolition of historic properties; and,

(viii) Seek opportunities for cooperative efforts with other Federal agencies, State and local agencies, and the private sector in the preservation and use of historic properties;

(4) *Integration of preservation with agency mission.* Agencies are encouraged to integrate the HPP with agency systems for property management, land use planning, and project planning so as to:

(i) Conduct activities to avoid damage to any historic properties known in advance, identified through survey, or discovered in the course of exploration, consistent with the historic resources values of those properties;

(ii) Include consideration of the views of the SHPO in the evaluation and protection of historic properties;

(iii) Take into account the views of local governments, appropriate Federal agencies, other interested parties, and the public in the evaluation and protection of historic properties;

(iv) Conduct all preservation activities in a manner consistent with the *Secretary's Standards;*

(v) Incorporate, consistent with the agency's missions and mandates, measures that enhance the preservation of historic properties; and,

(vi) Fully document the rationale for making decisions concerning historic properties;

(5) *Historic resource values.* In managing historic properties, agencies should consider resource values in addition to the significant aspects of the property that make it eligible for the National Register. Agencies should determine the historic resource values of specific properties eligible for the National Register in order to establish management priorities for those properties. These values are not constant; rather they vary depending on many considerations, including the general and specific cultural interests of the public.

(i) *Determination of historic resource values.* A number of considerations should be included in the determination of historic resource values. Several of these considerations, such as level of significance and integrity, are discussed in greater detail in National Park Service guidance, "How to Apply the National Register Criteria."

(A) *Level of significance.* National Register levels of significance are national, State, or local. National Historic Landmarks and units of the National Park System are of the highest significance.

(B) *Integrity.* Integrity is the completeness of the original material elements that are essential to the class of properties to which a particular property belongs. If, for example, a building is primarily significant for its architectural design, and it is stripped off most of its exterior elements as part of structural improvements, it will have lost some of its integrity. It might be in better structural condition, but its value as a historic resource has been lessened.

(C) *Rarity.* The rarity of a property type and/or features (e.g., interior woodwork, method of construction) may be of importance in determining a property's historic resource values.

(D) *Research/information value.* Potential of a property to reveal important information and fill research needs enhances its historic resource values.

(E) *Interpretive value.* Properties are particularly valuable if they aid historical interpretation.

(F) *Condition.* A property's value may be enhanced because it is in relatively good condition.

(G) *Cost to maintain/operate the property.* Properties which require smaller investments to maintain or operate may be more valuable because their preservation is cost effective.

(H) *Existing use or potential re-use.* Properties which serve, or have the potential to serve, other management needs have functional value that enhances their historic resource values. For example, when historic properties are used for administrative offices or housing in a manner that does not

VOL 51
ISS 46
MR 10
1986
UMI

destroy their integrity, such use serves practical, as well as preservation, needs.

(ii) The determination of the historic resource values of a property will vary depending on the mission of the agency, its needs, and the money available for preservation. Because all agencies operate within limited budgetary constraints, it is necessary to balance the considerations which determine relative historic resource value. An agency may choose to make a substantial investment in order to preserve a nationally significant property that is in poor condition, while another agency may make the same investment to preserve a dozen properties of local significance which are in good condition justification for either choice is possible. Some agencies may have a greater need than others to adaptively re-use historic properties. In such cases, the consideraton of the condition, potential for re-use, and maintenance costs of historic properties will be weighed heavily in determining the historic resource values of those properties. Where agencies have very little need to re-use historic properties, such considerations will not be as important.

(iii) Agencies should use a system which considers the above factors relative to the normal considerations in cost/benefit analyses. Attempts should be made to evaluate historic resource values within given project or management areas. The system should be straightforward and easy to replicate. Once the historic resource values of properties have been determined and considered in light of the agencies other mission concerns, sound decisions about preservation activities can be made.

(6) *Coordination with States.* Federal agencies should ensure that HPPs are coordinated with the preservation planning system instituted by the States in which they are operating, so long as State processes comply with law, regulations, and the *Secretary's Standards.* The National Park Service reviews State planning processes for conformance to the *Secretary's Standards* during required State historic preservation program reviews. Information concerning the capability of State planning processes to assist Federal agencies in the development of HPPs is available from the National Park Service.

(7) *Data bases.*-Pursuant to sections 101(b)(3) and 110(d) of the Act, Federal agencies should assist the Secretary, in his cooperative effort with the Advisory Council and appropriate SHPOs, in undertaking and encouraging the development of statewide and regional data bases, archeological and historic research designs, and management plans that can be used in developing HPPs. This will ensure that there exist progressively more complete inventory records of potentially significant properties. The automation of such inventories should be done using state of the art data base systems to facilitate incorporation of additional information into, and communication between, data base systems.

(8) *National Historic Landmarks.* In order to meet the requirement in section 110(f) of the Act, Federal agencies should take the approach that the importance of National Historic Landmarks, and hence their preservation, may in some instances transcend agency operational and/or project objectives.

(9) *Other planning considerations.*

(i) *Lease terms, etc.* Lease terms and stipulations, and conditions of Federal land transfers, permits, and other entitlements should be consistent with the intent of the Act.

(ii) *Environmental Assessments.* Nothing in these guidelines shall be construed as requiring preparation of an Environmental Assessment (EA) or Environmental Impact Statement (EIS) where one would not otherwise be required. When an EA or EIS is prepared, the lead agency should ensure to the extent feasible that its preparation is coordinated with implementation of these guidelines.

(iii) *Reasonable Project Costs.* Section 110(g) directs Federal agencies to include the costs of preservation activities as eligible project costs in all agency undertakings. This provision is intended to ensure that historic preservation activities may be eligible for agency support. It is not to be construed as otherwise conflicting with the cost-benefit ratio determined by the agency for a specific project. Where preservation activity is a condition of obtaining a Federal license or permit, the licensee/permittee may be charged for reasonable preservation costs. The term reasonable should be interpreted to mean at a rate commensurate with the extent of the licensee's or permittee's interest in or benefit from the undertaking that impacts the historic properties. It should also take into consideration the historic resource values of properties, i.e. there is a strong argument for a larger public investment in properties with greater historic resource values. Because it is difficult to establish fair standards that would be applicable in all cases, "reasonable" project costs should not be determined using an inflexible criteria, such as a flat fee or a standard percentage of a budget, but rather should be determined on a case-by-case basis.

(b) *Identification.*

(1) *Priority areas.* General areas in which the Federal agency has proposed undertakings or where threats to the resources from other factors, such as significant environmental deterioration or vandalism, have been identified should receive priority in resource management planning. Agencies should ensure that identification and evaluation activities are completed prior to the approval of any action that may have an effect upon properties which may be eligible for the National Register. Generally, background research and field survey conducted in accordance with the *Secretary's Standards for Identification* are appropriate where areas subject to effect have not been surveyed in the past, unless reliable data indicate that it is very unlikely that historic properties will be found in such areas. Where poorly defined areas are involved, such as where project effects are indirect and difficult to predict, it may be feasible to conduct only background research and minor field survey, but sufficient study should be done to provide a basis for decisionmaking about the effects of the project and about possible mitigation measures.

(2) *Continuing responsibility.* Agencies should schedule similar location, identification, evaluation, and registration activities for any properties not included in the initial consideration of properties in priority areas. Agencies should set realistic goals for completion of surveys of particular types. For practical reasons, agencies should document in initial surveys those properties less than 50 years old that would otherwise be eligible for the National Register.

(3) *Newly acquired lands.* Agency HPPs should specifically provide for surveys and identification of historic properties on any newly acquired lands, especially if acquired for construction or alteration. In consultation with the appropriate SHPO, a reconnaissance or intensive survey should be conducted to identify historic properties in the event that adequate resource surveys have not previously been conducted.

(4) *Use of existing data.* Agencies should determine, in consultation with the SHPO, and, as appropriate, local governments and Native American tribal councils, if adequate surveys have been conducted and, if so, consult those survey reports. Such lists include the National Register, State inventories and other published sources. Certified Local

Governments may also be able to provide information on existing surveys.

(i) *National Register.* The National Register of Historic Places was published in its entirety in the Federal Register, February 6, 1979. Annual updates of properties added to the National Register were published on March 18, 1980; February 3, 1981; February 2, 1982; March 1, 1983; and February 7, 1984. Annual lists are scheduled for publication each February. The National Register listings are also accompanied by a list of properties which have been determined to be eligible for inclusion. Detailed information concerning the boundaries of historic properties listed in, or determined eligible for, the National Register can be obtained from the SHPO or the National Park Service. An automated National Register Information System is scheduled for on-line access in 1986.

(ii) *State registers and inventories.* Any State registers or inventories of properties that may include properties meeting the criteria for listing in the National Register may be obtained from the appropriate SHPO. The State preservation plan will assist in identifying those historic contexts that may be present in the planning area, the property types expected to represent those contexts, and the possible significance of the properties. Where adequate historic contexts have been fully developed by the State, the agency should adopt those contexts for use in its HPP. This will save considerable time and effort and will ensure that the agency and the State are operating under the same assumptions concerning the historic and archeological significance of resources. The SHPO may also identify specific properties that might qualify for inclusion in the National Register.

(iii) *Historic American Buildings Survey and the Historic American Engineering Record (HABS/HAER).* HABS/HAER catalogues maintained by the National Park Service, or any similar statewide surveys and published reports, should be used to identify properties that may qualify for the National Register.

(iv) *National Archeological Data Base (NADB).* The NADB, maintained by the Archeological Assistance Division, National Park Service, includes bibliographical reports prepared by Federal agencies, information on Federal agency projects that included archeological work, and names and locational information on other archeological data basis.

(v) *Other sources.* State, university, or society historians, architects, architectural historians, and archeologists may also have registers, inventories, catalogues, or other lists of sites or areas with values that may qualify them for the National register. In addition to checking registers and inventories, agencies should review available ethnographic and oral historical sources for information that may be helpful in projecting where historic properties might be located. The SHPO can direct agencies to relevant data sources.

(5) *Marine lands.* For submerged lands, documentary and field research may serve to indicate the need for, and recommended location of, physical and/or electronic surveys for submerged archeological sites or sunken vessels. A sound methodology for conducting surveys on the continental shelf is found in Enclosures 1 and 2 of the Minerals Management Service's Notice to Lessees and Operators 75–3, Revision 1 (see *Recommended Sources of Information).* Because of the specialized nature and problems attending underwater survey activities, agency officials may wish to review specific survey, inventory, and documentation procedures with the Departmental Consulting Archeologist, National Park Service, United States Department of the Interior, P.O. Box 37127, Washington, DC 20013–7127. Additional expertise is available from those SHPOs whose programs include underwater archeology.

(6) *Alternative identification strategies.* Federal agencies are urged to experiment with different identification strategies. Sampling techniques and predictive modelling may be tested to determine their effectiveness in supplementing traditional identification strategies. There are a variety of approaches currently in use, designed to serve different objectives. Agencies should evaluate these approaches to determine if they are compatible with their own cultural resource management objectives. Such testing is best done in consultation with the SHPO. The *Secretary's Standards for Identification* provide more information on alternative strategies which would be particularly useful to agencies, especially in light of the limited funding available for surveys.

(7) *Reporting identification results.*

(i) *Findings of surveys.* The agency, in consultation with the SHPO, should compile a report containing the findings and records of any surveys conducted for the identification of historic properties within the area of the survey. Upon completion of the report, a copy should be provided to the appropriate SHPO for inclusion in the statewide comprehensive site survey and the Comprehensive Statewide Historic Preservation Plan. Such information should be in a form compatible with the State's inventory system, provided that system is compatible with the *Secretary's Standards.* Agencies should also continue to maintain survey records indicating what lands and properties under Federal jurisdiction or control have been surveyed and by whom.

(ii) *Records of surveys.* Agencies should maintain documentation demonstrating that required surveys have been conducted. Such documentation should include the type of survey employed, scaled maps showing those areas actually inspected during the surveys mentioned above, a historic resource inventory file containing documentation on all identified properties, site photographs, data on areas where historic properties are not located, and a description of the methodology used for identification.

(c) *Evaluation.*

(1) *Inventory of evaluated resources.* The agency in consulation with the SHPO, should create an inventory by evaluating all properties identified in the survey in accordance with National Register criteria for evaluation found in 36 CFR Part 60. The resulting inventory file should contain survey records of all properties located during a survey. Inventory files should contain the information used to evaluate the property under the National Register criteria. The values and attributes of properties which make them eligible for the National Register should not be inadvertently damaged or destroyed during the evaluation.

(2) *Special considerations.* In the case of archeological properties, testing during evaluation should be kept to a minimum and not proceed beyond the point of providing sufficient information for evaluations of eligibility for the National Register and for management purposes. Evaluations of properties against the National Register Criteria should include consideration of historic landscapes.

(3) *Procedures used.* Evaluation records should include the procedures used to collect and evaluate information. Published information sources, qualified informants, the detail with which project areas were examined on the ground and by what techniques (surface inspection, subsurface testing, aerial photography and other remote sensing, etc.) should be described. Maps showing areas actually inspected and by what means should be included. Any documents prepared during the evaluation should be appended as supporting material. Evironmental

VOL 51
ISS 46
MR 10
1986
UMI

statements reflecting negative historic property findings should be accompanied by supporting information indicating the factual basis for this finding.

(d) *Registration.*

(1) *Nomination to the National Register.* In accordance with the procedures in 36 CFR Part 60, those properties determined to meet the criteria will be nominated to the National Register. The National Park Service provides a variety of technical information materials in addition to the *Secretary's Standards for Evaulation and Registration* helpful in interpreting the National Register criteria (see Recommended Sources following Guidelines).

(2) *Determinations of eligibility.* Where registration of properties must be accomplished as quickly as possible because of the impacts of proposed undertakings or other threats to properties, agencies shall request determinations of eligibility from the Keeper of the National Register in accordance with the procedures in 36 CFR Part 63, entitled "Determinations of Eligibility for Inclusion in the National Register of Historic Places," (to be incorporated in 36 CFR Part 60 during 1986). In the revised Part 60, and under certain circumstances, agencies may make decisions on eligibility without seeking a formal determination from the Keeper and thereby satisfy the requirements of section 106 of the Act.

(3) *Multiple property documentation.* All nominating authorities are encouraged to nominate properties to the National Register using the multiple property nomination format. Because many properties have similar historic contexts, this facilitates the registration of properties because the nominating authority does not have to prepare, nor does the reviewing authority have to review, a great deal of repetitive documentation. For example, Federal agencies can nominate properties to the National Register under the multiple property documentation approach using sampling surveys to characterize the resources of an area. Once eligible resources are identified as having similar attributes, and the geographic area of their location has been defined, the eligible properties within such a class of properties can be listed in the National Register. Although only those properties specifically identified in the sample survey will be included in the Register at first, this approach facilitates the inclusion of properties discovered in later surveys in the same geographic area with matching significant attributes. Registration documentation on classes of properties should include:

(i) A determination of the general classes of historic properties likely to occur, based on background research in the area(s) of history, ethnography, architecture, archeolgy, environment, and land-use;

(ii) A general projection of the likely distribution of each class of such properties; and,

(iii) A general projection of the kinds of historic significance that each class of such properties is likely to represent.

(e) *Protection.* The HPP should include information about protection strategies. Such information should be directly related to the historic resource values of properties.

(1) *Using properties.* Section 110(a)(1) requires agencies to "use, to the maximum extent feasible, historic properties available to the agency." Agencies should use historic properties in a manner that does not cause significant damage to or deterioration of the property. If the use of the property requires that the property be modified, such modifications should be consistent with the recommended protection strategies in the *Secretary's Standards for Preservation Projects.* To effectively use historic properties, agencies should:

(i) Identify those program activities that presently involve the use of historic properties and ensure, to the maximum extent possible, that such activities continue to maintain such properties in active use, provided the activities are not causing damage to or deterioration of such properties;

(ii) Identify those program activities that could use historic properties in ways that advance both agency purposes and preservation of the properties, and adjust such activities to the maximum extent possible to cause such use to occur; and,

(iii) Whenever a new activity or program is planned, consider ways that it could be designed in order to use historic properties to the maximum extent possible, and integrate such use into activity or program design.

(2) *Exercising caution.* Section 110 (a)(2) requires agencies to "exercise caution to assure that any such property . . . is not inadvertently transferred, sold, demolished, substantially altered, or allowed to deteriorate significantly."

(i) In planning projects and programs, agencies should take steps early in the planning process to identify historic properties and to comply with the regulations of the Advisory Council, 36 CFR Part 800, implementing section 106 of the Act.

(ii) In managing historic building and structures, agencies should establish maintenance plans that are responsive to the *Secretary's Standards for Rehabilitation,* train maintenance personnel in the use of such plans, and ensure that any alterations are consistent with the *Secretary's Standards,* and are reviewed in accordance with section 106.

(iii) In general land management activities, agencies should ensure that historic preservation concerns are taken into account in decisionmaking, in a manner consistent with section 106 and 36 CFR Part 800. Special consideration should be given to properties that, although not necessarily endangered by agency actions, are subject to damage or deterioration as the result of weather, erosion, vandalism, or natural attrition. In consultation with the SHPO and the Advisory Council, steps should be taken to identify such properties, as needed, document their existence and nature, and take such action as may be necessary consistent with the properties' historic resource values. Such actions may include making properties available to non-Federal parties for adaptive use, conducting detailed documentation or archeological salvage, physical stabilization, or altering the property's environment to protect it.

(3) *Determination of threats.* A determination should be made of known threats and the effects if all or part of the treatened resource was lost. This determination should include careful consideration of the following:

(i) Impacts that cause degradation and/or loss of those characteristics that make a property eligible for the National Register, including the introduction of physical, visual, audible, or atmospheric elements that are out of character with the property and its setting;

(ii) Duration of adverse effects;

(iii) Adverse effects resulting from natural forces or vandalism;

(iv) The impact of any proposed action upon the property taken in consideration with impacts from other sources;

(v) Secondary or indirect impacts resulting from associated activities induced or promoted by the proposed action on the property;

(vi) The relationship between local short-term uses of the property and the long-term preservation and enhancement of the property, indicating to what extent long-term consideration of preservation and enhancement are foreclosed by any proposed action; and,

(vii) The likelihood of unexpected discoveries of significant resources.

(4) *Mitigation.*

(i) Recommendations for mitigation of unavoidable losses should be made. Such recommendations should describe

efforts that will be made to prevent or minimize damage to, loss of, or intrusion upon, historic properties. Where destruction of such resources is unavoidable, or the preservation of archeological resources in place is not prudent or possible, the recommendations should include procedures to recover archeological, historic, architectural, or ethnological specimens and data. Federal agencies should adopt mitigation mesures for use when waiving section 110 responsibilities as provided in regulations 36 CFR Part 78.

(ii) Such mesures may include:

(A) Archeological excavation to recover data and materials (see *Secretary's Standards for Archeological Documentation* and 36 CFR Part 79);

(B) Removal of structures or salvage of architectural components (see 36 CFR Part 79 concerning the curation of federally owned archeological collections);

(C) Provision for publication of information thus gained and initial deposition of artifacts and materials in a repository where they may be of public and educational benefit; and,

(D) Other preservation steps as may be necessary consistent with the historic resource values of the threatened property.

(iii) *Recrodation.* A determination of the necessity to record properties should take into account their historic resource values.

(A) 110(b) requires that each agency initiate measures "to assure that where, as a result of Federal action or assistance carried out by such agency, an historic property is to be substantially altered or demolished, timely steps are taken to make or have made appropriate records, and that such records then be deposited...in the Library of Congress or with such other appropriate agency as may be designated by the Secretary for future use and reference." Minimum standards for recordation are provided in the *Secretary's Standards for Historical Architectural, and Archeological Documentation.*

(B) Appropriate records may range from survey documentation to extensive archival, archeological data recovery, or architectural documentation. It includes the use of sampling procedures when these are sufficent to address the resource management issues represented by particular properties. In conducting data recovery on archeological sites to address specific research questions, it may be particularly useful to apply sampling techniques rather than examining all sites subject to damage.

(C) *Establishing the need for recordation.* Agencies should determine whether recordation is needed and establish standards for property specific recordation through consultation with the SHPO, Advisory Council, and other concerned parties under 36 CRF Part 800. Consultations with the Secretary under the Archeology and Historic Preservation Act (Pub. L. 93–291) may also be appropriate to determine the need for recordation (see section II(b)(4)).

(D) *Deposition of records.* Information on the deposition of records can be found in the *Secretary's Standards for Documentation.* Further, records and materials concerning National Register eligible properties should be deposited with the National Register Information System and the SHPO. In addition, archeological documentation should be deposited with any institution meeting the standards set forth in 36 CFR Part 79 when promulgated (see section II(b)(1)) and with the National Archeological Data Base. Until 36 CFR Part 79 is promulgated, agencies should consult with the Departmental Consulting Archeologist, United States Department of the Interior, P.O. Box 37127, Washington, DC 20013–7127 concerning appropriate depositories.

(5) *Unexpected discoveries.* Subject to such revisions as may be necessary because of unexpected discoveries during execution of a HPP or clarifications of a HPP necessary as a result of monitoring, an approved HPP should be considered to be a statement of an agency's historic preservation responsibilities and planned actions. 36 CFR Part 66 outlines procedures to be followed by Federal agencies when there is an unexpected discovery of data which may be important. For assistance in resolving issues under Part 66, agencies should contact the Interior Departmental Consulting Archeologist.

(6) *Preservation.* Section 110(a)(1) also requires agencies to "undertake, consistent with the preservation of such properties and the mission of the agency and the professional standards established pursuant to section 101(f), any preservation, as may be necessary to carry out this section." As part of the HPP, recommended treatments should be identified for expected property types. Recommendations should take into account historic resource values, prudent and feasible treatments, achievable preservation goals, and past treatments to similar properties. Treatments for historic or archeological properties include a broad range of activities. *The Secretary's Standards for Historic Preservation Projects* provides technical information on acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction activities. These are elaborated upon by a variety of information sources cited in the *Secretary's Standards.*

V. Developing a Historic Preservation Process

(a) *Federal Preservation Officers (FPOs).* Section 110(c) requires each agency, unless exempted by the Advisory Council, to designate a qualified official as its "preservation officer." It establishes that the preservation officer "shall be responsible for coordinating that agency's activities under this Act." It provides for preservation officers to be considered qualified upon completion of a training program established by the Secretary.

(1) *Qualifications.* The FPO shall be considered qualified as a preservation officer upon meeting the professional qualification standards in the *Secretary's Standards* or upon completing a training program established by the Secretary. FPOs should maintain or have access to the services of staff or other professionals meeting the qualifications outlined in the *Secretary's Standards.* The Secretary will offer an orientation program for Federal agencies addressing the requirements of section 110 and the advice in these Guidelines.

(2) *Position within agency structure.* FPOs should have agency-wide authority in order to effectively carry out their section 110 responsibilities. The FPO should occupy a position in the agency's organizational structure from which he or she can effectively monitor agency compliance with the requirements of the Act. Generally this means that the preservation officer should occupy a position close to the agency head, with direct access to both the agency head and to the agency's day-to-day operations. Decentralized agencies will find it helpful to designate officials in their bureaus or field offices who meet the same standards as the FPO. Administrative systems should be established to ensure that the FPO can review all agency activities that might affect historic properties. FPOs should be authorized to participate in the establishment of identification and management procedures for historic properties, in nominating properties to the National Register, in making National Register eligibility determinations, in consultations with the Advisory Council and SHPOs, and in training agency staff with reference to

VOL
51
ISS
46
MR
10
1986
UMI

their historic preservation responsibilities.

(3) *Delegations of responsibilities.* Where an agency delegates any of its section 110 responsibilities to non-Federal authorities, the agency should establish, as part of the HPP, clear lines of authority and responsibility to ensure accountability for section 110 implementation. Any process developed by the delegated authority needs to be consistent with those developed at other levels within the agency.

(4) *Use of professionals.* All HPPs should be developed and implemented by or under the supervision of qualified professionals in appropriate historic preservation disciplines, although the use of paraprofessionals, students, and avocational organizations under professional supervision is encouraged in the actual implementation of the HPP. Persons selected to supervise development and implementation of the HPP should meet the professional qualifications standards described in Section III(m) to undertake this work.

(b) *Consultations.* Federal agencies should make every reasonable effort to involve appropriate SHPO(s) and the public in the development and review of the HPP.

(1) *Providing copy of the HPP to SHPOs and other interested parties.* Copies of the proposed HPP should be provided to the appropriate SHPO(s). In addition, other agencies, parties having land or rights to land in or contiguous to the areas covered by the HPP, and other interested parties should be afforded a reasonable opportunity to review and comment to the agency on the HPP as early as possible in the process.

(2) *Providing copy of the HPP to the Advisory Council.* The agency should provide a copy of the HPP to the Advisory Council when appropriate to assist in consultations under section 106 of the Act. If programmatic memoranda of agreement between the agency and the Advisory Council are appropriate, such agreements should be made as early in the development of the HPP as is possible. Involving the Advisory Council in the early stages of review of the HPP should facilitate all aspects of the Advisory Council comment process later on when consulting on specific projects under section 106. Procedures implementing section 106 are found in 36 CFR Part 800.

(3) *Response to comments.* If, during the agency review period or the public comment period, the lead agency receives a comment on the HPP or a suggestion for a change which it believes merits possible revision of the proposed HPP, it should revise the HPP in consultation with the appropriate SHPO(s) and such other persons as it may deem appropriate.

(4) *Public notice.* Upon receipt of review comments from the appropriate SHPO(s) and agencies, and following revisions to the HPP, if necessary, the Federal agency should publish notice in the **Federal Register** and provide a reasonable opportunity for public comment. Where the impact of the HPP is only local or regional, publication of notice in a journal of local or regional circulation is advised.

(5) *Conflict Resolution.* Where SHPOs, relevant agencies, local governments, or the public object to the HPP, a mechanism should be provided for considering the objection. Any mechanism included in the HPP should consider the State's role in historic preservation as established in the State plan. Where a State is commenting pursuant to Section 106 of the Act, the role of the State and a mechanism for resolving conflicts will be more formally established.

(6) *Review by the Secretary.* The Secretary will review and comment on the HPPs should the initiating Federal agency seek such a review. Where review of HPPs is sought, copies should be forwarded to the Associate Director for Cultural Resources, Interagency Resources Division, National Park Service, United States Department of the Interior, P.O. Box 37127, Washington, DC 20013–7127.

(c) *Actions the agency should take following approval of the HPP.* After agency approval of the HPP, the agency should:

(1) Provide to the appropriate SHPO(s) copies of final HPPs and related studies and records developed pursuant to these guidelines for use in the comprehensive Statewide preservation inventory;

(2) Provide copies of the HPP and its supporting documentation to purchasers, lessors, and other users of Federal lands who may be affected;

(3) Notify the public through **Federal Register** or other appropriate means of the HPP;

(4) Provide for regularly scheduled updating of the HPP in consultation with the SHPO; and,

(5) Ensure that such HPPs and incorporated into or summarized or referenced in environmental impact statements, environmental assessments, and other assessments, if prepared.

[1] *The Directory of Technical Information,* prepared by the National Park Service to accompany the *Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation,* contains an exhaustive list of sources dealing with the preservation activities of planning, identification, evaluation, registration, and protection. The list of Recommended Sources prepared to accompany the *Section 110 Guidelines* includes only those documents relevant to Federal agency preservation activities which are not already included in the Directory of Technical Information. Agencies are urged to consult the Directory when seeking detailed guidance for all phases of agency preservation activities.

Office of Surface Mining Reclamation and Enforcement

[Federal Coal Lease No. M–46292]

Availability of the Final Environmental Impact Statement on the Proposed CX Ranch Mine, Bighorn County, MT

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of availability of a final environmental impact statement (OSM–EIS–20).

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) and the Montana Department of State Lands (DSL) are making available a jointly prepared final environmental impact statement (ESI) on the proposed CX Ranch mine. These agencies have prepared this EIS to assist the Department of the Interior and Montana DSL in making a decision on whether to approve Consolidation Coal Company's (Consol's) application for a permit to surface mine coal approximately 2 miles northwest of Decker, Montana.

ADDRESSES: Copies of the EIS may be obtained from Allen D. Klein, Administrator, Attn: Acting Chief, Environmental Analysis Branch, OSMRE, Western Technical Center, Second Floor, Brooks Towers, 1020 Fifteenth Street, Denver, Colorado 80202 or from Kit Walther, Environmental Analysis Bureau, Montana DSL, Capitol Station, Helena, Montana.

FOR FURTHER INFORMATION CONTACT: Floyd McMullen, Environmental Analysis Branch (telephone: 303–844–2451 (commercial) or 564–2451 (FTS)) at the Denver, Colorado, location given under **ADDRESSES**.".

SUPPLEMENTARY INFORMATION: Consol's proposed CX Ranch mine would be a new surface coal mine located in Big Horn County, Montana, 2 miles west of Decker, Montana, and 22 miles north of Sheridan, Wyoming. The mine would lie along the lower reaches of Squirrel Creek, just north of the Tongue River.

Consol is currently seeking approval of a permit application it has submitted to OSMRE and Montana DSL to mine 46.9 million tons of coal, over a 12-year period and at an average rate of approximately 8 million tons per year, at this proposed mine. During this period, Consol would disturb 974 acres of its proposed 1,905-acre permit area, which includes all or part of secs. 14, 15, 23, 25, and 26, T. 9 S., R. 39 E., and secs. 29, 30, and 31, T. 9 S., R. 40 E., Montana principal meridian.

Should Consol acquire additional coal leaseholds adjacent to its current proposed permit area, the company proposes to extend the life of the CX ranch mine by 21 years, eventually increase production to approximately 16 million tons per year, disturb 2,200 acres more for mining, and expand the permit area by 3,720 acres. Consol would excavate a total of 233 million tons of coal from this 33-year, extend life-of-mine area; 3,174 acres of a total 5,694-acre permit area would be disturbed in the process.

The EIS identifies and analyzes the impacts to the human environment that would result should Consol implement both the 12-year operation it has currently proposed for the permit area and the 33-year operation it has proposed for the life-of-mine area. The EIS also analyzes a cumulative-impact scenario, whereby all mines formally proposed in Montana would be fully developed. Under this scenario, OSMRE and Montana DSL have identified and analyzed the probable impacts of maximum projected growth, assuming that three new coal mines would be developed in the Decker area of Montana: CX Ranch, Youngs Creek/Tanner Creek (about 5 miles east of the proposed CX Ranch mine), and Wolf Mountain (1 mile north of the proposed CX Ranch mine). In the EIS, five alternative decisions that are available to the Department of the Interior and Montana DSL regarding Consol's permit application have been evaluated: approve the application as proposed, reject the application, selectively reject the application, approve the application with mitigating measures, and take no action. OSMRE and Montana DSL have identified "approve the application with mitigating measures" as their preferred alternative.

Dated: March 4, 1986.

H. Leonard Richeson,

Acting Assistant Director, Program Operations.

DEPARTMENT OF JUSTICE

Agency Information Collection Activities Under OMB Review

March 6, 1985.

The Office of Management and Budget (OMB) has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. The list has all entries grouped into new forms, revisions, or extensions. Each entry contains the following information: the name and telephone number of the Agency Clearance Officer (from whom a copy of the form and supporting documents is available); the office of the agency issuing the form; the title of the form; the agency form number, if applicable; how often the form must be filled out; who will be required or asked to report; an estimate of the number of responses; an estimate of the total number of hours needed to fill out the form; an indication of whether section 3504(h) of Pub. L. 96–511 applies; and, the name and telephone number of the person or office responsible for the OMB review. Copies of the proposed form(s) and the supporting documentation may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions regarding the item(s) contained in this list should be directed to the reviewer listed at the end of each entry *And* to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer and the Agency Clearance Officer of your intent as early as possible.

BILLING CODE 4410-10-M

Pollution Control; Lodging of Consent Decree for Conducting Remedial Investigation and Feasibility Study Pursuant To Cercla and RCRA; Berlin and Farro Liquid Incineration, Inc., et al.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on February 27, 1986, a proposed consent decree for conducting a remedial investigation and feasibility study ("RI/FS") was lodged in *United States* v. *Berlin and Farro Liquid Incineration, Inc., et al.*, Civil Action No. 84-CV-8478-FL, with the United States District Court for the Eastern District of Michigan. The Berlin and Farro Liquid Incineration, Inc., hazardous waste site is located near Swartz Creek, Michigan. The RI/FS is to determine the appropriate groundwater remedy, if any is required, as well as any remaining subsurface and surface cleanup work necessary for the protection of human health and the environment. The proposed consent decree requires the defendants to conduct the RI/FS.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, U.S. Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Berlin and Farro Liquid Incineration, Inc., et al.*, D.J. Ref. No. 90-11-2-77.

The proposed consent decree may be examined at the Office of the United States Attorney, Eastern District of Michigan, 113 Federal Building, 600 Church Street, Flint, Michigan 48502, at the Region V Office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, and at the Environmental Enforcement Section, Land and Natural Resources Division, U.S. Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount $53.30 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Bureau of Prisons

Modifications To List of Bureau of Prisons Institutions

AGENCY: Bureau of Prisons, Justice.

ACTION: Notice.

SUMMARY: Attorney General Order No. 646-76 (41 FR 14805), as amended, classifies and lists the various Bureau of Prisons institutions. Attorney General Order No. 960-81, Reorganization Regulations, published in the Federal Register October 27, 1981 (at 46 FR 52339 et seq.) delegated to the Director, Bureau of Prisons, in 28 CFR 0.96(r), the authority to establish and designate Bureau of Prison institutions. In this present document, the Bureau is publishing a consolidated listing of its institutions, and is designating a new Federal Detention Center at Oakdale, Louisiana. To institution is scheduled for formal dedication during the month of March 1986.

FOR FURTHER INFORMATION CONTACT: Hank Jacob, Office of General Counsel, Bureau of Prisons, 320 First Street NW., Washington, DC 20534 (202-272-6874).

SUPPLEMENTARY INFORMATION: This notice is not a rule within the meaning of the Administrative Procedure Act, 5 U.S.C. 551(4), the Regulatory Flexibility Act, 5 U.S.C. 601(2), or Executive Order No. 12291, Sec. 1(a).

By virtue of the authority vested in the Attorney General in 18 U.S.C. 4001, 4003, 4042, 4081, and 4082 and delegated to the Director, Bureau of Prisons by 28 CFR 0.96(r), it is hereby ordered as follows:

The following institutions are established and designated as places of

confinement for the detention of persons held under authority of any Act of Congress, and for persons charged with or convicted of offenses against the United States or otherwise placed in the custody of the Attorney General of the United States.

A. The Bureau of Prisons institutions at the following locations are designated as U.S. Penitentiaries:

(1) Atlanta, Georgia;
(2) Leavenworth, Kansas;
(3) Lewisburg, Pennsylvania;
(4) Lompoc, California;
(5) Marion, Illinois; and
(6) Terre Haute, Indiana.

B. The Bureau of Prisons institutions at the following locations are designated as Federal Correctional Institutons:

(1) Alderson, West Virginia;
(2) Ashland, Kentucky;
(3) Bastrop, Texas;
(4) Butner, North Carolina;
(5) Danbury, Connecticut;
(6) El Reno, Oklahoma;
(7) Englewood, Colorado;
(8) Fort Worth, Texas;
(9) La Tuna, Texas;
(10) Lexington, Kentucky;
(11) Loretto, Pennsylvania;
(12) Memphis, Tennessee;
(13) Milan, Michigan;
(14) Morgantown, West Virginia;
(15) Otisville, New York;
(16) Oxford, Wisconsin;
(17) Petersburg, Virginia;
(18) Phoenix, Arizona;
(19) Pleasanton, California;
(20) Ray Brook, New York;
(21) Safford, Arizona;
(22) Sandstone, Minnesota;
(23) Seagoville, Texas;
(24) Talladega, Alabama;
(25) Tallahassee, Flordia;
(26) Terminal Island, California; and
(27) Texarkana, Texas.

C. Bureau of Prisons institutions at the following locations are designated as Federal Prison Camps:

(1) Allenwood, Pennsylvania;
(2) Big Spring, Texas;
(3) Boron, California;
(4) Duluth, Minnesota;
(5) Eglin Air Force Base, Florida; and
(6) Maxwell Air Force Base/Gunter Air Force Station, Montgomery, Alabama.

D. The Bureau of Prisons institutions at the following locations are designated as Metropolitan Correctional Centers:

(1) Chicago, Illinois;
(2) Miami, Flordia;
(3) New York, New York;
(4) San Diego, California; and
(5) Tucson, Arizona.

E. The Bureau of Prisons institution at Springfield, Missouri is designated as the U.S. Medical Center for Federal Prisoners.

F. The Bureau of Prisons institution at Rochester, Minnesota is designated as the Federal Medical Center.

G. The Bureau of Prisons institution at Oakdale, Louisiana, is designated as the Federal Detention Center.

Dated: February 28, 1986.

Norman A. Carlson,

Director, Bureau of Prisons.

BILLING CODE 4410-05-M

Drug Enforcement Administration

Manufacturer of Controlled Substances Application; Johnson Matthey, Inc.

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on December 19, 1985, Johnson Matthey, Inc., 1401 King Road, West Chester, Pennsylvania 19380, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Sufentanil (9740)	II
Fentanyl (9801)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than April 9, 1986.

Dated: March 3, 1986.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 86-5098 Filed 3-7-86; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances Application; Marion Laboratories Inc.

Pursuant to § 1301.43(a) of Title 21 of Code of Federal Regulations (CFR), this is notice that on January 13, 1986, Marion Laboratories Inc., Analytical Systems Inc. Division, 23162 La Cadena Drive, Laguna Hills, California 92653, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Phencyclidine (7471)	II
1-piperidinocyclohexanecarbonitrile (PCC)	II
Benzoylecgonine (9187)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than April 9, 1986.

Dated: March 3, 1986.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Council on the Humanities Advisory Committee; Meeting

February 27, 1986.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that a meeting of the Jefferson Lecture Committee of the National Council on the Humanities will be held on Friday, April 4, 1986 at 10:30 a.m. in Room 506 in the Old Post Office Building, 1100 Pennsylvania Avenue, NW., Washington, DC.

The purpose of the meeting is to consider specific individuals who have been nominated for the 1987 Jefferson Lectureship. The meeting will be closed to the public pursuant to subsections (c)(6) and 9(B) of section 552b of Title 5, United States Code because the Committee will consider information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy and information the disclosure of which would significantly frustrate implementation of proposed agency action. I have made this determination under the authority granted me by the Chairman's Delegation of Authority dated January 15, 1978.

Further information about this meeting can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506, or call area code 202-786-0322.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-397]

Washington Public Power Supply System; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR Part 50, Appendix J, section III.D.2.(a) to the Washington Public Power Supply System (WPPSS or the licensee), holder of Facility Operating License No. NPF-21 which authorizes operation of the WPPSS Nuclear Project No. 2 (WNP-2 or the facility). The facility is a boiling water reactor and is located in Benton County, Washington.

Environmental Assessment

Identification of Proposed Action: The exemption from 10 CFR 50, Appendix J, section III.D.2.(a) would allow the licensee to delay the performance of a type B leak test on the drywell head "O" ring seals for not more than two months beyond the two year frequency established by Appendix J.

The Need for the Proposed Action: The exemption is needed to avoid the requirement of a special plant shutdown prior to March 19, 1986, for the sole purpose of performing this test. Such a shutdown would come at a time when there is a high demand for the electric output from the facility (prior to the spring runoff) and would result in plant personnel receiving greater radiation exposure than if the test were delayed till the next refueling outage (scheduled to commence not later than May 15, 1986).

Environmental Aspects of the Proposed Action: There are no environmental impacts of the proposed action. The proposed exemption involves a change in the installation or use of the facility's components located within the restricted areas as defined in 10 CFR Part 20. The staff has determined that the proposed exemption involves no significant increase in the amounts, and no significant change in the types of any effluents that may be released offsite and that there is no significant increase in individual or cumulative occupational radiation exposure. As indicated above, it is expected that granting the exemption will result in a reduction in cumulative occupational exposure.

With regard to potential non-radiological impacts, the proposed exemption involves systems located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and, by allowing better management of hydroelectric resources may have a positive environmental impact. Therefore, the Commission concludes there are no significant adverse non-radiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Action: We have concluded there is no measurable adverse environmental impact associated with the proposed exemption. The principal alternative would be to deny the requested exemption. This would not reduce the environmental impacts of plant operation.

Alternative Use of Resources: This action does not involve the use of resources not previously considered in connection with the "Final Environmental Statement Related to the Operation of WPPSS Nuclear Project No. 2." dated December 1981.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Findings of No Significant Impact

The Commission has determined not to prepared an environmental impact statement for the proposed exemption.

Based on the foregoing environmental assessment, we conclude the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for exemption dated January 17, 1986, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Richland Public Library, Swift and Northgate, Richland, Washington 99352.

Dated at Bethesda, Maryland, this 4th day of March 1986.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Director, BWR Project Directorate No. 3, Division of BWR Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 86-5164 Filed 3-7-86; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. STN 50-528]

Consideration of Issuance of Amendment To Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing; Arizona Public Service Co., et al.

The Nuclear Regulatory Commission is considering an application dated February 5, 1986, filed by the Arizona Public Service Company (APS), as Project Manager and Operating Agent of Palo Verde Nuclear Generating Station (PVNGS) Units 1, 2 and 3, on behalf of Public Service Company of New Mexico (PNM), a licensee under Facility Operating License No. NPF-41 for PVNGS Unit 1. APS requests that the Commission amend the PVNGS Unit 1 license to allow (i) the transfer by PNM to equity investors of a portion of its fee interest in PVNGS Unit 1 and (ii) the simultaneous transfer by the equity investors back to PNM of a long term (approximately 28½ years) possessory leasehold interest of this share under the terms described in this application. Under the proposed transaction, it is represented that PNM will remain in possession of its present interests in PVNGS under a leasehold rather than by virtue of ownership.

Under Facility Operating License NPF-41, issued June 1, 1985, PNM, APS, and other named utilities are licensed to possess PVNGS Unit 1, and APS is licensed to use and operate the facility. PVNGS Unit 1 is part of a three unit PVNGS project jointly owned by those utilities. Under an Arizona Nuclear Power Project (ANPP) Participation Agreement, each owner of the PVNGS project is obligated to pay a share, equal to its ownership interest, of all costs of construction, maintenance, operation, capital improvements, and decommissioning of each of the PVNGS units, and entitled to share equal to its ownership interests in the electrical output of the units. APS is authorized to act as agent for the other licensees of PVNGS Unit 1, and has exclusive responsibility and control over the physical construction, maintenance and operation of the facility.

On October 18, 1985, APS filed an application regarding a sale and leaseback transaction by PNM of a portion of PNM's ownership interests in PVNGS Unit 1. 50 FR 45955 (1985). By Order of December 12, 1985, the Commission approved the proposed sale and leaseback transactions and authorized the amendment of the PVNGS Unit 1 license subject to certain conditions. On December 26, 1985, the PVNGS license was amended, conditioned pursuant to the Commission's order. See 51 FR 1883 (1986). This amendment added a new paragraph, 2.B(b) to the license, which stated:

> Pursuant to an Order of the The Nuclear Regulatory Commission dated December 12, 1985, the Public Service Company of New Mexico (PNM) to transfer and PNM has transferred a portion of its ownership share in Palo Verde Unit 1 to certain institutional investors on December 31, 1985, and at the same time has leased back from such purchasers the same interest in the Palo Verde Unit 1 facility. The term of the lease is to January 15, 2015, subject to a right of renewal. the sale and leaseback transaction is subject to the respresentations and conditions set forth in the above application and Commission's Order of December 12, 1985, consenting to such transaction. Specifically, the lessor and anyone else who may acquire on interest under this transaction are prohibited from exercising directly or indirectly any control over the licensees of the Palo Verde Nuclear Generating Station, Unit 1. For purposes of this conditon, the limitations in 10 CFR 50.81 "Creditor Regulations" as now in effect and as they may be subsequently amended are fully applicable to the lessor and any successor in interest to that lessor as long as the license for Palo Verde Unit 1 remains in effect; this financial transaction shall have no effect on the license for the Palo Verde Nuclear Faility throughout the term of the license.
>
> Further, the licensees are also required to notify the NRC in writing prior to any change in: (i) The terms or conditions of any lease agreements executed as part of this transaction; (ii) the ANPP Participation agreement, (iii) the existing insurance for the Palo Verde Nuclear Facility, Unit 1 and (iv) any action by the lessor or others that may have an adverse effect on the safe operation of the facility.

On December 31, 1985, as permitted by this License Amendment, PNM sold to and leased back from equity investors approximately 7.367% of its 10.2% interest in PVNGS Unit 1.

In the instant application, APS requests an amendment to the PVNGS Unit 1 license which allows PNM to sell and leaseback its remaining interest in PVNGS Unit 1 by adding a provision at the end of paragraph 2.B(b) which would allow PNM to enter into additional sale and leaseback transactions on or before August 31, 1986. APS presently contemplates that sale and leaseback of a $75 million portion of the remaining Unit 1 interest will be consummated with a third-party equity investor not affiliated with PNM and a $50 million portion with an affiliate of PNM. PNM represents that these transactions will have essentially the same terms and conditions as the sale and leaseback transactions entered into on December 31, 1985, under which the equity investors have no right of possession in, absent a further license amendment, or control over PVNGS Unit 1. Those rights remained solely in PNM, as a lessee rather than an owner, and the other present licensees of PVNGS Unit 1, and APS continued to be the sole licensee authorized to use and operate PVNGS Unit 1. Throughout the term of the leaseholds PNM has the full and exclusive authority and responsibility to exercise and perform all of the rights and duties of a Participant in PVNGS under the ANPP Participation Agreement. PNM also retains responsibility for the payment of its share of the operating and maintenance expenses and costs of capital improvements during the term of the leaseholds and thereafter, in the absence of other Commission action, for 10.2% of the costs of decommissioning associated with PVNGS Unit 1.

APS asserts that the grant of the relief requested, which essentially is a recognition of the conversion of PNM's right of possession of an interest in PVNGS Unit 1 from a fee interest to a leasehold, does not present an unreviewed environmental impact and that no environmental impact statement or appraisal need to be prepared in acting upon the application.

The Commission has made a proposed determination that this amendment would involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not: (1) Involve a signficant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The applicant's request is for approval of the sale and leaseback transaction with PNM remaining in possession of its present interests in PVNGS and continuing to be obligated to pay its share of all costs of construction, maintenance, operation, capital improvements and decommissioning. The equity investors would not have any right of possesion in, absent further license amendment, or control over PVNGS Unit 1. APS would be the sole licensee authorized to use and operate the facility. Based on the above, and under the criteria in 10 CFR 50.92(c), the Staff proposed to determine that amendment to the license would not involve significant hazards considerations.

VOL 51 ISS 46 MR 10 1986 UMI

The Commission is seeking public comments on the application and this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make final determination unless it receives a request for a hearing.

Comments should be addressed to Rules and Records Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Comments may also be delivered to Room 4000, Maryland National Bank Building, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Monday through Friday.

Further, although no determination has been made to hold hearings on the subject application, by April 9, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment of the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene in any hearings which may be held. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date and it is determined that a hearing be held, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any other which may be entered in the proceeding on the petitioner's interest. The petition should identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at lease one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration and whether hearings are necessary. The final determination will serve to decide when the hearing, if any, is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendments and make them effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendments.

If the final determination is that a license amendment involving a significant hazards consideration is necessary, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendments until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendments before the expiration of the 30-day notice period, provided that its final determination is that the amendments involve no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Rules and Procedures Branch, Office of Administration, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW, Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message address to George W. Knighton: (petitioner's name and telephone number), date petition was mailed), (plant name), and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Arthur C. Gehr, Snell & Wilmer, 3100 Valley Bank Center, Phoenix, AZ 85073.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(2)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application dated February 5, 1986, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, DC, and at the local public document room at the Phoenix Public Library, 12 E. McDowell Road, Phoenix, AZ 85004.

Dated at Bethesda, Maryland, this 4th day of March, 1986.

For the Nuclear Regulatory Commission.

George W. Knighton,

Director, PWR Project Director No. 7, Division of PWR Licensing–B.

[FR Doc. 86–5165 Filed 3–7–86; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–382]

Louisiana Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–38 issued to Louisiana Power Light Company (the licensee), for operation of the Waterford Steam Electric Station, Unit 3, located in St. Charles Parish, Louisiana.

The amendment would revise the Appendix A Technical Specifications in accordance with the licensee's application for amendment dated February 19, 1986, as supplemented by letters dated February 27, 1986 and March 4, 1986, (1) by modifying the surveillance requirements for the emergency diesel generators and (2) by extending the interval for Type B and C containment leakage rate testing to the first refueling outage.

(1) Emergency Diesel Generator Surveillance

Surveillance Requirement 4.8.1.1.2.d.1 specifies that "at least once per 18 months during shutdown" the emergency diesel generators will be subjected "to an inspection in accordance with procedures prepared in conjunction with its manufacturer's recommendations for this class of standby service." The proposed change will modify the surveillance interval by specifying that the inspection be performed during refueling outages.

The Standard Review Plan and the Technical Specification Base cite various Regulatory Guides as the basis for operability demonstration of the diesel generators. Functional testing is primarily addressed by Regulatory Guide 1.108, Periodic Testing of Diesel Generator Units as Onsite Electric Power Systems at Nuclear Power Plants. This Regulatory Guide discusses most of the testing requirements of Surveillance Requirements 4.8.1.1.2.d.2–13. However, the Regulatory Guide, the Standard Review Plan and the Waterford 3 Technical Specification Bases are silent on the subject of diesel generator inspection as described in Surveillance Requirement 4.8.1.1.2.d.1. In satisfying Surveillance Requirement 4.8.1.1.2.d.2–13, the operability of the diesel generators is demonstrated.

LP&L recently retained the services of the diesel manufacturer, Cooper-Bessemer, to perform on-line diagnostic analyses of the diesel generator operation. Cooper-Bessemer determined that no significant deficiencies were present and that those areas identified as recommendations would not adversely affect the operation of the diesel generators. Further, Cooper-Bessemer recommended that a refueling cycle interval is adequate for inspection purposes. Although Surveillance Requirement 4.8.1.1.2.d.1 appears to allow flexibility with respect to manufacturer's recommendations (i.e. perform inspections, "in accordance with . . . manufacturer's recommendations"), this change will make explicit the manufacturer's recommendation that inspections be performed at refueling outages.

LP&L will utilize the EN–SPEC 2000 Engine Analyzer to perform periodic diagnosis testing on the diesel generators. The 2000 Engine Analyzer is a multi-purpose test instrument designed to evaluate the performance of reciprocating engines and compressors. By comparing current operational characteristics with previously recorded baseline data, any appreciable performance degradation should be detected and remedied. Therefore, based on the Cooper-Bessemer results and planned preventive maintenance, a full plant outage to satisfy Surveillance Requirement 4.8.1.1.2.d.1 at a time other than refueling is not recommended by the manufacturer as being technically justified and would serve no useful purpose.

The NRC staff proposed to determine that the proposed change does not involve a significant hazards consideration because it meets the three criteria of 10 CFR 50.92(c). The basis for this proposed finding is given below.

(a) Operation of the facility in accordance with this proposed change does not involve a significant increase in the probability or consequences of an accident previously analysed. The bases for diesel generator operability requirements are contained in the Standard Review Plan, Regulatory Guide 1.108 (among others), and the Technical Specification Bases. Through Surveillance Requirements 4.8.1.1.2.a–c and 4.8.1.1.2.d.2–13, Waterford 3 continues to fully demonstrate operability of the diesel generators. Therefore, the proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated.

(b) Operation of the facility in accordance with this proposed amendment will not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed change introduces no new systems, modes of operation, failure modes or other plant perturbations. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(c) Operation of the facility in accordance with the proposed amendment does not involve a significant reduction in a margin of safety. Emergency diesel generator operability will continue to be functionally tested in accordance with Surveillance Requirements 4.8.1.1.2a–c and 4.8.1.1.2d.2–13. Functional testing provides an objective demonstration of operability as mandated by the Standard Review Plan.

On the basis that the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of an accident of a type different from any previously evaluated, or (3) involve a significant reduction in a margin of safety, the staff has made an initial determination that the proposed amendment is not likely to involve a significant hazards consideration.

(2) Type B and C Containment Leakage Rate Testing

Surveillance Requirement 4.6.1.2.d states that Type B and C containment leakage rate tests shall be conducted at intervals no greater than 24 months. Surveillance Requirement 4.6.1.2.f requires, in part, that the bypass leakage rate be determined through Type B and C testing at least once per 24 months. The proposed change would allow for an extension of the above Type B and C testing interval to the refueling outage for the first cycle of operation only.

LP&L successfully completed the pre-operational Type A integrated leak rate testing (ILRT) on May 1, 1983, and Type B and C local leak rate testing (LLRT) on April 22, 1984. The results of the ILRT results were submitted to the NRC in a letter dated July 19, 1983. The LLRT results demonstrated a low level of leakage. Against the allowable Technical Specification leakage limit of 630,697 cc/day, testing revealed an actual leakage of 15,952 cc/day. The current leakage is 21,547 cc/day, a minor increase. Similar results were obtained for the bypass leakage—against an

VOL 51 ISS 46 MR 10 1986 UMI

allowable limit of 63,069 cc/day, bypass leakage was demonstrated to be 5,400 cc/day, with a current leakage of 6,150 cc/day. (Note: The Technical Specifications use the term L_a to define allowable leakage. L_a (in %/24 hours) is the maximum allowable leakage rate at peak containment DBA pressure. In the Technical Specifications, $0.60L_a$ corresponds to 630,687 cc/day and $0.06L_a$ corresponds to 63,069 cc/day.)

The performance of the pre-operational ILRT/LLRT testing was scheduled to be consistent with what appeared, at the time, to be a reasonable fuel load date. The intent of the scheduling was to allow adequate time for the first cycle of operation so as to satisfy the 24 month Type B and C testing requirements of Surveillance Requirements 4.6.1.2.d/f at the first refueling outage. Due to various factors, the full power licensing of Waterford 3 was delayed to March 16, 1985 and commercial operation of the facility was declared in September 1985. Therefore, absent the proposed change, LP&L would be faced with an extended mid-cycle outage in order to perform the Type B and C testing.

Containment leakage rate is primarily affected by equipment wear and maintenance. During periods of inactivity little, if any, increase in leakage rate would be expected. From the time of performance of the ILRT/LLRT testing to receipt of the low power operating license in December 1984 (a period of approximately 8 months), LP&L was primarily occupied with addressing licensing issues rather than exercising plant systems.

Thus, B Type and C equipment was subject to only minimal wear during that time.

To determine the effect on Type B and C equipment due to maintenance, LP&L has conducted a review of the LLRT logbook. This review has determined that maintenance was performed on only a few components out of a total of 117 and that in these cases acceptable Type B testing was performed post-maintenance.

Given the low burden placed on Type B and C components during a significant portion of the time since ILRT/LLRT testing, and the low level of maintenance on these components, it would be expected that increases in the containment and bypass leakage rates would be minor. This is borne out by Waterford 3's history of minor problems with containment pressure control. With a farly tight Technical Specification on containment pressure, 14.9–15.4 psia depending on containment temperature, LP&L has found it necessary to frequently "burp" containment to maintain pressure at an acceptable level. Presently, pressure control is required every one to two days.

The containment air locks and the containment purge system (supply and exhaust) are systems exercised on fairly frequent basis and provide potential leakage paths. However, operability and leak testing of these systems are required seperately through Technical Specifications 3.6.1.3 and 3.6.1.7, respectively. The proposed change has no effect on the leakage rate testing of the air locks and containment purge system.

Precedents for the proposed change exist. For example, on September 26, 1985 in response to an August 26, 1985 request, the NRC granted on exemption to Appendix J to allow Dresden Unit 3 to continue operation to their scheduled refueling. The request was primarily based on the presence of a four-month outage during which leak-sensitive components were not exercised. The proposed change for Waterford 3 will realign the scheduling to be consistent with the first refueling outage, which is anticipated to start between December 15, 1986 and March 1, 1987.

In summary, the proposed change is supported by:

- The large margin to Technical Specification limits demonstrated during the pre-operational LLRT.
- The low component usage factor prior to low power licensing.
- The minimal component maintenance and successful post-maintenance testing of a minor number of components.
- The continued leakage rate testing of the air locks and containment purge system, as already required.
- Granting of similar requests to other operating nuclear plants.
- The intent of Standard Technical Specification to require LLRT only at refueling intervals, as long as refueling takes place within a reasonable period of time.

The NRC staff proposes to determine that the proposed change does not involve a significant hazards consideration because it meets the criteria of 10 CFR 50.92(c). The basis for this proposed finding is given below.

(a) Operation of the facility in accordance with the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The FSAR Chapter 15 safety analyses assume the maximum allowable Technical Specification leakage in calculating off-site dose consequences. As stated above, the current leakage rate is estimated to be about 4% of the leakage rate allowed by the technical specifications. This low estimate for current actual leakage confirms the expectation that leakage would be low based on the low component usage factor in the first 8 months since the last tests were performed and the limited amount of component maintenance that has been required to date.

(b) Operation of the facility in accordance with this proposed amendment will not create the possibility of a new or different kind of accident from any accident previously analyzed. Specifically, the proposed change introduces no new systems, modes of operation, failure modes or other plant perturbations. The change is schedular in nature and for one-time only, as all required valve and penetration testing will be conducted at the first refueling outage. Taking credit for the low component usage factor between previous leak rate testing and plant licensing will align the leakage rate testing with the first refueling outage. Leakage rate testing will then be conducted at subsequent refueling outages which will occur at 18-month intervals, well within the 24 months allowable. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previousy evaluated.

(c) Operation of the facility in accordance with this proposed amendment does not involve a significant reduction in a margin of safety. Specifically, estimates of current local leakage rate about 4% of the leakage rate allowed by the technical specifications. The actual period of plant operation is well within the two-year period originally intended by the technical specifications. Current plant performance indicates little, if any, degradation in containment leakage. The low level of required maintenance and successful post-maintenance testing, combined with the performance of leakage rate testing during the remainder of Cycle 1, provide adequate assurance that any reduction in safety margin is minimal. Therefore, the proposed change will not involve a significant reduction in a margin of safety.

On the basis that the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of an accident of a type different from any previously evaluated, or (3) involve a significant reduction in a margin of safety, the staff has made an initial determination that the proposed

amendment is not likely to involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attn: Rules and Procedures Branch, Office of Administration.

Service Branch

By April 9, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or has been admitted as a party may amend the peitition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amendment petition must satisfy the specificity requirements described above.

Not later than (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Rules and Procedures Branch, Office of Administration, or may be delivered to the Commission's Public Document Room, 1717 H Stree, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to George W. Knighton: Petitioner's name and telephone number; date pefition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Bruce W. Churchill, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petitioner and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.7714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washinton, DC, and at the University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans 70122.

Dated at Bethesda, Maryland, this 4th day of March 1986.

For the nuclear regulatory commission.

George W. Knighton,

Director, PWR Project Directorate No. 7, Division of PWR Licensing-B.

BILLING CODE 7590-01-M

[Docket No. 30–07022, License No. 29–13613–02, EA 86–17]

Radiation Technology, Inc.; Order Suspending the License (Effective Immediately)

I

Radation Technology, Incorporated, Lake Denmark Road, Rockaway, New Jersey 07866 (the licensee) is the holder of a materials license issued by the Nuclear Regulatory Commission (the

VOL 51
ISS 46
MR 10
1986
UMI

Commission or NRC) pursuant to 10 CFR Part 30. The license, which was issued on November 18, 1970, most recently renewed on August 17, 1981, and due to expire on August 31, 1986, authorizes the licensee to perform certain activities using byproduct material in accordance with criteria specified therein. This authorization includes, among other activities, the use of specified radioactive sources not to exceed 12,000 curies per source and 2,000,000 curies total, for service irradiation in the licensee's Radiation Technology Model 2102 service irradiator.

II

Products are irradiated in the Model 2102 service irradiator at the licensee's facility by placing them in metal boxes (totes) which enter and exit the service irradiator on a conveyor system. There are two conveyor openings in the irradiator room barrier with two "swing type"doors for each opening.

These openings are approximately 3½ ft by 3½ ft. A personnel access door is located adjacent to the two conveyor openings. Each of these three openings is protected with an interlock system.

The conveyor openings interlock system, which is described in documents incorporated into the license and required by the regulations, is designed to lower the sources, if exposed, when entry through a conveyor opening is made other than a tote. This system consists of tote-recognition switches located on each side of each of the two conveyor openings and a switch for each conveyor door. The tote-recognition switches function to identify a tote and disable the conveyor door switches so that the totes can pass through the conveyor door into the irradiator without the sources returning to the shielded position. If a conveyor door is opened during irradiator operation without the proper actuation of these tote-recognition switches, the switch on the conveyor door will cause the sources to be lowered to the shielded position and and an alarm to be sounded.

The personnel access door interlock system, described in documents incorporated into the license and required by the regulations, prevents opening the access door from the outside if the sources are exposed,and lowers the sources if the door is opened while the sources are in the exposed position. This system consists of: (1) An electrical key-operated lock; (2) a circuit which disables the key and prevents opening the door, except from inside the irradiator room by use of the inside dooorknob, whenever a high radiation condition exists in the irradiator room as detected by a radiation monitor; (3) a switch on the door jam which senses the position of the door and returns the sources to the shielded position in the service irradiator pool if the door is opened; and (4) an electric eye beam located approximatley six feet inside the door, which, if interrupted by the presence of an individual, wil also return the sources to the shielded position.

III

During an NRC inspection conducted at the licensee's facility on February 28, 1986, the NRC found that, because of a malfunction of the radiation monitor associated with the personnel access door interlock on February 20, 1986, the electrical lock on the personnel access door could not be opened with the door key. Also, the NRC found that in spite of this condition, licensee personnel continued to operate the irradiator while the monitor was not functioning. These personnel established a method of opening the door following an irradiator shutdown that consisted of inserting fingers and/or a screwdriver through the wire mesh door and minipulating the inside doorknob, which opened the door. Life threatening radiation levels exist in the irradiator room during irradiator operations and may continue to exist if the sources fail to lower into their shielded position following completion of operations or further interlock failures. Bypassing the electrical lock and opening the door using the inside doorknob could allow inadvertent personnel entry into the irradiator room. Bypassing of the personnel access door interlock consitituted violation of the requirements on License No. 29-13613-02.

IV

Another violation of NRC requirements was identified during an NRC inspection on September 21, 1984 at the licensee's facility in Rockaway, New Jersey, involving bypassing of the safety interlock system for one of the two conveyor openings to the service irradiator. Specifically, in accordance with a memorandum dated April 2, 1984 issued by the President/Radiation Safety Officer of the Company, the doors for the lower conveyor were tied open and the tote-recognition switches were tied back, disabling the protective interlocks. Consequently, an individual could have gained access to the irradiator through the lower conveyor doors while the sources were exposed without the sources being lowered to the shielded position as required. In response to this violation, NRC Region I issued a Confirmatory Action Letter to the licensee on September 28, 1984. The letter confirmed the licensee's commitment to:

1. Operate the irradiators in the facility only if all the safety interlocks described in the correspondence referenced in Conditions 17 and 18 of License No. 29-13613-02 are operable and functioning, and

2. Immediately cease the operation of the irradiator if a safety interlock referenced in Item 1 becomes inoperable or incapable of functioning as described in the correspondence referenced in Conditions 17 and 18 of License No. 29-13613-02.

As a result of the identification of this violation, an investigation was initiated. Although this investigation is still continuing, the investigation determined that after the Confirmatory Action Letter was issued, the licensee at times continued to operate the irradiator facility with the required interlock systems for the conveyor doors disabled.

In addition, contrary to the licensee's commitment to operate the facility in strict accordance with the license as described in the above Confirmatory Action Letter, the licensee replaced the approved conveyor interlock system with a new system in October or November 1985, and subsequently operated the irradiator, without informing the NRC and obtaining the required approval. A license amendment request and approval are required to permit the NRC to ensure that operation of the replacement interlocks would be in accordance with regulatory requirements. Approval was not requested until January 9, 1986, and approval has not yet been granted.

V

From the foregoing it is apparent that the licensee has not taken adequate actions to comply with Commission regulations, including 10 CFR 20.203 and Conditions 17 and 18 of its license and, consequently, the NRC lacks reasonable assurance that the facility will be operated in a manner to assure that the health and safety of the public (licensee employees) will be protected. Operation of the service irradiator with any safety interlock bypassed has potentially serious adverse effects for individuals at the facility. For example, in an earlier incident in 1977 at this same facility, when the personnel access door interlock system was rendered inoperable, a licensee employee entered the irradiator cell while the radioactive sources were exposed and received a radiation dose to the whole body in the range of 150-300 rem, an amount well in excess of the regulatory limit. As a result, the NRC issued an Order suspending the license on September 23, 1977. The suspension Order was subsequently lifted on October 14, 1977.

In view of the events at this facility since 1984, a full investigation of the foregoing must be completed before I can determine whether there is reasonable assurance that the licensee will comply with Commission requirements, whether the health and safety of the public, including employees, will be protected and, whether, therefore, facility operation should be permitted to continue. Accordingly, I have determined that continued operation of the facility is an immediate threat to the public health and safety. Therefore, the public health, safety and interest require that License No. 29-13613-02 be suspended, effective immediately, until a full investigation is completed and I have further determined that no prior notice under 10 CFR 2.201 is required.

VI

In view of the foregoing, and pursuant to sections 81, 161b and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR Part 30, pending completion of the Commission's investigation of these events and further order of the Commission: It is hereby ordered, effective immediately, that:

A. All operations authorized by License No. 29-13613-02 are suspended;

B. The licensee shall place and maintain all sources in their fully shielded position at the bottom of the irradiator pools, and conduct only those licensed activities required to maintain the facility in a safe condition.

C. The Regional Administrator, Region I, may relax or rescind any of the above provisions upon demonstration of good cause by the licensee.

VII

The licensee may show cause why this Order should not have been issued and should be vacated by filing a written answer under oath or affirmative within 20 days of the date of this Order which sets forth the matters of fact and law on which the licensee relies. The licensee may answer as provided in 10 CFR 2.202(b) by consenting to this Order.

The licensee or any other person adversely affected by this Order may request a hearing within 20 days of its issuance. Any answer to this Order or request for hearing shall be submitted to the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies shall also be sent to the Executive Legal Director at the same address and to the Regional Administrator, NRC Region I, 631 Park Avenue, King of Prussia, Pennsylvania 19406. Upon the failure of the licensee to answer or request a hearing within the specified time, this Order shall be final without further proceedings. An answer to this order or a request for hearing shall not stay the immediate effectiveness of section VI of this order.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this order should be sustained.

Dated at Bethesda, Maryland, this 3rd day of March 1986.

For the Nuclear Regulatory Commission.

James M. Taylor,

Director, Office of Inspection and Enforcement.

[FR Doc. 86-5167 Filed 3-7-86; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-397]

Washington Public Power Supply System, WPPSS Nuclear Project No. 2; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-21, issued to Washington Public Power Supply System (the licensee), for operation of the WPPSS Nuclear Project No. 2 located in Benton County near Richland, Washington.

The amendment would modify the WNP-2 Technical Specifications to allow deferring the Type B leak rate test on the drywell head "O" rings from March 19, 1986, until the spring 1986 refueling outage. The spring 1986 refueling outage is presently scheduled to begin April 15, 1986. Concurrently the Supply System is seeking a one time only exemption to the maximum test interval requirement of 10 CFR Part 50, Appendix J requirements.

The Technical Specifications and Appendix J specify that the Type B and C leak tests are to be conducted at intervals no greater than 24 months. The WNP-2 drywell head "O" ring Type B test was last completed on March 19, 1984, making the next test due no later than March 19, 1986. This test requires plant shutdown and shield plug removal to allow access. The WNP-2 refueling outage is scheduled to begin less than one month later and the licensee requests this one time only Technical Specification and Appendix J exemption to defer this test to the forthcoming refueling outage. These revisions to the technical specifications would be made in response to the licensee's application for amendment dated January 17, 1986.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Accordingly, the licensee has determined, and the staff agrees, that the requested amendment does not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because, due to outages and the power ascension test program completion during the two year period, there were six months in which the "O" rings were not exposed to an operating environment; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated becasue no new designs or plant operating modes are affected by this amendment; or (3) involve a significant reduction in a margin of safety because, as discused in (1) above, the total time of operation under the amended technical specifications will not exceed that of the Appendix J requirement, i.e. 24 months. Therefore, based on these considerations and the three criteria given above, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

The Commission has determined that failure to act in a timely way would result in shutdown of the power facility on March 20, 1986, because the last surveillance test of the containment lead "O" ring seals will have been performed more than 24 months prior. Therefore, the Commission has insufficient time to issue its usual 30-day notice of the proposed action for public comment.

VOL 51 ISS 46 MR 10 1986 UMI

If the proposed determination becomes final, an opportunity for a hearing will be published in the **Federal Register** at a later date and any hearing request will not delay the effective date of the amendment.

If the Commission decides in its final determination that the amendment does involve a significant hazards consideration, a notice of opportunity for a prior hearing will be published in the **Federal Register** and, if a hearing is granted, it will be held before any amendment is issued.

The Commission is seeking public comments on this proposed determination of no significant hazards consideration. Comments on the proposed determination may be telephoned to Elinor G. Adensam, Director of BWR Project Directorate No. 3, by collect call to (301) 492–8180 or submitted in writing to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attn: Docketing and Service Branch. All comments received by March 14, 1986, will be considered in reaching a final determination. A copy of the application may be examined at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Local Public Document Room, Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Dated at Bethsda, Maryland, this 4th day of March, 1986.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Director, BWR Project Directorate No. 3, Division of BWR Licensing.

[FR Doc. 86–5168 Filed 3–7–86; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Human Factors; Meeting

The ACRS Subcommittee on Human Factors will hold a meeting on March 19 and 20, 1986, Room 1046, 1717 H Street, NW., Washington, DC.

The meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Wednesday, March 19, 1986—8:30 A.M. until the conclusion of business.
Thrusday, March 20, 1986—8:30 A.M. until the conclusion of business.

The Subcommittee will meet to: (1) Examine the potential for automating more of the monitoring and control functions in nuclear power plants to relieve the burden on plant operators and enhance safety, (2) review 1985 progress on the Human Factors Program Plan, and (3) be briefed on the status of EOP Implementation.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommitte, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statement's and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. John Schiffgens (telephone 202/634–1414) between 8:15 A.M. and 5:00 P.M. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: March 4, 1986.

Morton W. Liberkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee; Generalized System of Preferences (GSP); Deadline for Acceptance of Petitions Requesting Modification of List of Articles Eligible for Duty-Free Treatment Under the GSP

Notice is hereby given that, in order to be considered during the 1986 GSP annual review, all petitions to modify the list of articles eligible for duty-free treatment under the Generalized System of Preferences (GSP) and requests to review the GSP status of any beneficiary developing country must be received no later than the close of business, Monday, June 2, 1986. The GSP provides for the duty-free importation of qualifying eligible articles when imported from designated beneficiary developing countries: The GSP is authorized by Title V of the Trade Act of 1974, as amended, and has been implemented by Excecutive Order 11888 of November 24, 1975, and mofified by subsequent Executive Orders and Presidential Proclamations.

Interested parties or foreign governments may submit petitions (1) to designate additional articles as eligible for the GSP; or (2) to withdraw, suspend or limit GSP duty-free treatment accorded either to eligible articles under the GSP or to individual beneficiary developing countries with respect to specific GSP eligible articles; or (3) to otherwise modify GSP coverage. Also, any person may file a request to have the GSP status of any eligible beneficiary developing country reviewed with respect to any of the designation critieria listed in subsections 502(b) or 502(c) of the Act (19 U.S. 2662 (b) and (c)).

Petitions and requests to modify GSP treatment should be submitted in English, in 20 copies, in conformity with regulations codified in 15 CFR, Chapter XX, especially Part 2007 and addressed to the Chairman, GSP Subcommittee, Trade Policy Staff Committee, Office of the United States Trade Representative, Room 517, 600 Seventeenth Street, NW., Washington, DC 20506. Further information may be obtained by calling the GSP Information Center at (202) 395–6971.

Prospective petitioners and requestors are strongly advised to review the GSP regulations published in the **Federal Register** on Tuesday, February 11, 1986, (51 FR 5035). Petitions and requests that do not conform to the requirements of these regulations will not be accepted for review.

Notice of petitions and requests accepted for review will be published in the **Federal Register** on or about Tuesday, July 15, 1986. The notice will also provide information concerning the opportunity for interested parties to comment on petitions and requests accepted for review through public hearings and written submissions. Any modifications to the GSP resulting from the 1986 GSP annual review will be

announced on or about April 1, 1987 and will take effect on July 1, 1987.

Donald M. Phillips,

Chairman, Trade Policy Staff Committee.

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–14966, File No. 812–6207]

Fidelity California Tax-Free Fund et al.; Application

March 4, 1986.

Notice is hereby given that Fidelity California Tax-Free Fund; Fidelity Cash Reserves; Fidelity Congress Street Fund; Fidelity Contrafund; Fidelity Corporate Bond Fund; Fidelity Corporate Trust; Adjustable Rate Preferred Stock Fund; Fidelity Daily Income Trust; Daily Money Fund; Daily Tax-Exempt Money Fund; Fidelity Destiny Fund; Fidelity Discoverer Fund; Fidelity Equity-Income Fund; Equity Portfolio: Growth; Equity Portfolio: Income; Fidelity Exchange Fund; Financial Reserves Fund; Fixed-Income Portfolios; Fidelity Freedom Fund; Fidelity Fund; Fidelity Government Securities Fund; Fidelity High Income Fund; Fidelity High Yield Municipals; Institutional Cash Portfolios; Institutional Tax-Exempt Cash Portfolios; Fidelity Limited Term Municipals; Fidelity Magellan Fund; Fidelity Massachusetts Tax-Free Fund; Fidelity Mercury Fund; Fidelity Money Market Trust; Fidelity Mortgage Securities Fund; Fidelity Municipal Bond Fund; Fidelity New York Tax-Free Fund; North Carolina Cash Management Trust; Fidelity Overseas Fund; Fidelity Puritan Fund; Fidelity Qualified Dividend Fund; Rodney Square Fund; Fidelity Securities Fund: OTC Portfolio; Fidelity Select Portfolios; Fidelity Special Situations Fund; Fidelity Tax-Exempt Money Market Trust; Tax-Exempt Portfolios; Fidelity Thrift Trust; Fidelity Trend Fund; Fidelity U.S. Government Reserves Fund; and Variable Insurance Products Fund ("Applicants"), 82 Devonshire Street, Boston, Massachusetts 02109, filed an application on September 25, 1985, and an amendment thereto on February 13, 1986, for an order, pursuant to section 17(b) of the Investment Company Act of 1940 ("Act"), exempting Applicants from the provisions of section 17(a) to the extent necessary to permit the Applicants to pay an equitable portion of the premium of a professional services liability insurance policy to be issued by an affiliate and to allow certain claims thereunder to be settled. The exemption is also sought with respect to all investment companies that may in the future be advised by Fidelity Management & Research Company ("FMR"), and whose trustees, managing general partners, and officers may be covered by such insurance policy. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and the rules thereunder for the text of the applicable provisions.

Applicants are all registered investment companies, and, although the boards are not identical, they have common trustees. FMR, a registered investment adviser, provides investment advice and administrative and portfolio management services to Applicants. Fidelity Distributors Corporation, a wholly-owned subsidiary of FMR, acts as principal underwriter to Applicants. One of the Applicants is Daily Money Fund ("Daily Money"), an open-end diversified investment company which operates as a money market fund and is organized as a Massachusetts business trust. Daily Money is divided into two portfolios: the U.S. Treasury Portfolio and the Money Market Portfolio.

Old Republic International Corporation ("ORIC") is primarily a commercial lines underwriter providing insurance, reinsurance and related financial services to all of the major market areas and is comprised of about 125 separate subsidiaries, joint ventures, divisions and associated companies ("ORIC Group"). One of the first-tier subsidiaries of ORIC is Old Republic Marketing, Inc. ("Marketing"). Old Republic Equity Plans, Inc. ("Plans"), a broker-dealer, is a subsidiary of Marketing. Plans distributes Daily Money to numerous subsidiaries, divisions, and associated companies of ORIC. The accounts of all the companies in the ORIC Group on occasion hold in excess of 5% of the shares of either of Daily Money's portfolios, and of Daily Money as a whole. From time to time these accounts may also hold a presumptively controlling block of the securities of either portfolio and/or of Daily Money as a whole.

Old Republic General Insurance Group, Inc. ("General") is another first-tier subsidiary of ORIC. One of General's subsidiaries is Old Republic Insurance Company, Inc. ("Insurance Company"). According to the application, Insurance Company is one of a decreasing number of insurers that currently offer mutural fund errors and omissions and trustee liability insurance coverage to investment companies, and is also one of the few insurers willing to issue a policy following the policy from provided by the Applicants' primary insurance carriers.

Applicants' errors and omissions insurance coverage is structured such that several insurance companies have provided the various policies that in the aggregate constitute comprehensive coverage. Following notification in early 1985 that the Applicants' two primary errors and omissions insurance carriers would provide substantially reduced coverage, and based on the recommendation of FMR's insurance broker after analysis and comparision of various policies, Applicants' trustees determined that the interests of the Applicants would be furthered by the Applicants' joint participation in the purchase of additional errors and omissions coverage in the amount of $4,000,000 from Insurnace Company. The total premium to be paid to Insurance Company for this coverage is $90,000, of which $24,894 or 27.66% would be allocated to all mutual funds advised by FMR, including Applicants. As with the Funds' primary insurance coverage, payment of the premium would be allocated among the Funds, FMR, and affiliated non-fund entities on a basis determined by each Fund's board of directors to be fair and reasonable to that Fund, pursuant to Rule 17d–1(d)(7) under the Act. It is anticipated that the allocation among the Funds of premiums relating to the Insurance Company coverage will correspond to the allocation among the Funds of premiums relating to the Funds' primary insurance coverage. The Funds' primary insurer currently determines the allocation of premium payments among the Funds based on the ratio of each Fund's net assets to the total net assets of all covered Funds, and has represented that as a result the premium allocated to each Fund is less than its share of the sum of the premiums that would have been paid if such insurance coverage were purchased separately by the insured parties.

The management of Applicants additionally believes that the interests of the Applicants would be served by permitting extra-judicial settlement of certain claims arising under the proposed policy. In order to ensure fairness and eliminate any possibility of overreaching, the officers of each Applicant will continue to be required to report all losses or costs under the policy to that Applicant's Board. In the event of a loss or cost, the Board of the Applicant in question, including its independent members, would determine the amount of such loss or costs. If the amount exceeded the coverage provided

VOL 51 ISS 46 MR 10 1986 UMI

by the two primary carriers, the Board would submit a claim for its payment to Insurance Company. Where a proposed settlement offer by Insurance Company was in an amount less than the claim submitted to it, and where the indemnification provisions of an Applicant's governing documents might cause a claim to be made to that Applicant for such difference, the independent members of the Board of the Applicant in question, with the advice of their independent counsel, would determine the adequacy of the offer by Insurance Company. In determining the adequacy of such offer, the standards specified in section 17(b) would be considered.

Since certain subsidiaries or affiliates of ORIC may from time to time be deemed to be affiliated persons of Daily Money because of the ORIC Group's ownership of its securities, and certain other Applicants may be deemed affiliated persons of Daily Money because of the identity of their investment adviser and of certain of their trustees, Insurance Company may be deemed an affiliated person, or an affiliated person of an affiliated person, of Daily Money and the other Applicants. As such, Insurance Company may be deemed to be prohibited by section 17(a) of the Act from selling an errors and omissions policy to Applicants. In addition, these affiliations also may be deemed to prohibit the settlement of certain claims under the policy by Insurance Company for less than the full amount of the claim.

Applicants assert that, in view of the terms, quality and increasing scarcity of the insurance in question, coupled with the safeguards built into the settlement process through the role of the independent trustees or managing general partners, the purposes of the Act and the public interest would be furthered by granting an order pursuant to section 17(b) of the Act to the extent necessary to permit the Applicants to pay an equitable portion of the premiums of an errors and omissions policy provided by Insurance Company, and to permit the extra-judicial settlement of certain claims arising under such policy for less than the applicable amount of the claim without the need for further exemptive orders.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-14967, File No. 812-6156]

Hutton Advantaged Properties II Limited Partnership; Application

March 4, 1986.

Notice is hereby given that Hutton Advantaged Properties II Limited Partnership ("Partnership"), a Delaware limited partnership, and its general partners, Related Advantaged Residential Associates Inc., Hutton Advantaged Housing Associates Inc. ("Hutton General Partner"), and Related and Hutton Associates Limited Partnership ("Related/Hutton Associates") (collectively, "General Partners", and together with the Partnership, "Applicants"), 645 Fifth Avenue, New York, New York 10022, filed an application on July 17, 1985, and an amendment thereto on January 8, 1986, for an order pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") exempting the Partnership from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of all applicable provisions thereof.

According to the application, the Partnership intends to publicly offer an initial maximum of 10,000 units of limited partnership interests at a price of $5,000 per interest ("Interests"). The Interests will be offered through E.F. Hutton & Company Inc. ("Dealer Manager"), an affiliate of the Hutton General Partner and Related/Hutton Associates, on a "best efforts" basis. Applicants state that the Partnership has the right, exercisable in its sole discretion, to sell and require the Dealer Manager to offer up to 10,000 Interests in addition to the initial maximum of 10,000 Interests. Applicants state that on July 2, 1985, the Partnership filed a Registration Statement on Form S-11 with the Commission under the Securities Act of 1933, as amended, relating to the offering of Limited Partnership Interests in the Partnership, and such Registration Statement was declared effective on August 9, 1985.

Applicants state that the Partnership will operate as a "two-tier" partnership that is, the Partnership, as a limited partner, will invest in other limited partnerships ("Local Partnerships") which will own and operate residential housing developments ("Apartment Complexes") primarily in suburban locations, which are existing or under construction and benefit from financing at rates below those otherwise available from conventional lenders made available through various federal and state government programs or through the issuance of tax exempt bonds. Applicants state that the Partnership will generally acquire a 98% interest in the profits, losses and cash distributions of the Local Partnerships, although the Partnership may acquire a lesser interest, but not less than 90%. Applicants expect that Related/Hutton Associates, one of the General Partners, will become a local affiliated partner of the Local Partnership ("Local Affiliated Partner").

Applicants state that the existing Apartment Complexes owned by the Local Partnerships are expected to be subject to substantial mortgage obligations and will therefore be highly leveraged. Applicants state that the Partnership will obtain additional leverage with respect to Local Partnerships owning existing Apartment Complexes through the use of purchase money notes ("Purchase Money Notes"). Applicants further state that the Purchase Money Notes will be issued to the original partners of such Local Partnerships, evidencing the obligation of the Partnership to pay the deferred portion of the purchase price for its interest in the Local Partnerships, and will be secured by the Partnership's limited partnership interest in the Local Partnerships. Applicants represent that it is the intention of the General Partners that the majority of the Local Partnerships will own Apartment Complexes receiving the benefits of mortgage insurance under sections 221(d)(4) and 207 of the National Housing Act, as amended, tax exempt bond financing under section 103(b)(4) of the Internal Revenue Code of 1954, as amended, or rental assistance under Section 8 of the United States Housing

Act of 1937, as amended. Applicants state that tax-exempt bond financing of a residential rental project under section 103(b)(4) is expressly conditioned upon the occupancy of at least 20% of the units of such project by individuals of low and moderate income. Applicants further state that such occupancy by low and moderate income individuals must be on an ongoing basis and continue during the entire time that the bonds are outstanding.

Applicants state that any subscriptions for Interests will be approved by the General Partners, which approval will be required to be conditioned upon representations as to suitability of the investment for each subscriber. Applicants state that the form of subscription agreement for Interests provides that each subscriber represent, among other things, that he either (i) has an annual gross income of at least $30,000 and a net worth (exclusive of home, home furnishings and personal automobiles) of at least $30,000; or (ii) has a net worth (exclusive of home, home furnishings and personal automobiles) of at least $75,000; or (iii) is purchasing in a fiduciary capacity for a person having the net worth and annual gross income set forth in clause (i) or the net worth set forth in clause (ii).

Applicants state that the General Partners and affiliates of the General Partners ("Affiliates") will receive substantial reimbursements, fees and other compensation from the proceeds of the sale of the Interests. Applicants state that the General Partners and Affiliates will be reimbursed for the actual cost of organizational expenses and will each receive a distributive share of 1% of all items of cash flow, profits and losses of the Partnership and the Local Partnerships respectively. The General Partners and their Affiliates will receive additional fees for managing the conduct of the affairs of the Partnership and the local Partnerships and the continuing operation of Apartment Complexes owned by the Local Partnerships. Applicants represent that all compensation to be paid to the General Partners and Affiliates is specified in the Partnership Agreement and Prospectus and no compensation will be payable to the General Partners or Affiliates not so specified.

Applicants state that the Partnership has received an opinion of Partnership Counsel that it does not come within the definition of "investment company" as defined in section 3(a) of the Act and, therefore, is not required to register as an investment company under the Act. Applicants state that the opinion of Partnership Counsel is based in part upon the existence of the right of both the Partnership and the Local Affiliated Partner, upon a vote of a majority in interest of the Limited Partners, to remove a local general partner from a Local Partnership without cause. Applicants represent that these rights will expire upon the granting of the exemption requested in this Application.

Applicants state that at the time the Registration Statement was declared effective, several significant changes to the Internal Revenue Code of 1954 had been proposed by President Reagan in "The President's Tax Proposals to the Congress for Fairness, Growth and Simplicity" and were under consideration by Congress. Applicants represent that several of the proposed changes would have had an adverse effect on the ability of the Partnership to provide certain tax benefits to investors. Among these, according to Applicants, was the extension of at-risk limitations to real estate, the proposed amendments to the depreciation rules, and changes in the treatment of construction costs and construction period interest. Applicants further represent that many of these proposals would apply to property acquired or placed in service or to costs incurred, after January 1, 1986. Applicants determined, therefore, that it would be in the best interests of investors and consistent with the public policy in favor of providing housing for low and moderate income persons to commence the offering as soon as practicable, in order to raise sufficient proceeds to enable the Partnership to purchase interests in Local Partnerships which acquire Apartment Complexes in 1985.

Applicants believe that expediting the offering, and raising sufficient funds to permit the Partnership to acquire interests in approximately 13 Local Partnerships by the end of 1985, has been beneficial to investors. Applicants state that although the final form of the changes to the tax laws which will be enacted is still uncertain, Partnership Counsel believes that transitional rules may preserve certain tax benefits for Apartment Complexes acquired by Local Partnerships in 1985.

Furthermore, Applicants believe that the relief requested herein is justified in light of the unusual circumstances surrounding the proposed tax legislation. Applicants state that the scope of the tax changes being discussed is very broad and the uncertainty surrounding the legislative process has made planning transactions extremely difficult. Applicants submit that given these factors, the ability to expedite transactions and realize some certainty as to their tax consequences has become crucial in order to permit the realization of the investment objectives described in the Prospectus.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

Applicable Rate of Interest on Nonqualified Withdrawals From a Capital Construction Fund

Under the authority in section 607(h)(4)(B) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1177(h)(4)(B)), we hereby determine and announce that the applicable rate of interest on the amount of additional tax attributable to any nonqualified withdrawals from a capital construction fund established under section 607 of the Act shall be 13.32 percent, with respect to nonqualified withdrawals made in the taxable year beginning in 1985.

The determination of the applicable rate of interest with respect to nonqualified withdrawals was computed, according to the joint regulations issued under the Act (46 CFR 391.7(e)(2)(ii)), by multiplying eight percent by the ratio which (a) the average yield on 5-year Treasury securities for the calendar year immediately preceding the beginning of such taxable year bears to (b) the average yield on 5-year Treasury securities for the calendar year 1970. The applicable rate so determined was computed to the nearest one-hundredth of one percent.

So ordered by: *Acting Deputy Administrator Maritime Administration.*

Administrator, National Oceanic and Atmospheric Administration.

Assistant Secretary for Tax Policy, *Department of the Treasury.*

Dated: March 3, 1986.

Richard E. Bowman,

Acting Deputy Maritime Administrator.

Anthony J. Calio,

Administrator, National Oceanic and Atmospheric Administration.

J. Roger Mentz,

BILLING CODE 4810-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. IP85-14; Notice 2]

Motor Vehicle Safety Standards; Metzeler Kautschuck GmbH; Petition for Determination of Inconsequential Noncompliance

This notice grants the petition by Metzeler Kautschuck GmbH of Munchen, West Germany, to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381, *et seq.*) for a noncompliance with 49 CFR 571.119, Motor Vehicle Safety Standard No. 119, *New Pneumatic Tires for Vehicles Other Than Passenger Cars.* The basis of this petition was that the noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of the petition was published on October 16, 1985, and an opportunity afforded for comment (50 FR 41978).

Paragraph S6.5(d) of Standard No. 119 requires tires to be marked with the maximum load rating and corresponding inflation pressure. Previous agency interpretations of this requirement have noted that only one load rating may appear on the sidewall of tires. Metzeler manufactured 9,000 ME88 Marathon motorcycle tires, in tire size designations 150/90H15, 140/90H16, 130/90H17, 120/90H18, wherein a second maximum load rating was marked for operational purposes. The subject tires were manufactured during the period from March through July 1985. These "H" speed rated motorcycle tires are designed for a maximum load at speeds up to, but not exceeding 130 mph. The second maximum load rating on these tires has been labeled for operations not exceeding 60 mph, and the maximum load rating has been adjusted accordingly. All other labeling is correct.

Metzeler argued that the noncompliance is inconsequential because the failure to label properly has no impact on safety and the tires otherwise comply with all requirements of Standard No. 119. Metzeler contended that it is providing information useful to riders who are using these motorcycle tires that are designed for heavily loaded touring motorcycles. It indicated that the violation only involves additional information, and not the lack of safety labeling. Metzeler further states that when apprised of the agency interpretation on August 8, 1985, it discontinued the use of the second load rating on August 9, 1985.

One comment was received on the petition, which supported it.

The tires covered by this petition have been manufactured for use on touring-type motorcycles. Such vehicles are usually operated at normal highway speeds, with one passenger and occasionally luggage. It is doubtful that a motorcycle tourist would load the motorcycle to the indicated maximum load for 60 mph and subsequently operate the motorcycle (with a passenger and luggage) at speeds up to 130 mph (where the maximum load rating would be lower). Thus, NHTSA has concluded that the error does not compromise safety. It notes that any attempt to correct the noncompliance by buffing off the superfluous information could create a safety problem, as the sidewalls of motorcycle tires are such that the buffing operation could quickly expose the cord material.

Accordingly, it is hereby found that the petitioner has met its burden of persuasion that the noncompliance with Standard No. 119 herein described is inconsequential as it relates to motor vehicle safety, and its petition is granted.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on March 5, 1986.

Barry Felrice,

Associate Administrator for Rulemaking.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Nonconventional Source Fuel Credit; Publication of Inflation Adjustment Factor and Reference Price for Calendar Year 1985

AGENCY: Internal Revenue Service, Treasury.

ACTION: Publication of inflation adjustment factor and reference price for calendar year 1985 as required by section 29(d)(2)(A) of the Internal Revenue Code (26 U.S.C. 29(d)(2)(A) (formerly 44D renumbered by the Tax Reform Act of 1984).

SUMMARY: The inflation adjustment factor and reference price are used in determining the availability of the tax credit for production of fuel from nonconventional sources under section 29 of the Internal Revenue Code.

DATE: The 1985 inflation adjustment factor and reference price apply to qualified fuels sold during calendar year 1985.

Inflation factor: The inflation adjustment factor for calendar year 1985 is 1.4211.

Price: The reference price for all qualified fuels is $24.08 per equivalent barrel for the 1985 calendar year.

Because the above reference price does not exceed $23.50 multiplied by the inflation adjustment factor, the phaseout of credit provided for in section 29(b)(1) of the Internal Revenue Code does not occur for any qualified fuel based on the above reference price.

Note.—After December 31, 1984, gas produced from a tight formation that also falls under any of the categories of gas specified in 18 CFR 272.103(a) (as amended) under the Natural Gas Policy Act of 1978 (NGPA) will no longer be eligible for the credit allowed by section 29 (formerly section 44D) of the Internal Revenue Code.

FOR FURTHER INFORMATION CONTACT:

For the inflation factor—Robert O'Keefe, PM:PFR:R, 1111 Constitution Avenue, NW., Internal Revenue Service, Washington, DC 20224, Telephone Number (202) 376-0720 (not a toll-free number).

For the reference price—Noel J. Sheehan, CC:C:E:1:2, Room 5232, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, Telephone Number (202) 566-4463 (not a toll-free number).

Peter K. Scott,

Acting Deputy, Associate Chief Counsel (Technical).

BOARD FOR INTERNATIONAL BROADCASTING

TIME AND DATE: 9:00 a.m., April 28–30, 1986.

PLACE: RFE/RL Broadcast Center, Oettingenstrasse 67, Am Englischen Garten, 8000 Munich 22, Federal Republic of Germany.

STATUS: Closed, pursuant to 5 U.S.C. 552(b)(c)(1) 22 CFR 1302.4 (c) and (h) of the Board's rules (42 FR 9388, March 12, 1977).

MATTERS TO BE CONSIDERED: Matters concerning the broad foreign policy objectives of the United States Government.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Angelo R. Manginelli, Acting Executive Director, Board for International Broadcasting, Suite 400, 1201 Connecticut Avenue, NW., Washington, DC 20036, 202–254–8040.

Board Meeting: April 28–30, 1986
Board for International Broadcasting, Suite 400, 1201 Connecticut Avenue, NW., Washington, DC 20036

Certification of Closed Meeting

The Acting Executive Director, in accordance with Section 3(f)(1) of the Government in the Sunshine Act (5 U.S.C. 552b(f)(1) and the Board's rules issued under that Act (22 CFR 1302), hereby certifies that the Board meeting of April 28–30, 1986, at which will be discussed matters concerning the broad foreign objectives of the United States Government, may properly be closed to the public on the basis of the exemptions set forth in the Board's rules in 22 CFR 1302.4 (c) and (h).

Dated: February 19, 1986.

Angelo R. Manginelli,
Acting Executive Director.

2

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: Monday, March 17, 1986, 2:00 p.m. (eastern time).

PLACE: Clarence M. Mitchell, Jr., Conference Room No. 200–C on the 2nd Floor of the Columbia Plaza Office Building, 2401 "E" Street, NW., Washington, DC 20507.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

Open

1. Announcement of Notation Vote(s)
2. A Report on Commission Operation (Optional)
3. Report on Pre-complaint Counseling and Complaint Processing for FY 1984
4. Proposed Revisions of the Commission's Regulations on Employee Responsibilities and Conduct
5. Proposed Revision to section 603 of Volume II of the Compliance Manual, Processing Cases Which Raise Issues Included on the Priority on Pending Lists.

Closed

1. Litigation Authorization: General Counsel Recommendations
2. Discussion of Certain Commissioners' Charges

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the Federal Register, the Commission also provides a recorded announcement a full week in advance on future Commission sessions. Please telephone (202) 634–6748 at all times for information on these meetings.)

CONTACT PERSON FOR MORE INFORMATION: Cynthia C. Matthews, Executive Officer at (202) 634–6748.

Dated: March 5, 1986.

Cynthia C. Matthews,
Executive Officer, Executive Secretariat.

HARRY S. TRUMAN SCHOLARSHIP FOUNDATION

TIME AND DATE: 11:00 a.m. Monday, April 14, 1986.

PLACE: Harry S. Truman Library, Independence, Missouri, 64050.

STATUS: The meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

1. Call meeting to order.
2. Welcome—Director, Harry S. Truman Library
3. Adoption of proposed agenda.
4. Approval of minutes of September 9, 1985 meeting.
5. Discussion of economy measures mandated by Pub. L. 99–177.
6. Future scholar recruitment.
7. Report of the Chairman.
8. Report of the Executive Secretary.
9. Resolution to empower the Chairman/Executive Secretary to enter/renew contracts, conclude agreements, and conduct other Foundation business.
10. New business.
11. Discuss and set date, time and place of Fall Board meeting.
12. Adjournment.

CONTACT PERSON FOR MORE INFORMATION: Malcolm C. McCormack, Executive Secretary Telephone 202/395–4831.

Malcolm C. McCormack,
Executive Secretary.

INTER-AMERICAN FOUNDATION BOARD

TIME AND DATE:

March 10, 1986, 6:00–9:00 p.m.
March 11, 1986, 9:00 a.m.–12:00 noon

PLACE: 1515 Wilson Boulevard, Fifth Floor, Rosslyn, Virginia 22209.

The Inter-American Foundation's Board meeting scheduled for March 10–11, 1986 has been cancelled. No new date has been set.

CONTACT PERSONS FOR MORE INFORMATION:

Robert W. Mashek, Secretary to the Board of Directors (703) 841–3844

Charles M. Berk, General Counsel, (703) 841–3812

Dated: March 5, 1986.

Charles M. Berk,
Sunshine Act Officer.

DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

20 CFR Part 10

Claims for Medical Benefits Under the Federal Employees' Compensation Act

AGENCY: Office of Workers' Compensation Programs, Labor.

ACTION: Final rule.

SUMMARY: The Department of Labor is revising the regulations concerning the procedures for submitting bills for medical services provided to Federal employees under Federal Employees' Compensation Act, and establishing limits for fees for medical procedures and services according to a published schedule developed and maintained by the Director of the Office of Workers' Compensation Programs (OWCP).

The final rule provides for the implementation of a schedule of maximum allowable charges; directs its maintenance and revision by the Director of the Workers' Compensation Programs; sets forth procedures for providers to seek reconsideration of fee determinations under the schedule; and establishes requirements for medical bills.

EFFECTIVE DATE: June 9, 1986.

FOR FURTHER INFORMATION CONTACT: Thomas M. Markey, Associate Director for Federal Employees' Compensation, Employment Standards Administration, U.S. Department of Labor, Room S–3229, Frances Perkins Building, 200 Constitution Avenue, NW., Washington, DC 20210; Telephone (202) 523–7552.

SUPPLEMENTARY INFORMATION: Proposed regulations were published in the **Federal Register** on June 7, 1984 (49 FR 23658–63) and provided a 60-day period for comment. On August 24, 1984 (49 FR 33695), the comment period was extended for 60 days to allow additional time for comment. On January 31, 1985 (50 FR 4525), the period for comment was reopened for the period through March 4, 1985, to allow interested persons to evaluate additional information made available by the Department and to comment on the proposed rule. During the comment period, the Department of Labor received fifteen written comments, including five comments from labor organizations which represent Federal employees, five comments from Federal agencies, two comments from medical association, and three comments from private citizens.

The Department's analysis of the comments received are set forth below, starting with comments on the need for the schedule and its application to certain types and groups of medical providers.

Two labor organizations, one Federal agency, and one private citizen questioned the need for regulations establishing maximum allowable charges for medical procedures and services. We believe that the increasing costs of providing medical care to injured Federal workers make a variety of cost containment measures desirable. During the Fiscal Year 1984, the Secretary of Labor authorized payment of $165,000,000 from the Employees' Compensation Fund for medical services and expense associated with workplace injuries and illnesses. This represented a 9.1% increase over Fiscal Year 1983. Moreover, medical costs rose from about $15 million in FY 1967 to $69 million in FY 1977 and to $165,000,000 in FY 1984. An investigation by the Senate Permanent Subcommittee on Investigations, and hearings held by the Subcommittee in March 1982, concluded that while OWCP had a general policy of reviewing bills for reasonableness of charges, there was no consistent application of this policy in OWCP's local district offices, and no guidelines were provided for this purpose. Citing the disproportionate rise in medical outlays as compared to general compensation outlays, the Office of Inspector General strongly recommended adoption of a fee schedule as a first step in cost containment, in successive reports from 1982 until proposed regulations were published. Therefore, we conclude that the fee schedule will assist OWCP in its medical cost containment efforts. The OWCP will continue to monitor and analyse the expenditures for medical procedures and services, including the impact of the schedule of maximum allowable charges.

The comments of one Federal agency reflected an apparent misunderstanding of the scope of application of the schedule of maximum allowable charges. The commentator suggested that significant problems could arise in the case of hospital charges where the hospital would be subject to both the Department's schedule of maximum allowable charges and to a State-mandated billing system (such as the Diagnostic Related Group (DRG) billing systems implemented in the States of New York and New Jersey) or the nation-wide DRG billing system being implemented by the Health Care Financing Administration (HCFA) under the Medicare program. It is not the intent of the Department to apply the schedule of maximum allowable charges to hospitals, pharmacies or nursing homes as the structure of the schedule is not suited to this purpose. Thus, the conflict envisioned by the commentator will not arise. Being cognizant of the efforts of HCFA to utilize DRG billing systems for hospital charges, the Department will, after HCFA has gained experience with and had an opportunity to evaluate DRGs, revisit the issue of cost-containment measures for hospital charges. To eliminate possible future confusion, § 10.411(d)(1) is being amended to exclude hospitals, pharmacies and nursing homes from the medical providers subject to the schedule of maximum allowable charges. However, physicians' charges for services or treatment provided in a hospital or nursing home setting are subject to the schedule. For example, in the case of a laminectomy, charges for supplies and services furnished by the hospital such as operating room and recovery room charges would not be subject to the schedue of maximum allowable charges, but the physician's charges for the surgical procedure and any followup hospital room visits would be subject to application of the schedule.

To bring these regulations into conformance with the practices of Medicare, Medicaid, CHAMPUS, and most states, § 10.411(a) was modified to permit hospitals to submit bills on Uniform Bill (UB–82), or on the provider's own billing form.

One Federal agency commented on the negative impact the proposed rule would have on Federal agency medical facilities which request reimbursement for service rendered to injured Federal workers on a standardized per diem basis rather than by itemized costs per patient. It is not the intent of the Department to require a significant modification to the basic record-keeping and billing structure of these medical facilities. Therefore, § 10.411(d)(1) has been further revised to exempt from application of the schedule of maximum allowable charges requests for reimbursement from medical facilities of the U.S. Public Health Service, Army, Navy, Air Force, and Veterans Administration.

One medical association pointed out that the proposed CPT coding system for identifying the service or procedure performed by the provider does not address all distinctive procedures utilized by providers in diagnosing and treating illnesses. We have amended the rule to indicate that the Health Care Financing Administration Common Procedure Coding System (HCPCS),

which expands CPT–4 to cover a wider range of services, and the *International Classification of Disease, 9th Revision, Clinical Modification* (ICD–9–CM), are to be used to identify services and diagnosed conditions. These are the systems which have been adopted by the Health Care Financing Administration (HCFA), which administers Medicare and Medicaid, and by major insurance companies, and therefore should be most familiar to providers. The Department notes that the Washington State Relative Value Schedule (RVS), which serves as the model for OWCP's proposed fee schedule, regulates some fees by review of the provider's medical report, imposing no standard fee. Similarly, for procedures and services for which no unit value is established in the OWCP fee schedule, payment commensurate with the service performed will be made, taking into consideration the individual circumstances described in the medical report. This is provided for in the regulations at § 10.411(e), which is not revised.

Identical suggestions were made by two labor organizations that the Department should consider adopting the medical fee schedule of the Health Insurance Association of America (HIAA) inasmuch as the HIAA schedule is utilized by a large number, if not the majority, of OPM authorized Federal Employee Health Benefits Plans. The schedule of HIAA was one of the existing schedules of fees which were reviewed by the OWCP. However, it was found that the HIAA schedule was not sufficiently comprehensive in that it covers only surgical fees and does not address medical fees or procedures such as radiololgy, pathology, and physical therapy. In addition, the regional divisions to account for geographic cost variations were larger and thus less reflective of such variations than the Metropolitan Statistical Areas (MSA) established by the Bureau of the Census, which provided a high statistical correlation between HCFA and industry data.

Comments were also received concerning the possible negative effects the proposed schedule could have for the injured worker.

The proposed rule, or components thereof, led several commentators (two labor organizations, three agencies, one medical association, and one private individual) to contend that physicians may choose not to treat injured Federal employees thereby limiting the injured worker to fewer physicians from whom to obtain treatment with a possible result of reduced quality of care. Bases for this argument included the contentions that physicians do not utilize the CPT coding system and would not be willing to make the conversion, and that physicians will not be willing to risk the possible reduction of charges under the schedule of maximum allowable charges with the end result in either situation being the refusal by some physicians to accept injured Federal workers as patients. With regard to the first contention, the Department notes that HCFA is requiring all physicians (hospitals being excluded) to utilize the HCPCS coding system (an expansion of the CPT coding system) in billings under the Medicare program, and that the American Medical Association and the Health Insurance Association of America are involved in HCFA's ongoing work in devising HCPCS. Thus, the Department concludes that the vast majority of physicians have adopted or will adopt the HCPCS/CPT coding system in their billing procedures and that the requirement for the use of HCPCS/CPT will not result in injured Federal workers being refused medical treatment. With regard to the contention that providers will simply choose not to be subject to the possibility of fee reduction, the system as planned will subject approximately 5% of all billed medical procedures to question. Within this 5%, reduction will not occur or will be lessened where justification for a higher fee is shown. Further, it is expected that some percentage of medical providers will accept the maximum allowable fee as reasonable and will not contest the reduction of fee. Lastly, the fact that the fee for a particular service or procedure is reduced under the schedule does not necessarily mean that the fee for other services or procedures performed by that same provider will also be reduced. The Department concludes that the schedule of maximum allowable charges will not result in a significant number of providers refusing to treat injured Federal workers solely on the basis of the existence and application of the schedule.

The most frequently mentioned area of concern in the comments received pertained to §§ 10.411(i) and 10.412 (c) and (d) and the potential for injured workers having to bear some of the cost of the medical care for job-related injuries. Two labor organizations questioned the authority of the Department under 5 U.S.C. 8103 to establish a schedule of maximum allowable charges which may place injured Federal employees in a position where they may become vulnerable for payment of medical charges not accepted or approved by the OWCP. Three additional labor organizations, three Federal agencies, and one private citizen also expressed concern that under the proposed rule an injured employee could be liable for that amount of the charge over the allowable maximum, especially where the employee (who, as one labor organization pointed out, probably would not know the maximum allowable charge for a particular service or procedure) paid the medical provider directly and then requested reimbursement from OWCP.

Possible solutions put forth by the commentators to minimize or eliminate the envisioned vulnerability of injured workers for such payments included the recommendations to: Provide legal defense of injured workers who may become subject to litigation by the medical provider; pay all reimbursement requests in full; make direct billing of claim to OWCP mandatory for providers, thus removing the injured worker from the payment process; and establish criminal penalties against any provider who seeks payment from an injured employee for an amount over and above the maximum allowable charge. The Department agrees that injured workers should not be subject to payment of any portion of a charge above the allowable maximum. However, the proposed solutions taken individually are either impractical or unacceptable. The Department does not possess sufficient resources to defend injured workers in the event the medical provider attempts litigation. Further, this method of protection of the employee (whether provided by the Department of Labor or by the Department of Justice) would not, in and of itself, tend to reduce the instances of litigation. Payment of all employee requests for reimbursement of paid medical charges without regard to reasonableness is unacceptable as it simply ignores the cost-containment intent of the proposed rule.

With regard to the requirement for direct provider billing, we view such action as impractical. Although most providers bill OWCP directly, there are a significant number of cases in which, because OWCP has not yet accepted a case, because of an ongoing family-physician relationship with the provider, or because of the physician's preference, the claimant has already reimbursed the physician. This practice would continue unless an effective sanction were adopted, and it is difficult to imagine a sanction (such as OWCP's refusal to pay for treatment) which would not exacerbate the problem it was intended

VOL 51 ISS 46 MR 10 1986 UMI

to solve. Finally, the imposition of criminal sanctions is beyond the purview of these regulations.

To the extent that this problem may occur, the Department believes it will occur infrequently. However, in order to provide the injured worker with protection against being made vulnerable to payment for injury-related medical charges, the Department proposes a combination of sanctions against the provider and indemnification of the injured worker. Existing regulation (20 CFR 10.450; 49 FR 18980) provides for exclusion of medical providers from participation in the Federal Employees' Compensation program and for denying payment to such providers out of the Employees' Compensation Fund. The Department is revising § 10.450 to provide for exclusion for any single collection or any single formal and deliberate attempt by a provider or by anyone acting on the provider's behalf (to include billing, referral to a collection agent, or initiation of litigation) to collect from the injured worker any amount in excess of the maximum allowable charge. Thus, unless the provider agrees to cease such action, an attempt to collect the disallowed portion of the provider's charge will result in initiation of procedures to exclude the provider from payment under the Federal Employees' Compensation Act. Where a provider is excluded, notification of the exclusion will be provided, in accordance with 20 CFR 10.456(a), to certain individuals and agencies including the Health Care Financing Administration and the State or local authority responsible for licensing or certifying the excluded party.

In order to provide protection to the injured worker who pays the provider an amount which may exceed the maximum allowable charge under the schedule and subsequently requests reimbursement from OWCP, § 10.412 is modified to provide for OWCP to advise the provider of the maximum allowable fee for the service and request that the provider reimburse the injured worker for that amount of the payment above the allowable fee or provide justification for the additional charge. Failure of the provider to make such reimbursement within a reasonable time or to provide satisfactory justification will be deemed collection of a fee warranting initiation of the exclusion procedures (20 CFR 10.450–10.457). In addition, in determining the amount to be reimbursed to an employee who has paid a bill which exceeds the normal rate, the Office will take into consideration all the circumstances, including the fact that the employee paid the bill in good faith reliance on full reimbursement.

Section 10.411(i) has been expanded as a result of comments from a labor organization, a Federal agency, and one individual, to provide that if a fee for a particular service or procedure is lower to the general public than as provided by the schedule of maximum allowable fees, the provider shall bill at the lower rate. A charge to an injured Federal worker for a particular service or procedure which is higher than the provider's charge to the general public for that same service or procedure will be considered as a charge "substantially in excess of such provider's customary charges" for the purpose of the provisions of § 10.450(d) concerning exclusion of providers. The Department believes that this will minimize the potential for providers selectively increasing their usual and customary charges to equal the maximum allowable fee under the schedule. Further, as previously stated, the OWCP will continue to monitor and analyse the expenditures for medical procedures and services, including the impact of the schedule of maximum allowable charges.

The processing of provider requests for reconsideration of fee determinations and the requirements for payee verification of receipt of payment in claimant reimbursement situations were also commented upon.

One Federal agency expressed concern that the appeals procedure involved in adjudication of fees which exceed the schedule could result in a significant increase in paperwork processing requirements and concern over OWCP's ability to respond to providers within 30 days as specified by § 10.411(g)(2). We also appreciate the potential for increased paperwork but view it as an unavoidable consequence of the necessity to provide due process to providers whose charges are partially reduced under the schedule. However, we do not anticipate such processing to be overburdening or to endanger our ability to respond to the provider in 30 days givern the rather limited circumstances enunciated in § 10.411(g)(1) which will justify reevaluation of the amount paid.

The requirement in § 10.412(a)(1) for the signature of the provider or the provider's designee on a claimant's request for reimbursement certifying that payment for the service was received was viewed by one Federal agency as causing, in many cases, an unneccessary additional contact with the provider where the bill otherwise showed evidence of payment. The Department agress that such extra step is not essential. Therefore, § 10.412(a)(1) is revised to eliminate the signature requirement in all instances, and in lieu thereof, to include as "evidence . . . that payment for the service was received" a signed statement by the provider, a mechanical stamp or other device showing receipt of payment, a copy of the claimant's cancelled check (both front and back), or a copy of the claimant's credit card receipt. The elimination of the need in all instances for the signature of the provider (or official designee) certifying receipt of payment by the claimant in no way affects the requirement for such signature as provided by § 10.411(b), which also applies to bills submitted for reimbursement.

One medical association submitted extensive comments primarily related to the construction of the schedule of maximum allowable charges. These comments covered the general areas of selection of the Washington State RVS, development of the geographic cost index, and update procedures for the system.

On selection of the Washington State RVS, the commentator stated that the Washington State RVS, which is based on the 1969 California Relative Value Studies, is a "charge-based" system (i.e., is based upon an analysis of actual physician charge patterns), and that a "resource cost-based" system which includes such factors as time, complexity, cost of advanced professional education, and overhead is more appropriate. Also, while recognizing that the Washington State RVS has been modified over time with the involvement of the Washington State Medical Association, and that the revisions have taken such factors as time and complexity into account, the commentator noted that such modifications were not done with the contemplation of nationwide application in light of legitimate regional variations in care and that consensus judgments of physicians in any one state are not necessarily appropriate to physicians nationwide. The Washington State Department of Labor and Industry adopted the California system following a careful and thorough evaluation of the California unit values by a team of medical physicians appointed by that Washington State Department. Since then, a similar panel of physicians has updated the Washington State RVS annually to take account of new technologies in the practice of medicine by adjusting the unit values according to the risk, time, and ability involved in

performing the procedure. Additional annual adjustments, based on the same set of criteria, have been made by the panel to unit values for procedures whose technology may have remained constant, but whose relative "value" is now considered different from the California system. Moreover, the Department views the "charge-based" RVS to be a reasonably accurate indicator of resource costs based on the economic theory which purports that prices are a reflection of resource costs plus a reasonable profit. While it is agreed that the modifications to the Washington State RVS did not contemplate nationwide application, we believe that the procedures reviewed by the Washington State panel of physicians are accepted nationwide, are coded using a system usable nationwide (i.e., CPT), and on average are generally not viewed differently in terms of their relative "value" by physicians of different regions. Further, in reviewing existing schedules of medical fees, the Department did not find a comprehensive "resource cost-based" system of nationwide scope. However, should such a system be developed, it would be evaluated for possible application by the Department.

With regard to the geographic cost index developed to account for regional variations in charges, the commentator agreed that the use of MSAs and non-MSAs to define the geographic units appears to be preferable to the other options considered by the Department, but expressed concern that fees of physicians with practices based in teaching hospitals located outside of an MSA and physicians practicing in non-MSA regions located near an MSA may differ significantly from the non-MSA average. A similar concern was expressed by a Federal agency. It is acknowledged that fees of physicians with practices based in teaching hospitals, many of which are in MSA rather than non-MSA regions, are usually higher than those with practices in non-teaching hospitals. The schedule of maximum allowable charges reflects this phenomena to some extent by incorporating teaching hospital physician fee data into the development of the geographic costs indices for both MSA and non-MSA regions. Also, the fact that a provider possesses unusual qualifications (such as professorial rank) serves as a basis for requesting reevaluation of the maximum allowable charge. The use of MSA/non-MSA regional divisions may create a degree of imprecision in the indices near the "border areas" between an MSA and non-MSA region. The creation of a "transition zone" between regions is not possible due to lack of available data concerning location and geographic size of and procedure unit values for such "zones." Some degree of imperfection is difficult, if not impossible, to avoid when dividing an area into regional units such as MSAs. However, it is our judgment that a regional application of the schedule is appropriate given the fact that medical costs vary across the country and the benefits yielded from reflecting these variances far outweigh the imperfections associated with the MSA/non-MSA structure.

The commentator also questioned the appropriateness of using Medicare expenditure information as a starting point in developing the geographic cost indices since that information may not necessarily reflect physician charges given possible reduction by carrier "reasonable charge" determinations, and since it covers a population quite different from the FECA population. Recognizing the imperfections of Medicare data, as discussed by the Department in the Supplemental Information of the original proposal, the data was used as a starting point where the OWCP could not rely solely on FECA data. Medicare data was also used to substantiate the reliability of the FECA data as an indicator of regional variations in the cost of providing medical care, and it was found that the Medicare data correlated highly with both FECA and private sector based surgical data. Thus, the Department views Medicare data as a reliable measure of the degree of regional cost variations as opposed to a measure of actual costs.

With regard to the use of FECA costs in developing the indices, the commenter questioned the validity of the indices where data on some services was based on a limited number of claims, and also questioned the appropriateness of applying an index of FECA expenditures to a relative value unit to arrive at a physician payment. In developing the geographic cost indices, OWCP analyzed an average of 400 records per MSA/non-MSA and observed consistency in service mix throughout the country and in procedure price within each MSA/non-MSA (i.e., all procedures in a high cost area tended to be high relative to the cost of all procedures in a low cost area). Therefore, the fact that there were limited claims for certain specific procedures is not seen as undercutting the validity of the estimate which was based on an evaluation of several procedures and an average of 400 records within an MSA/non-MSA region, especially since the indices were based on a weighted average which accorded those procedures with fewer records less weight in the overall computation, and in view of the high correlation among FECA, Medicare, and private sector based surgical data. Finally, FECA expenditures were used to provided a reliable measure of regional variation in the cost of providing medical care, and not as a basis for setting prices for various medical procedures. The latter function is provided by the Washington State RVS.

Lastly, with regard to the maintenance of the schedule of maximum allowable charges, the commentator suggested that a national price index, preferably the medical care component of the Consumer Price Index, be used to update the dollar conversion factors, and that the Department should consider establishing its own process to maintain the RVS which underlies the schedule. Having found the Washington State RVS to have the most current and comprehensive data available, and given the process used by Washington State to assign and adjust its relative values, the Department will utilize the most recent revision of the relative value assignments published by the State of Washington Department of Labor and Industries. With regard to the internal procedure for updating the geographic cost indices to reflect economic change, the OWCP will adjust these indices by the annual percent change in the Medicare Economic Index for Physicians' Services as determined by the Health Care Financing Administration. The Medicare Economic Index consists of two components: one measuring increases in general earnings level (attributable to factors other than increases in productivity) and the other measuring increases in expenses of the kind incurred by physicians. This index was selected on the basis that it is clearly applicable to the medical community, easy to obtain, administratively facile to implement, and a valid and reliable measure of annual adjustments in both physicians' medical practice expenses and general earnings.

Classification—Executive Order 12291

The Department of Labor has concluded that the regulatory revision does not constitute a "major rule" under Executive Order 12291, because it is not likely to result in: (1) An annual effect of the economy of $100 million or more; (2) a major increase in cost or prices for consumers, individual industries, Federal, State or local government

UMI

agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory analysis is required.

Paperwork Reduction Act

The information collection requirements entailed by the proposed regulations were previously approved by OMB under OMB Control Nos. 1215–0055 and 1215–0142. As no changes in these requirements were made in the final regulations, these control numbers remain valid.

Regulatory Flexibility Act

The Department believes that this rule will have "no significant economic impact upon a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act, Pub. Law 96–354, 91 Stat. 1164 (5 U.S.C. 605(b)). Although this rule is applicable to small entities it should not result in or cause a significant economic impact to any small entity subject to its provisions. This conclusion is reached because application of the schedule of maximum allowable charges established by this rule will not significantly reduce the amount of money paid to most medical providers for the medical services rendered to FECA beneficiaries. The Secretary has certified these facts to the Chief Counsel for Advocacy of the Small Business Administration. Accordingly, no regulatory impact analysis is required.

List of Subjects in 20 CFR Part 10

Claims, Government employees, Archives and Records, Health records, Freedom of Information, Privacy, Penalties, Health professions, Workers' compensation, Employment, Administrative practice and procedure, Wages, Health facilities, Dental health, Medical devises, Health care, Lawyers, Legal services, Student, X-rays, Labor, Insurance, Kidney disease, Lung disease, Tort claims.

Accordingly, Part 10 of Chapter I of Title 20 of the Code of Federal Regulations is amended as set forth below.

PART 10—[AMENDED]

1. The authorities citation for Part 10 is revised to read as follows:

Authority: 5 U.S.C. 301; Reorganization Plan No. 6 of 1950, 15 FR 3174, 64 Stat. 1263; 5 U.S.C. 8145, 8149; Secretary's Order 6–84, 49 FR 32473; Employment Standards Order 78–1, 43 FR 51469.

2. Section 10.1 is amended by revising paragraph (b) to read as follows:

§ 10.1 Statutory provisions.

* * * * *

(b) The Act provides for the payment of dollar benefits to enumerated classes of persons who are injured or disabled while in the performance of their duties in service to the United States and to persons within such classes who become sick or disabled as a result of their employment with or service to the United States. The Act further provides for the payment of dollar benefits to certain survivors of persons who have died as a result of or while in the performance of employment or services rendered to the United States. In addition to dollar benefits, eligible beneficiaries who have become disabled as a consequence of a service related injury, disease or other compensable condition, shall be entitled to receive the full range of medical benefits and services made necessary by the compensable condition, which shall be provided at the expense of the United States, subject to the limitations imposed by §§ 10.411 and 10.412 of this part. In appropriate cases, vocational rehabilitation services shall be provided to eligible beneficiaries. In the case of death due to a compensable injury, disease or other condition, certain burial expenses shall be paid, subject to the provisions of 5 U.S.C. 8134.

* * * * *

3. Section 10.411 is revised to read as follows:

§ 10.411 Submission of bills for medical services, appliances and supplies; limitation on payment for services.

(a)(1) All charges for medical and surgical treatment, appliances or supplies furnished to injured employees, except for treatment and supplies provided by hospitals, pharmacies and nursing homes, shall be supported by medical evidence as provided in § 10.410, itemized by the physician or provider on the American Medical Association standard "Health Insurance Claim Form," OWCP 1500a "Instructions for Completing Health Insurance Claim Form," and shall be forwarded promptly to the Office for consideration. The provider of such service shall identify each service performed, using the Health Care Financing Administration Common Procedure Coding System (HCPCS as periodically revised), with brief narrative description or, where no code is applicable, a detailed description of services performed. The provider shall also state each diagnosed condition and furnish the corresponding diagnostic code using the "International Classification of Disease, 9th Edition, Clinical Modification" (ICD–9–CM). A separate bill shall be submitted when the employee is discharged from treatment or monthly, if treatment for the work-related condition is necessary for more than 30 days.

(2) Charges for appliances, supplies, services or treatment provided by hospitals shall be supported by medical evidence as provided in § 10.410. Such charges should be itemized by the provider on Uniform Bill (UB–82), or in lieu thereof, on the provider's billhead stationery, and shall be forwarded promptly to the Office for consideration.

(3) Charges for appliances, supplies or services provided by pharmacies and nursing homes shall be itemized on the provider's billhead stationery or a standard form and forwarded promptly to the Office for consideration. Bills for prescription drugs must include the generic or trade name of the drug provided, the prescription number, and the date the prescription was filled.

(b) The physician or other provider (or official designee) shall sign the billing form signifying that services were performed as described and were necessary, and signifying agreement to accept the fee determined by the Office as payment in full for each itemized service.

(c) Bills submitted by providers, other than hospitals, pharmacies and nursing homes, which are not itemized on the American Medical Association "Health Insurance Claim Form," or are not signed by the provider and the claimant, or on which procedures are not identified by the provider using HCPCS/CPT codes, or on which diagnoses are not identified using ICD–9–CM codes, may be returned to the provider for correction and resubmission.

(d)(1) Payment for medical and other health services furnished by physicians and other persons for work-connected injuries shall, except as provided below, be no greater than a maximum allowable charge for such service as determined by the Director. The schedule of maximum allowable charges is not applicable to charges for appliances, supplies, services or treatment provided and billed for by hospitals, pharmacies or nursing homes, but is applicable to charges for services or treatment furnished by a physician in a hospital or nursing home setting. The schedule of maximum allowable charges is also not applicable to charges for appliances, supplies, services or treatment furnished by medical facilities of the U.S. Public Health Service, the Departments of the Army, Navy and Air Force, and the Veterans Administration. The Director shall maintain a schedule of maximum allowable fees for procedures performed in a given locality. The schedule shall consist of an assignment of a value to procedures identified by HCPCS/CPT which represents the relative skill, effort, risk, and time required to perform the procedure, as compared to other procedures of the same general class; a classification of the procedure into one of the following categories: medical, surgical, pathology, radiology; an index representing the average cost of medical care per capita in the locality where service is provided, in relation to other areas, as a measure of the reasonable cost of a single service in that area; and a monetary value assignment (conversion factor) for one unit of value in each of the four categories of service. Payment for performance of a procedure identified by a HCPCS/CPT code shall not be more than the amount derived by multiplying the relative value for that procedure by the geographic index for services in that area and by the dollar amount assigned to one unit in that category of service.

(2) The "locality" which serves as a bases for determination of average cost is defined by the Bureau of Census Metropolitan Statistical Areas. The Director shall base the determination of the relative per capita cost of medical care in a locality using information about enrollment and medical cost per county, provided by the Health Care Financing Administration (HCFA).

(3) The relative value assignments published by the State of Washington Department of Labor and Industries shall be adopted, using the most recent revision. The conversion factors for each of the four categories of service used in the State of Washington will be adopted as the base dollar multipliers for those categories and will be associated with the average cost of medical care derived from HCFA data for Washington State. The geographic index factor for a given MSA shall be based on statistical analyses of charges to OWCP, for groupings of MSA's that have similar HCFA per capita medical costs when compared to the per capita cost of medical care for the State of Washington. Index factors will be further adjusted to reflect statistical data concerning charges submitted for services to OWCP.

(4) Thus, if the unit value for a particular surgical procedure is 14.0, and the dollar value assigned to one unit in that category of service (surgery) is $59.49, then the maximum allowable charge for one performance of that procedure, in a locale whose index is 1.0, would be the product of 14, 1.0, and $59.49, or $832.86.

(e) Where there is wide variation in the time, effort and skill required to perform a particular procedure from one occasion to the next, the Director may choose not to assign a relative value to that procedure, but the allowable charge for the procedure may be set individually based on consideration of a detailed medical report and other evidence. The Office may, at its discretion, set fees without regard to schedule limits for specially authorized consultant examinations, for examinations performed under 5 U.S.C. 8123, and for other specially authorized services.

(f) The Director shall review the schedule of fees at least once a year, and may adjust the schedule or any of its components when deemed necessary or appropriate.

(g)(1) A provider's designation of the HCPCS/CPT code to identify a procedure being billed shall be accepted by the Office if it is consistent with medical reports and other evidence.

Where no code is supplied, the Office may determine the correct procedure code based on the narrative description of the procedure supplied on the billing form and in associated medical reports, and pay no more than the maximum allowable fee for that procedure. If the charge submitted by a provider for a treatment or service supplied to an injured employee exceeds the maximum amount determined to be reasonable according to the schedule, the Office shall pay the amount allowed by the schedule for that service and shall notify the provider in writing that payment was reduced for that service in accordance with the schedule. The provider shall also be notified of procedures for requesting reconsideration of the balance of the charge.

(2) A physician or other provider whose charge for service is only partially paid because it exceeds a maximum allowable amount set by the Director may, within 30 days, request reconsideration of the fee determination. Such request should be made to the OWCP District Office having jurisdiction over the injured employee's case, and must be accompanied by documentary evidence that the actual procedure performed was incorrectly identified by HCPCS/CPT code; that the presence of a severe or concomitant medical condition made treatment especially difficult; or that the provider possessed unusual qualifications. Board-certification in a specialty is not sufficient evidence in itself of unusual qualification to justify an exception. These are the only circumstances which will justify reevaluation of the paid amount. A list of OWCP District Offices and their respective areas of jurisdiction is available upon request from the U.S. Department of Labor, Office of Workers' Compensation Programs, Washington, DC 20210. Within 30 days of receiving the request for reconsideration, the OWCP District Office shall respond in writing stating whether or not an additional amount will be allowed as reasonable, considering the evidence submitted.

(h) If an appealed amount continues to be disallowed by the decision of the OWCP District Office, the provider may apply, within thirty days of the date of that decision, to the Assistant Regional Administrator of the region having jurisdiction over the district office. The application may be accompanied by additional evidence. Within 60 days of receipt of the application, the Assistant Regional Administrator shall issue a decision in writing stating whether or not an additional amount will be allowed as reasonable, considering the evidence submitted. This decision shall be final, and shall not be subject to further review.

(i)(1) A provider whose fee for service is partially paid by OWCP as a result of the application of its fee schedule or other tests for reasonableness in accordance with these regulations shall not request reimbursement from the employee (patient) for additional amounts.

(2) Where a provider's fee for a particular service or procedure is lower to the general public than as provided by the schedule of maximum allowable charges, the provider shall bill at a lower rate. A charge to an injured Federal employee for a particular service or procedure which is higher than the provider's charge to the general public for that same service or procedure will be considered a charge "substantially in excess of such provider's customary charges" for the purposes of § 10.450(d).

(3) A provider whose fee for service is partially paid by OWCP as the result of the application of its schedule of maximum allowable charges and who collects or attempts to collect from the injured employee, either directly or through a collection agent, any amount in excess of the charge allowed by the Office, and who does not cease such action or make appropriate refund to the injured employee within 60 days of the date of the decision of the Office, shall

VOL
51
ISS
46
MR
10
1986
UMI

be subject to the exclusion procedures as provided by § 10.450(h).

4. Section 10.412 is revised to read as follows:

§ 10.412 Reimbursement for medical expenses, transportation costs, loss of wages and incidental expenses.

(a)(1) If bills for medical, surgical, or dental services, supplies, or appliances have been paid for by an injured employee on account of an injury incurred in the performance of duty, an itemized bill on the American Medical Association "Health Insurance Claim Form," OWCP 1500a "Instructions for Completing Health Insurance Claim Form," together with a medical report as provided in § 10.410, may be submitted to the Office for consideration. The provider of such service shall state each diagnosed condition and furnish the applicable ICD–9–CM diagnostic code and identify each service performed using the applicable HCPCS/CPT procedure code, with a brief narrative description of the service performed, or where no code is applicable, a detailed description of that service. The bill must be accompanied by evidence that payment for the service was received from the injured employee and the amount of that payment. Acceptable evidence that payment was received includes, but is not necessarily limited to, a signed statement by the provider, a mechanical stamp or other device showing receipt of payment, a copy of the claimant's cancelled check (both front and back), or a copy of the claimant's credit card receipt.

(2) If services were provided by a hospital, pharmacy or nursing home, the bill should be submitted in accordance with the provisions of § 10.411(a) (2) or (3), as appropriate. Any request for reimbursement must be accompanied by evidence, as described in paragraph (a)(1) of this section, that payment for the service was received from the employee and the amount of that payment.

(3) These requirements may be waived by the Office if extensive delays in the filing or the adjudication of a claim make it unusually difficult for the claimant to obtain the required information.

(b) Copies of bills shall not be paid unless they bear the original signature of the provider, with evidence of payment. Payment for medical and surgical treatment, appliances or supplies shall in general be no greater than the maximum allowable charge for such service determined by the Director, as set forth in § 10.411.

(c) If a claimant is only partially reimbursed for medical expenses because the amount paid by the claimant to the physician for a service exceeds the maximum allowable charge set by the Director's schedule, the Office shall advise the provider of the maximum allowable charge for the service in question and allow the provider the opportunity to refund to the claimant, or credit to the claimant's account, the amount paid by the claimant which exceeds the maximum allowable charge, or to request reconsideration of the fee determination as provided by § 10.411 (g) and (h). Failure of the provider to make appropriate refund to the claimant, or to credit the claimant's account, within 60 days after the date of this notification by the Office, or the date of a subsequent reconsideration decision which continues to disallow all or a portion of the appealed amount, shall result in initiation of exclusion procedures as provided by § 10.450(h).

(d) After notification as provided in paragraph (c) of this section, if the amount of money paid in excess of the charge allowed by the Office is not refunded by the provider or credited to the claimant's account, the Office may make reasonable reimbursement to the claimant based on a review of the facts and circumstances of the case.

5. Section 10.450 is revised by adding paragraph (h) to read as follows:

§ 10.450 Exclusion for fraud and abuse: Grounds.

* * * * *

(h) Collected or attempted to collect from the claimant, either directly or through a collection agent, an amount in excess of the charge allowed by the Office for the procedure performed, and has failed or refused to make appropriate refund to the injured employee, or to cease such collection attempts, within 60 days of the date of the decision of the Office.

Signed at Washington, DC, this 3rd day of March, 1986.

William E. Brock,

Secretary of Labor.

Establishment of Airport Radar Service Areas; Final Rule

VOL 51
ISS 46
MR 10
1986
UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 85-AWA-4]

Establishment of Airport Radar Service Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action designates Airport Radar Service Areas (ARSA) at the 11 airports listed below. The designation date for Metropolitan Oakland International Airport, CA, is April 9, 1987, due to an unforeseen delay in delivery and installation of equipment at Oakland Tower. Each location designated is a public or military airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of each ARSA will require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at each of the affected locations will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

EFFECTIVE DATE: 0901 UTC, April 10, 1986, except for Metropolitan Oakland International Airport, CA, ARSA which will be effective 0901 UTC, April 9, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Burns, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On April 22, 1982, the National Airspace Review (NAR) plan was published in the **Federal Register** (47 FR 17448). The plan encompassed a review of airspace use and the procedural aspects of the air traffic control (ATC) system. The FAA published NAR Recommendation 1-2.2.1, "Replace Terminal Radar Service Areas (TRSA) with Model B Airspace and Service (Airport Radar Service Areas)," in Notice 83-9 (48 FR 34286, July 28, 1983) proposing the establishment of ARSA's at Columbus, OH, and Austin, TX. Those locations were designated ARSA's by SFAR No. 45 (48 FR 50038, October 28, 1983) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis. The original expiration dates for SFAR 45, December 22, 1984, for Columbus and January 19, 1985, for Austin were extended to June 20, 1985 (49 FR 47176, November 30, 1984).

On March 6, 1985, the FAA adopted the NAR recommendation and amended Parts 71, 91, 103 and 105 of the Federal Aviation Regulations (14 CFR Parts 71, 91, 103 and 105) to establish the general definition and operating rules for an ARSA (50 FR 9252), and designated Austin and Columbus airports as ARSA's as well as the Baltimore/Washington International Airport, Baltimore, MD (50 FR 9250). Thus far the FAA has designated 11 ARSA's as published in the **Federal Register** on November 1, 1985 (50 FR 45718), 11 ARSA's on December 9, 1985 (50 FR 50254), and 12 on February 7, 1986 (51 FR 4872), in the implementation of this NAR recommendation.

On September 30, 1985, the FAA proposed to designate ARSA's at 11 airports under Airspace Docket No. 85-AWA-4 (50 FR 39822). This rule designates ARSA's at these airports. Interested parties were invited to participate in this rulemaking proceeding by submitting comments on the proposals to the FAA. Additionally, the FAA has held informal airspace meetings for each of the proposed airports. In response to public comments received the FAA has modified several of the proposals.

Related Rulemaking

In addition to the airports addressed here and those previously designated, the FAA published proposed ARSA designations for 17 additional airports on September 30, 1985 (50 FR 39822).

Discussion of Comments

The FAA has received comments on the basic ARSA program as well as comments directed toward the proposed individual designations. Additionally, several of the comments on individual designations are common or speak to the basic program itself. Discussion of the comments is divided into two sections. The first addresses common and ARSA program comments, the second addresses comments on the proposals at particular locations.

ARSA Program Comments

Comments received from the Aircraft Owners and Pilots Association (AOPA) and several others claimed that the notification for some of the informal airspace meetings held for some of the candidate airports was inadequate. The schedule of the meetings was published in the Notice of Proposed Rulemaking (NPRM) (September 30, 1985, 50 FR 39822). Additionally, the FAA sent announcements to individuals, fixed-base operators, aviation user organizations, and to the news media organizations in each airport's area. The ARSA program has received considerable coverage in newsletters and official publications of aviation organizations and the schedule of the meetings mailed to members. Furthermore, a 126-day comment period was provided for Airspace Docket No. 85-AWA-4 in which the public could make comment to the public docket on the proposals. For the above reasons the FAA believes the opportunity was sufficient to permit full public comment on the proposals.

AOPA and others commented that, notwithstanding the statement by the FAA in the Regulatory Evaluation contained in the notice, increased air traffic controller personnel and equipment would be needed to handle the increased traffic expected due to the mandatory provisions of the ARSA. FAA's experience with the current ARSA's has been that while there is an increase in the amount of traffic being handled by controllers, this increase is significantly offset by the reduction in the amount of control instructions that must be issued under ARSA procedures as compared to TRSA procedures. However, the FAA recognizes that the potential exists for a need to establish additional controller positions at some facilities due to increased workload should the expected efficiency improvements in handling traffic not fully offset the increased number of aircraft handled. Further, FAA does not expect to incur additional equipment costs in implementing the ARSA program. In some instances, previously adopted plans to replace or modify older existing equipment may be rescheduled to accommodate the ARSA program. However, no new equipment is expected to be required as a result of the ARSA program.

Several commenters, including AOPA and the Experimental Aircraft Association (EAA), disagreed with the FAA's conclusion that the additional air traffic could be accommodated with existing manpower at locations where TRSA participation was low. The FAA's conclusion for the total program was in part based upon the fact that participation in the existing TRSA's was quite high and, therefore, an increase from the present levels to 100% would not be a significant change. The commenters, while not agreeing with this conclusion, claimed that the FAA's rationale did not apply where participation was low and thus

additional manpower would be needed at these locations if ARSA was designated. The FAA recognizes that participation in the TRSA program is relatively low at some of the candidate locations. However, this is in large part due to the controllers' walkout of 1981 and the subsequent reduction in fully qualified controllers which led to the discontinuance of TRSA services. A sufficient number of controllers is assigned at the facilities to which the commenters refer and those facilities are ready to provide the service to the increased number of pilots. This factor was considered by the FAA in its initial evaluation of the ARSA program.

The Soaring Society of America (SSA) objected to the ARSA program because it does not provide the same level of safety and service to all classes of aviation. As with other regulations, this rule affects different operators in different ways depending on their respective need to operate in controlled airspace or near the airports involved. The FAA does not agree that this variation in impact is reason not to adopt a rule which benefits the majority of users.

SSA claimed that the ARSA rule should state that the ultimate responsibilty for separation from other aircraft operating in VFR conditions rests with the pilot. While the FAA agrees that such is the case, the agency does not agree that the ARSA must so state. Unless a new or amending provision to the Federal Aviation Regulations (FAR) specifically deletes, amends, or supersedes existing sections, the existing regulations still apply. The ARSA rule (50 FR 9252, 9257, March 6, 1985) did not alter the sections of the FAR that establish that level of responsibility.

AOPA faulted the FAA's implementation of the ARSA program. The FAA stated in the proposal that the benefits of standardization and simplicity were nonquantifiable, and that the safety benefits anticipated by the FAA were not attributable to any given candidate but were based upon implementation of the program on a national basis. According to AOPA this evidenced the need to further evaluate the program at the current locations so that benefits could be individually assessed and each candidate evaluated accordingly. The FAA does not agree. The benefits of standardization and simplicity would always be nonquantifiable regardless of the amount of evaluation, yet they received considerable emphasis by the NAR Task Group. Overall national midair collision accident rates are relatively low, and accident rates within individual categories of airspace are lower still. Additionally, accidents at specific locations are random occurrences. Therefore, estimates of potential reductions in absolute accident rates resulting from the ARSA program cannot realistically be disaggregated below the national level. Additionally, the FAA does not believe that these considerations should be cause for delaying a program that was recommended by a majority of the members of the National Airspace Review, and which has already produced positive results at most of the designate locations.

Numerous commenters also objected to the proposals based upon their belief that air traffic in several of the proposed locations was too great for the ARSA program. The FAA believes that such a point argues strongly for the establishment of an ARSA rather than the converse.

Some commenters, including AOPA, predicted that user costs incurred due to delays will be greater than was estimated by the FAA, and that these costs will be experienced more at some sites than at others. In the NPRM, FAA acknowledged that initial delay problems would vary from site to site, that estimates of delays were quite preliminary that at some facilities the transition process is expected to go very smoothly, and that at other sites delay problems will dominate the initial adjustment period. These cost estimates are expected to be transitory in nature in that actual delays will be reduced as pilots and controllers become experienced with ARSA procedures. This has been the case at the three locations where ARSA has been in effect for an appreciable period, and is the trend at those locations more recently designated.

AOPA discounted the FAA delay estimates claiming that they were based upon a standard ARSA. The FAA does not agree. Estimates of costs and benefits were based upon the ARSA proposed for the individual locations whether they were standard or modified.

Several commenters questioned the validity of FAA's estimates of the time savings expected to be realized as a result of the greater flexibility allowed air traffic controllers in handling traffic within an ARSA. FAA wants to reemphasize that its estimates of expected savings in time and money which will result from the greater flexibility allowed air traffic controllers in handling traffic within an ARSA are quite preliminary. These estimated savings may or may not offset the delay anticipated at some sites after initial establishment of an ARSA, but are expected to provide overall time savings to all traffic, IFR as well as VFR, which will exceed delay as controllers gain experience with ARSA operating procedures.

Other commenters questioned the operating cost and passenger time values used to calculate delay costs and time savings. The values used are weighted averages of overall activity within an aircraft category for various aircraft types, and represent a typical mix of air passengers. FAA recognizes that for some specific operations actual operating cost and passenger time values will exceed the average values used, while in other cases, the actual values will be less. However, weighted averages represent the most appropriate and equitable measure to use when assessing *overall* impacts. Further, because the delay resulting from implementing ARSA procedures is expected to be transitory and efficiency improvements in the movement of traffic are ultimately expected to result, those operators whose variable cost and passenger time values exceed the averages used in the regulatory evaluation may in fact realize above average benefits.

Further, some commenters, including AOPA, expressed concern that older 360 channel transceivers would not be adequate to operate within an ARSA. Frequencies compatible with 360 channel transceivers are available at all ARSA locations. Therefore, operators of 360 channel equipment will not need to install new radios to operate within an ARSA.

SSA claimed that some FAA field personnel had indicated that a transponder would be needed to enter an ARSA, and thus, the cost to implement the program was grossly underestimated. An operable two-way radio is the only avionics required for flight in an ARSA. A transponder is not required and the costing estimates are correct.

AOPA and other commenters stated that the proposed ARSA's would derogate rather than improve safety, as a result of increased frequency congestion, pilots concentrating on their instruments and placing too much reliance upon ATC rather than "see and avoid," and the compression of air traffic into narrow corridors as pilots elect to circumnavigate an ARSA rather than receive ARSA services. In addition to increasing the risk of aircraft collision, the commenters claimed that compression would increase the impact

VOL 51 ISS 46 MR 10 1986 UMI

of aircraft noise on underlying communities and cause aircraft to be flown closer to obstructions.

As indicated above, while an increased number of aircraft will be using radio frequencies, the amount of "frequency time" needed for each aircraft is significantly reduced in an ARSA compared to the current TRSA. This has been the experience of the FAA at the current ARSA facilities.

AOPA claims that since the communications and readback procedures in ARSA's do not differ from those utilized in TRSA's there would be no reduction in "frequency time" needed for each pilot to acknowledge instructions or information, and thus, the partial offset indicated by the FAA was not justified. The offset is based upon fewer as well as shorter transmissions for each pilot, thus the FAA does not agree with this claim.

The FAA evaluated the flow of air traffic around the Austin, TX, and Columbus, OH, ARSA's during the confirmation period to determine if compression was occurring. This evaluation was performed by observing the radar at Austin, TX, and by both radar observations and the use of extracted computer data at Columbus, OH. Following the designation of an ARSA at Baltimore/Washington International Airport (BWI), the FAA evaluated the flow of air traffic there for a period of 90 days by observing the radar and extracting computer data to determine if compression was occurring. Additionally, the FAA has continually monitored for the possibility of compression at all recently designated locations. Compression has not been detected at any of these locations. However, compression of air traffic is a site-specific effect that could occur at a particular location regardless of its absence elsewhere. Thus, although the FAA does not believe compression of traffic will occur at any of the proposed airports, the agency will continue to monitor each designated ARSA and make adjustments if necessary.

AOPA, SSA, the State of Montana Aeronautics Division, and other commenters claimed that the FAA provided no demonstrable evidence that the ARSA program would improve aviation safety. The FAA continues to believe the implementation of the ARSA program will enhance aviation safety. The program requires two-way radio communication between ATC and all pilots within the designated areas. Air traffic controllers will thus be in a much improved position to issue complete traffic information to the pilots involved, and thus, safety will be improved.

AOPA, and several other commenters, requested that VFR corridors be established at several of the subject locations along routes that are currently contained within an airport traffic area (ATA). The NAR Task Group noted in their evaluation of the TRSA program that under FAR § 91.87 pilots operating under VFR to or from a satellite airport within an ATA are excluded from the two-way radio communications requirement. The Task Group noted that this was acceptable until the volume of air traffic at the primary airport dictated the installation of a radar approach control. The Task Group recommended, and the FAA adopted, the ARSA program as a safety improvement addressing this problem. Thus, the FAA does not believe provisions for VFR corridors that penetrate an ATA in most cases are warranted or in keeping with that recommendation.

AOPA and others commented that several of the proposals will require pilots to violate FAR § 91.79 (14 CFR 91.79) regarding minimum safe altitudes. The section states in part, "Except when necessary for takeoff or landing, no person may operate an aircraft below . . . an altitude of 1,000 feet above the highest obstacle within a horizontal radius of 2,000 feet of the aircraft [when over any congested area of a city, town, or settlement, or over any open air assembly of persons]." The commenters claim that the 1,200-foot base altitude of the 5- to 10-mile portion of the ARSA will force pilots to violate FAR§ 91.79 where obstacles extend more than 200 feet above the ground. There are two alternatives available to pilots in such a situation which permit compliance with the regulation. Namely, pilots may participate in ARSA services and thus not be limited to the 1,200-foot base, and secondly, a pilot may deviate 2,000 feet horizontally from the obstacle.

Furthermore, AOPA claims that the above response does not adequately respond to the issue. They claim that deviations of 2,000 feet horizontally would increase workload and reduce the efficiency of see-and-avoid, and thus, potentially reduce safety. The FAA does not encourage deviation but participation which would not require deviation and would result in controllers providing radar assistance for see-and-avoid. However, the above claim was that ARSA designation would require pilots to violate other regulations. In light of the foregoing the FAA does not agree.

SSA, and other commenters, claimed that designation of these ARSA's would negatively impact cross-country glider flights operating out of airports 20 miles, or more, from these ARSA's. While some deviations may be required, the FAA does not agree that the minor deviations that may be required will result in negatively impacting cross-country glider operations.

Several commenters noted that the proposal did not contain an environmental assessment. Under existing environmental regulations the proposed establishment of a Terminal Control Area (TCA) or a TRSA does not require an environmental assessment. The agency environmental regulations have not yet been amended to reflect ARSA procedures. However, because the potential environmental impact and regulatory effects of ARSA designation fall between those of the TCA and TRSA designations, the FAA finds that no environmental assessment is required for an ARSA designation.

AOPA, EAA, and other commenters indicated that the FAA had failed to demonstrate a need for the ARSA program itself, as well as a need for several of the individual proposed locations. Additionally, comments were received that faulted some of the features of the ARSA. Most of these comments went beyond the scope of the subject proposal and were addressed when the FAA adopted the recommendation of National Airspace Review (NAR) Task Group 1–2.2 (50 FR 9252, March 6, 1985). However, the FAA believes the need for the ARSA program was adequately demonstrated by the task group that reviewed the TRSA program and recommended the ARSA as the former's replacement. The task group faulted the TRSA program in several of its aspects and through consensus agreement determined the preferred features of the ARSA prior to making their recommendation to the FAA. Justification for the ARSA program has been the subject of previous FAA rulemaking, and the program was adopted after consideration of public comment. Response to comments on ARSA's at particular locations is made below.

AOPA, EAA, and others commented that several of the proposed ARSA's failed to meet the criteria for designation. The criteria for this group of candidates was recommended by the NAR Task Group and adopted by the FAA. Namely, ". . . excluding TCA locations, all airports with an operational airport traffic control tower and currently contained within a TRSA serviced by a Level III, IV, or V radar approach control facility shall have [an ARSA] designated; unless a study indicates that such designation is

inappropriate for a particular location." (49 FR 47184, November 30, 1984).

AOPA, EAA, and others commented that the existence of a TRSA in the above mentioned category should not be considered as justification for an ARSA. After a review of all comments received to the above referenced proposal, the FAA adopted that NAR recommendation (50 FR 9252, March 6, 1985). Therefore, absent a finding that designation would be inappropriate, the existence of a TRSA within that criteria is deemed sufficient for designation.

AOPA, EAA, and others indicated that several of the proposed locations do not meet the criteria that the FAA is considering for future ARSA candidates. The FAA has circulated proposed criteria for future application. However, whatever the nature of any criteria eventually adopted, this group of locations which qualify as ARSA candidates under the adopted NAR criteria would not be affected.

Several commenters suggested the top of the ARSA be lowered from 4,000 feet above field elevation. Absent strong justification for lowering this altitude, the FAA has not adopted these recommendations. The agency's rationale for nonadoption is set forth immediately above.

Several commenters, including AOPA and EAA, indicated that at several of the proposed ARSA's the TRSA was working quite well and that there was no need to change something that was working. The FAA acknowledges that TRSA's are functional and beneficial, to a point. However, the NAR Task Group did not fault individual TRSA locations but the TRSA program itself and recommended its replacement. The FAA concurred with the assessment and has determined that the ARSA program is an improvement over the TRSA program from the standpoints of both safety and service. Thus, the quality of service being provided at TRSA locations should not constitute a roadblock to improvement.

Several commenters claimed the reduced separation standards of the ARSA program would derogate rather than enhance safety. The elimination of the Stage III separation requirements was recommended by users, all of whom are vitally interested in aviation safety, and adopted by the FAA. This aspect of the ARSA program received considerable FAA attention during the confirmation period at Austin, TX, and Columbus, OH. The FAA agrees with the task group that the Stage III separation standards are not needed for safety in a mandatory participation area.

Several commenters requested that the ARSA be described in statute rather than nautical miles. Numerous user organizations and the NAR itself have recommended that the FAA adopt nautical-mile descriptions rather than statute. It is the intention of the FAA to establish all new descriptions according to that recommendation.

Several commenters objected to proposals where the ARSA was in proximity to other airports. According to these commenters pilots would not know whether they should be in contact with the ARSA approach control facility or in contact with the control tower at the secondary airport, or on unicom. The FAA does not view this situation as different from that existing at many of these locations today. Through pilot education programs and experience with ARSA procedures this situation will improve. Also, as at present, when a pilot contacts the wrong FAA facility the controllers will give appropriate instructions.

AOPA, SSA, and other commenters objected to several of the proposed ARSA's based upon the claim that the FAA had failed to evaluate the cumulative effect of the proposed ARSA's and other regulatory airspace. The evaluation for each ARSA included all factors known to the FAA, including the proximity of other regulatory airspace.

AOPA and SSA objected to the ARSA's based upon a claim that an insufficient amount of pilot education had been accomplished by the agency. AOPA cited Birmingham as an example where there were 19 days between the informal airspace meeting and the closing of the comment period, and SSA claimed that the comment period and a single informal airspace meeting were insufficient. The FAA does not agree. The example cited by AOPA references the comment period, not the total period to provide for pilot education. Pilot education will continue after the comment period has ended and until the effective date of the ARSA's. In addition to the comment period and the informal airspace meeting, user meetings will be held for each designated location.

Underlying a great many of the comments received was the idea that some provision should be made so that pilots could continue their current practices without contacting the responsible ATC facility. While the FAA has made modifications from the standard ARSA in cases where circumstances warrant, the basic thrust of the ARSA program is to require two-way communication with the responsible approach control facility, and not to make modifications in the program to provide for nonparticipation.

AOPA and others commented that FAA underestimated the one-time cost of distributing Letters to Airmen and the Advisory Circular, and neglected costs related to the informal public meetings. Both of these issues were discussed in the detailed regulatory evaluation of the NPRM, which has been available in the regulatory docket since publication of the NPRM. The availability of this detailed evaluation was indicated in the introductory paragraph of the regulatory evaluation summary included in the **Federal Register** NPRM (50 FR 39822, 39824, September 30, 1985). AOPA's comments assumed that every active pilot would be notified at least once. However, FAA intends to mail individual Letters to Airmen only to those pilots living in the vicinity of ARSA sites, and consequently its cost estimate is less than that of AOPA. The total one-time cost of distributing Letters to Airmen and the Advisory Circular was also prorated to reflect only those sites included in the notice, and both total and prorated cost estimates were provided in the notice. Further, as FAA indicated in the detailed regulatory evaluation, the expenses associated with public meetings will be incurred regardless of whether or not an ARSA is ultimately established at a proposed site, and consequently these expenses are more appropriately considered sunken costs attributable to the rulemaking process rather than implementation costs of the ARSA program. Similarly, information on ARSA's following the establishment of a new site will also be disseminated at aviation safety seminars conducted throughout the country by various district offices. These seminars are regularly provided by the FAA to discuss a variety of aviation safety issues, and, therefore, will not involve additional costs strictly as a result of the ARSA program.

SSA, and other commenters questioned whether the FAA considered the impact of the proposed ARSA's on individuals in making its Regulatory Flexibility Determination, and whether the threshold for determining if a significant economic impact on a substantial number of small entities had been exceeded because some small entities might be impacted. The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. Small entities are independently owned and operated small businesses and small not-for-profit

VOL 51
ISS 46
MR 10
1986
UMI

organizations. Individual citizens, as such, are not considered small entities under the terms of the RFA; however, an individual whose business is a sole proprietorship would be considered a small entity under the RFA. Some of the small entities which could be potentially affected by implementation of the ARSA program include the fixed-base operators, flight schools, agricultural operations and other small aviation businesses located at satellite airports located within 5 miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in the TRSA and radio communication with ATC is voluntary, operations at these airports might be altered, and some business could be lost to airports outside of the ARSA core. Because FAA is excluding almost every satellite airport located within the 5-mile ring to avoid adversely impacting their operations, and in some cases will achieve the same purposes through Letters of Agreement between ATC and the affected airports establishing special procedures for operating to and from these airports, FAA expects to virtually eliminate any adverse impact on the operations of small satellite airports which potentially could result from the ARSA program. Similarly, FAA expects to eliminate potential adverse impacts on existing flight training practice areas, as well as, soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures which will accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, a substantial number of small entities, defined in FAA Order 2100.14. "Regulatory Flexibility Criteria and Guidance," as more than one-third (but not less than eleven) of the small entities subject to a proposed rule, clearly will not be impacted by this rulemaking. Therefore, adoption of this final rule will not result in a significant economic impact on a substantial number of small entities.

Numerous commenters objected to the ARSA designations claiming they would simply provide the FAA with the basis for additional regulatory restrictions. The FAA does not believe this to be a valid objection. While the agency has no current plans for further regulatory action which imposes additional restrictions, such action if it should ever become a reality would be the subject of additional rulemaking and would of necessity be judged on its own merits, as should these proposals.

The Air Line Pilots Association concurred with the proposal as an improvement in operational efficiency and a significant contribution to a reduction of midair collision potential.

The Air Transport Association endorsed the proposed designations as an improvement in safety with specific comments indicated below.

The General Aviation Manufacturers Association endorsed the ARSA's as an improvement in safety and concurred with the FAA's philosophy regarding some deviation from the standard model.

Comments were received which were supportive of each of the ARSA's addressed here as an improvement in aviation safety, and stating that participation by all pilots was only equitable and that normal safety concerns dictated mandatory two-way communications. The FAA agrees.

Comments on Particular Locations

Beale AFB, Mather AFB, McClellan AFB, and Sacramento

The United States Air Force (USAF) supported the designations as improvements in aviation safety. However, the USAF recommended that the base altitude of the 5- to 10-mile shelf at Mather AFB be lowered to 1,100 feet MSL to contain aircraft executing an ILS approach to Runway 22L. The FAA does not agree with the recommendation. To incorporate that modification would require a departure from the standard floor of 1,200 feet above ground level that has not been done at any location. Furthermore, the purpose of the ARSA, unlike Terminal Control Area's, is not to contain aircraft. The National Airspace Review Task Group was aware that the standard configuration would not contain all final approaches across the country. However, the recommended model provides an increased level of safety at all locations.

Several commenters, including AOPA, objected to the designations based upon a claim that the proposed ARSA's had no relationship to flight patterns in the Sacramento area. These commenters suggested that any such proposal should be based upon quantitative data showing the number and direction of flights and past conflicts. The FAA agrees that the proposed ARSA's were not based upon such information. However, the ARSA program has not been proposed as an en route program but a terminal program centered around the candidate airports. Thus, the recommendation goes well beyond the scope of the proposals and could not be adopted by the FAA without additional rulemaking.

AOPA and several other commenters objected to the designation based upon their belief that insufficient time was allowed by the agency to properly evaluate the comments received. The FAA does not agree. Although the period of time from the closing of comments until the effective date is somewhat short, the agency has not waited until the closing of comments to begin the evaluation of the comments received prior to closing.

AOPA, SSA, and several other commenters objected to the designations at Mather and McClellan AFB's claiming that the latter did not meet the criteria. The FAA does not agree. All candidates meet the recommended and adopted criteria.

The Sacramento Director of Airports submitted comments that were generally supportive of the ARSA as an improvement in safety. However, the Director suggested that only one ARSA be designated in the area at this time and that it be evaluated prior to making a decision on the others. The FAA appreciates the Director's suggestion. However, the implementation of the ARSA program on a revised schedule as suggested would require considerably more time during which both users and the agency were faced with multiple terminal radar programs for the same geographic area. The agency believes the simultaneous designations to be preferable.

Several commenters objected to the base altitudes of the 5- to 10-mile circles claiming that during periods of marginal VFR weather the shelf altitudes would invite the compression of air traffic. The FAA has addressed the possibility of compression discussed above. However, the agency believes that participation in such programs as ARSA is even more important during periods of marginal VFR weather, regardless of the base altitude of the ARSA shelf.

Several commenters objected to the ARSA but requested that if designation was to occur that the ARSA's be limited to the 5-mile circle plus 2-mile wide extensions to coincide with arrival and departure paths. The FAA does not agree. The configuration of the ARSA was specifically designed to provide ARSA services to all aircraft, arriving, departing, and transiting, within the proposed proximity of the candidate airport. Furthermore, there is a sufficient amount of air traffic that does not conform to the suggested airspace configuration to warrant adoption of the standard configuration.

Several commenters suggested that the Sacramento VORTAC should be included in the ARSA because it serves as the final approach fix for instrument approaches and is the point at which several airways cross. The FAA does not agree. First, the suggestion goes well beyond the proposal and would require additional rulemaking and notification to establish. Additionally, the ARSA program has not been proposed to contain all approaching aircraft nor those transiting outside the proposed airspace. Finally, such would be a sharp departure from the standardization sought by the recommending Task Group and the agency.

Several commenters objected to the ARSA but requested that if designation was to occur that VFR corridors be established along Highways 50 and 80 to provide for greater nonparticipative access to secondary airports. The FAA does not agree. Both highways pass through airport traffic areas. Cutouts have been provided for three secondary airports in the area and a corridor has been provided for the two airports between Sacramento and McClellan. Although the configurations alter past requirements for some aircraft operating at these airports, that alteration was specifically addressed and intended (49 FR 47184, 47186, November 30, 1984).

SSA objected to the designations claiming that the FAA should further evaluate combination or multiple ARSA's prior to proceeding with such designations. The FAA does not agree. The ARSA program has been adopted as a replacement for the TRSA program. These airports fall within that criteria.

SSA objected to the designations claiming that the ARSA's would negatively impact cross-country glider activity and eliminate the possible use of these airports as landing sites. The FAA does not agree. Glider activity from nearby locations can be accommodated on a prior approval basis, traffic permitting. Cross-country flights would be impacted to only a minor extent, and landing at these locations previously required two-way radio communications due to the airport traffic areas.

Some commenters objected to the ARSA designation at Sacramento Metropolitan claiming that if designation was to occur at any airport in the area, it should be at Sacramento Executive Airport. The FAA does not agree. The ARSA program is a TRSA replacement program, and since Executive Airport was not contained within a TRSA it did not qualify as a candidate.

Birmingham Municipal Airport, AL

Some commenters claimed the ARSA was proposed for Birmingham based upon anticipated growth which according to their claim would not occur. The FAA does not agree. An ARSA was proposed for Birmingham based upon the current status and traffic without regard to any projections.

Some commenters claimed that the amount of air traffic at Birmingham was only sufficient to justify an ARSA for a few hours each day. The FAA does not agree. The recommended and adopted criteria covers this point, namely, an airport with an operating airport traffic control tower. Thus, according to that criteria the ARSA should be effective during the operational hours of the airport traffic control tower.

Burlington International Airport, VT

Several commenters, including AOPA, objected to the designation of an ARSA but requested that if designation was to occur that the base altitude of the 5- to 10-mile shelf to the west be raised to 2,200 feet MSL to coincide with the shelf altitude to the east. The bases for these comments were to provide greater standardization and simplification and to provide for greater nonparticipative access to the Bostwick and Shelburne Airports. The FAA has raised the base altitude to the east to 1,500 feet MSL in partial response to this suggestion. However, if the altitude were raised to 2,200 feet MSL, such would not provide the level of safety and service envisioned for air traffic using Burlington International. The FAA believes this deviation from the standard is warranted due to the terrain east of the airport.

Several commenters requested the base altitude be raised citing the pervailing weather conditions during the months of October through January. The FAA does not agree. Radar service is of even greater importance during periods of marginal VFR weather and should be encouraged, rather than making provision for nonparticipation.

Castle AFB, CA

The Office of the Director of Transportation of Merced Airport objected to the designation at Castle AFB claiming that such would negatively impact commercial aviation at Merced. The FAA does not agree. The designation at Castle will enhance aviation safety in the area and improve the efficiency of air traffic control. Both of these will improve rather than impede commercial flight.

A group of citizens commented that since Castle is a military facility general aviation aircraft are prohibited from using the airport, and therefore, an ARSA was unnecessary. The FAA does not agree. ARSA designation is being made at Castle AFB to provide a level of safety and efficiency of service in the airspace in proximity to a relatively busy airport, regardless of whether a particular category of air traffic use the airport itself.

Some commenters objected to the designation claiming that to do so without a study of local conditions and without obtaining local input was not in the best interest of aviation safety. The FAA does not agree with the premise of the objection. A study and evaluation of local conditions began prior to the publication of the proposal and continued until this rule was issued. During that period local input was received from local users and was given full consideration prior to the agency reaching a decision.

Several commenters objected to designation because the ARSA does not contain all of the final approach into Castle AFB. The purpose of the ARSA is not to contain all of any final approach course. No ARSA has been proposed that fully encompasses that amount of airspace, and the FAA does not agree that designation should not occur simply because the final approach is not fully contained.

Several commenters, including AOPA, requested that if designation were to occur that the Castle ARSA be limited to the east side of the airport. This request was based upon the claim that all military air traffic into Castle remained to the east side of the airport. The FAA does not agree. The military segregates the air traffic at Castle using the east side for the heavy jets, but the west side is used for lighter aircraft.

Several commenters objected to the designation claiming that it would encourage pilots to violate the interagency agreement, to which the FAA is party, regarding flying over wildlife refuges at no less than 2,000 feet above ground level. The FAA does not agree. The refuges in the vicinity of Castle AFB are well beyond 10 miles from Castle, and the designation does not impact upon that agreement.

The USAF supported the ARSA as a positive step to increase aviation safety. However, the USAF recommended that the 1,900 feet MSL base altitude to the east be lowered to 1,800 feet MSL; that the 320° bearing which delineates an altitude segment be moved to the 290° bearing from the airport; and, that the cutout for Atwater Airport be enlarged. The bases for these recommendations were that the base altitude to the east

VOL
51
ISS
46
MR
10
1986
UMI

had been incorrectly computed; that the proposed segment line did not provide protection for arrivals to Runway 13 or for departures off Runway 31; and, that enlarging the cutout would not decrease the level of safety and service envisioned by the proposal and would provide increased ease of access to the Atwater Airport. The FAA agrees with the later recommendation, and the cutout for Atwater has been enlarged. The first and second recommendations by the USAF would increase the degree of restriction envisioned in the proposal. Therefore, they are not adopted by the agency, and would of necessity require additional rulemaking and notification to establish.

In the NPRM, the FAA estimated 9 no radio (NORDO) aircraft based at Atwater Airport would have to install two-way radios to continue operations as they did prior to the implementation of the ARSA. A large cutout has been provided for Atwater Airport to allow these operators to continue operations to and from this airport without the expense of installing two-way radios.

Charlotte/Douglas International Airport, NC

The Air Transport Association supported the designation as an improvement in aviation safety and service. The FAA agrees.

Comments received opposing designation of the Charlotte ARSA have been addressed above.

Columbus Metropolitan Airport, GA

One commenter objected to the designation claiming that one of the FAA representatives had said at the informal airspace meeting that Columbus air traffic controllers would not be allowed to apply ARSA procedures, and therefore, there would be no advantage in the ARSA program. The FAA does not agree. The representative gave assurances at the meeting that air traffic controllers at Columbus would provide safety alerts to VFR pilots if they did not see one another after the issuance of traffic advisories, one of the procedures utilized in the ARSA program.

Several commenters objected to the designation because the Columbus ARSA is nonstandard in dimensions. While the FAA agrees that the Columbus ARSA is nonstandard, the agency does not agree that such is a valid objection. In adoption of the ARSA program the FAA indicated that several proposed locations would have nonstandard configurations. Other regulatory airspace, such as exists at Columbus, was one of the reasons cited for such nonstandard configurations.

Several commenters objected to the designation claiming that the ARSA would negatively impact recreational flying. Some of these commenters indicated at the informal airspace meeting that the air traffic controllers at Columbus had been most cooperative in the past. The FAA envisions no charge in that level of cooperation and recreational flying can be accommodated on the same basis as it has been in the past. If that should prove unsatisfactory, a local agreement can be established between such operators and the air traffic control facility to provide for this activity.

Metropolitan Oakland International Airport, CA

The operator of Sky Sailing Airport claimed that sailplane operations would be unacceptable affected because of the proximity of the Oakland ARSA. The FAA does not agree. Sky Sailing Airport is 8 miles from the ARSA boundary with the major area of sailplane activity 12 miles east of the ARSA. The modifications to the original proposal will provide additional areas of no restriction from the ARSA.

Several commenters, including the San Francisco Chamber of Commerce, claimed that the proposed ARSA would hinder eastbound helicopter operations from a new heliport on the San Francisco waterfront. The FAA does not agree. The communications requirement for the ARSA is no different from that presently required of the helicopter operations in the present airport traffic areas.

The United States Navy at Alameda Naval Air Station objects to the ARSA as proposed due to the omission of the airspace beyond 5 miles from the Oakland 347° radial to the Oakland 060° radial. They state the large concentration of light civil air traffic in this area will conflict with Navy traffic to Runway 25 at Alameda Naval Air Station. The FAA does not agree. The terrain in this area is such that the base altitude of the shelf would afford less than 200 feet of ARSA airspace. The FAA recognizes the concerns of the Navy but feels that including this airspace would be more restrictive than is required.

Several commenters, including AOPA, claimed that approaches to Hayward Airport from the east and Lake Chabot area would require too many frequency changes for landing at Haywood. The FAA agrees. For this reason, the airspace boundaries in these areas have been modified to allow access to Hayward Airport from the northeast, east, and south without entering the ARSA.

Several commenters claimed that traffic arriving and departing Hayward Airport would cause additional workload for controllers at Oakland Approach Control. The FAA does not agree. Comments concerning workload have been previously addressed. Letters of agreement between FAA facilities for use of the airspace in the Hayward Airport traffic area will be addressed by the facilities involved.

Oakland Tower was originally scheduled to receive a piece of replacement radar equipment in the summer of 1985. Due to unforeseen delay in equipment delivery, associated software development and installation scheduling, the earliest this radar equipment can be installed and certified will be late 1986. For these reasons, the effective date of the Metropolitan Oakland International Airport ARSA will be April 9, 1987.

Nashville Metropolitan Airport, TN

Several commenters objected to the designation claiming that the ARSA would negatively impact balloon operations in the area. Some of these commenters indicated that under the TRSA program they had called the radar approach control facility and had received good cooperation from the air traffic controllers, but they anticipated the ARSA would curb their activity. The FAA envisions no change to the procedure followed by these balloonists. The designation of the ARSA simply requires the type of approval and coordination that has been occurring previously on a voluntary basis or mandatory basis within the airport traffic area.

Other Comments

A number of other comments were received addressing matters beyond the scope of these proposals such as charting, the number of frequencies depicted on a chart, the general design features of an ARSA, etc. The FAA will give consideration to all of the points raised in these comments but will not address them as a part of this rulemaking.

Regulatory Evaluation

Those comments which addressed information presented in the Regulatory Evaluations of the notices for the dockets included in this final rule have been discussed above. A detailed Regulatory Evaluation of the final rule has been placed in the regulatory docket.

Briefly, the FAA finds that a direct comparison of the costs and benefits of this rule is difficult for a number of

reasons. Many of the benefits of the rule are nonquantifiable, especially those associated with simplification and standardization of terminal airspace procedures. Further, the benefits of standardization result collectively from the overall ARSA program, and as discussed previously, estimates of potential reductions in absolute accident rates resulting from the ARSA program cannot realistically be disaggregated below the national level. Therefore, it is difficult to specifically attribute these benefits to individual ARSA sites. Finally, until more experience has been gained with ARSA operations, estimates of *both* the efficiency improvements resulting in time savings to aircraft operators, and the potential delays resulting from mandatory participation, will be quite preliminary.

ATC personnel at some facilities anticipate that the process will go very smoothly, that delays will be minimal, and that efficiency gains will be realized from the start. Other sites anticipate that delay problems will dominate the initial adjustment period.

FAA believes these adjustment problems will only be temporary, and that once established, the ARSA program will result in an overall improvement in efficiency in terminal area operations at those airports where ARSA's are established. These overall gains which FAA expects for the group of ARSA sites established by this rule typify the benefits which FAA expects to achieve nationally from the ARSA program. These benefits are expected to be achieved without any additional controller staffing or radar equipment costs to the FAA.

In addition to these operational efficiency improvements, establishment of these ARSA sites will contribute to a reduction in midair collisions. The quantifiable benefits of this safety improvement could range from less than $100 thousand, to as much as $300 million, for each accident prevented.

For these reasons, FAA expects that the ARSA sites established in this rule will produce long term, ongoing benefits which will exceed their costs, which are essentially transitional in nature.

Regulatory Flexibility Determination

Under the terms of the Regulatory Flexibility Act, the FAA has reviewed this rulemaking action to determine what impact it may have on small entities. FAA's Regulatory Flexibility Determination was published in the NPRM, and those comments which addressed it have been discussed above. For the reasons presented in the NPRM and clarified in the Discussion of Comments, FAA has determined that this rulemaking action is not expected to affect a substantial number of small entities. Therefore, the FAA certifies that this regulatory action will not result in a significant economic impact on a substantial number of small entities.

The Rule

This action designates Airport Radar Service Areas (ARSA) at the 11 airports listed below. Each location designated is a public or military airport at which a nonregulatory Terminal Radar Service Area is currently in effect. Establishment of each ARSA will require that pilots maintain two-way radio communication with air traffic control while in the ARSA. Implementation of ARSA procedures at each of the affected locations will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a) and 1354(a); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. § 71.501 is amended as follows:

Beale AFB, CA [New]

That airspace extending upward from the surface to and including 4,100 feet MSL within a 5-mile radius of Beale AFB (lat. 39°08'10" N., long. 121°26'06" W.), and that airspace extending upward from 1,600 feet MSL to 4,100 feet MSL within a 10-mile radius of Beale AFB from the 127° bearing from the airport clockwise to the 007° bearing from the airport, and that airspace extending upward from 2,600 feet MSL to 4,100 feet MSL within a 10-mile radius of the airport from the 007° bearing from the airport clockwise to the 127° bearing from the airport.

Birmingham Municipal Airport, AL [New]

That airspace extending upward from the surface to and including 4,600 feet MSL within a 5-mile radius of the Birmingham Municipal Airport (lat. 33°33'50" N., long. 86°45'16" W.), and that airspace extending upward from 2,400 feet MSL to 4,600 feet MSL within a 10-mile radius of Birmingham Municipal Airport from the 343° bearing from the airport clockwise to the 231° bearing from the airport, and that airspace extending upward from 1,900 feet MSL to 4,600 feet MSL within a 10-mile radius of the airport from the 231° bearing from the airport clockwise to the 343° bearing from the airport.

Burlington International Airport, VT [New]

That airspace extending upward from the surface to and including 4,400 feet MSL within a 5-mile radius of the Burlington International Airport (lat. 44°28'17" N., long. 73°09'12" W.), and that airspace extending upward from 2,200 feet MSL to 4,400 feet MSL within a 10-mile radius of Burlington International Airport from the 360° bearing from the airport clockwise to the 180° bearing from the airport, excluding the airspace within Restricted Area R–6501; and that airspace extending upward from 1,500 feet MSL to 4,400 feet MSL within a 10-mile radius of the airport from the 180° bearing from the airport clockwise to the 360° bearing from the airport.

Castle AFB, CA [New]

That airspace extending upward from the surface to and including 4,200 feet MSL within a 5-mile radius of Castle AFB (lat. 37°22'52" N., long. 120°34'00" W.), excluding that airspace within an area bounded by a line beginning at the point where the 186° bearing from Castle AFB intersects the 5-mile radius of Castle AFB and thence northerly via the 186° bearing to the point where the 186° bearing intersects the 1.5-mile arc from the Atwater Airport (lat. 37°20'05" N., long. 120°36'15" W.) and thence counterclockwise via the 1.5-mile arc from Atwater Airport to the point where it intersects the 240° bearing from Castle AFB and thence southwesterly via the 240° bearing to the point where the 240° bearing intersects the 5-mile radius of Castle AFB; and that airspace extending upward from 1,400 feet MSL to and including 4,200 feet MSL within a 10-mile radius of Castle AFB from the 126° bearing from Castle AFB clockwise to the 306° bearing from Castle AFB, and that airspace extending upward from 1,900 feet MSL to and including 4,200 feet MSL within a 10-mile radius of Castle AFB from the 306° bearing from Castle AFB clockwise to the 126° bearing from Castle AFB.

Charlotte-Douglas International Airport, NC [New]

That airspace extending upward from the surface to and including 4,700 feet MSL within a 5-mile radius of the Charlotte-Douglas International Airport (lat. 35°12'52" N., long. 80°56'37" W.), and the airspace extending upward from 2,000 feet MSL to 4,700 feet MSL within a 10-mile radius of the Charlotte/Douglas International Airport.

Columbus Metropolitan Airport, GA [New]

That airspace extending upward from the surface to and including 4,400 feet MSL within a 5-mile radius of Columbus Metropolitan Airport (lat. 32°30'58" N., long. 84°56'20" W.), excluding that airspace within Restricted Area R–3002; and that airspace extending upward from 1,700 feet MSL to and including 4,400 feet MSL within a 10-mile radius of Columbus Metropolitan Airport from the 079° bearing from the airport clockwise to the 325° bearing from the airport,excluding that airspace within Restricted Area R–3002; and that airspace extending upward from 1,900 feet MSL to and including 4,400 feet MSL within a 10-mile radius of the airport from the 325° bearing from the airport clockwise to the 079° bearing from the airport, excluding that airspace within Restricted Area R–3002. This airport radar service area is effective during the specific days and times established in advance by a Notice to Airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory.

Mather AFB, CA [New]

That airspace extending upward from the surface to and including 4,100 feet MSL within a 5-mile radius of the Mather AFB (lat. 38°33'23" N., long. 121°17'44" W.) to the points where the 5-mile radius intersects the 5-mile radius of the McClellan AFB, CA, Airport Radar Service Area (ARSA), and that airspace extending upward from 1,600 feet MSL to and including 4,100 feet MSL within a 10-mile radius of Mather AFB to the points where the 10-mile radius intersects the 10-mile radius of the McClellan AFB ARSA.

McClellan AFB, CA [New]

That airspace extending upward from the surface to and including 4,100 feet MSL within a 5-mile radius of McClellan AFB (lat. 38°40'02" N., long. 121°23'58" W.) to the points where the 5-mile radius intersects the 5-mile radius of the Mather AFB, CA, Airport Radar Service Area (ARSA), excluding that airspace within an area bounded by a line beginning at a point where the 321° bearing from McClellan AFB intersects the 5-mile radius of McClellan thence southeasterly via this 321° bearing to a point where it intersects the 007° bearing from Rio Linda Airport (lat. 38°40'34" N., long. 121°26'40" W.) and thence direct to the point where the 187° bearing from Rio Linda Airport intersects the 215° bearing from McClellan AFB and thence southwesterly via the 215° bearing to the 5-mile radius of McClellan AFB; and that airspace extending upward from 1,600 feet MSL to 4,100 feet MSL within a 10-mile radius of McClellan AFB to the points where this 10-mile radius intercepts the 10-mile radii of the Sacramento Metropolitan Airport, CA, ARSA and the Mather AFB ARSA.

Metropolitan Oakland International Airport, CA [New]

That airspace extending upward from the surface to and including 4,000 feet MSL within a 5-mile radius of the Metropolitan Oakland Airport (lat. 37°43'17" N., long. 120°13'11" W.), excluding that airspace contained within the San Francisco, CA Terminal Control Area (TCA); and that airspace extending upward from 1,500 feet MSL to and including 4,000 feet MSL within a 10-mile radius of the Metropolitan Oakland Airport, excluding that airspace contained within the San Francisco TCA, and that airspace beyond 5 miles from the Metropolitan Oakland Airport from the Oakland VORTAC 004° radial clockwise to the Oakland VORTAC 092° radial, and that airspace beyond the 15-mile radius of the San Francisco TCA.

Nashville Metropolitan Airport, TN [New]

That airspace extending upward from the surface to and including 4,600 feet MSL within a 5-mile radius of the Nashville Metropolitan Airport (lat. 36°07'37" N., long. 86°40'53" W.), excluding that airspace within a 1.5-mile radius of lat. 36°12'00" N., long. 86°42'10" W. (in the vicinity of Cornelia Fort Airport); and that airspace extending upward from 2,100 feet MSL to and including 4,600 feet MSL within a 10-mile radius of Nashville Metropolitan Airport from the 018° bearing from the airport clockwise to the 198° bearing from the airport, and that airspace extending upward from 2,400 feet MSL to and including 4,600 feet MSL within a 10-mile radius of the airport from the 198° bearing from the airport clockwise to the 018° bearing from the airport.

Sacramento Metropolitan Airport, CA [New]

That airspace extending upward from the surface to and including 4,100 feet MSL within a 5-mile radius of the Sacramento Metropolitan Airport (lat. 38°41'44" N., long. 121°36'01" W.), excluding that airspace within a 2-mile radius of Riego Flight Strip (lat. 38°45'15" N., long. 121°33'43" W.), and that airspace within a 2-mile radius of Natomas Field (lat. 38°38'18" N., long 121°30'51" W.), and that airspace east of the 002° bearing from Natomas Field; and that airspace extending upward from 1,600 feet MSL to 4,100 feet MSL within a 10-mile radius of Sacramento Metropolitan Airport to the points where this 10-mile radius intercepts the 10-mile radius of McClellan AFB, CA, Airport Radar Service Area.

Issued in Washington, DC, on March 4, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

Part IV

Department of Education

34 CFR Part 280

Magnet Schools Assistance Program Proposed Rule; and Application Notice for Noncompeting Continuation Projects for Fiscal Year 1986

VOL 51 ISS 46 MR 10 1986 UMI

DEPARTMENT OF EDUCATION

34 CFR Part 280

Magnet Schools Assistance Program

AGENCY: Department of Education.

ACTION: Notice of Proposed rulemaking.

SUMMARY: The Secretary proposes to amend three sections of the regulations which implement the Magnet Schools Assistance Program. These amendments to the regulations are necessary to implement the statutory changes to the Magnet Schools Assistance Act (Title VII of the Education for Economic Security Act, Pub. L. 98–377) which were enacted on November 22, 1985 as part of the National Science, Engineering, and Mathematics Authorization Act of 1985, Pub. L. 99–159.

DATE: Comments must be received on or before April 9, 1986.

ADDRESS: Comments should be addressed to M. Patricia Goins, Division of Educational Support, U.S. Department of Education (Room 2023, FOB–6) 400 Maryland Avenue SW., Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: M. Patricia Goins. Telephone: (202) 472–7960.

SUPPLEMENTARY INFORMATION:

Summary of Proposed Amendments

Section 703 of the Act which describes the purposes of the Magnet Schools Assistance Program has been amended by combining the four clauses in the statement of purpose into two clauses. This change in language does not significantly alter the purposes of the Magnet Schools Assistance Program. Section 280.1 of the regulations is amended to conform to the statutory change.

Section 706 of the Act has been amended to narrow the range of activities for which magnet schools funds may be used. Under Section 706, grants may be used by an eligible local educational agency (LEA) for—

(1) Planning and promotional activities directly related to expansion and enhancement of academic programs and services offered at magnet schools;

(2) The acquisition of books, materials, and equipment (including computers) and the maintenance and operation thereof, necessary for the conduct of programs in magnet schools; and

(3) The payment of or subsidization of the compensation of elementary and secondary school teachers who are certified or licensed by the State and who are necessary for the conduct of programs in magnet schools.

With respect to clauses (2) and (3), assistance must be directly related to improving the knowledge of mathematics, science, history, English, foreign languages, art, or music, or to improving vocational skills.

Only the above-described activities may be supported with magnet schools funds. A new § 280.40 setting out these authorized activities has been added to the regulations.

Section 709 of the Act has been amended by deleting the prohibitions on secular humanism instruction. This prohibition, presently codified at § 280.40(d) of the regulations, is deleted. The remaining provisions currently in § 280.40 are redesignated as § 280.41.

Executive Order 12291

These proposed amendments have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed amendments will not have a significant economic impact on a substantial number of small entities.

The small entities affected by this program are LEAs. The amendments do not impose burdensome reporting or recordkeeping requirements and will not have a significant economic impact on the limited number of LEAs affected.

Intergovermental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed amendments.

All comments submitted in response to these proposed amendments will be available for public inspection, during and after the comment period, in Room 2023 FOB–6, 400 Maryland Avenue SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, public comment is invited on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

List of Subjects in 34 CFR Part 280

Civil rights, Desegregation, Education, Elementary and secondary education, Grant programs-education, Magnet schools.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations. The citation is the appropriate section of the Act (Title VII of the Education for Economic Security Act, Pub. L. 98–377, 98 Stat. 1299–1302 (20 U.S.C. 4051–4062).

(Catalog of Federal Domestic Assistance number 84.165, Magnet Schools Assistance Program)

Dated: March 3, 1986.

William J. Bennett,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by amending Part 280 as follows:

PART 280—MAGNET SCHOOLS ASSISTANCE PROGRAM

1. The authority citation for Part 280 is revised to read as follows:

Authority: 20 U.S.C. 4051–4062, unless otherwise noted.

2. Section 280.1 is revised to read as follows:

§ 280.1 What is the Magnet Schools Assistance Program?

The Magnet Schools Assistance Program provides grants to eligible local educational agencies (LEAs) for use in magnet schools that are part of an approved desegregation plan and that are designed to bring students from different social, economic, ethnic and racial backgrounds together. The purposes of the program are to support, through financial assistance to eligible LEAs,—

(a) The elimination, reduction, or prevention of minority group isolation in elementary and secondary schools with substantial portions of minority students; and

(b) Courses of instruction within magnet schools that will substantially strengthen the knowledge of academic subjects and the grasp of tangible and marketable vocational skills of students attending such schools.

(20 U.S.C. 4053)

§ 280.4 [Amended]

3. In § 280.4(b), under the definition, "special curriculum", the "of" is changed to "or" between the words, "elementary" and "secondary".

§ 280.10 [Amended]

4. Section 280.10 is amended by: removing "for planning and conducting programs" from paragraph (a); removing paragraphs (d) and (e); and revising the citation of authority to read "(20 U.S.C. 4054)".

§ 280.40 [Redesignated as § 280.41]

5. Section 280.40 is redesignated as § 280.41 and paragraph (d) is removed. After the semicolon at the end of paragraph (b) insert "or". At the end of paragraph (c) replace the semicolon and the "or" with a period.

6. A new § 280.40 is added to read as follows:

§ 280.40 What costs are allowable?

An LEA may use funds received under this part for the following activities:

(a) Planning and promotional activities directly related to the expansion and enhancement of academic programs and services offered at magnet schools, though planning activities are subject to the restriction in § 280.41(a).

(b) The acquisition of books, materials, and equipment (including computers) and the maintenance and operation thereof. Any books, materials or equipment purchased with grant funds must be—

(1) Necessary for the conduct of programs in magnet schools; and

(2) Directly related to improving the knowledge of mathematics, science, history, English, foreign languages, art, or music, or to improving vocational skills.

(c) The payment or subsidization of the compensation of elementary and secondary school teachers—

(1) Who are certified or licensed by the State;

(2) Who are necessary to conduct programs in magnet schools; and

(3) Whose employment is directly related to improving the knowledge of mathematics, science, history, English, foreign languages, art, or music, or to improving vocational skills.

(20 U.S.C. 4056)

DEPARTMENT OF EDUCATION

Magnet Schools Assistance Program

AGENCY: Department of Education.

ACTION: Application Notice for Noncompeting Continuation Projects for Fiscal Year 1986.

Applications are invited for noncompeting continuation projects under the Magnet Schools Assistance Program (MSAP).

Authority for this program is contained in Title VII of the Education for Economic Security Act, Pub. L. 98–377. (20 U.S.C. 4051–4062)

The MSAP provides Federal financial assistance for projects in magnet schools that are part of approved desegegration plans that local educational agencies (LEAs) are implementing. LEAs may use funds to plan and promote magnet schools; to purchase books, materials, and equipment (including computers) for magnet school programs; and to pay or subsidize certified or licensed school teachers in magnet schools. A "magnet school" is defined by the Act as a school or education center that offers a special curriculum capable of attracting substantial numbers of students of different racial backgrounds.

Closing Date for Transmittal of Applications: To be assured of consideration for funding, applicants for noncompeting continuation awards should mail or hand deliver their applications on or before May 2, 1986.

If an application is late, the Department of Education may lack sufficient time to review it with other applications for noncompeting continuation awards and may decline to accept it.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Washington, DC 20202. Applications for the MSAP should be marked Attention: 84.165.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3635, Regional Office Building 3, 7th and D Streets SW., Washington, DC.

The Application Control Center will accept a hand delivered application between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, or Federal holidays.

Program Information: The present recipients of MSAP awards are eligible to apply for the continuation of those awards. Section 280.33 of the MSAP regulations states that the Secretary is authorized to approve the continuation of an existing MSAP award if the recipient of that award "is making satisfactory progress toward achieving the purposes of [the program]" and meets the conditions of 34 CFR 75.253(a).

Applicants should be aware that the range of authorized activities for which magnet schools funds may be used has been narrowed by an amendment to the Magnet Schools Assistance Act. Applicants should review the Notice of Proposed Rulemaking for the Magnet Schools Program published in this issue of the **Federal Register** to ensure that their proposed activities for fiscal year 1986 meet the criteria in the new § 280.40 of the regulations.

Intergovernmental Review: This program is subject to the requirements of the Executive Order and the regulations in 34 CFR Part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

The Executive Order—

- Allows States, after consultation with local officials, to establish their own process for review and comment on proposed Federal financial assistance;
- Increases Federal responsiveness to State and local officials by requiring Federal agencies to accommodate State and local views or explain why those views will not be accommodated; and
- Revokes OMB Circular A–95.

Transactions with nongovernmental entities, including State postsecondary educational institutions and federally recognized Indian tribal governments, are not covered by Executive Order 12372. Also excluded from coverage are research, development, or demonstration projects that do not have a unique geographic focus and are not directly relevant to the governmental responsibilities of a State or local government within that geographic area.

The Magnet Schools Assistance Program is a new program, and States have not made a determination as to whether it will be included or excluded from review under the State review process. Therefore, immediately upon receipt of this notice, applicants that are governmental entities, including local educational agencies, must contact the appropriate State single point of contact to find out about and to comply with the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application package for this program.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by June 2, 1986 to the following address:

The Secretary, U.S. Department of Education, Room 4181, (84.165) 400 Maryland Avenue, SW., Washington, DC 20202. (Proof of mailing will be determined on the same basis as applications.)

PLEASE NOTE THAT THE ABOVE ADDRESS IS NOT THE SAME ADDRESS AS THE ONE TO WHICH THE APPLICANT SUBMITS ITS COMPLETED APPLICATIONS. DO NOT SEND APPLICATIONS TO THE ABOVE ADDRESS.

Available Funds: The amount of funds available for fiscal year 1986 for MSAP is $71,775,000. (This amount reflects a reduction of $3,225,000 from the fiscal year 1986 appropriation pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985, Pub. L. 99–177.)

In fiscal year 1985, the Department awarded 44 grants for MSAP projects. These grantees are eligible to apply for fiscal year 1986 continuation awards.

These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

Application Forms: Application forms and program information packages are expected to be ready for mailing on April 1, 1986. They may be obtained by writing to the Magnet Schools Assistance Program Staff, U.S. Department of Education (Room 2023, FOB–6), 400 Maryland Avenue SW., Washington, DC 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those specifically imposed under the statute and regulations.

The Secretary strongly urges that applicants not submit information that is not requested.

(The application is approved under OMB Control Number 1810–0516)

Applicable Regulations: Regulations applicable to this program include the following:

(a) Regulations governing the Magnet Schools Assistance Program, 34 CFR Part 280 published in the **Federal Register** on May 22, 1985 at 50 FR 21190 and the proposed amendments published in this issue of the **Federal Register**. (If any substantive changes are made in the final regulations for this program, applicants will be given an opportunity to revise or resubmit their applications.)

(b) Education Department General Administrative Regulations, 34 CFR parts 74, 75, 77, 78, and 79.

FOR FURTHER INFORMATION: For further information contact M. Patricia Goins, Division of Educational Support, U.S. Department of Education (Room 2023, FOB–6), Mail Stop 6264, 400 Maryland Avenue, SW Washington, DC 20202. Telephone: (202) 472–7960.

(20 U.S.C. 4051–4062)

(Catalog of Federal Domestic Assistance Number 84.165, Magnet Schools Assistance Program)

Dated: March 3, 1986.

Lawrence F. Davenport,

Assistant Secretary for Elementary and Secondary Education.

COMMISSION ON THE BICENTENNIAL OF THE UNITED STATES CONSTITUTION

45 CFR Part 2001

Project Recognition and Support

AGENCY: Commission on the Bicentennial of the United States Constitution.

ACTION: Interim rule with request for comments.

SUMMARY: These regulations set forth general provisions and policies governing the process adopted by the Commission on the Bicentennial of the United States Constitution for project recognition and support. These policies will apply to all projects, programs and other activities designed to commemorate the 200th anniversary of the drafting, signing, ratification and adoption of the United States Constitution, in 1787 and 1788, and the beginnings of the Federal Government under the Constitution in 1789, including the election of the First Congress and of America's first President and Vice President, the creation of the first cabinet departments and the creation of the Federal judiciary system.

These regulations are necessary so that the mandates of Congress may be carried out by the Commission in accomplishing its principal purpose, to promote and coordinate activities to commemorate the bicentennial of the Constitution. (See sec. 3, Pub. L. 98–101; 97 Stat. 719.) The provisions of these regulations will enable individuals and private and public groups, including governmental agencies and states, to obtain official recognition of the Commission for their proposed projects and to use the Commission's National Bicentennial Logo. The regulations will also make clear the criteria for Commission involvement with projects and the limitations on such involvement.

DATES: Interim rule effective January 23, 1986; comments must be received on or before May 9, 1986.

ADDRESS: Comments should be mailed or delivered to the General Counsel of the Commission at 734 Jackson Place, NW., Washington, DC 20503. Comments received may also be inspected at this address between 9:00 p.m. and 5:30 p.m.

FOR FURTHER INFORMATION CONTACT: Joseph B. McGrath, General Counsel, Tel. (202) USA–1787.

SUPPLEMENTARY INFORMATION:

Background

These regulations were approved by the Commission on November 25, 1985 as an interim rule to govern policies on project recognition and support during the organizational phase of Commission operations. It is intended that the regulations will be published as a final rule following consideration of comments received and further review by the Commission.

Classification

This is not a major rule under E.O. 12291 since it is not likely to have any effect on the economy, on costs or on prices, nor does it affect competition, employment, investment, productivity, innovation or the ability of U.S. based enterprises to compete with foreign enterprises. A regulatory analysis is not required for this rulemaking. The rule has no effect on the environment and an environmental impact statement under the National Environmental Policy Act is not required.

Statutory Authority

This regulation is authorized under Pub. L. 98–101, 97 Stat. 719. No previous regulation on these subject matters has been issued. The principal draftsmen of this regulation were Dr. Bradford P. Wilson and Joseph B. McGrath of the Commission staff.

Request for Comments

A 60 day public comment period ending [insert date] has been provided for the purpose of receiving comments and recommendations for improvement of the regulation prior to publication of a final rule. Comments should be mailed or delivered to the General Counsel of the Commission at 734 Jackson Place, NW., Washington, DC 20503.

Paperwork Reduction Act

The information collection requirement contained in this rule has been submitted to the Office of Management and Budget for review under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). No person may be subjected to a penalty for failure to comply with the information collection requirement until it has been approved and assigned an OMB control number. The OMB control number, after it has been assigned, will be announced in the final rule or by separate notice in the **Federal Register**.

List of Subjects in 45 CFR Part 2001

National Bicentennial logo, State Bicentennial Commission, Designated bicentennial community, National Register of Bicentennial Projects, U.S. Constitution Bicentennial, Officially recognized projects, Seals and insignia.

Issued in Washington, DC on January 23, 1986.

Mark W. Cannon,
Staff Director.

For the reasons set out in the preamble and under the authority of Pub. L. 98–101, 97 Stat. 719, a new Chapter XX is established and a new Part 2001 is added to Title 45, *Code of Federal Regulations* to read as follows.

CHAPTER XX—COMMISSION ON THE BICENTENNIAL OF THE UNITED STATES CONSTITUTION

PART 2001—PROJECT RECOGNITION AND SUPPORT

Subpart A—General Policies

Sec.

Appendix A to Part 2001—National Bicentennial Logo.
Appendix B to Part 2001—Application for Recognition.

Authority: Pub. L. 98–101; 97 Stat. 719, 5 U.S.C. 552.

Subpart A—General Policies

§ 2001.10 Commission policy.

The Commission on the Bicentennial of the United States Constitution was established by Pub. L. 98–101 to promote and coordinate activities to commemorate the bicentennial of the Constitution. All public and private groups are encouraged to conduct activities that will foster awareness, knowledge and appreciation of the Constitution of the United States during

the bicentennial years of 1986–89. Insofar as its resources permit, the Commission will offer information, advisory assistance, and coordination to individuals and groups interested or involved in bicentennial activities.

§ 2001.11 Financial support decisions.

Commission involvement with a project in any of the ways herein described does not obligate the Commission to contribute financial support to that project. Any decision to provide financial support to a bicentennial project shall be considered by the Commission separately and on its own merits in relation to the resources of the Commission.

§ 2001.12 Nonexclusive involvement.

Unless otherwise indicated by the Commission in advance and in writing, Commission involvement with a project will not in any way limit the Commission from involving itself in other projects of the same or a similar nature.

Subpart B—National Bicentennial Logo

§ 2001.20 Design and adoption.

Under the authority granted by section 5(j) of Pub. L. 98–101, 97 Stat. 719, 721, the Commission has designed and adopted a Logo as the official emblem of the bicentennial. This design is depicted and described in Appendix A to this Part of the Commission's regulations. It is hereby designated by the Commission as the official National Bicentennial Logo and this designation includes any likeness of this Logo which, in whole or in part, is used in such manner as to suggest this Logo. Its use shall be governed by these regulations.

§ 2001.21 Authorized use of logo.

Authorization for use of the National Bicentennial Logo shall be granted only at the sole discretion of the Commission and in accord with these regulations. Reproduction of the Logo is permitted only after written authorization of the Commission. Authorized users may not delegate use of the Logo to others unless specifically authorized to do so in writing by the Commission or by these regulations.

§ 2001.22 No commercial use permitted.

No commercial use of the National Bicentennial Logo is authorized. The Commission shall review all requests for use of the Logo by commercial organizations. The Commission shall also review requests of a State Bicentennial Commission or a Designated Bicentennial Community (see below) for use of the Logo by a commercial sponsor of a project officially recognized by such Commission or Community. In exercising its discretion, the Commission shall determine each case on its merits.

Subpart C—Involvement With Bicentennial Projects

§ 2001.30 Commission decisions.

Unless delegated by vote of the Commission to a committee of the Commission, or to the Commission's Staff Director, authority to decide Commission involvement with projects remains with the full Commission. Commission involvement with bicentennial projects shall be determined by written decisions on each project as set forth herein.

§ 2001.31 Withdrawal of involvement.

The Commission reserves the right at all times and with respect to any project to withdraw its involvement or recognition, or both, including any authorization for use of the Logo.

§ 2001.32 Types of projects.

Initially, there will be five forms of Commission involvement with bicentennial projects. These are identified as Commission Projects, Cosponsored Projects, Officially Recognized Projects, State Bicentennial Commissions, and Designated Bicentennial Communities. The details as to each type of project recognition are set forth in the following sections of this Subpart.

§ 2001.33 Commission projects.

Commission Projects are defined as projects of national or international significance, for the development and implementation of which the Commission takes full responsibility. Such projects will be few in number and approved in advance by the Commission.

§ 2001.34 Cosponsored projects.

(a) *Commission participation.* The Commission may choose to cosponsor a limited number of projects with private and public organizations, domestic and foreign, including all branches and agencies of the Federal Government. In doing so, the Commission reserves the option to participate in a project's development and implementation, although primary responsibility for the project will ordinarily rest with the other sponsor or sponsors.

(b) *Use of logo.* Cosponsors shall be authorized to use the National Bicentennial Logo solely in connection with the project for which the Commission is a cosponsor. Such use shall include the legend, "Cosponsored by the Commission on the Bicentennial of the United States Constitution." A cosponsored project shall also be considered an Officially Recognized Project (see below).

(c) *Qualification criteria.* For a project to qualify for Commission cosponsorship the Commission must determine that (1) the project will make an exceptional contribution to advancing the national commemoration; (2) the project will increase public understanding and appreciation of the Constitution; (3) the cost to the Commission, if any, is reasonable in relation to what the project will accomplish; and, (4) the project will be adequately financed and directed.

§ 2001.35 Officially recognized projects.

(a) *Recognition requirements.* The Commission shall grant Official Recognition to projects of exceptional merit with regional, national, or international signficance. To be considered for Official Recognition, such projects must have substantial educational and historical value in relation to the U.S. Constitution and must be adequately financed and directed.

(b) *Implementation.* Responsibility to develop and implement an Officially Recognized Project lies with the Project's sponsor or sponsors. To the extent feasible the Commission shall monitor all Officially Recognized Projects.

(c) *Certificates of recognition.* Projects granted Official Recognition shall receive a Certificate of Official Recognition and such other symbolic recognition as may be approved by the Commission.

(d) *Use of logo.* Sponsors of Officially Recognized Projects are authorized to use the National Bicentennial Logo solely in connection with the Recognized Project. Sush use shall include the legend, "Officially Recognized by the Commission on the Bicentennial of the United States Constitution."

§ 2001.36 State Bicentennial Commission.

(a) *Recognition.* The Commission shall recognize any bicentennial organization as a State Bicentennial Commission upon the request of the Governor or the legislature of a State, or upon the request of the chief exective in the case of the District of Columbia, the Commonwealth of Puerto Rico, and the territories of American Samoa, Guam, and the Virgin Islands. A State Bicentennial Commission, so recognized, shall qualify as a State advisory

ISS
46
MR
10
1986
UMI

commission under section 6(d) of Pub. L. 98–101, 97 Stat. 719, 722. The Commission is authorized to delegate authority to such State advisory commissions to assist the Commission in carrying out its purposes.

(b) *Use of logo.* Recognized State Bicentennial Commissions are authorized to use and to grant use of the National Bicentennial Logo. Permission to use the Logo may be granted only to nonprofit organizations which are sponsors of projects officially recognized by a State commission as a part of a State bicentennial program, provided such sponsors have been advised in writing by the State commission of such recognition. In order to grant use of the Logo, the State commission shall determine in advance that the project will increase public understanding and appreciation of the U.S. Constitution, and that it will be adequately financed and directed.

(c) *Nonprofit organizations.* Nonprofit organizations which are sponsors of State-recognized projects may be authorized to use the National Bicentennial Logo solely in connection with the recognized project. Such use shall include the legend, "Recognized by the [Name of State Bicentennial Commission]."

(d) *Monitoring responsibility.* A State commission which grants use of the National Bicentennial Logo shall be responsible for monitoring such use to assure that it is consistent with the requirements of this Commission and with the letter and spirit of Pub. L. 98–101, 97 Stat. 719, and any amendments thereto.

§ 2001.37 Designated Bicentennial Communities

(a) *Definitions.* The Commission encourages local governing bodies to establish Bicentennial Communities. The term "community" includes all political subdivisions having an elected government, such as a city, county, town, village, township, borough, any Native American tribe or reservation, or any combination thereof. Unincorporated areas which have an established identity of their own may also apply for designation.

(b) *Qualification criteria.* A Designated Bicentennial Community is one which (1) has established a bicentennial committee broadly representative of the Community; (2) has developed a commemorative program that will educate its residents about the meaning and significance of the Constitution; and, (3) has received an official designation from the Commission.

(c) *Application Process.* To be considered as a Designated Bicentennial Community, a community should submit a completed application form to its State Bicentennial Commission. Upon approval, by the State commission, the application with the State commission's recommendation shall be sent to this Commission for its review and decision. (See Subpart D—Selection Process below.) The Commission shall prepare, publish and supply the required application forms and shall issue a Certificate of Designation to all communities whose applications are approved by the Commission.

(d) *Use of logo.* Designated Bicentennial Communities are authorized to grant use of the National Bicentennial Logo to nonprofit organizations which are sponsors of projects officially recognized by the Designated Community Bicentennial Committee as part of the community bicentennial program, provided the sponsors have been advised in writing by the local Bicentennial Committee of such recognition.

(e) *Nonprofit organizations.* Organization sponsors of Community-recognized projects are authorized to use the National Bicentennial Logo only in connection with the recognized project. Such use shall include the legend, "Recognized by [Name of Community], a Bicentennial Community."

(f) *Monitoring responsibility.* A Designated Bicentennial Community which grants use of the National Bicentennial Logo shall be responsible for monitoring such use to assure that it is consistent with the requirements of this Commission and with the letter and spirit of Pub. L. 98–101, 97 Stat. 719, and any amendments thereto.

Subpart D—Selection Process

§ 2001.40 Submission of application.

To apply for Commission Cosponsorship or Official Recognition of a project, sponsors must complete a Commission application and submit it together with all required materials to: Commission on the Bicentennial of the United States Constitution, 734 Jackson Place NW., Washington, DC 20503.

§ 2001.41 Application requirements.

Applications should include a comprehensive description of the project and a narrative statement indicating how the project meets the criteria established by the Commission, as provided on the application form. The application form shall include a statement that the applicant agrees to be bound by all policies, requirements, regulations and other decisions made by the Commission affecting the applicant's project and responsibilities. See Appendix B for sample form.

§ 2001.42 Evaluation.

The Commission staff shall evaluate all requests for cosponsorship or official recognition and shall prepare recommendations for action thereon by the Commission or its committees, or both. The Commission shall be informed of all applications for cosponsorship or official recognition and of all requests for recognition of State Bicentennial Commissions and Designated Bicentennial Communities.

§ 2001.43 State Commission approval.

Approval of the appropriate State Bicentennial Commission shall be required if the project is to be conducted or carried out within a single State.

§ 2001.44 Interim letter.

The Commission may issue a Letter of Encouragement when a project demonstrates outstanding merit but has not reached that stage of development or obtained that level of support which would provide reasonable assurance of implementation. This Letter does not authorize use of the National Bicentennial Logo.

§ 2001.45 Commission approval.

Commission approval of an application shall be in writing and result in the issuance of a letter of agreement to cosponsorship or a Certificate of Official Recognition, or both.

Subpart E—Coordination and Information

§ 2001.50 National Register of bicentennial projects.

(a) As a means of coordination, and to enable the Commission to provide information and advisory assistance to all interested individuals and groups, the Commission shall maintain a National Register of Bicentennial Projects.

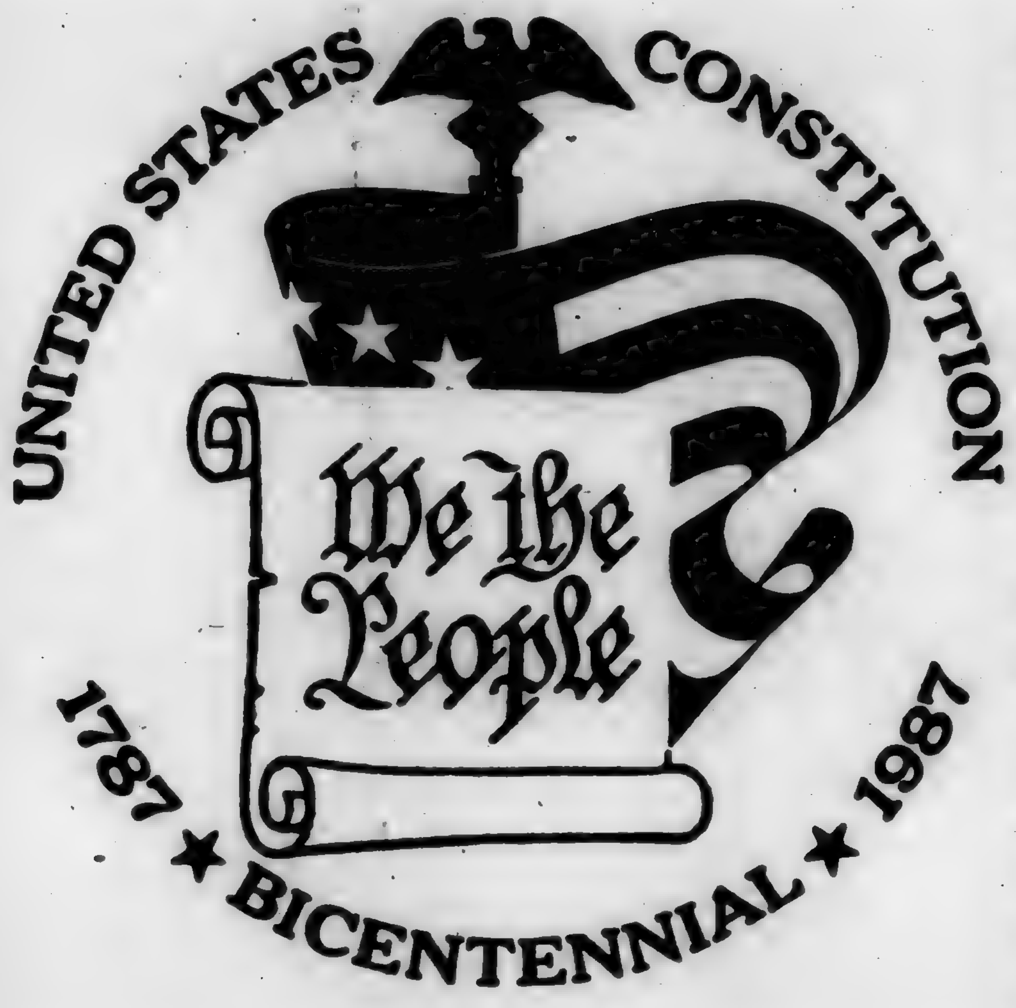
(b) This Register shall include all those projects, activities, and programs in which the Commission has involved itself. These may also be publicized by inclusion in commemorative calendars and schedules of bicentennial events published by the Commission.

(c) Within the limits of Commission resources, and to the extent feasible, the National Register shall be expanded to include officially recognized bicentennial projects approved and reported to the Commission by State Bicentennial Commissions and Designated Bicentennial Communities.

Appendix A to Part 2001—National Bicentennial Logo

This Appendix is intended to improve the utility of Part 2002 by setting forth a description and depiction of the National Bicentennial Logo adopted by the Commission on the Bicentennial of the United States Constitution. This Logo is the subject of Subpart B, §§ 2001.20–2001.22, and it is referred to repeatedly thereafter. Copies of the Logo may be obtained from the Commission. This Appendix contains no requirements or restrictions which are not already in the regulations.

Description: In color the Logo is intended to appear on a white or light-colored field. The canton of the American flag is dark blue and the stripes are bright red. The scroll lettering and borders are in gold; the eagle and flag staff are in gold. The circular lettering and dates are in dark blue. The Logo may also be duplicated wholly is black or dark blue on a light or white field.



Appendix B to Part 2001—Application For Recognition

This Appendix is intended to improve the utility of Part 2002 by setting forth a sample application form for use in applying to the Commission on the Bicentennial of the United States Constitution for official project recognition and support under the regulations contained therein. It contains no requirements or restrictions which are not already in the regulations.

The expectation of the Commission is that this application form will be used by all applicants or that applicants will use the form as a guide in submitting information with their applications, modifying its requirements as may be necessary for particular projects or activities. As a general matter, however, the information requested on the form set forth below will be required by the Commission for its evaluation process prior to granting official recognition of a commemorative project or activity.

Commission File No. ____

Application for Official Recognition by the Commission on the Bicentennial of the United States Constitution

(please type or print)

____

Date of Application

I. *Identification*

1. ____
Name of Sponsor (individual, organization, or agency)
2. ____
____
Address of Sponsor
3. (   ) ____
Sponsor's Telephone Number
4. ____
Name of Projects for which Recognition is Sought
5. ____
Name of Project Director
6. ____
Address and Tel. Number (if different from sponsor)

General Background Information (attach separate sheet)

1. Brief identification and history of the sponsor, including names of the members of the Board of Directors or other leadership body of the sponsoring organization, relevant background of principal organization personnel, and description of sponsor's previous experience, if any, with this type of project.

Please indicate who will be responsible for the operation of the project and in what capacity they will be so responsible. (Please attach resumes of director and co-director or equivalents.) Note: If sponsor is a nonprofit 501 (c)(3) organization please attach IRS verification.

2. A summary of the operations and programs of the sponsoring organization during the year immediately preceding the date of this application, including income and budget date. (Not applicable to newly formed organizations.)

3. Please attach copies of significant or representative endorsements of the project by individuals and governmental, business, community, service, academic, Bicentennial, or other organizations.

III. *Project Description* (attach additional sheets)

1. Provide a brief (no more than one typewritten page) description of the project for which recognition is sought.

2. Attach a *comprehensive* description of the project in narrative form, including the ways in which the project will be carried out, dates at which significant progress will be reached, the approximate number and background of probable participants and/or audience, and any other information relevant to successful conduct of the project. Also, please indicate how the project meets the regulatory criteria established by the Commission on the Bicentennial of the U.S. Constitution (see attached regulations).

IV. *Timing and Budget Information*

1. Please state the beginning and ending dates of the project. If specific dates are not yet determined, please state the criteria that will determine the duration of the project.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

Family Violence Prevention and Services

AGENCY: Office of Human Development Services (HDS), HHS.

ACTION: Notice of the availability of funds for State and Tribal grants for family violence prevention and services.

SUMMARY: FY 1985 and FY 1986 funds are now available for demonstration grants to States (including Territories and Insular Areas) and Indian Tribes and Tribal organizations to assist in establishing, maintaining, and expanding programs and projects to prevent family violence and to provide immediate shelter and related assistance for victims of family violence and their dependents. This Notice sets forth the application process and requirements for these demonstration grants. The Department expects that these FY 1986 Family Violence Prevention and Services grants will serve as a one year transition into the Administration's proposed Family Crisis and Protective Services program in FY 1987.

DATE: Applications must be received by May 9, 1986.

ADDRESS: Address applications to: Enid A. Borden, Office of Policy and Legislation, Room 306-E Humphrey Bldg., 200 Independence Avenue, S.W., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT: Enid A. Borden, (202) 245-7027.

SUPPLEMENTARY INFORMATION:

Background

On October 9, 1984, the President signed into law the Child Abuse Amendments of 1984 (Pub. L. 98-457, 42 U.S.C. 10401 et. seq.). Title III of these Amendments is entitled the "Family Violence Prevention and Services Act" (Act). The purposes of this legislation are to: assist States in their efforts to prevent family violence and provide immediate shelter and related assistance for victims of family violence and their dependents; and carry out coordination, research, training, technical assistance, and evaluation activities. In addition, the Secretary may also make grants directly to Indian Tribes and tribal organizations.

The Department has been an active participant in ongoing family violence prevention service activities, child abuse and neglect prevention and service activities, and initatives and efforts in the areas of elder abuse, services to runaway youth and prevention of youth suicide. In addition to funding and administering categorical, block grant, and discretionary grant programs that address these concerns, the Department has undertaken several national initiatives:

- A Federal government-wide interagency meeting was held in April of 1985 with representatives of 22 Federal departments and agencies as an initial step in coordinating Federal activities concerning the prevention and treatment of family violence as required under the Act.
- The Department sponsored the "Surgeon General's Workshop on Violence and Public Health" in 1985, which focused on the impact of domestic violence on family life.
- The Family violence segment of PROJECT SHARE, a Department-operated human services clearinghouse, has been expanded.

Funds under the Act will supplement the many excellent activities and programs currently being carried out by the public and private sectors. We particularly urge the continuation of private sector involvement, through in-kind or monetary contributions, to community-based family violence prevention activities.

Funds Available

Public Law 99-88, the Supplemental Appropriations Act of 1985, made $6 million available for the program through FY 1986. The Department's FY 1986 appropriation bill, Pub. L. 99-178, appropriated an additional $2.5 million. Public Law 99-177, the Gramm-Rudman-Hollings legislation, reduces this $8.5 appropriation to $8.393 million.

The Department will make $7.1 million (85% of total funds) available for grants to States (see section 310(b) of the Act). State allocations are listed at the end of this Notice and have been computed based on the formula in section 304. Section 304 also contains a provision for reallotment to other States of any funds not made available to a State because of such State's failure to meet the requirements for a grant.

The Department has also set aside $400,000 for direct grants to those Indian tribes or tribal organizations which: (1) Meet the definition of "Indian tribe" or "tribal organization" in sections 4(b) and (c) of the Indian Self-Determination and Education Assistance Act (25 USC 450(b)) (or any consortium of such Indian tribes or tribal organizations); and (2) which have current "638" contracts with the Bureau of Indian Affairs (BIA) to carry out social services programs and activities. According to the BIA, this represents 102 Tribes and tribal organizations.

We explored the possibility of funding all Tribes based on Indian population in proportion to the State's population, but that was not feasible given the amount of funds available. In view of the requirement in section 303(g) that 60% of grant funds be made available for "immediate shelter and related assistance," the Department believes that those Indian Tribes already operating social services programs will be able to utilize these funds most effectively. Since section 304(a) specifies a minimum base amount for State allocations, we have set a base amount for eligible Tribes. Tribes which meet the application requirements and whose reservation and surrounding tribal trust lands population is less than 3,000 will receive a minimum of $3,000; tribes which meet the application requirements and whose reservation and tribal trust lands population exceeds 3000 will receive a minimum of $8,000, except for the Navajo Tribe which will receive a minimum of $20,000. The Department will use the best available population figures from the Census Bureau. Where Census Bureau data is unavailable, we will use figures from the BIA Indian Population and Labor Force Report.

The remaining funds under Pub. L. 99-88 and Pub. L. 99-178 will be used to carry out the research, training, technical assistance, evaluation, coordination, and clearinghouse activities required by the Act.

Eligibility

"States" as defined in section 309(6) of the Act are eligible to apply for funds. The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Republic of Palau in accordance with section 514 of Pub. L. 99-178.

"Indian tribes" and "Tribal organizations" are eligible to apply if they meet the definitions in section 4(b) and (c) of the Indian Self-Determination and Education Assistance Act (section 309(2)) and have FY 1985 "638" contracts with the BIA for the delivery of social services.

Application Requirements—General

The application requirements for these grants do not go beyond the requirements in the statute. We have cited each requirement to the specific section of the law. We suggest that this Notice be read in conjunction with the

statute and specifically call to your attention the definitions of "family violence," "shelter," and "related assistance" in section 309 and, for States, the sub-state matching requirements in section 303(f).

State Application Requirements

The Secretary will approve any application that meets the requirements of the Act and this Notice and will not disapprove an application unless the State has been given reasonable notice of the Department's intention to disapprove and an opportunity to correct any deficiencies (section 303(a)(3)).

The application must be signed by the Chief Executive of the State and must contain the following information and assurances:

(1) The name of the State agency designated as responsible for the administration of State programs and activities related to family violence carried out under the Act and for coordination of related State programs (section 303(a)(2)(D)).

(2) The procedures designed to involve knowledgeable individuals and interested organizations and assure an equitable distribution of grants and grant funds within the State and between rural and urban areas in the State (section 303(a)(2)(C)).

(3) The following assurances:

(a) That funds under the Act will be distributed in demonstration grants to local public agencies and nonprofit private organizations for programs and projects within the State to prevent incidents of family violence and to provide immediate shelter and related assistance for victims and their dependents (section 303(a)(2)(A)).

(b) That not less than 60% of the funds distributed shall be used for immediate shelter and related assistance (section 303(g)).

(c) That not more than 5% of the funds will be used for State administrative costs (section 303(a)(2)(B)(i)).

(d) That in distributing the funds, the State will give special emphasis to the support of the projects specified in section 303(a)(2)(B)(ii), i.e., community-based projects of demonstrated effectiveness carried out by nonprofit private organizations (particularly those projects the primary purpose of which is to operate shelters for victims of family violence and their dependents) and those which provide counseling, alcohol and drug abuse treatment, and self-help services to abusers and victims.

(e) That no entity funded by the State will receive more than $50,000 in any one fiscal year, no entity will be funded for a total period in excess of three years, and no entity will receive more than a total of $150,000 under this Act (section 303(c)).

(f) That demonstration grants funded by the State will meet the matching requirements in section 303(f), i.e., 35% in the first year, 55% in the second year, and 65% in the third year; that, except in the case of a public entity, not less than 50% of the local matching share shall be raised from private sources; the local share may be in cash or in-kind; and the local share may not include any Federal funds provided under any authority other than this title.

(g) That demonstration grants funded by the State may not be used as direct payment to any victim or dependent of a victim of family violence (section 303(d)).

(h) That no income eligibility standard will be imposed on individuals receiving assistance or services supported with funds appropriated to carry out the Act (section 303(e)).

(i) That procedures will be developed to assure the confidentiality of records pertaining to persons receiving assistance or services from any program assisted under the Act as specified in section 303(a)(2)(E).

(j) That the address or location of any shelter-facility assisted under the Act will not be made public, except with written authorization of the person or persons responsible for the operation of such shelter (section 303(a)(2)(E)).

(k) That all demonstration grants made by the State under the Act must prohibit discrimination on the basis of age, handicap, sex, race, color, national origin or religion (section 307).

(l) That within one year after receiving a grant, the State will provide assurances that the State has or has under consideration a procedure for the eviction of an abusing spouse from a shared residence (section 303(a)(2)(F)).

(m) That States will comply with Departmental recordkeeping and reporting requirements and general requirements for the administration of grants under 45 CFR Part 74.

Indian Tribe and Tribal Organization Application Requirements

The application from the Indian Tribe or Tribal organization must be signed by the Chief Executive Officer of the Indian Tribe or Tribal organization and must contain the following information and assurances:

(1) The name of the organization or agency designated as responsible for the administration of the programs and activities related to family violence carried out under the Act and for coordination of related programs (section 303(a)(2)(D)).

(2) A statement that the applicant has obtained the authority to submit an application on behalf of the Indian individuals in the Tribe(s) (section 303(a)(2)(G)).

(3) The procedures designed to involve knowledgeable individuals and interested organizations in providing services under the Act (section 303(a)(2)(C)).

(4) A brief description of how the Indian Tribe or Tribal organization plans to use the grant funds to prevent incidents of family violence and to provide immediate shelter and related assistance to victims of family violence and their dependents (section 303(a)(2)(G)).

(5) The following assurances:

(a) That not less than 60% of the funds shall be used for immediate shelter and related assistance (section 303(g)).

(b) That no funds under the Act will be used as direct payment to any victim or dependent of a victim of family violence (section 303(d)).

(c) That no income eligibility standard will be applied to individuals receiving assistance or services supported with funds appropriated to carry out the Act (section 303(e)).

(d) That procedures will be developed to assure the confidentiality of records pertaining to persons receiving assistance or services from any program assisted under the Act as specified in section 303(a)(2)(E).

(e) That the address or location of any shelter-facility assisted under the Act will not be made public, except with written autorization of the person or persons responsible for the operation of such shelter (section 303(a)(2)(E)).

(f) That Indian grantees will comply with Department recordkeeping and reporting requirements and general grant administration requirements of 45 CFR Part 74.

Additional information

As a part of the legislative history for these Amendments, the Conference Report (H.R. Rep. No. 1038, 98th Cong., 2nd Sess., page 30, 1984) contained a statement of Congressional concern regarding a number of programmatic issues for this program. In order to share all available information with States for this new program, we have paraphrased the language of the Conference Report as follows:

> States may wish to consider giving priority to applicants in communities currently without a family violence prevention program or who can demonstrate that current services or programs are inadequate to meet the needs of the community.

VOL 51 ISS 46 MR 10 1986 UMI

States and Indian tribes are also encouraged to coordinate at all levels of service delivery with other public and private programs; and to include personnel with appropriate skills training, and experience in the administration of the programs and projects funded. We also suggest that recipients of funds under this title should take all reasonable steps to facilitate the reconciliation, where possible, of spouses and the family. In that regard we believe it would be inappropriate for demonstration grant recipients that provide temporary shelter for abused spouses to require a minimum length of stay for shelter residents, to censor mail or telephone calls of shelter residents, or to interfere with reconciliation efforts unless requested to do so by the resident.

Notification Under Executive Order 12372

For States, this program is covered under Executive Order 12372, "Intergovernmental Review of Federal Programs" for State plan consolidation and simplification only—45 CFR 100.12. The review and comment provisions of the Executive Order and Part 100 do not apply. Federally recognized Indian Tribes are exempt from the provisions and requirements of E.O. 12372.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the application requirements contained in this notice have been approved by the Office of Management and Budget under control number 0980–0175.

Indian Tribal Eligibility

Based on BIA data, below are two lists of Indian Tribes (or in one instance, a consortium of Tribes) which have FY 1985 contracts with the BIA to provide social services. Tribes are listed by BIA Area Office based on Census Bureau population data or, where that is not available, BIA data.

Tribes Under 3,000 Population

Eastern Area Office

Houlton Bank of Maliseet Indians of Maine
Indian Township Passamaguoddy Reservation of Maine
Miccosukee Tribe of Indians of Florida
Mississippi Band of Choctaw Indians, Mississippi
Narragansett Indian Tribe of Rhode Island
Penobscot Tribe of Maine
Pleasant Point Passamaguoddy Reservation of Maine
Seminole Tribe of Florida

Aberdeen Area Office

Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota
Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota
Devil's Lake Sioux Tribe of the Devil's Lake Sioux Reservation, North Dakota
Lower Brule Sioux Tribe of the Lower Brule Reservation, South Dakota
Sisseton-Wahpeton Sioux Tribe of the Lake Traverse Reservation, South Dakota
Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota
Yankton Sioux Tribe of South Dakota

Minneapolis Area Office

Grand Traverse Band of Ottawa and Chippewa Indians of Michigan
Menominee Indian Tribe of Wisconsin
Michigan Inter-Tribal Council on behalf of:
  Bay Mills Indian Community
  Hannahville Indian Community
  Keweenah Bay Indian Community
  Saginaw Chippewa Indian Tribe of Michigan, Isabella Reservation, Michigan
  Sault Saint Marie Tribe of Chippewa Indians of Michigan

Anadarko Area Office

Apache Tribe of Oklahoma
Cheyenne-Arapaho Tribes of Oklahoma
Comanche Indian Tribe of Oklahoma
Kiowa Indian Tribe of Oklahoma
Wichita Indian Tribe of Oklahoma

Billings Area Office

Chippewa-Cree Indians of the Rocky Boy's Reservation, Montana

Phoenix Area Office

Cocopah Tribe of Arizona
Colorado River Indian Tribes of the Colorado River Indian Reservation, Arizona and California
Duckwater Shoshone Tribe of the Duckwater Reservation, Nevada
Elko Band Council
Ft. McDermitt Paiute and Shoshone Tribes of the Ft. McDermitt Indian Reservation, Nevada
Ft. McDowell Mohave-Apache Indian Community, Arizona
Ft. Mojave Indian Tribe of Arizona
Hualapai Tribe of the Hualapai Reservation, Arizona
Kaibab Band of Paiute Indians of the Kaibab Indian Reservation, Arizona
Las Vegas Tribe of Paiute Indians of the Las Vegas Indian Colony, Nevada
Moapa Band of Paiute Indians of the Moapa River Indian Reservation, Nevada
Paiute Indian Tribe of Utah
Paiute-Shoshone Tribe of the Fallon Reservation and Colony, Nevada
Pascua Yaqui Tribe of Arizona
Pyramid Lake Paiute Tribe of the Pyramid Lake Reservation, Nevada
Quechan Tribe of the Ft. Yuma Indian Reservation, California
Reno-Sparks Indian Colony, Nevada
Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona
Shoshone Paiute Tribes of the Duck Valley Reservation, Nevada

Te-Moak Bands of Western Shoshone Indians, Nevada
Ute Indian Tribe of the Unitah and Ouray Reservation, Utah
Walker River Paiute Tribe of the Walker River Reservation, Nevada
Washoe Tribe of Nevada and California
Yavapai-Apache Indian Community of the Camp Verde Reservation, Arizona
Yerington Paiute Tribe of the Yerington Colony and Campbell Ranch

Albuquerque Area Office

Jicarilla Apache Tribe, New Mexico
Pueblo of Acoma, New Mexico
Pueblo of Isleta, New Mexico
Pueblo of Jemez, New Mexico
Pueblo of Picuris, New Mexico
Pueblo of San Felipe, New Mexico
Pueblo of San Juan, New Mexico
Pueblo of Santa Clara, New Mexico
Pueblo of Santo Domingo, New Mexico
Pueblo of Taos, New Mexico
Pueblo of Zia, New Mexico
Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado
Ute Mountain Tribe of the Ute Reservation, Colorado, New Mexico and Utah

Portland Area Office

Burns Paiute Indian Colony, Oregon
Confederated Tribes of the Siletz Reservation, Oregon
Confederated Tribes of the Umatilla Reservation, Oregon
Confederated Tribes of the Warm Springs Reservation, Oregon
Kootenai Tribe of Idaho

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List March 7, 1986.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at **(202) 783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

	WASHINGTON, DC	DENVER, CO	DALLAS, TX
WHEN:	March 20; 9 am and 1 pm. (identical sessions)	March 24; at 9 am.	April 23; at 1:30 pm.
WHERE:	Office of the Federal Register, First Floor Conference Room, 1100 L Street NW, Washington, DC	Room 239, Federal Building, 1961 Stout Street, Denver, CO.	Room 7A23, Earl Cabell Federal Building, 1100 Commerce Street, Dallas, TX.
RESERVATIONS:	Ruth Reedy, 202-523-5239, for reservations.	Elizabeth Stout Denver Federal Information Center. 303-236-7181, for reservations	local numbers: Dallas 214-767-8585 Ft. Worth 817-334-3624 Austin 512-472-5494 Houston 713-229-2552 San Antonio 512-224-4471, for reservations

Rules and Regulations

Federal Register
Vol. 51, No. 47
Tuesday, March 11, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF ENERGY

10 CFR Part 216

Defense Priorities and Allocations System

AGENCY: Department of Energy.

ACTION: Final rule; technical amendment.

SUMMARY: The Department of Energy (DOE) is amending the regulation in accordance with the newly established Defense Priorities and Allocations System by the Department of Commerce (15 CFR Part 350).

EFFECTIVE DATE: March 11, 1986.

FOR FURTHER INFORMATION CONTACT:

Gilbert J. Breer, Property and Equipment Management Division (MA-422), Procurement and Assistance Management Directorate, Washington, DC 20585, (202) 252-4920
Elliot Winnick, Office of the AGC for Procurement and Financial Incentives, GC-43, Washington, DC 20585, (202) 252-1526

SUPPLEMENTARY INFORMATION: DOE finds that advance notice and comment, which are generally required by the Administrative Procedure Act, are unnecessary for this technical amendment. This finding is based on the fact that the changes are limited to procedural guidance and that the changes will not adversely affect the public or impose any additional burden on the public.

As a result, the following sections are affected: The "Authority," is revised by removing the outdated authority citation and inserting the new authority citation. Revise section 216.1, "Introduction," paragraph (a) by adding a new sentence between the fourth and last sentence; paragraph (c) is amended by removing "Defense Materials System ("DMS") and the Defense Priorities System ("DPS") established by the Department of Commerce.", and inserting in its place "Defense Priorities and Allocations System ("DPAS") regulation established by the Department of Commerce, 15 CFR Part 350." Section 216.2, "Definitions," paragraphs (e) and (h) are revised by removing the definitions for "BDC" and "FPA" and inserting in their places the definitions for "DOC" and "FEMA," respectively. Section 216.3, "Requests for assistance," paragraph (a), introductory text, is amended by revising the second sentence by removing the out-of-date mailing address for applications and inserting the correct mailing address; paragraph (a)(11) is amended by removing "DMS Regulation 1" and inserting in its place "the DPAS Regulation, Section 350.31(e)(2)"; paragraph (b) is amended by removing "BDC" and inserting in its place "DOC." Section 216.5 paragraphs (a) and (b) are amended by removing "BDC" and inserting in its place "DOC"; paragraph (b) is further amended by removing "DMS Regulation 1 and DPS Regulation 1" and inserting in its place "the DPAS Regulation,". Section 216.6, "Petition for reconsideration," is amended by removing "216.9" and inserting in its place "216.8." Section 216.7, "Conflict of priority orders," is amended by removing "BDC" and "FPA" and inserting in their places "DOC" and "FEMA," respectively. Section 216.8, "Communications," is amended by revising the address, communications are addressed to.

List of Subjects in 10 CFR Part 216

Energy, Maximize domestic energy supplies, Government contracts.

For reasons set out in the preamble, Chapter II to Title 10 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, DC, on March 5, 1986.

Berton J. Roth,

Director, Procurement and Assistance Management Directorate.

PART 216—MATERIALS ALLOCATION AND PRIORITY PERFORMANCE UNDER CONTRACTS OR ORDERS TO MAXIMIZE DOMESTIC ENERGY SUPPLIES

1. The authority citation for Part 216 is revised to read as follows:

Authority: Section 104 of the Energy Policy and Conservation Act (EPCA) Pub. L. 94-163, 89 Stat. 871; and section 101(c) of the Defense Production Act of 1950 (DPA) (50 U.S.C. App. 2071(c)), as amended; section 7, E.O. 11912, April 13, 1976; Defense Mobilization Order No. 13, September 22, 1976; 44 CFR Part 330; Defense Priorities and Allocations System Delegation No. 2, 49 FR 30430.

2. In § 216.1, paragraph (a) is amended by adding a sentence between the fourth and last sentence, and by revising the last sentence of paragraph (c) to read as follows:

§ 216.1 Introduction.

(a) * * *Delegation No. 4 was superseded by Defense Priorities and Allocations System Delegation No. 2, effective date August 29, 1984, 49 FR 30430. * * *

* * * * *

(c) * * * If these additional two findings are made, the Department of Commerce will notify DOE, and DOE will inform the applicant that it has been granted the right to use priority ratings under the Defense Priorities and Allocations System ("DPAS") regulation established by the Department of Commerce, 15 CFR 350.

3. Section 216.2 is amended by revising paragraphs (e) and (h) to read as follows:

§ 216.2 Definitions.

* * * * *

(e) "DOC" means the Department of Commerce, acting through the Secretary or the delegate of the Secretary.

* * * * *

(h) "FEMA" means the Federal Emergency Management Agency.

* * * * *

4. Section 216.3 is amended by revising the second sentence of paragraph (a) introductory text; by revising paragraph (a)(11); and by revising paragraph (b) to read as follows:

§ 216.3 Requests for assistance.

(a) * * * The application should be sent to: Department of Energy, Procurement and Assistance Management Directorate, Attn: MA-422, Forrestal Building, 1000 Independence Avenue, S.W., Washington, DC 20585. * * *

* * * * *

(11) Quarterly estimates of requirements for controlled materials, if applicable, by shapes and forms as prescribed by the DPAS regulation. § 350.31(e)(2).

(b) DOE, on consultation with the DOC, may prescribe standard forms of application or letters of instruction for use by all persons seeking assistance.

* * * * *

§ 216.5 [Amended]

5. Section 216.5 paragraphs (a) and (b) are amended by removing "BDC" and inserting in its place "DOC"; paragraph (b) is further amended by removing "DMS Regulation 1 and DPS Regulation 1," and inserting in its place "the DPAS Regulation,".

§ 216.6 [Amended]

6. Section 216.6 is amended by changing the reference "216.9" to read "216.8" in the third sentence.

§ 216.7 [Amended]

7. Section 216.7 is amended by removing "BDC" and inserting "DOC" in its place, and removing "FPA" and inserting in its place "FEMA."

8. Section 216.8 is amended by revising the DOE mailing address to read as follows:

§ 216.8 Communications.

BILLING CODE 6450-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket 9133]

Boise Cascade Corp.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: This Final Order requires a Boise, Idaho distributor of office products to cease accepting from any supplier a net price for office products that is lower than the price at which the supplier sells the products to other retailers with whom respondent competes. The Commission ruled that respondent violated the Robinson-Patman Act by knowingly receiving wholesaler discounts on goods it sold at retail in competition with other dealers.

DATES: Complaint issued April 23, 1980. Final Order issued Feb. 11, 1986.[1]

FOR FURTHER INFORMATION CONTACT: Harold E. Kirtz, Atlanta Regional Office, Federal Trade Commission, 1718 Peachtree St., Room 1000, Atlanta, GA 30367. (404) 347–4836.

SUPPLEMENTARY INFORMATION: In the Matter of Boise Cascade Corporation, a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Discriminating In Price Under section 2, Clayton Act—Knowingly Inducing or Receiving Discriminating Price Under 2(f): § 13.855 Inducing and receiving discriminations. Subpart—Discrimination in Price Under Section 5, Federal Trade Commission Act: § 13.892 Knowingly inducing or receiving discriminating payments.

List of Subjects in 16 CFR Part 13

Office products, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; Sec. 2, 49 Stat. 1526; 15 U.S.C. 45, 13)

Before Federal Trade Commission

Final Order

Commissioners: Terry Calvani, Acting Chairman, Patricia P. Bailey, Mary L. Azcuenaga.

In the matter of Boise Cascade Corp., a corporation.

[Docket No. 9133]

This matter has been heard by the Commission upon the appeal of respondent from the Initial Decision, and upon briefs and oral argument in support of and in opposition to the appeal. For the reasons stated in the accompanying opinion, the Commission has determined to affirm the Initial Decision. Accordingly, the appeal of Boise Cascade Corporation is denied, and

It is ordered that the following order to cease and desist be, and the same hereby is, entered:

I

The following definitions shall apply in this order:

A. "Boise Cascade" shall mean Boise Cascade Corporation, its divisions and subsidiaries, its officers, directors, agents and employees, and its succesors and assigns.

B. "Office Products" shall mean furniture and supplies commonly used in offices such as those which are sold or distributed by Boise Cascade Corporation's Office Products Division.

C. "Net Price" shall take into account all discounts, rebates, allowances, deductions or other terms and conditions of sale.

II

It is further ordered that Boise Cascade shall, in connection with the offering to purchase or purchasing in commerce, as "commerce" is defined in the Clayton Act, of office products for resale, cease and desist from directly or indirectly inducing, receiving or accepting from any seller a net price that Boise Cascade knows or has reason to know is below the net price at which office products of like grade and quality are being offered or sold by such seller to other purchasers with whom Boise Cascade is competing in the resale or distribution of said office products to end-users.

III

It is further ordered that Boise Cascade shall, within sixty (60) days of the effective date of this order, distribute a copy of this order to each of its suppliers of office products.

IV

It is further ordered that Boise Cascade shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate structure of Boise Cascade, such as the creation or dissolution of subsidiaries or divisions, or any other change in the corporation, which may affect compliance obligations arising out of the order.

V

It is further ordered that Boise Cascade shall, within ninety (90) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner in which it has complied with this order and shall file such other reports as the Commission may from time to time require to assure compliance with the terms and conditions of this order.

Issued: February 11, 1986.

By direction of the Commission.

Emily H. Rock,

Secretary.

16 CFR Part 13

[Docket 9183]

The Electrical Bid Registration Service of Memphis, Inc., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: This Final Order requires a Memphis, Tenn. bid depository set up by electrical subcontractors to cease taking disciplinary action against firms that negotiate prices after bidding is closed or that accept a contract at a price other than that filed with the registry. Additionally, respondents may not require firms using the registry to deal only with other registry participants and cannot restrict in any way negotiations between electrical subcontractors and general contractors. Further, respondents are required to reinstate any firm it suspended for violation of the illegal rules and remove the illegal provisions from its by-laws or other rules.

DATES: Complaint issued Aug. 6, 1984. Final Order issued Feb. 12, 1986.[1]

FOR FURTHER INFORMATION CONTACT: Truett Honeycutt, Atlanta Regional Office, Federal Trade Commission, 1718 Peachtree St., Room 1000, Atlanta, GA 30367. (404) 347–4836.

SUPPLEMENTARY INFORMATION: In the Matter of The Electrical Bid Registration Service of Memphis, Inc., a corporation, and C.H. Dennis, Jr., individually and as an officer and director of said corporation, and James L. Overton, Wayne A. Allen, and Jack Gross, individually and as directors of said corporation, and The National Electrical Contractors Association, Memphis Chapter, a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Coercing and Intimidating: § 13.350 Customers or prospective customers; § 13.367 Members. Subpart—Combining or Conspiring: § 13.388 To control allocation and solicitation of customers; § 13.390 To control employment practice; § 13.497 To terminate or threaten to terminate contracts, dealings, franchises, etc. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; § 13.533–60 Release of general, specific or contractual constrictions, requirements, or restraints. Subpart—Cutting Off Access To Customers or Market: § 13.570 Interfering with competitors' bids or price quotations; § 13.580 Organizing and controlling seller-suppliers.

List of Subjects in 16 CFR Part 13

Electrical subcontractors, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Before Federal Trade Commission

[Docket No. 9183]

Final Order

Commissioners: Terry Calvani, Acting Chairman, Patricia P. Bailey, Mary L. Azcuenaga.

In the Matter of The Electrical Bid Registration Service of Memphis, Inc., a corporation, and C.H. Dennis, Jr., individually and as an officer and director of said corporation, and James L. Overton, Wayne A. Allen, and Jack Gross, individually and as directors of said corporation, and the National Electrical Contracters Assoc., Memphis Chapter, a corporation.

The Administrative Law Judge filed his Initial Decision in this matter on November 21, 1985, finding the corporate respondents Electrical Bid Registration Service of Memphis, Inc., and National Electrical Contractors Association, Memphis Chapter, Inc. to have violated section 5 of the Federal Trade Commission Act, 15 U.S.C. 45, by engaging in acts and practices as alleged in the complaint.

On December 11, 1985, the Respondents filed a notice of their intention to appeal the Initial Decision. That notice was withdrawn on January 10, 1986. Counsel Supporting the Complaint filed a notice of intention to appeal the Initial Decision on December 13, 1985, but withdrew their notice on January 8, 1986.

The Commission has determined that the case should be placed on its own docket for review and that the Initial Decision, with the exception of Finding 56 and the associated discussion, should become effective as the decision of the Commission. Accordingly,

It is ordered that the Initial Decision, except as noted above, and the Order contained therein shall become effective on February 12, 1986.

By the Commission. Acting Chairman Calvani would not have placed this matter on the Commission's docket for review and would have allowed the Initial Decision in its entirety to become effective as provided in § 3.51(a) of the Commission's Rules. The Commission having determined to take this procedural step, he concurs in the issuance of the Order contained in the Initial Decision.

Issued: February 12, 1986.

Emily H. Rock,

Secretary.

16 CFR Part 13

[Docket No. C-3182]

Health Care Management Corp. et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires the Columbus, Ga. owner and operator of North Mobile Community Hospital near Mobile, Ala., and the hospital's medical staff, among other things, to cease imposing unlawful restrictions relating to the practice of podiatry at the hospital. The hospital and its staff are prohibited from imposing such restrictions by not enacting any bylaw or policy that would have the effect of: (1) Coercing or intimidating any staff member not to co-admit podiatrists' patients; (2) Requiring an amount of residency training for podiatrists that is not reasonably related to legitimate quality-of-care grounds; or (3) Prohibiting podiatrists with hospital privileges from attending medical staff meetings.

DATE: Complaint and Order issued Feb. 20, 1986[1].

FOR FURTHER INFORMATION CONTACT: Paul K. Davis, Director, Atlanta Regional Office, Federal Trade Commission, 1718 Peachtree St., NW., Atlanta, GA 30367 (404) 881–4836.

SUPPLEMENTARY INFORMATION: On Tuesday, Oct. 15, 1985, there was published in the Federal Register, 50 FR 41693, a proposed consent agreement with analysis In the Matter of Health Care Management Corporation, a corporation, and Medical Staff of North Mobile Community Hospital, an unincorporated association, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

---

[1] Copies of the Complaint and the Decision and Order are filed with the original document.

VOL 51 ISS 47 MR 11 1986 UMI

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Aiding, Assisting and Abetting Unfair or Unlawful Act or Practice: § 13.290 Aiding, assisting and abetting unfair or unlawful act or practice. Subpart—Coercing and Intimidating: § 13.367 Members. Subpart—Combining or Conspiring: § 13.384 Combining or conspiring: § 13.405 To discriminate unfairly or restrictively, in general; § 13.450 To limit distribution or dealing to regular, established or acceptable channels or classes; § 13.497 To terminate or threaten to terminate contracts, dealings, franchises, etc. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; § 13.533–45 Maintain records.

List of Subjects in 16 CFR Part 13

Hospital privileges, Podiatrists, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Emily H. Rock,

Secretary.

---

16 CFR Part 13

[Docket No. C–3181]

Sunbeam Corp.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires a Pittsburgh, Pa. marketer of Oster brand air cleaners, among other things, to cease misrepresenting the ability of air cleaners to eliminate or help eliminate indoor pollutants. Additionally, respondent is required to have competent and reliable substantiation for all future claims about its products' efficacy.

DATE: Complaint issued Feb. 11, 1986. Order issued Feb. 11, 1986 [1].

FOR FURTHER INFORMATION CONTACT: Janet Grady, Director, San Francisco Regional Office, Federal Trade Commission, Room 12470, Box 36005, 450 Golden Gate Ave., San Francisco, CA 94102. (415) 556–1270.

SUPPLEMENTARY INFORMATION: On Friday, Nov. 29, 1985, there was published in the **Federal Register**, 50 FR 49058, a proposed consent agreement with analysis In the Matter of Sunbeam Corporation, a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Advertising Falsely or Misleadingly: § 13.10 Advertising falsely or misleadingly; § 13.05–5 Knowingly by advertising agent; § 13.170 Qualities or properties of product or service; § 13.170–16 Cleansing, purifying; § 13.190 Results; § 13.205 Scientific or other relevant facts; § 13.210 Scientific tests. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; § 13.533–45 Maintain records. Subpart—Misrepresenting Oneself and Goods—Goods: § 13.1710 Qualities or properties; § 13.1730 Results; § 13.1740 Scientific or other relevant facts; § 13.1762 Tests, purported. Subpart—Neglecting, Unfairly or Deceptively, to Make Material Disclosure: § 13.1885 Qualities or properties; § 13.1895 Scientific or other relevant facts.

List of Subjects in 16 CFR Part 13

Household air cleaning appliances, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

[T.D. 86–57]

Customs Regulations Amendment Relating to Textiles and Textile Products

AGENCY: U.S. Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations relating to the importation of textiles and textile products into the U.S. Due to recent changes in the Tariff Schedules of the United States resulting from Presidential Proclamation 5365, dated August 30, 1985, effectuating the U.S.-Israel Free Trade Area agreement, certain general headnotes upon which portions of the Customs Regulations are predicated no longer exist. Accordingly, this document revises the Customs Regulations to reflect those changes.

EFFECTIVE DATE: March 11, 1986.

FOR FURTHER INFORMATION CONTACT:

Legal Aspects: Phil Robins, Classification and Value Division (202–566–8181);

Operations Aspects: Bill Marchi, Duty Assessment Division (202–566–2957); U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

SUPPLEMENTARY INFORMATION:

Background

By T.D. 85–38, published in the **Federal Register** on March 5, 1985 (50 FR 8710), § 12.130, Customs Regulations (19 CFR 12.130), was amended to provide specific regulatory authority mandating that "country of origin" rules be applied in determining whether textiles or textile products are subject to any of the multilateral or bilateral textile agreements negotiated by the U.S. pursuant to section 204, Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Section 12.130(a), Customs Regulations, now states that textiles or textile products subject to section 204, Agricultural Act of 1956, as amended (7 U.S.C. 1854), include merchandise subject to General Headnotes 3(g)(iii)(C)(1), 3(g)(iii)(C)(2), and 3(g)(iii)(E) of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202). In addition, § 12.130(f), Customs Regulations, states that all importations of textiles and textile products covered by General Headnotes 3(g)(iii)(C)(2) or 3(g)(iii)(E), TSUS, shall be accompanied by the appropriate declaration(s) of the manufacturer, producer, exporter or

importer of the textiles or textile products.

Pursuant to the U.S.-Israel Free Trade Area (FTA) agreement, which became effective September 1, 1985, certain changes were made to the TSUS; including the deletion of General Headnotes 3(g)(iii)(C)(1), 3(g)(iii)(C)(2), and 3(g)(iii)(E).

The FTA agreement is a program providing for free or reduced rates of duty for merchandise from Israel to stimulate trade between Israel and the U.S. This program was authorized by §§ 401–405 of the Trade and Tariff Act of 1984 (Pub. L. 98–573) and implemented by the U.S.-Israel Free Trade Area Implementation Act of 1985 (19 U.S.C. 2112 note) and Presidential Proclamation 5365 of August 30, 1985, published in the **Federal Register** on September 5, 1985 (50 FR 36220). On January 1, 1995, all currently eligible reduced rate importations from Israel will be accorded duty-free treatment.

The deletion of the above mentioned general headnotes from the TSUS necessitates their deletion from § 12.130. These are nonsubstantive changes which will merely conform the Customs Regulations to the TSUS.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for this final rule, the provisions of the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601, *et seq.*), do not apply.

Inapplicability of Public Notice and Delayed Effective Date Provisions

Inasmuch as this amendment merely conforms the Customs Regulations to the TSUS, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure thereon are unnecessary and pursuant to 5 U.S.C. 553(d)(3), a delayed effective date is not required.

Drafting Information

The principal author of the document was Glen E. Vereb, Regulations Control Branch, Office of Regulations and Rulings, Customs Headquarters. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Part 12

Customs duties and inspection, Imports, Textile products and apparel.

Amendment to the Regulations

Part 12, Customs Regulations (19 CFR Part 12), is amended as set forth below.

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The general authority citation for Part 12 continues to read as follows. All other statutory authority cited at the end of various sections in Part 12 remains the same.

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624.

2. Paragraph (a) and the introductory text of paragraph (f) of § 12.130 are revised to read as follows:

§ 12.130 Textiles and textile products country of origin.

(a) *General.* Textiles or textile products subject to § 204, Agricultural Act of 1956, as amended (7 U.S.C. 1854), include merchandise which is classifiable under the provisions contained in Schedule 3, Subpart 6D of Schedule 6, Part 1 of Schedule 7, and Subparts 4A, 5D, 5E, 7B, 12C, and 13B of Schedule 7 of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202); provided that such merchandise:

(1) Is in chief value of cotton, wool, or man-made fibers, or any textile fibers subject to the terms of any textile trade agreement, or any combination thereof; or

(2) Contains 50 percent or more by weight of cotton or man-made fibers, or any textile fibers subject to the terms of any textile trade agreement; or

(3) Contains 17 percent or more by weight of wool; or

(4) If in chief value of textile fibers or textile materials, contains a blend of cotton, wool, or man-made fibers, or any textile fibers subject to the terms of any textile trade agreement, or any combination thereof, which fibers, in the aggregate amount to 50 percent or more by weight of all component fibers.

* * * * *

(f) *Declaration of manufacturer, producer, exporter, or importer of textiles and textile products.* All importations of textiles and textile products subject to section 204, Agricultural Act of 1956, as amended, shall be accompanied by the appropriate declaration(s) set forth in paragraph (f)(1) or (f)(2) of this section. Textiles or textile products subject to section 204 include that merchandise described in § 12.130(a). All importations of textiles and textile products not subject to section 204 shall be accompanied by the declaration set forth in paragraph (f)(3) of this section. The declaration(s) shall be filed with the entry. The declaration(s) may be prepared by the manufacturer, producer, exporter or importer of the textiles and textile products. If multiple manufacturers, producers, or exporters are involved, a separate declaration prepared by each may be filed. A separate declaration may be filed for each invoice which is presented with the entry. The determination of country of origin, other than as set forth in paragraph (g) of this section, will be based upon information contained in the declaration(s). The declaration(s) shall not be treated as a missing document for which a bond may be filed. Entry will be denied unless accompanied by a properly executed declaration(s)

* * * * *

Approved: February 24, 1986.

William Von Raab,

Commissioner of Customs.

Francis A. Keating, II,

Assistant Secretary of the Treasury.

BILLING CODE [illegible]

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 232 and 235

[Docket No. R–86–1277; FR–2229]

Mortgage Insurance, Changes in Interest Rates

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This change in the regulations decreases the maximum allowable interest rate on section 232 (Mortgage Insurance for Nursing Homes) and on section 235 (Homeownership for Lower Income Families) insured loans. This final rule is intended to bring the maximum permissible financing charges for these programs into line with competitive market rates.

EFFECTIVE DATE: March 3, 1986.

FOR FURTHER INFORMATION CONTACT: John N. Dickie, Chief Mortgage and Capital Market Analysis Branch, Office of Financial Management, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Telephone (202) 755–7270. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The following amendments to 24 CFR Chapter II have been made to decrease the maximum interest rate which may be charged on loans insured by this Department under section 232 (fire safety equipment) and section 235 of the National Housing Act. The maximum interest rate on the HUD/FHA section 232 (fire safety equipment) and section 235 insurance programs has been lowered from 10.50 percent to 9.50 percent.

The Secretary has determined that this change is immediately necessary to meet the needs of the market and to prevent speculation in anticipation of a change.

As a matter of policy, the Department submits most of its rulemaking to public comment, either before or after effectiveness of the action. In this instance, however, the Secretary has determined that advance notice and public comment procedures are unnecessary and that good cause exists for making this final rule effective immediately.

HUD regulations published at 47 FR 56266 (1982), amending 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, contain categorical exclusions from their requirements for the actions, activities and programs specified in § 50.20. Since the amendments made by this rule fall within the categorical exclusions set forth in paragraph (*1*) of § 50.20, the preparation of an Environmental Impact Statement or Finding of No Significant Impact is not required for this rule.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local governmental agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In accordance with the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule provides for a small increase in the mortgage interest rate in programs of limited applicability, and thus of minimal effect on small entities.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on October 29, 1985 (50 FR 4166) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program numbers are 14.108, 14.117, and 14.120.

List of Subjects

24 CFR Part 235

Condominiums, Cooperatives, Low and moderate income housing, Mortgage insurance, Homeownership, Grant programs: Housing and community development.

24 CFR Part 232

Fire prevention, Health facilities, Loan programs: Health, Loan programs—Housing and community development, Mortgage insurance, Nursing homes, Intermediate care facilities.

Accordingly, the Department amends 24 CFR Parts 232 and 235 as follows:

PART 232—NURSING HOMES AND INTERMEDIATE CARE FACILITIES MORTGAGE INSURANCE

1. The authority citation for 24 CFR Part 232 continues to read as follows:

Authority: Secs. 211, 232, National Housing Act (12 U.S.C. 1715b, 1715w); sec. 7(d), Department of Housing and Urban Development (42 U.S.C. 3535(d)).

2. In § 232.560, paragraph (a) is revised to read as follows:

§ 232.560 Maximum interest rate.

(a) The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 9.50 percent per annum, except that where an application for commitment was received by the Secretary before March 3, 1986, the loan may bear interest at the maximum rate in effect at the time of application.

* * * * *

PART 235—MORTGAGE INSURANCE AND ASSISTANCE PAYMENTS FOR HOME OWNERSHIP AND PROJECT REHABILITATION

3. The authority citation for 24 CFR Part 235 continues to read as follows:

Authority: Secs. 211, 235, National Housing Act, (12 U.S.C. 1715b, 1715z); sec. 7(d), Department of Housing and Urban Development Act, (42 U.S.C. 3535(d)).

4. In § 235.9, paragraph (a) is revised to read as follows:

§ 235.9 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 9.50 percent per annum, except that where an application for commitment was received by the Secretary before March 3, 1986, the loan may bear interest at the maximum rate in effect at the time of application.

* * * * *

5. In § 235.540, paragraph (a) is revised to read as follows:

§ 235.540 Maximum interest rate.

(a) On or after March 3, 1986, the loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 9.50 percent per annum, with the exception of applications submitted pursuant to feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new

rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

BILLING CODE 4210–27–M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 201–8

[FIRMR Amdt. 6]

Implementation of Federal Information Processing Standards (FIPS), Federal Telecommunications Standards (FED–STDS), and Joint FIPS/FED–STDS in the FIRMR

AGENCY: Information Resources Management Service, GSA.

ACTION: Final rule.

SUMMARY: This regulation updates implementation provisions for a number of Federal Information Processing Standards (FIPS), Federal Telecommunications Standards (FED–STDS), and Joint Federal Information Processing Standards/Federal Telecommunications Standards (FIPS/FED–STDS) to provide associated standard terminology that shall be used in solicitation documents, including requirements documents, where the standard is applicable. Some general language has been added to more fully explain the kinds and purpose of standards and how copies may be obtained. Additionally, clarification has been added to explain that if a FIPS waiver or FED–STD exception is obtained, a deviation from the FIRMR is not required. The intended effect of this regulation is to enhance economy and efficiency in the acquisition of automatic data processing/telecommunications equipment and services.

EFFECTIVE DATE: May 12, 1986.

FOR FURTHER INFORMATION CONTACT: Phillip R. Patton, Policy Branch (KMPP), Information Resources Management Service, telephone (202) 566–0194 or FTS 566–0194.

SUPPLEMENTARY INFORMATION: (1) Among the changes is an update of FIPS PUB 1–1 to FIPS PUB 1–2 which consolidates FIPS PUBS 1–1, 7, 15, 35, and 36. FIPS PUB 1–2 specifies the codes and character sets for use in Federal information processing systems, communication systems, and associated equipment. This consolidation reduces the number of closely related FIPS PUBS in the family of standards based upon the voluntary American National Standard Code for Information Interchange. Other revisions implement new FIPS PUB 2–1, 8–5, and 33–1. FIPS PUBS 107, 108, and 111 and FED–STDS 1015, 1026 and 1028 are also implemented. FIPS PUB 98 is suspended indefinitely with the implementing text being removed with a note of explanation.

(2) The changes being made by this issuance are explained in the following paragraphs.

a. Section 201–8.100–1 is revised to explain more completely what is provided in the standards index.

b. Section 201–8.101–1 is revised to separate regulatory coverage on implementation of standards from that of deviations.

c. Section 201–8.101–2 is amended to state that if a waiver is obtained from the use of an individual FIPS, a FIRMR deviation is not required. Also, a statement is added that if specifications for waiver approval are not included in the FIPS, waiver approval responsibility rests with the head of the agency.

d. Section 201–8.101–3 is amended to state that if an exception is obtained from the use of an individual FED–STD, a deviation from the FIRMR is not required.

e. Section 201–8.101–4 is added to provide separate coverage of deviations from that of standards implementation and to state that if a waiver or exception is obtained from the use of an individual standard, a deviation from the FIRMR is not required.

f. Section 201–8.102 is amended to advise agencies that Federal standards for information resources are issued under authorities and procedures set forth in this section.

g. Section 201–8.102–1 is amended to advise agencies that FIPS PUBS fall into two general categories, FIPS PUB Standards and FIPS PUB Guidelines. It further advises that qualifications concerning use and special implementing information are explained where applicable in the FIPS PUBS.

h. Section 201–8.102–2 is revised to state that FED–STDS are developed by the National Communication System under delegation from GSA. It also advises DoD activities and contractors how and where they may obtain copies of the standards.

i. Section 201–8.103 is revised to replace MIL–STD–188–120 with FED–STD 1037 as the official authority for Federal telecommunications standards terms and definitions.

j. Section 201–8.104 is amended to provide that if a FIPS PUB is waived or a FED–STD is expected relative to a specific requirement, the agency is not required to apply the standard to the acquisition nor is a deviation from the FIRMR required.

k. Section 201–8.105–1 is revised to reflect that FIPS PUB 1–1 has been updated to FIPS PUB 1–2 by consolidating and superseding FIPS PUBS 1–1, 7, 15, 35, and 36.

l. Section 201–8.105–2 is revised to reflect that FIPS PUB 2 is being updated to FIPS PUB 2–1 by superseding FIPS PUB 7. FIPS PUB 7 was referred to in FIPS PUB 2 as a future FIPS PUB and was subsequently developed to provide relevant implementation guidance for FIPS PUB 2.

m. Section 201–8.105–4 is revised and reserved reflecting the deletion of FIPS PUB 7 that is superseded by FIPS PUB 1–2.

n. Section 201–8.105–7 is revised and reserved reflecting the deletion of FIPS PUB 15 which is superseded by FIPS PUB 1–2.

o. Section 201–8.105–12 is revised to reflect that FIPS PUB 33 is being updated to FIPS PUB 33–1 by replacing American National Standard Institute X3.45–1974, Character Set for Handprinting, with X3.45–1982, Character Set for Handprinting. The updated standard incorporates editorial and technical modifications that are not substantive.

p. Section 201–8.105–13 is revised and reserved reflecting the deletion of FIPS PUB 35 that is superseded by FIPS PUB 1–2.

q. Section 201–8.105–14 is revised and reserved reflecting the deletion of FIPS PUB 36 that is superseded by FIPS PUB 1–2.

r. Section 201–8.105–18 is revised to change the reference to FIPS PUB 1–1 to FIPS PUB 1–2.

s. Section 201–8.105–30 is revised to change references to FIPS PUB 1–1 to FIPS PUB 1–2 and delete references to FIPS PUB 35.

t. Sections 201–8.105–31 and 201–8.105–32 are amended to remove the words, "Federal Standard," from the sections' captions.

u. Section 201–8.105–33 is revised to change the references to FIPS PUB 1–1 to FIPS PUB 1–2.

v. Section 201–8.105–35 is added by incorporating FIPS PUB 107, Local Area Networks: Baseband Carrier Sense

VOL 51 ISS 47 MR 11 1986 UMI

Multiple Access with Collision Detection Access Method and Physical Layer Specifications and Link Layer Protocol.

w. Section 201–8.105–36 is added by incorporating FIPS PUB 108, Alphanumeric Computer Output Microform Quality Test Slide.

x. Section 201–8.105–37 is added by incorporating FIPS PUB 111, Storage Module Interfaces (With Extensions for Enhanced Storage Module Interfaces).

y. Section 201–8.106–6 is revised by deleting the existing text, reserving the section, and adding a note to explain that implementation of FIPS 98, Message Format for Computer Based Message Systems, has been suspended indefinitely pending its revision.

z. Sections 201–8.107–1, 201–8.107–2, and 201–8.107–3 are amended to remove the words, "Federal Standard," from the sections' captions.

aa. Section 201–8.109 is amended to state that if the entire Federal Standard language specification has been waived, no compiler validation is required for that acquisition.

bb. Section 201–8.110–1 is amended to revise paragraph (b) that updates FIPS PUB 8–4 to FIPS PUB. 8–5 and add to its title the parenthetical, "(Including CMSAs, PMSAs and NECMAs)."

cc. Section 201–8.112–8 is added to incorporate FED–STD 1015, Telecommunications: Analog to Digital Conversion of Voice by 2400 Bit/Second Linear Predictive Coding.

dd. Section 201–8.112–12 is revised to add FED–STD 1026, Telecommunications: Interoperability and Security Requirements for Use of the Data Encryption Standard in the Physical Layer of Data Communications.

ee. Section 201–8.112–14 is revised by relocating coverage on FED–STD 1030A to Section 201–8.112–16 and replacing it with coverage on FED–STD 1028.

ff. Section 201–8.112–16 is revised by relocating coverage on FED–STD 1061 to Section 201–8.112–25 and replacing it with coverage on FED–STD 1030A.

gg. Section 201–8.112–17 is revised by relocating coverage on FED–STD 1062 to Section 201–8.112–26 and reserving this section.

hh. Section 201–8.112–18 is revised by relocating coverage on FED–STD 1063 to Section 201–8.112–27 and reserving this section.

ii. Section 201–8.112–19 through 201–8.112–24 are established and reserved.

jj. Section 201–8.112–25 is established to relocate the coverage on FED–STD 1061.

kk. Section 201–8.112–26 is established to relocate the coverage on FED–STD 1062.

ll. Section 201–8.112–27 is established to relocate the coverage on FED–STD 1063.

mm. Section 201–8.113–2 is revised to change the references to FIPS PUB 1–1 to FIPS PUB 1–2.

nn. Section 201–8.113–3 is revised to change the references to FIPS PUB 1–1 to FIPS PUB 1–2.

oo. Section 201–8.113–4 is revised to change the references to FIPS PUB 1–1 to FIPS PUB 1–2 and delete the reference to FIBS PUB 15.

(2) The General Services Administration (GSA) has determined that this rule is not a major rule for purposes of Executive Order 12291 of February 17, 1981. GSA decisions are based on adequate information concerning the need for, and the consequences of the rule. The rule is written to ensure maximum benefits to Federal agencies. This is a Governmentwide management, acquisition, and use regulation that will have little or no net cost effect on society.

Computer technology, Telecommunications, Information resources activities, Standards for information resources.

Chapter 201 of Tile 41 of the Code of Federal Regulation is amended as set forth below.

PART 201-8—IMPLEMENTATION AND USE OF FEDERAL STANDARDS

1. The table of contents for Part 201–8 is changed by amending, reserving, or adding the following entries and the authority citation for the part continues to read as follows:

201–8.100–1 Standards Index.
201–8.101–1 Implementation.
201–8.101–4 Deviations.
201–8.105–4 [Reserved]
201–8.105–7 [Reserved]
201–8.105–13 [Reserved]
201–8.105–14 [Reserved]
201–8.105–31 FIPS PUB 89, Optical Character Recognition (OCR) Character Positioning.
201–8.105–33 FIPS PUB 91, Magnetic Tape Cassettes for Information Interchange, Dual Track, Complementary Return-to-Bias (CRB) Four-States Recording on 3.81 mm (0.150 in) Tape.
201–8.105–35 FIPS PUB 107, Local Area Networks: Baseband Carrier Sense Multiple Access with Collision Detection Access Method and Physical Layer Specifications and Link Layer Protocol.
201–8.105–36 FIPS PUB 108, Alphanumeric Computer Output Microform Quality Test Slide.
201–8.105–37 FIPS PUB 111, Storage Module Interfaces (With Extensions for Enhanced Storage Module Interfaces).
201–8.106–6 [Reserved]
201–8.107–1 FIPS PUB 21–1, COBOL.
201–8.107–2 FIPS PUB 68, Minimal BASIC.
201–8.107–3 FIPS PUB 69, FORTRAN.
201–8.112–8 FED–STD 1015, Telecommunications: Analog to Digital Conversion of Voice by 2400 Bit/Second Linear Predictive Coding.
201–8.112–12 FED–STD 1026, Telecommunications: Interoperability and Security Requirements for Use of the Data Encryption Standard in the Physical Layer of Data Communications.
201–8.112–14 FED–STD 1028, Telecommunications: Interoperability and Security Requirements for Use of the Data Encryption Standard with CCITT Group 3 Facsimile Equipment Communications.
201–8.112–16 FED–STD 1030A, Electrical Characteristics of Unbalanced Voltage Digital Interface Circuits.
201–8.112–17 [Reserved]
201–8.112–18 [Reserved]
201–8.112–19 [Reserved]
201–8.112–20 [Reserved]
201–8.112–21 [Reserved]
201–8.112–22 [Reserved]
201–8.112–23 [Reserved]
201–8.112–24 [Reserved]
201–8.112–25 FED–STD 1061, Group 2 Facsimile Apparatus for Document Transmission.
201–8.112–26 FED–STD 1062, Group 3 Facsimile Apparatus for Document Transmission.
201–8.112–27 FED–STD 1063, Telecommunications: Procedures for Document Facsimile Transmission.

Authority: Sec. 205(c), 63 stat. 390; 40 U.S.C. 486(c).

2. Section 201–8.100–1 is revised to read as follows:

§ 201.8.100–1 Standards Index.

GSA publishes periodically, usually annually, a handbook titled, the ADP and Telecommunications Standards Index. It provides guidance to agencies on the application of standards in the acquisition and use of ADP and telecommunications equipment and services. it specifies standard terminology for use in requirements documents, including solicitations, for each standard. The handbook also provides status on standards under development. Its availability and ordering information is provided through the issuance of a FIRMR bulletin.

3. Section 201–8.101–1 is revised to read as follows:

§ 201–8.101–1 Implementation.

Agencies shall implement Federal standards for the acquisition and use of automatic data processing and telecommunications equipment, services and related software as prescribed by this subpart.

4. Section 201–8.101–2 is revised to read as follows:

§ 201–8.101–2 Waiver to a Federal Information Processing Standard (FIPS).

Waiver procedures, together with exemption and waiver approval authority from the mandatory use of a specific FIP, are contained in each FIPS. If specifications for waiver approval are not included in the FIPS, waiver approval responsibility rests with the head of the agency. Exceptions, waiver authority approval, and criteria upon which to base exemptions and waiver approval are explained where applicable. For some standards, a waiver approval response from the Secretary of Commerce to an agency request for waiver is required before acquisition action can commence. If a waiver is obtained from the use of an individual FIPS, a deviation from the FIRMR is not required.

5. Section 201–8.101–3 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 201–8.101–3 Exception to a Federal Telecommunication Standard (FED–STD).

(a) Exceptions to the mandatory use of a FED–STD required by this Subpart 201–8 may be granted by GSA only upon submission of adequate justification to GSA. If an exception is obtained from the use of an individual FED–STD, a deviation from the FIRMR is not required. Circumstances under which exceptions may be granted include, but are not limited to, the following—.

* * * * *

6. Section 201–8.101–4 is added to read as follows:

§ 201–8.101–4 Deviations.

Deviations to the implementation of standards as prescribed by this subpart shall be handled as provided in Subpart 201–1.4. If a waiver or exception is obtained from the use of an individual standard, a deviation from the FIRMR is not required.

7. Section 201–8.102 is revised to read as follows:

§ 201–8.102 Types of Federal standards.

Federal standards for information resources are adopted and issued under authorities and procedures set forth in the following subsections of this § 201–8.102. These standards are applied and implemented into Federal information resources activities by this Subpart 201.8.1 by GSA. Federal standards discussed in this part are categorized as Federal Information Processing Standards (FIPS), Federal Telecommunications Standards (FED–STDS), or as Joint Federal Information Processing and Federal Telecommunications Standards (FIPS/FED-STUDS). Each of these standard categories is described in detail below.

8. Section 201–8.102–1 is revised to read as follows:

§ 201–8.102–1 Federal Information Processing Standards Publications (FIPS PUBS).

(a) Federal Information Processing Standards Publications (FIPS PUBS) are official Federal Government publications relating to standards adopted and issued under the provisions of section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 759(f)), and Executive Order 11717, dated May 9, 1973 (38 FR 12315, May 11, 1973). FIPS PUBS, issued by the National Bureau of Standards (NBS,) fall into general categories, FIPS PUB Standards and FIPS PUB Guidelines. FIPS PUB Guidelines are informational documents whereas FIPS PUB Standards are mandatory.

(b) Qualifications concerning use and special implementing information are explained where applicable.

(c) Requests for FIPS PUBS (except for Department of Defense (DoD) activities and DoD contractors), including discounts for quantity orders, should be sent to: National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161 (Telephone (703) 487–4650 or FTS 737–4650).

(d) Requests for FIPS PUBS subscriptions should be sent to: Subscriptions, National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161 (Telephone (703) 487–4630, or FTS 737–4630).

(e) Requests from Department of Defense (DoD) activities and DoD contractor, should be sent to: Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120.

(1) Requests should include a complete mailing address.

(2) Requests from DoD contractors must include the solicitation or contract number where applicable.

(3) List requested documents in alphabetical order and indicate quantity of each document.

(4) Telephone requests may be made by calling (215) 697–3321 or AUTOVON 442–3321.

9. Section 201–8.102–2 is revised to read as follows:

§ 201–8.102–2 Federal Telecommunications Standards (FED-STDS).

(a) Federal Telecommunications Standards (FED-STDS) are official Federal Government publications relating to standards adopted and issued under the provisions of section 206 of the Federal Property and Administrative Services Act of 1949, 63 Stat. 390, as amended (40 U.S.C. 487). These Federal publications are issued by GSA and collectively constitute the Federal Supply Class (FSC) of "Telecommunications" in the Federal Standards Index. These standards are developed by the National Communications System under delegation from the GSA.

(b) Federal agencies may obtain one copy of each FED-STD free of charge. Copies are available to the public on a cost-reimbursable basis. Requests for these publications, specifying the FED-STD number, should be sent to: General Services Administration (WFSI), Washington, DC 20407 (Telephone (202) 472–2205 or FTS, 472–2205).

(c) Requests from Department of Defense (DoD) activities and DoD contractors, should be sent to: Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120.

(1) Requests should include a complete mailing address.

(2) Requests from DoD contractors must include the solicitation or contract number where applicable.

(3) List requested documents in alphabetical order and indicate quantity of each document.

(4) Telephone requests may be made by calling (215) 697–3321 or AUTOVON 442–3321.

10. Section 201–8.103 is revised to read as follows:

§ 201–8.103 Categories of Federal standards.

The following categories of Federal standards are implemented by this Subpart 201–8.1. For terms not defined in an individual FIPS PUB, see FIPS PUB 11–2, Guidelines: American National Standard Vocabulary for Information Processing Systems, available as indicated in § 201–8.102–1(d). Federal telecommunications standards terms and definitions are defined in FED–STD 1037, Glossary of Telecommunications Terms, available as indicated in § 201–8.102–2(d).

11. Section 201–8.104 is amended by revising paragraph (a) to read as follows:

§ 201–8.104 Application of Standards to requirements.

(a) FIPS PUBS and FED–STDS, unless waived or excepted, shall be applied to ADP and telecommunication acquisitions. Standard terminology for use in requirements documents, including solicitations for offers, is provided for each standard implemented

VOL
51
ISS
47
MR

1986
UMI

by GSA in the subsections of this Subpart 201–8.1 entitled with FIPS PUB, FED–STD, or join FIPS/FED–STD numbers. When a FIPS PUBS is waived or a FED–STDS is excepted with respect to a specific requirement, the agency is not required to apply the standard to the acquisition. No deviation from the FIRMR is required (see §§ 201–8.101–2 and 201–8.101–3).

* * * * *

12. Section 201–8.105–1 is revised to read as follows:

§ 201–8.105–1 FIPS PUB 1–2, Code for Information Interchange, Its Representations, Subsets, and Extensions.

(a) FIPS PUB 1–2 promulgates the American National Standard Code for Information Interchange (ASCII) and specifies the code and character set for use in Federal information processing systems, communications systems, and associated equipment.

(b) The standard terminology for use in requirements documents, including solicitations, is:

ASCII System Requirements (DEC 85 FIRMR)

The system, upon receiving a hardware or software command, must accept data on magnetic tape, paper tape, or any other input/output media covered by an approved Federal Information Processing Standards Publication (FIPS PUB) in ASCII code and collating sequence prescribed in FIPS PUB 1–2 and in the format prescribed in FIPS PUBS 2–1, 3–1, 25, 50, or other applicable FIPS PUBS. Such data may be translated, if necessary, into a form that the equipment can internally process, provided that, upon receiving a hardware or software command, the equipment can produce processed data on magnetic tape, paper tape, printers, and other output media in the ASCII code and collating sequence prescribed in FIPS PUB 1–2 and in the format prescribed in FIPS PUBS 2–1, 3–1, 25, 50, or other applicable FIPS PUBS.

(End of requirement statement)

13. Section 201–8.105–2 is revised to read as follows:

§ 201–8.105–2 FIPS PUB 2–1, Perforated Tape Code for Information Interchange.

(a) FIPS PUB 2–1 specifies the representation of the ASCII code and format on perforated tape to be used in Federal information processing systems, communication systems, and associated equipment.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Punched Paper Tape Readers and Punches (DEC 85 FIRMR)

Punched paper tape equipment must be capable of reading and punching in the prescribed ASCII code and format specified in FIPS PUBS 1–2 and 2–1.

(End of requirement statement)

§ 201–8.105–4 [Reserved]

14. Section 201–8.105–4 is removed and reserved as follows:

§ 201–8.105–7 [Reserved]

15. Section 201–8.105–7 is removed and reserved as follows:

16. Section 201–8.105–12 is revised to read as follows:

§ 201–8.105–12 FIPS PUB 33–1, Character Set for Handprinting.

(a) FIPS PUB 33–1 announces the adoption of the American National Standard X3.45–1982, Character Set for Handprinting, as a Federal standard. The standard provides the description, scope, and application rules for a character set for handprinting.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Reading Handprinted Material (DEC 85 FIRMR)

All applicable Optical Character Recognition (OCR) equipment or services which result from this requirement and which are capable of reading handprinted material must comply with FIPS PUB 33–1. The applicable services include data preparation and processing of information represented in OCR form.

(End of requirement statement)

§ 201–8.105–13 [Reserved]

17. Section 201–8.105–13 is removed and reserved as follows:

§ 201–8.105–14 [Reserved]

18. Section 201–8.105–14 is removed and reserved as follows:

19. Section 201–8.105–18 is amended by revising paragraph (b) to read as follows:

§ 201–8.105–18 FIPS PUB 52, Recorded Magnetic Tape Cartridge for Information Interchange, 4-Track, 6.30 mm (0.250 in), 63 BPMM (1600 BPI), Phase Encoded.

* * * * *

(b) The standard terminology for use in requirements documents, including solicitations, is:

Recorded Characteristics—63 BPMM 6.30 mm Tape (DEC 85 FIRMR)

All magnetic tape cartridge recording and reproducing equipment which results from this requirement and employs 6.30 mm (0.250 in) wide magnetic tape with one, two, or four independent serial data tracks at recording densities of 63 bits per millimeter (1600 bits per inch) using phase encoding techniques, including associated software, shall provide the capability to accept and generate recorded magnetic tape cartridges in the code and format as specified in FIPS PUB 1–2 and FIPS PUB 52.

(End of requirement statement)

20. Section 201–8.105–30 is revised to read as follows:

§ 201–8.105–30 FIPS PUB 86, Additional Controls for Use With American National Standard Code for Information Interchange.

(a) FIPS PUB 86 specifies a set of encoded control functions to supplement the basic control functions defined in FIPS PUB 1–2 to facilitate data interchange between data processing equipment and two-dimensional, character-imaging, input-output devices.

(b) The architectural assumptions for devices for use with FIPS PUB 86 are contained in American National Standard X3.64–1979, which is part of the FIPS PUB.

(c) The standard terminology for use in requirements documents, including solicitations, is:

Additional ASCII Controls for Character-Imaging ADP Equipment of Services (DEC 85 FIRMR)

All applicable ADP character-imaging equipment or services (e.g., interactive ADP terminals of the display and printer type, line printers, microfilm printers, typesetting composers, word processors, and related devices or services using such devices) must comply with the requirements set forth in FIPS PUB 86 when such equipment or services employ the character set and encoding conventions prescribed in FIPS PUB 1–2, employ primarily character-oriented controls, and are consistent with the architectural assumptions for devices in Appendix B, ANSI X3.64–1979. All ADP terminals that meet these conditions are included in this requirement if they contain alphanumeric keyboards and CRT displays or printers that may be used in any form of on-line interactive application or stand alone off-line data preparation. Computer resident control software may be used, but is not required, to implement specific features of FIPS PUB 86, unless specified elsewhere in this document [*insert reference here*].

(End of requirement statement)

21. Section 201–8.105–31 is amended by revising the section heading to read as follows:

§ 201–8.105–31 FIPS PUB 89, Optical Character Recognition (OCR) Character Positioning.

* * * * *

22. Section 201–8.105–32 is amended by revising the section heading to read as follows:

§ 201–8.105–32 FIPS PUB 91, Magnetic Tape Cassettes for Information Interchange, Dual Track, Complementary Return-to-Bias (CRB) Four-States Recording on 3.81 mm (0.150 in) Tape.

* * * * *

23. Section 201–8.105–33 is amended by revising paragraph (b) to read as follows:

§ 201–8.105–33 FIPS PUB 93, Parallel Recorded Magnetic Tape Cartridge for Information Interchange, 4 Track 6.30 mm (0.250 in), 63 BPMM (1600 BPI), Phase Encoded.

* * * * *

(b) The standard terminology for use in requirements documents, including solicitations, is:

Magnetic Tape Cartridge Equipment and Associated Software (DEC 85 FIRMR)

All magnetic tape cartridge recording and reproducing equipment which results from this requirement and employs 6.30 mm (0.250 in) wide magnetic tape with data recorded across four parallel tracks at recording densities of 63 bits per millimeter (1600 bits per inch) using phase encoding techniques, including associated software, shall provide the capability to accept and generate recorded magnetic tape cartridges in the code and format as specified in FIPS PUB 1–2 and FIPS PUB 93.

(End of requirement statement)

24. Section 201–8.105–35 is added to read as follows:

§ 201–8.105–35 FIPS PUB 107, Local Area Networks: Baseband Carrier Sense Multiple Access with Collision Detection Access Method and Physical Layer Specifications and Link Layer Protocol.

(a) FIPS PUB 107 applies to local area networks that employ the carrier sense multiple access with collision detection (CSMA/CD) access method where compatibility with the architecture of the ISO Reference Model for Open Systems Interconnection is required. The standard provides the mechanical, electrical, functional and procedural specifications and the link protocol required to establish physical connections to transmit bits and to send data link frames between nodes of a local area network. The local area network spans a local area with a baseband coaxial cable of up to 2500 meters in length, transmitting at 10 megabits per second.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Local Area Network Equipment and Services Employing CSMA/CD (DEC 85 FIRMR)

All local area network services and equipment employing CSMA/CD which result from this requirement shall provide the capability to transmit bits and to send data link frames between nodes in compliance with the requirements set forth in FIPS PUB 107.

(End of requirement statement)

25. Section 201–8.105–36 is added to read as follows:

§ 201–8.105–36 FIPS PUB 108, Alphanumeric Computer Output Microform Quality Test Slide.

(a) FIPS PUB 108 provides information necessary for the preparation of a test form slide to ensure the generation of quality microforms by computers. It should be used for the acquisition of test form slides procured to verify and monitor the quality of microforms generated by alphanumeric computer output microform devices.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Test Form Slides for Computer Output Microform Devices (DEC 85 FIRMR)

All test form slides that verify and maintain the quality of microforms generated by computer output microform devices offered as a result of this requirement must comply with FIPS PUB 108.

(End of requirement statement)

26. Section 201–8.105–37 is added to read as follows:

§ 201–8.105–37 FIPS PUB 111, Storage Module Interfaces (With Extensions for Enhanced Storage Module Interfaces).

(a) FIPS PUB 111 defines the mechanical, electrical, and functional requirements for attaching disk drives to their control unit. This resulting interface will facilitate the interconnection of disk drives and the control unit, as part of a storage module subsystem, providing a common interface specification for both controller and disk subsystems that are employed with small to medium sized computer systems which are generally excluded from the provisions of FIPS 60–2, 61–1, 63–1, and 97.

(b) This standard adopts American National Standard X3.91M–1982, Enhanced Storage Module Interfaces, and may be used as an alternative to FIPS 60–2, FIPS 61–1, and either FIPS 63–1 or FIPS 97 for those instances when FIPS 60–2 would otherwise be applicable. When FIPS 111 is employed, FIPS 60–2 need not be used. However, any waiver of FIPS 60–2 is also a waiver of FIPS 111.

(c) While it is not economical or practical to require extensive verification of storage module drives (SMD) products offered to the Government, procuring agencies may, at their option, require that correct operation of all interfaces conforming to FIPS 111 be verified through demonstration or other means acceptable to the Government prior to acceptance of applicable equipment. In special cases, NBS may assist agencies in evaluating conformance to the SMD interface. Arrangements for verification assistance can be made by contacting the Center for Computer Systems Engineering, Institute for Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, MD 20899.

(d) The standard terminology for use in requirements documents including solicitations, is:

Storage Module Interfaces (With Extensions for Enhanced Storage Module Interfaces) (DEC 85 FIRMR)

Unless a waiver is granted following the waiver procedures specified in FIPS PUB 111, or unless this requirement requires conformance with FIPS PUB 60–2, ADP systems and disk storage subsystems that may result from this requirement must conform to FIPS PUB 111. Waivers applicable to this requirements document are identified elsewhere in this document. At the option of the Government, the correct operation of these systems' conforming interfaces must be verified before the acceptance of all applicable ADP equipment.

(End of requirement statement)

27. Section 201–8.106–6 is removed and reserved and a note of explanation is added to read as follows:

§ 201–8.106–6 [Reserved]

Note.—The Secretary of Commerce has decided to suspend the implementation of FIPS 98, Message Format for Computer Based Message Systems, indefinitely pending its revision (see 50 FR 9480, March 8, 1985).

28. Section 201–8.107–1 is amended by revising the section heading to read as follows:

§ 201–8.107–1 FIPS PUB 21–1, COBOL.

* * * * *

29. Section 201–8.107–2 is amended by revising the section heading to read as follows:

§ 201–8.107–2 FIPS PUB 68, Minimal BASIC.

* * * * *

30. Section 201–8.107–3 is amended by revising the section heading to read as follows:

§ 201–8.107–3 FIPS PUB 69, FORTRAN.

* * * * *

31. Section 201–8.109 is amended by revising paragraph (c) to read as follows:

§ 201–8.109 Validation of compilers.

* * * * *

(c) Federal agencies shall use these test results to confirm that the compiler meets the language elements specifications of that Federal Standard. When an agency has indicated in a requirements document that a waiver applies to a Federal Standard language specification, only the portions of the language that have been waived are

VOL
51
ISS
47
MR
11
1986
UMI

excluded from the validation requirements. If the entire Federal Standard language specification has been waived, there is no compiler validation requirement for that acquisition action.

* * * * *

32. Section 201–8.110–1 is amended by revising paragraph (b) to read as follows:

§ 201–8.110–1 FIPS PUBS applicable to the interchange of machine processable data between and among agencies.

* * * * *

(b) The standard terminology for use in requirements documents, including solicitations, is:

Interchange of Machine Processable Data (DEC 85 FIRMR)

All application programs resulting from this requirement that have been identified as those that will be interchanged, or that will record data that will be interchanged with Federal agencies, State and local governments, industry, and the public must implement the following applicable approved Federal Information Processing Standards (FIPS):

FIPS PUB 4, Calender Date.
FIPS PUB 5–1, States and Outlying Areas of the United States.
FIPS PUB 6–3, Counties and County Equivalents of the States of the United States and the District of Columbia.
FIPS PUB 8–5, Metropolitan Statistical Areas including CMSAs, PMSAs and NECMAs).
FIPS PUB 9, Congressional Districts of the United States.
FIPS PUB 10–3, Countries, Dependencies, Areas of Special Sovereignty, and Their Principal Administrative Divisions.
FIPS PUB 58, Representations of Local Time of the Day for Information Interchange.
FIPS PUB 59, Representations of Universal Time, Local Time Differentials, and United States Time Zone References for Information Interchange.
FIPS PUB 66, Standard Industrial Classification (SIC) Codes.
FIPS PUB 70, Representation of Geographic Point Locations for Information Interchange.
FIPS PUB 95, Code for the Identification of Federal and Federally-Assisted Organizations.
FIPS PUB 103, Codes for the Identification of Hydrologic Units in the United States and the Caribbean Outlying Areas.

(End of requirement statement)

33. Section 201–8.112–8 is added to read as follows:

§ 201–8.112–8 FED–STD 1015, Telecommunications: Analog to Digital Conversion of Voice by 2400 Bit/Second Linear Predictive Coding.

(a) FED–STD 1015 specifies requirements relating to the conversion of analog voice to 2400 bit/second digitized voice by Linear Predictive Coding (LPC–10) and reconversion back to analog voice. It applies to all synchronous (not packetized) 2400 bit/second digitized voice telecommunications equipment procured or leased.

(b) The standard terminology for use in requirements documents, including solicitations, is:

2400 Bit/Second Digitized Voice Telecommunications Equipment (DEC 85 FIRMR)

All synchronous (not packetized) 2400 bit/second digitized voice telecommunications equipment offered as a result of this requirement shall be capable of Linear Predictive Coding (LPC–10) operation in conformance with FED–STD 1015.

(End of requirement statement)

34. Section 201–8.112–12 is revised to read as follows:

§ 201–8.112–12 FED–STD 1026, Telecommunications: Interoperability and Security Requirements for use of the Data Encryption Standard in the Physical Layer of Data Communication.

(a) The purpose of FED–STD 1026 is to facilitate the interoperation of Government data communication facilities systems and data that require cryptographic protection using the Data Encryptioms Standard (DES) algorithm.

(b) FED–STD 1026 specifics interoperability and security related requirements using encryption at the Physical Layer of the International Standards Organization's (ISO) Open Systems Interconnection (OSI) Reference Model (International Standard 7498) in telecommunications systems conveying Automatic Data Processing (ADP) and/or narrative text information. The algorithm used for encryption is the Data Encryptions Standard (DES), FIPS PUB 46, Data Encryptions Standard. Requirements contained in this standard relate to the interoperation of Physical Layer Data Encryptions Equipment, or their interoperation with associated Data Terminal Equipment of Data Circuit-terminating Equipment.

(c) Additional security requirements, not directly related to interoperatibility, are contained in FED–STD 1027, Telecommunications: General Security Requirements for Equipment Using the Data Encryptions Standard (DES). The DES algorithm is specified in FIPS PUB 46.

(d) In Physical Layer encryption, all of the Physical Layer Service Data Unit is encrypted except the START and STOP bits during asynchronous operation, and the parity bits when parity is restored.

(e) The standard terminology for use in requirements documents, including solicitations, is:

Cryptographic Components, Equipment Systems, and Services (DEC 85 FIRMR)

All applicable DES cryptographic components, equipment or services used for encryption of ADP and/or narrative text information in the Physical Layer data communications using the Data Encryptions Standard (DES) algorithm must comply with the requirements specified in FED–STD 1026. The Physical Layer is further defined in International Standard 7498, Open Systems Interconnection Reference Model.

(End of requirement statement)

35. Section 201–8.112–14 is revised to read as follows:

§ 201–8.112–14 FED–STD 1028, Telecommunications: Interoperability and Security Requirements for Use of the Data Encryption Standard with CCITT Group 3 Facsimile Equipment.

(a) FED–STD 1028 specifies interoperability and security related requirements for use of encryption with the International Telegraph and Telephone Consultative Committee, (CCITT) Group 3-type facsimile equipment conveying Automatic Data Processing (ADP) and/or narrative text information. The algorithm used for encryption is the Data Encryption Standard (DES), FIPS–PUB 46, Data Encryption Standard. Requirements contained in this standard relate to the interoperation of DES Equipment, or their interoperation with associated CCITT Group 3 facsimile equipment. Group 3 facsimile apparatus are described in Electronic Industries Association Standard RS–465.

(b) Additional security requirements, not directly related to interoperability, are contained in FED–STD 1027, Telecommunications: General Security Requirements for Equipment Using the Data Encryption Standard (DES). The DES algorithm is specified in FIPS PUB 46.

(c) Additional requirements for interoperability and security at the physical layer are contained in FED–STD 1026, Telecommunications: Interoperability and Security Requirements for Use of the Data Encryption Standard in the Physical Layer of Data Communications.

(d) The standard terminology for use in requirements documents, including solicitations, is:

CCITT Group 3 Facsimile Equipment, Systems, and Services (DEC 85 FIRMR)

All applicable cryptographic components, equipment or services used for the encryption of documents transmitted by CCITT Group 3-type facsimile equipment using the Data Encryption Standard (DES) algorithm must comply with the requirements specified in FED–STD 1028.

(End of requirement statement)

36. Section 201–8.112–16 is revised to read as follows:

§ 201–8.112–16 FED–STD 1030A, Electrical Characteristics of Unbalanced Voltage Digital Interface Circuits.

(a) FED–STD 1030A specifies the electrical characteristics of unbalanced voltage digital interface circuits employed for the interchange of serial binary information conveyed at the DC baseband level at signaling rates of up to 100 kilobits per second. It adopts, with the additional requirements stated therein, Electronic Industries Association (EIA) Standard RS–423–A. Federal agencies shall use this standard in the design and/or acquisition of equipment requiring these interface circuits. Note that some digital interfaces; e.g., EIA RS–232–C or CCITT V.35, do not require the use of these circuits. Therefore, FED–STD 1030A is required only to the extent that user applications or specific digital interfaces dictate the use of these circuits.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Digital Interface Circuits—Unbalanced Voltage (APR 84 FIRMR)

All equipment using unbalanced voltage digital interface circuits that is offered as a result of this requirement shall comply with the electrical characteristics addressed by FED–STD 1030A.

(End of requirement statement)

§ 201–8.112–17 [Reserved]

37. Section 201–8.112–17 is removed and reserved as follows:

§ 201–8.112–18 [Reserved]

38. Section 201–8.112–18 is removed and reserved as follows:

39. Sections 201–8.112–19 through 201–8.112–24 are reserved as follows:

§ 201–8.112–19 [Reserved]

§ 201–8.112–20 [Reserved]

§ 201–8.112–21 [Reserved]

§ 201–8.112–22 [Reserved]

§ 201–8.112–23 [Reserved]

§ 201–8.112–24 [Reserved]

40. Section 201–8.112–25 is added to read as follows:

§ 201–8.112–25 FED–STD 1061, Group 2 Facsimile Apparatus for Document Transmission.

(a) FED–STD 1061 establishes the machine specifications for Group 2 facsimile apparatus used on voice band analog circuits. This group exploits bandwidth compression techniques to achieve a transmission time of approximately 3 minutes for a 216 mm by 297 mm size document with a nominal resolution of four (4) lines per millimeter.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Facsimile Apparatus (Group 2)—Voice Band Analog Circuits (APR 84 FIRMR)

All Group 2 facsimile apparatus offered as a result of this requirement for use with voice band analog circuits shall comply with FED–STD 1061.

(End of requirement statement)

41. Section 201–8.112–26 is added to read as follows:

§ 201–8.112–26 FED–STD 1062, Group 3 Facsimile Apparatus for Document Transmission.

(a) FED–STD 1062 establishes machine specifications for Group 3 facsimile apparatus, as defined in the FED–STD, for use over voice band analog circuits. Federal departments and agencies shall comply with this standard in the design, development, and procurement of facsimile terminals/systems with the following exception: Military Standard 188–161 applies to tactical users within the Department of Defense.

(b) FED–STD 1062 does not apply to the transmission of mixed mode information such as coded character data and image data. Technical specifications of the standard are contained in Electronic Industries Association Standard RS–465.

(c) The standard terminology for use in requirements documents, including solicitations, is:

Acquisition, Design or Development of Group 3 Facsimile Apparatus (APR 84 FIRMR)

All Group 3 facsimile apparatus designed, developed, or offered for use over voice band analog circuits shall comply with FED–STD 1062.

(End of requirement statement)

42. Section 201–8.112–27 is added to read as follows:

§ 201–8.112–27 FED–STD 1063, Telecommunications: Procedures for Document Facsimile Transmission.

(a) FED–STD 1063 specifies procedures for transmitting facsimile documents over voice band analog circuits. Federal departments and agencies shall comply with this standard in the design, development, and procurement of facsimile terminals/systems with the following exception: Military Standard 188–161 applies to tactical users within the Department of Defense.

(b) FED–STD 1063 does not apply to the transmission of mixed mode information such as coded character data and image data. Technical specifications of the standard are contained in Electronic Industries Association Standard RS–466. Group 1, 2, and 3 facsimile apparatus are described in Electronic Industries Association Standard RS–465.

(c) The standard terminology for use in requirements documents, including solicitations, is:

Acquisition, Design or Development of Group 1, 2, and 3 Facsimile Apparatus (APR 84 FIRMR)

All group 1, 2, and 3 facsimile apparatus designed, developed, or offered for use over voice band analog circuits shall comply with FED–STD 1063.

(End of requirement statement)

43. Section 201–8.113–2 is revised to read as follows:

§ 201–8.113–2 FIPS PUB 16–1/FED–STD 1010, Bit Sequencing of the Code for Information Interchange in Serial-By-Bit Data Transmission.

(a) FIPS PUB 16–1/FED–STD 1010 specifies the method of transmitting the Standard Code for Information Interchange, FIPS PUB 1–2, in serial-by-bit, serial-by-character data transmission. FIPS PUB 16–1 reflects changes necessary to accommodate FIPS PUB 1–2 when operating in either 7- or 8-bit coded environments. The standard is applicable to the transmission of the standard code in a serial bit stream form at the interface between data terminal and data communication equipment. Data terminal equipment transmitting an approved Federal subset or superset of FIPS PUB 1–2 must comply with FIPS PUB 16–1/FED–STD 1010. This standard adopts the technical specifications contained in American National Standard X3.15–1976, same subject.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Bit Sequencing—Serial Data Transmission (DEC 85 FIRMR)

All applicable equipment or services that may result from this requirement, transmitting in a serial-by-bit, serial-by-character mode, must be capable of bit sequencing as prescribed in FIPS PUB 16–1/FED–STD 1010 for the transmission of the Standard Code for Information Interchange, FIPS PUB 1–2, at the interface between data terminal equipment and data communication equipment.

(End of requirement statement)

44. Section 201–8.113–3 is revised to read as follows:

BEST COPY AVAILABLE

VOL 51
ISS 47
MR 11
1986
UMI

§ 201–8.113–3 FIPS PUB 17–1/FED–STD 1011, Character Structure and Character Parity Sense for Serial-By-Bit Data Communication in the Code for Information Interchange.

(a) FIPS PUB 17–1/FED–STD 1011 specifies the method of transmitting the Standard Code for Information Interchange, FIPS PUB 1–2, in serial-by-bit, serial-by-character data transmission. FIPS PUB 17–1 reflects changes necessary to accommodate revisions prescribed in FIPS PUB 1–2 when operating in either 7- or 8-bit coded environments. The standard is applicable at the interface between data terminal and data communication equipment. Data terminal equipment transmitting an approved Federal subset or superset of FIPS PUB 1–2 must comply with FIPS PUB 17–1/FED–STD 1011. This standard adopts the technical specifications contained in American National Standard X3.16–1976, same subject.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Character Structure/Parity—Serial Data Transmission (DEC 85 FIRMR)

All applicable equipment that may result from this requirement, transmitting in a serial-by-bit, serial-by-character synchronous or asynchronous mode, must be capable of transmitting the character structure and sense of character parity prescribed in FIPS PUB 17–1/FED–STD 1011 for the transmission of the Standard Code for Information Interchange, FIPS PUB 1–2, at the interface between data terminal equipment and data communication equipment.

(End of requirement statement)

45. Section 201–8.113–4 is revised to read as follows:

§ 201–8.113–4 FIPS PUB 18–1/FED–STD 1012, Character Structure and Character Parity Sense for Parallel-By-Bit Data Communication in the Code for Information Interchange.

(a) FIPS PUB 18–1/FED–STD 1012 specifies the channel assignment for transmitting the Standard Code for Information Interchange, FIPS PUB 1–2, in parallel-by-bit, serial-by-character data transmission. FIPS PUB 18–1 reflects changes necessary to accommodate revisions prescribed by FIPS PUB 1–2 when operating in either 7- or 8-bit coded environments. The standard is applicable at the interface between data terminal equipment and data communication equipment. Data terminal equipment transmitting an approved Federal subset or superset of FIPS PUB 1–2 must comply with FIPS PUB 18–1/FED–STD 1012. This Standard adopts the technical specifications contained in American National Standard X3.25–1976, same subject.

(b) The standard terminology for use in requirements documents, including solicitations, is:

Character Structure/Parity—Parallel Data Transmission (DEC 85 FIRMR)

All applicable equipment or services that may result from this requirement, transmitting in a parallel-by-bit, serial-by-character mode, must be capable of transmitting the character structure and sense of character parity prescribed in FIPS PUB 18–1/FED–STD 1012, when transmitting the Standard Code for Information Interchange, FIPS PUB 1–2, or an approved Federal subset at the interface between data terminal equipment and data communication equipment.

(End of requirement statement)

Dated: February 10, 1986.

T.C. Golden,

Administrator of General Services.

BILLING CODE [illegible]

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[Docket No. 50718–6023]

Atlantic Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMPS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule to place a minimum size limit of seven pounds (3.2 kilograms (kg)) on the landing of bigeye tuna in the Atlantic tuna fishery. This management measure was recommended by the International Commission for the Conservation of Atlantic Tunas (Commission) and will eliminate any advantage to identifying yellowfin as bigeye tuna by establishing identical regulations for both species.

EFFECTIVE DATE: April 9, 1986.

ADDRESS: Copies of the regulatory impact review prepared for this rule are available from E. C. Fullerton, Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, CA 90731.

FOR FURTHER INFORMATION CONTACT: James J. Morgan, (213) 548–2518.

SUPPLEMENTARY INFORMATION: At its fourth special meeting in 1984, the Commission recommended that the size limit on bigeye tuna, first established in 1981, remain in effect indefinitely to conform the fishing regulations to the limitations on the landing of yellowfin tuna.

On October 30, 1985, proposed rules implementing a permanent minimum size limit on bigeye tuna (*Thunnus obesus*) of seven pounds (3.2 kg), in conjunction with an incidental catch allowance of three percent by weight, were published in the Federal Register (50 FR 45134). The public comment period ended on November 29, 1985; no comments were received. Therefore, the Secretary issues this final rule unchanged from the proposed rule published on October 30, 1985 (50 FR 45134).

Classification

A regulatory impact review (RIR) was prepared which presents the effects of implementing the minimum size limit. Copies of the RIR are available at the above address. Based on the RIR, the Administrator of NOAA determined that the rule is not major as defined by E.O. 12291. It also was determined that this action is not significant under the Regulatory Flexibility Act because it will not have a significant economic effect on a substantial number of small entities. The rule will have little or no effect because the domestic fleet generally harvests fish above seven pounds.

Since this final regulation clarifies and improves implementation of the Commission's recommendations without altering the management regime, it is excluded from the requirements of the National Environmental Policy Act and no environmental assessment or environmental impact statement has been prepared.

This rule has no information collection provision for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

List of Subjects in 50 CFR Part 285

Fisheries.

Dated: March 6, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Part 285 is amended as follows:

PART 285—[AMENDED]

1. The authority citation for Part 285 continues to read as follows:

Authority: 16 U.S.C. 971 *et seq.*

§ 285.50 [Amended]

2. Section 285.50 is amended by removing the last sentence "The prohibition against fishing for bigeye tuna less than seven pounds is to remain in effect until December 31, 1983."

[FR Doc. 86–5271 Filed 3–10–86; 8:45 am]

BILLING CODE 3510–22–M

---

50 CFR Part 642

[Docket No. 60339–6039]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency rule.

SUMMARY: The Secretary of Commerce issues an emergency rule amending the regulations for the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic. This rule provides for reductions in the total allowable catch, allocations, and quota for the Gulf group of king mackerel based on recent data and socio-economic considerations. The intended effect is to protect the Gulf group of king mackerel which has been depleted to the point where the fishery is nearing collapse.

EFFECTIVE DATES: In § 642.21, the introductory text of paragraph (a), paragraphs (a) (1), (2) and (3), and (c) are suspended from March 6, 1986, through June 4, 1986, and new paragraphs (f), (g), and (h) are effective from March 6, 1986, through June 4, 1986. All other paragraphs remain effective. The amendments to § 642.7 are effective from March 6, 1986 through June 4, 1986.

ADDRESS: Copies of documents supporting this action may be obtained from and comments on this action may be sent to Donald W. Geagan, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813–893–3722.

SUPPLEMENTARY INFORMATION: King mackerel is managed under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic (FMP) and its implementing regulations at 50 CFR Part 642 under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). Amendment 1 to the FMP was prepared jointly by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and implemented September 22, 1985 (50 FR 34843, August 28, 1985).

Intensive fishing effort is jeopardizing the biological integrity of the Gulf migratory group of king mackerel. The Gulf migratory group, which inhabits the Gulf of Mexico during the summer and supports a winter fishery in southeast Florida, has been severely overfished. Amendment 1 to the FMP estimated the possible range of allowable biological catch (ABC) for the Gulf migratory group at 10,713,000 to 14,997,000 pounds annually with a best point estimate of 14,225,000 pounds. At this level of harvest the population was expected to recover within 3 to 5 years.

The latest stock assessment (August 15, 1985), made at the request of the Councils, estimated the possible range of ABC at 980,000 to 2,340,000 pounds annually for the Gulf migratory group. Recruitment has declined to 16 percent of the 1979 level, whereas the spawning stock has declined to 26 percent of the 1979 level. This analysis indicated that current problems exist with the Gulf migratory group which threaten complete collapse of the fishery if fishing mortality is not reduced below current levels.

The Councils considered the stock assessment report, information obtained from 15 public hearings, and the social and economic impacts associated with imposing more severe management restrictions including a moratorium. They determined that to leave total allowable catch (TAC) for the Gulf migratory group at 14.225 million pounds would ignore the depleted status of the resource, but that implementation of a TAC within the limits of the revised stock assessment would be devastating to the valuable commercial and recreational users dependent upon this resource. The Councils decided that a 22 percent reduction of the average catch over the last three years would be sufficient to protect and begin to restore the Gulf migratory group and would be an acceptable level of economic and social short-term sacrifice on the part of the commercial and recreational fishermen. Therefore, the Councils recommended that the TAC for the Gulf migratory group of king mackerel be set at 5.20 million pounds for the current fishing year (1985–1986) which began July 1, 1985. Therefore, TAC for the Gulf group of king mackerel is set at 5.20 million pounds. This is allocated according to the formulas in the FMP as follows:

(1) Recreational—3.54 million pounds.
(2) Commercial—1.66 million pounds.

The commercial allocation under § 642.21 (f) and (g) is further divided into the following quotas:

(1) Eastern zone—1.08 million pounds.
(2) Western zone—0.48 million pounds.
(3) Purse seine—0.10 million pounds.

The commercial fishery will be closed individually or collectively, as appropriate, by notice under § 642.22 when each quota is exceeded or is projected to be reached.

The recreational fishery allocation established by this emergency rule under § 642.21(h) is regulated by a bag limit of two fish per person per trip on private vessels and three fish per person per trip on charter boats (excluding the captain and crew) or two fish per person per trip (including captain and crew), whichever is greater. The harvest of the recreational allocation will be closely monitored by use of the NMFS Marine Recreational Fishing Statistics Survey, charterboat survey, and State data. If the recreational sector reaches or is projected to reach its allocation of 3.54 million pounds, that fishery will be closed by notice under §642.22.

The Councils are unable to respond to this problem under the framework measure at § 642.27 because modifications of TAC or other regulations are restricted to preseason actions that become effective only at the beginning of each fishing year (i.e. July 1). These emergency regulations lowering TAC are therefore implemented under section 305(e)(2)(B) of the Magnuson Act to prevent further stress on the resource by fishing at an unacceptable level, i.e. the level set in Amendment 1, while still allowing the recreational and commercial fisheries to operate.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is necessary to respond to an emergency situation and that it is consistent with the Magnuson Act and other applicable law.

The Assistant Administrator also finds for good cause (i.e. to prevent further stress on the Gulf migratory group of king mackerel) that the reasons justifying promulgation of this rule on an emergency basis also makes it impracticable and contrary to the public interest to provide notice and opportunity for comment upon, or to delay for 30 days the effective date of these emergency regulations, under the provisions of section 553 (b) and (d) of the Administrative Procedure Act.

The Assistant Administrator has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management programs of Alabama, Florida, Louisiana, and Mississippi. Texas does not have an approved coastal zone management program. This determination has been submitted for review by the responsible

VOL 51 ISS 47 MR 11 1986 UMI

State agencies under section 307 of the Coastal Zone Management Act.

This emergency rule is exempt from the normal review procedures of Executive Order 12291 as provided in section 8(a)(1) of that order. This rule is being reported to the Director of the Office of Management and Budget, with an explanation of why it is not possible to follow the procedures of that order.

The Assistant Administrator prepared an environmental assessment (EA) for this action and concluded there will be no significant impact on the human environment. A copy of the EA is available from the NMFS Southeast Regional Office at the ADDRESS listed above.

This rule does not contain a collection of information requirement and therefore is not subject to the provisions of the Paperwork Reduction Act.

This rule is exempt from the procedures of the Regulatory Flexibility Act because the rule is issued without opportunity for prior public comment.

List of Subjects in 50 CFR Part 642

Fisheries, Fishing.

Dated: March 6, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR Part 642 is amended as follows:

PART 642—COASTAL MIGRATORY PELAGIC RESOURCES OF THE GULF OF MEXICO AND THE SOUTH ATLANTIC

1. The authority citation for Part 642 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Section 642.7 is amended by adding a new paragraph (a)(27) to be effective from March 6, 1986, through June 4, 1986, to read as follows:

§ 642.7 Prohibitions.

(a) * * *

(27) Possess Gulf migratory group king mackerel harvested in the FCZ under the recreational allocation set forth at §642.21(h) after closure has been invoked as specified in § 642.22.

* * * * *

3. Section 642.21 is amended by suspending all of paragraph (a) except the last sentence, from March 6, 1986, through June 4, 1986, and adding new paragraphs (f), (g), and (h) to be effective from March 6, 1986, through June 4, 1986, to read as follows:

§ 642.21 Quotas.

* * * * *

(f) The commercial allocation for the Gulf migratory group of king mackerel is 1.66 million pounds for the current fishing year (July 1, 1985—June 30, 1986). This allocation is divided into quotas as follows:

(1) 1.08 million pounds for the eastern zone;

(2) 0.48 million pounds for the western zone; and

(3) 0.10 million pounds for purse seines (see Figure 2 of § 642.29, and paragraph (e) of this section for a description of allocation zones).

(g) *Purse seine quota for king mackerel.* (1) The harvest of king mackerel by purse seines from the Gulf migratory group is limited to 0.10 million pounds for the current fishing year.

(2) The total harvest of king mackerel by purse seines from the Atlantic ocean is limited to 400,000 pounds each fishing year.

(3) King mackerel harvested by purse seines are counted in the commercial allocations and quotas specified in paragraphs (e) and (f) of this section.

(h) *Recreational quota for king mackerel.* The recreational allocation for the Gulf migratory group of king mackerel is 3.54 million pounds for the current fishing year (July 1, 1985–June 30, 1986).

[FR Doc. 86-5269 Filed 3-6-86; 5:03 pm]

BILLING CODE 3510-22-M

---

50 CFR Part 652

[Docket No. 41270-5026]

Atlantic Surf Clam and Ocean Quahog Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice to continue size limit adjustment.

SUMMARY: NOAA issues this notice to continue the size limit adjustment to 5 inches for the surf clam fishery made effective November 8, 1985. Public comments were requested through December 31, 1985. The intended effect of the rule is to reduce the discard rate, resulting in greater short and long term yield from the fishery.

EFFECTIVE DATE: November 8, 1985.

FOR FURTHER INFORMATION CONTACT: Bruce Nicholls, 617–281–3600, extension 283.

SUPPLEMENTARY INFORMATION: Amendment 5 to the Fishery Management Plan for Atlantic Surf Clam and Ocean Quahog Fisheries (FMP) implemented an FMP framework managment measure which allows adjustment of the minimum size limit for surf clams by authorizing the Director of the Northeast Region, NMFS (Regional Director), in consultation with the Mid-Atlantic Fishery Management Council (Council), to select a minimum size limit for surf clams from among the following values: 5½, 5¼, 5, and 4¾ inches.

The size limit is selected to reduce discards of surf clams to less than 30 percent, on average, of trip catches. The Regional Director monitors current stock assessments, catch reports, and other relevant information concerning the size distribution of the surf clam resource in determining if any adjustment in the size limit is appropriate. Under these adjustment criteria, a minimum size limit of 5¼ inches was in effect from October 14, 1984, through November 7, 1985.

The Council voted at its September, 1985, meeting to recommend that the Regional Director reduce the size limit to 5 inches. The Council's Surf Clam Committee, at its meeting on October 28, 1985, advised the Regional Director to construct the discard rate by combining landed undersized surf clams with actual discards, i.e., those undersized clams that are thrown overboard.

The NMFS Northeast Fisheries Center (NEFC) analyzed surf clam discarding rates and size composition of landings in the Mid-Atlantic Area from January 1, 1985 through October 4, 1985. This information showed that the percentage of discards, as defined by the Council criteria, was between 40 and 50 percent for the ten month period, exceeding the target discard level of 30 percent.

Based on this information, statements from industry, and guidance from the Council, the Regional Director determined that the minimum size limit for surf clams should be reduced from 5¼ inches to 5 inches. On November 8, 1985, NOAA filed a notice with the Office of the Federal Register to reduce the minimum size limit to 5 inches in all three areas of the fishery, effective November 8, 1985 (50 FR 46671; November 12, 1985). Comments on this action were invited from the public for 15 days following publication. The notice specified that, pursuant to provisions of the FMP and implementing regulations, the Secretary would consider the comments and publish notice of any changes in the size limit. On December 5, 1985, the public comment period was extended through December 31, 1985, due to the complexity of the issue and industry interest (50 FR 49852).

Five written comments were received. Four of the commentors opposed the adjustment; one endorsed it. The comments opposing the adjustment

questioned the definition of discards, the time period of information used to calculate the discard rate, the procedures by which the size change was accomplished, and suggested that a 5 inch minimum size would lead to more rapid harvest of allowable quotas and be inconsistent with stock conservation.

Comment 1: Defining discards to include landed undersized clams is an overboard interpretation encouraging the landing of undersized clams.

Amendment 5 authorizes the Regional Director to change surf clam minimum sizes to prevent waste of the stock through excessive discards. While providing no definition of discards, the amendment does provide that "in adjusting the size limit the Regional Director shall consider current stock assessments, catch reports, and other relevant information." Using this guidance, the Regional Director could consider, in determining to adjust the minimum surf clam size, the large volume of undersized clams landed which, because of the prevailing size distribution of surf clam stocks, would with a more rigorous enforcement program have been discarded at sea and wasted, contrary to the purpose of the Amendment. Although under ideal conditions fishermen might have responded to the minimum size regulations by directing fishing effort in areas with larger surf clams, in practice they were limited in doing so by the prohibition on fishing more than six hours every other week.

No evidence of deliberate and manipulative non-compliance with the size limit during the period upon which the adjustment was based has come to light; if it had, public policy would compel the Regional Director to exclude evidence arising from such practices from his assessment of discard rates.

Comment 2: The period of time used in calculating the discard percentage was adopted arbitrarily. A different time period might have resulted in a lower apparent discard rate.

In deciding to reduce the minimum size, the Regional Director was authorized to act on his own initiative to view landed undersized clams as "constructive discards" and base the adjustment on industry performance over a six month period. The Regional Director was empowered to and, because of the policy implications of the size limit change, did, during required consultations, ask the Council for its preference in his construction of the available facts. Advice of the Council's Surf Clam Committee to use a base period at least six months in length was later affirmed by the full Council. The base period used to calculate the average discard rate, January through October of 1985, was a period when excessive discards, and hence the possible need for a size limit adjustment, was at issue in industry and government forums. A different base period may have led to marginally different results, but would have been equally subject to criticism by fishermen concerned that the size limit should be reduced to limit discards.

Comment 3: The public was not afforded adequate opportunity to influence and respond to deliberations concerning the size limit selection.

The adjustment procedure provides considerable opportuntiy for Council consultation, notice, and public comment. The discard problem and large landings of undersized clams were discussed at Council meetings in June, August, September, and December, 1985, and at the Surf Clam Committee Meeting on October 28, 1985, attended by representatives from the industry. The Federal Register notice announcing the adjustment provided ample opportunity for public comment. The public comment period was extended at industry request to allow commentors time to develop and present their positions to NMFS and the Council prior to final agency action.

Comment 4: The reduction in minimum size increases harvest rates and is inconsistent with stock conservation.

Size limit adjustments promulgated under the implementing regulations are concerned only with which of four alternative minimum surf clam sizes will reduce surf clam discard rates below 30 percent. While stock conservation is a primary objective of the overall surf clam management program, it is not an issue here since each of the alternative size specifications available under the rule is within a range which promotes harvest of surf clams leading to maximum yield per recruit. In fashioning the size limit adjustment provision, the Council expressly recognized and accepted the trade-off of increased harvests with a reduced size limit to prevent excessive discards and waste of the stock.

Although a smaller legal minimum size does make a greater proportion of the standing stock subject to legal harvest, thus potentially increasing catch rates, the objective of the size limit is to optimize surf clam yield per recruit, not control harvests within quotas. Other FMP measures, including fishing time restrictions and closures, are used to keep harvest within optimum yield for the fishery.

Therefore, based on the record of public comment and the presentations and actions taken by the Council, the Secretary continues the surf clam minimum size limit at 5 inches in all three areas of the fishery.

Other Matters

This action is taken under the authority of 50 CFR 652.25 and is taken in compliance with Executive Order 12291. The action is covered by the certification for Amendment 5 to the Fishery Management Plan for Atlantic Surf Clam and Ocean Quahog Fisheries, and under the Regulatory Flexibility Analysis, that the authorizing regulations do not have a significant economic impact on a substantial number of small entities.

Proposed Rules

Federal Register
Vol. 51, No. 47
Tuesday, March 11, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

1 CFR Ch. III

Use of Federal Rules of Evidence in Federal Agency Adjudications

AGENCY: Administrative Conference of the United States.

ACTION: Request for public comments.

SUMMARY: The Administrative Conference's Committee on Adjudication has under consideration a draft recommendation on the use of the Federal Rules of Evidence in Federal Agency Adjudications. Interested persons are invited to comment on the draft recommendation.

DATES: Comments due by Wednesday, April 9, 1986.

ADDRESS: Send comments to: Richard K, Bert, Administrative Conference of the United States, 2120 L Street NW., Suite 500, Washington, DC 20037.

FOR FURTHER INFORMATION CONTACT: Richard K, Berg, 202–254–7065.

SUPPLEMENTARY INFORMATION: The Administrative Conference's Committee on Adjudication has under consideration a draft recommendation of the use of the Federal Rules of Evidence in Federal agency adjudications. The draft recommendation is based on a study prepared for the Administrative Conference by Professor Richard J. Pierce, Jr. of the University of Pittsburgh Law School. Copies of the report may be obtained from the Office of the Chairman, Administrative Conference of the United States, 2120 L Street NW., Suite 500, Washington, DC 20037. (Telephone: 202–254–7065).

Professor Pierce's report finds that agency rules governing the admissibility of evidence in adjudicatory proceedings fall into three general categories: (1) Rules which track the standard, set out the Administrative Procedure Act, "Any oral or documentary evidence may be received, but the agency as a matter of policy shall provide for the exclusion of irrelevant, immaterial or unduly repetitious evidence,"; (2) the rules which require the application of the Federal Rules of Evidence "so far as particable;" and (3) rules which permit or encourage resort to the Federal Rules of Evidence for guidance, but leave the decision whether to apply them in the discretion of the presiding officer. Professor Pierce concludes that the third model has advantages over the other two, and the draft recommendation urges that it be adopted by the agencies.

The Committee on Adjudication invites comments on the proposed recommendation, and, in addition, requests comments addressed to the four issues listed below the text of the proposed recommendation. The committee requests that comments be filed at Conference's office by the close of business, Wednesday, April 9, 1986. However, comments received subsequent to that date will be considered to the extent the committee's schedule permits.

Draft Recommendation

Use of Federal Rules of Evidence in Federal Agency Adjudication.

Preamble

Federal agencies have adopted hundreds of different sets of rules governing admission of evidence in formal adjudications.[1] While those rules vary in their details, they can be placed in three general categories: (1) Rules that reflect the wide open standard of APA section 556(d); (2) rules that require presiding officers to apply the Federal Rules of Evidence (FRE) "so far as practicable;" and, (3) rules that permit presiding officers to use the FRE as a source of guidance in making evidentiary rulings. In a few instances, Congress has required the agency to adopt a standard that refers to the FRE; in other cases the agency voluntarily adopted such a standard.

Presiding officers vary substantially in the extent of their use of the FRE as a source of guidance in making evidentiary rulings. Presidint officers at agencies whose rules refer to the FRE rely on the FRE as a source of guidance much more frequently than presiding officers at agencies whose rules reflect only the APA standard. Presiding officers at agencies with rules that refer to the FRE are more satisfied with the rule they apply than presiding officers at agencies with rules that reflect only the APA standard. The relative dissatisfaction expressed by many presiding officers in the latter group seems to be based on their perception that the APA standard does not accord them sufficient discretion to engage in responsible case management. Because they perceive that they do not have the discretion to exclude evidence they consider clearly unreliable, they must devote valuable hearing and opinion-writing time to reception and consideration of such evidence.

Because the APA evidentiary standard is broadly permissive, courts routinely decline to reverse agencies that have adopted this standard on the basis of alleged erroneous admission of evidence. However, courts seem confused by the FRE "so far as practicable" evidence standard. Some courts apparently interpret it to accord near total discretion to agencies. Other courts interpret it as a mandate to comply with the FRE except in unusual circumstances. Still others apparently view the standard as a mandate to admit evidence inadmissible under the FRE except when unusual circuemtances require application of the FRE. Independent of the evidentiary standard adopted by the agency, reviewing courts apply three general rules: (1) An agency must respect evidentiary privileges; (2) an agency can be reversed if it declines to admit evidence admissible under the FRE; and, (3) an agency will be reversed if it bases a finding on unreliable evidence.

The FRE "so far as practicable" standard has four significant disadvantages: (1) Courts seem confused as to what it means or how to enforce it; (2) instructing presiding officers to exclude evidence based on the standard forces them to undertake a difficult and hazardous task; (3) excluding evidence on the basis that it is inadmissible in a jury trial is totally unnecessary to insure that agencies act only on the basis of reliable evidence; and, (4) agencies, like other experts, should be permitted to rely on classes of evidence broader than those that can be considered by lay jurors. Yet, the APA standard alone has the disadvantage that presiding officers perceive it as an inadequate tool for effective case management. A standard that *permits* presiding officers to use the FRE as a source of guidance in making evidentiary rulings avoids the disadvantages of both the APA standard and the FRE "so far as practicale" standard. In addition, under any set of evidentiary rules, an agency can materially assist presiding officers in their evidentiary decisionmaking by specifying with greater particularity the substantive standards the agency intends to apply in resolving various classes of adjudications and the types of evidence it considers reliable and probative with respect to recurring factual issues.

Recommendations

1. Congress should not require agencies to apply the Federal Rules of Evidence to limit the discretion of presiding officers to admit evidence in formal adjudications. (This recommendation is inconsistent with some existing statutory provisions, *e.g.*, 29 U.S.C. 160(B).)

2. Agencies should not limit the discretion of presiding officers to admit evidence in formal adjudications by requiring them to apply the Federal Rules of Evidence. (This recommendation is inconsistent with some agency regulations, *e.g.*, 47 CFR 1.351.)

3. Agencies should adopt evidentiary regulations applicable to formal adjudications that clearly confer on presiding officers discretion to exclude unreliable evidence and evidence the probative value of which is substantially outweighed by its potential for undue consumption of time. Those regulations should include descretion to use the Federal Rules of Evidence as a source of general guidance in determining reliability and to use the weighted balancing test in Federal Rule 403, which allows exclusion of evidence the probative value of which is substantially outweighed by its potential for undue consumption of time. (*See, e.g.*, 29 CFR 1844.)

4. Agencies should assist presiding officers in their evidentiary decisionmaking by announcing in advance of a formal adjudication the substantive standards the agency intends to apply in resolving the adjudication. (This recommendation is intended to assit presiding officers assigned to formal adjudications governed by extremely broad statutory standards, *e.g.*, public convenience and necessity. If the agency does not specify the applicable substantive standard with greater particularity in advance of the formal adjudication through some means, *e.g.*, rulemaking, prior adjudication or scoping order, the presiding officer will have difficulty making informed decisions concerning the relevance or relative probative value of evidence tendered.)

5. For purposes of these recommendations, formal adjudication means an adjudication required by statute or regulation to be determined on the record after opportunity for a hearing. For purposes of these recommendations, presiding officer means an Administrative Law Judge, an agency head, or other officer who presides at the reception of evidence in such a proceeding.

Additional Issues To Consider

1. The proposed recommendation is drafted with the intention of providing a flexible evidentiary standard adaptable to any agency formal adjudication. It is desirable to promulgate any recommendation suggesting an evidentiary standard applicable to all agency formal adjudications, given the wide variety in the functions and in the types of adjudications conducted by agencies?

2. The proposed recommendations are entirely precatory in their reference to the Federal Rules of Evidence. Should some degree of reliance on the Federal Rules be mandatory?

3. The proposed recommendations apply only to formal adjudications required by staute or regulation to be on the record. Should they be broadened to include the many proceedings conducted as formal adjudications by agency custom of because the agency voluntarily chooses for other reasons to proceed by formal adjudication? Should they apply to all proceedings involving evidentiary hearings?

4. Should the recommendations apply to nonadversarial formal adjudications, *e.g.*, Social Security Administration disability proceedings?

---

[1] The term "formal adjudications" refers to adjudications required by statute to be determined on the record after opportunity for an agency hearing in accordance with the Administrative Procedure Act, 5 U.S.C. 554, 556 and 557, and also includes agency adjudications which by regulation are conducted in conformance with these provisions.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 1501

Operations of the International Organizations Employees Loyalty Board

AGENCY: Office of Personnel Management.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of Personnel Management (OPM) proposes to amend its current regulation to conform it to recent Federal court decisions, which have ruled that certain terms and conditions of the regulation (which is derived from Presidential Executive Order 10422) are overly broad and vague and, therefore, may violate individual rights guaranteed by the First Amendment of the U.S. Constitution. These regulations would respond to these concerns and limit and tighten applicability of the standard by substituting more precise, tested language with appropriate safeguards that should successfully withstand legal challenge and protect the purposes served by the Presidential Executive Order on which they are based.

DATE: Comments must be received on or before May 12, 1986.

ADDRESS: Send or deliver written comments to George Woloshyn, Associate Director, Compliance and Investigations Group, Room 5478, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: George Woloshyn, 202/632–4426.

SUPPLEMENTARY INFORMATION:

Evaluation Required

Executive Order 10422, first promulgated in 1953, by President Harry S. Truman, requires that U.S. citizen working, or wishing to work, for the United Nations or other public international organizations be evaluated for loyalty to the United States. The Order sets out the terms and conditions for making such determinations.

The results of such evaluation are provided to the Secretary of State who, after appropriate investigation, reports his or her findings to the international organization for its use in making employment decisions.

Challenges to Evaluation

Specific instances have occurred in which employees or candidates for employment have challenged the investigation process in Federal court of the basis of putative effects on their

VOL 51
ISS 47
MR 11
1986
UMI

First Amendment rights of freedom of speech and assembly. They argued that in order to obtain employment as a private citizen with an international organization, they were required by the loyalty criteria to refrain from lawful behavior or speech in which they desired to engage. The courts agreed and decided in their favor. The principal difficulty, according to the courts, is that certain terms of the loyalty determination criteria are unconstitutionally board. They specifically focused on two phrases containing prohibitions involving the *advocacy of* certain acts or beliefs as examples of how the loyalty standard went further in trying to influence the behavior of individual citizens than First Amendment rights would permit.

Features of this amendment

This amendment more precisely states the content of each evaluation criterion so that its application is more narrowly and tightly construed. The proposed changes are noted below, along with a brief rational for each change.

(a) The phrase "knowingly associating with spies and saboteurs" is eliminated from § 1501.8(b)(1). *Reason:* courts have expressed doubts regarding its constitutionality

(b) The phrase "sedition or advocacy therof" is eliminated from § 1501.8(b)(1). *Reason:* courts have found this languate to be unconstitutional.

(c) The word "treason" is added to 1501.8(b)(1). *Reason:* it adds clarity and consistency to the sentence.

(d) The advocacy proscription in § 1501.8(b)(3) is limited by addition of language that requires a threat of imminent lawless action. *Reasons:* the additional words are required by the courts, and their absence was noted in one court decision.

(e) The word "may" in the phrase "which may indicate disloyalty . . ." is eliminated from § 1501.8(b)(4). *Reason:* elimination of the word serves to limit application of the provision. Moreover, the disclosures in question are limited to classified documents of information. *Reason:* clarifies and limits the nature of the information disclosed.

(f) the wording "and to the deteriment of the Government of the United States" is added to § 1501.8(b)(5). *Reason:* the added wording serves to reasonably narrow application of the provision.

(g) The membership provision of § 1501.8(b)(6) is repleced with more recent wording from the amended Executive Order 10422, Part II, 2(f). *Reason:* the newer language is required by previous court decision.

E.O. 12291, Federal Regulaiton

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it involves only private individuals seeking to work for public international organizations.

Director.

Accordingly, OPM proposes to amend 5 CFR Part 1501 as follows:

PART 1501—OPERATIONS OF THE INTERNATIONAL ORGANIZATIONS EMPLOYEES LOYALTY BOARD

1. The authority citation for Part 1501 continues to read as follows:

Authority: E.O. 10422, as amended; 3 CFR, 1949–1953 Comp., p. 921.

2. Section 1501.8(b) is revised to read as follows:

§ 1501.8 Grounds for determinations of the Board.

* * * * *

(b) *Activities and associations.* Among the activities and associations of the employee or person being considered for employment which may be considered in connection with a determination of disloyalty may be one or more of the following:

(1) Sabotage, espionage, or treason, or attempts thereat or preparations therefor.

(2) Advocacy of revolution or force or violence to alter the constitutional form of government of the United States, that is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.

(3) Intentional, unauthorized disclosure to any person, under circumstances which indicate disloyalty to the United States, of classified United States documents or United States information obtained by the person making disclosure as a result of his or her previous employment by the Government of the United States or otherwise.

(4) Performing or attempting to perform his or her duties, or otherwise acting, while an employee of the U.S. Government during a previous period, with the intent to serve the interest of another government in preference to the interests of the United States and to the detriment of the Government of the United States.

(5) Knowing membership in, with the specific intent of furthering the aims of, or adherence to and active participation in with the specific intent of furthering the aims of, any foreign or domestic organization, association, movement, group, or combination of persons, which unlawfully advocates or practices the commission of acts of force or violence to prevent others from exercising their rights under the Constitution or laws of the United States, or any State, or which seeks to overthrow the Government of the United States or subdivision thereof by unlawful means.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 26

Determination of World Price for Certain Commodities; Upland Cotton

AGENCY: Office of the Secretary, USDA

ACTION: Proposed rule.

SUMMARY: The purpose of this proposed rule is to (1) prescribe a formula by which the Secretary of Agriculture will derive the prevailing world market price (adjusted to United States quality and location) for the 1986 through 1990 crops of upland cotton (hereinafter referred to as the "adjusted world price"), (2) provide a mechanism by which such adjusted world price will be announced periodically, and (3) invite public comment on the proposals. These actions are required by section 103A(a)(5)(E)(i–iii) of the Agricultural Act of 1949, as amended by the Food Security Act of 1985.

DATE: Comments must be received on or before March 26, 1986, in order to be assured of consideration.

ADDRESS: Mail comments to Dr. Howard C. Williams, Director, Commodity Analysis Division, USDA–ASCS, Room 3741 South Building, P.O. Box 2415, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Charles V. Cunningham, Deputy Director, Commodity Analysis Division, USDA–ASCS, Room 3741 South Building, P.O. Box 2415, Washington, DC 20013 or call (202) 447–7954.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation No. 1512–1 and has been designated as "not major". It has been determined that these provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local governments, or geographic regions; or (3) Significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The titles and numbers of the Federal Assistance Programs to which this proposed rule applies are: Commodity Loans and Purchases–10.051, and Cotton Production Stabilization–10.052 as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is applicable to the provisions of this proposed rule and an initial Regulatory Flexibility Analysis has been completed and is available upon request.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

Basis for Adjusted World Price Determination

Section 103A(a)(5)(E)(i) of the Agricultural Act of 1949, as amended (hereinafter referred to as the "Act") provides that the Secretary of Agriculture shall prescribe by regulation:

(a) A formula to define the prevailing world market price for cotton; and

(b) A mechanism by which such prevailing world market price shall be announced periodically.

Section 103A(a)(5)(E)(ii) provides that the Secretary, not later than 90 days after the date of enactment of the Food Security Act of 1985 (Pub. L. 99–198), shall:

(a) Publish in the **Federal Register** proposed regulations specifying the formula for determining the prevailing world market price for cotton and the mechanism for periodically announcing such price; and

(b) Invite public comment on the proposed regulations.

The prevailing world market price for upland cotton, adjusted to U.S. quality and location (hereinafter referred to as the "adjusted world price"), as determined in accordance with the formula set forth in this proposed rule, shall be utilized under several provisions of the upland cotton program for the 1986 through 1990 crops.

For example, if the adjusted world price for any of the 1986 through 1990 crops of upland cotton is below the loan level for a crop of upland cotton, the Secretary must implement one of two programs designed to make United States upland cotton competitive in world markets.

Further, if the program which is implemented by the Secretary fails to make United States upland cotton fully competitive in world markets and if the adjusted world price is below the loan repayment rate for a crop of upland cotton, the Secretary shall provide for the issuance of negotiable marketing certificates to first handlers of cotton (persons regularly engaged in buying or selling upland cotton) in such monetary amounts and subject to such terms and conditions as the Secretary determines will make upland cotton produced in the United States available at competitive prices, including such payments as may be necessary to make raw cotton in inventory on August 1, 1986, available on the same basis.

Under the provisions of this proposed rule, the prevailing world market price for upland cotton shall be determined based upon the average price quoted each Thursday for the five lowest-priced growths of the growths quoted for Middling (M) $1\frac{3}{32}$ inch cotton C.I.F. northern Europe (hereinafter referred to as the "Northern Europe price"). The Northern Europe price was selected as the basis for determining the prevailing world market price for upland cotton because it is readily available and is widely accepted as the most accurate indication of the competitive level of offering prices for upland cotton. The quotations are published daily and reflect offering prices from around the world. Furthermore, the Northern Europe price has been included as a part of the U.S. price support loan rate formula since the 1978 crop.

The Act provides that the prevailing world market price for upland cotton shall be adjusted to United States quality and location. Accordingly, the adjusted world price for upland cotton shall be equal to the Northern Europe price adjusted to average U.S. quality and location.

The Northern Europe price shall be adjusted to average U.S. spot market location by deducting the average difference during the preceding 52-week period between the average of the U.S. Northern Europe price quotations each Thursday for M $1\frac{3}{32}$ inch cotton and the average U.S. designated spot market price quotations each Thursday for M $1\frac{3}{32}$ inch cotton. The price so derived shall be further adjusted to Strict Low Middling (SLM) $1\frac{1}{16}$ inch (micronaire 3.5 through 4.9) cotton (hereinafter referred to as the "U.S. base quality") by deducting the difference between the loan rate for a crop of upland cotton for M $1\frac{3}{32}$ inch (micronaire 3.5 through 4.9) cotton and the loan rate for a crop of upland cotton of the U.S. base quality, as announced by the Secretary. This price shall then be adjusted to average U.S. location by deducting the difference between the average loan rate for a crop of upland cotton for the U.S. base quality in the designated spot markets and the national average loan rate for the U.S. base quality, as announced by the Secretary, to determine the adjusted world price for upland cotton.

The adjusted world price will be determined weekly beginning August 1, 1986, and continuing through the last Thursday of July 1991. Such price will be announced on or before 10:00 a.m. Eastern time each Friday. The initial determination will be made and announced as soon as possible after publication of a final rule in the **Federal Register** setting forth the formula for determining the adjusted world price for upland cotton.

Interested persons are invited to submit written comments on both the proposed formula for determining the adjusted world price and the proposed mechanism for periodically announcing such price. Comments must be received by March 26, 1986 in order to be assured of consideration. The adjusted world price for upland cotton must be determined and announced by the Secretary of Agriculture before final determinations regarding the 1986 upland cotton program can be announced. The comment period is being limited to 15 days because farmers and the entire cotton industry need to know all the detailed provisions of the 1986 upland cotton program as soon as possible in order for planting decisions to be finalized for the 1986 crop. Farmers are already planting 1986-crop upland cotton in some areas. Others are currently preparing land for planting.

VOL 51
ISS 47
MR 11
1986
UMI

List of Subjects in 7 CFR Part 26

Upland cotton, World market price.

Proposed Rule

Accordingly, it is proposed to amend 7 CFR Subtitle A by adding a new Part 26 to read as follows:

PART 26—DETERMINATION OF WORLD MARKET PRICE FOR CERTAIN COMMODITIES

Subpart A—Determination of World Market Price for Upland Cotton

Sec.
26.1 Applicability.
26.2 Determination of the prevailing world market price for upland cotton.
26.3 Adjusted world price for upland cotton.

Authority: Sec. 501, Pub. L. 99-198.

Subpart A—Determination of World Market Price for Upland Cotton

§ 26.1 Applicability.

This subpart sets forth the procedures for determining the prevailing world market price for upland cotton and the mechanisms for periodically announcing such price as required by section 103A(a)(5)(E) of the Agricultural Act of 1949, as amended (hereinafter referred to as the "Act").

§ 26.2 Determination of the prevailing world market price for upland cotton.

The prevailing world market price for upland cotton shall be determined by the Secretary of Agriculture based upon the average of the prices quoted each Thursday for the five lowest-priced growths of the growths quoted for Middling one and three-thirty-seconds inch (M $1\frac{3}{32}$ inch) cotton C.I.F. (cost, insurance, and freight) northern Europe (hereinafter referred to as the "Northern Europe price"). If no Thursday quotes are available, the latest available quotes will be used.

§ 26.3 Adjusted world price for upland cotton.

(a) The prevailing world market price for upland cotton, adjusted to average U.S. quality and location (hereinafter referred to as the "adjusted world price"), determined in accordance with paragraph (b) of this section, shall be applicable to the programs of the Department of Agriculture for the 1986 through 1990 crops of upland cotton as provided in section 103A of the Act.

(b) The adjusted world price for upland cotton shall equal the Northern Europe price as determined in accordance with § 26.2 and adjusted to average U.S. quality and location as follows:

(1) The Northern Europe price shall be adjusted to average designated U.S. spot market location by deducting the average difference in the immediately preceding 52-week period between:

(i) The average of price quotations from the U.S. Memphis territory and the California/Arizona territory as quoted each Thursday for M $1\frac{3}{32}$ inch cotton C.I.F. Northern Europe; and

(ii) The average price of M $1\frac{3}{32}$ inch (micronaire 3.5 through 4.9) cotton as quoted each Thursday in the designated U.S. spot markets.

(2) The price determined in accordance with subparagraph (b)(1) shall be adjusted to reflect the price of Strict Low Middling (SLM) $1\frac{1}{16}$ inch (micronaire 3.5 through 4.9) cotton (hereinafter referred to as the "U.S. base quality") by deducting the difference, as announced by the Secretary of Agriculture, between the applicable loan rate for a crop of upland cotton for M $1\frac{3}{32}$ inch (micronaire 3.5 through 4.9) cotton and the loan rate for a crop of upland cotton of the U.S. base quality.

(3) The price determined in accordance with subparagraph (b)(2) shall be adjusted to average U.S. location by deducting the difference between the average loan rate for a crop of upland cotton of the U.S. base quality in the designated U.S. spot markets and the corresponding crop year national average loan rate for a crop of upland cotton of the U.S. base quality, as announced by the Secretary of Agriculture.

(c) If Thursday quotes are not available for either the Northern Europe or the spot market quotations for any week, that week will not be taken into consideration in determining the average difference in the 52-week period as provided in subparagraph (b)(1).

(d) The adjusted world price for upland cotton, as determined in accordance with paragraph (b), shall be determined weekly by the Secretary of Agriculture and shall be announced, to the extent practicable, on or before 10:00 a.m. Eastern time each Friday, beginning August 1, 1986, and continuing through the last Friday of July 1991. In the event that Friday is a nonworkday, the determination will be announced the next workday.

(e) The adjusted world price, determined in accordance with paragraph (b), shall be subject to further adjustments, as determined by the Executive Vice President, Commodity Credit Corporation, based upon the Schedule of Premiums and Discounts and the location differentials applicable to each warehouse location as announced in accordance with the upland cotton price support loan program for a crop of upland cotton.

Signed at Washington, DC, on March 6, 1986.

Frank W. Naylor, Jr.,

Acting Secretary.

BILLING CODE 3410-05-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket Number 86-ANE-1]

Airworthiness Directive; General Electric Co. (GE) CF6-50 and -45 Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require the removal from service of certain high pressure turbine rotor (HPTR) stage 1 disks installed on certain GE CF6-50 and -45 turbofan engines. The proposed AD is needed to prevent crack initiation in the HPTR stage 1 disk forward embossment radii which could result in an uncontained HPTR stage 1 disk failure.

DATE: Comments must be received on or before April 10, 1986.

ADDRESSES: Comments on the proposal may be mailed in duplicate to:

Federal Aviation Administration, New England Region, Office of the Regional Counsel, Attention: Rules Docket Number 86-ANE-1, 12 New England Executive Park, Burlington, Massachusetts 01803

or delivered in duplicate to Room 311 at the above address.

Comments delivered must be marked: Docket Number 86-ANE-1.

Comments may be inspected at the New England Regional Office, Office of the Regional Counsel, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The applicable service bulletin (SB) may be obtained from General Electric Company, 1 Neumann Way, Cincinnati, Ohio 45215. A copy of the SB is contained in Rules Docket Number 86-ANE-1, in the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Jeff Blazey, Engine Certification Branch,

ANE-142, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7090.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket, at the address given above, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice, must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 86-ANE-1". The postcard will be date/time stamped and returned to the commenter.

The FAA has determined that certain CF6-50 and -45 HPTR stage 1 disks may contain forward embossment radii contours which do not conform to the FAA approved type design. This condition adversely affects the fatigue strength of the disk, requiring its removal from service. The proposal AD would require removal of certain CF6-50 and -45 HPTR stage 1 disks in accordance with GE Alert SB A72-859, Revision 1, dated January 31, 1986, and inspection to detemine conformance with the FAA approved type design.

Conclusion

The FAA has determined that this proposed regulation involves 99 stage 1 disks installed in some CF-50 and -45 engines, core modules, or stocked as spares, and the approximate cost to each engine is $99,000. It has also been determined that a substantial number of small entities are not affected as the engines are only used on large aircraft. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (14 FR 11034; February 26, 1979); and (3) if promulgated, will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT".

List of Subjects in 14 CFR Part 39

Air transporation, Aircraft, Aviation safety, Engines, Incorporation by reference.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new AD:

General Electric Company: Applies to General Electric (GE) CF-50 and -45 turbofan engines.

Compliance is required as indicated unless already accomplished.

To prevent possible failure of high pressure turbine rotor (HPTR) stage 1 disk, accomplish the following:

(a) Remove from service, in accordance with GE Alert Service Bulletin (SB) A72-859, Revision 1, dated January 1, 1986, those HPTR stage 1 disks identified by specific serial numbers listed in GE Alert SB A72-859, Revision 1, under paragraph 2., Table 1, for inspection to determine conformance with the FAA approved type design.

(b) Compliance required as follows:

(1) For those disks with less than 5,490 flight cycles since new on the effective date of this AD, comply prior to the accumulation of 5,500 flight cycles.

(2) For those disks with 5,490 or greater flight cycles since new on the effective date of this AD, comply within the next 10 flight cycles.

(c) For HPTR stage 1 disks which do not conform to the approved FAA type design will be retired from service.

(d) Those HPTR stage 1 disks which conform to the approved FAA type design may be returned to service.

Note.—For the purpose of this AD, the number of flight cycles equals the number of flights that involve an engine operating sequence consisting of engine starting, takeoff operation, landing and engine shutdown.

Upon request, an alternate means of compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

Upon submissen of substantiating data by an owner or operator, through an FAA maintenance inspector, the Manager, Engine Certification Office, Burlington, Massachusetts may adjust the compliance time specified in this AD.

The FAA will request the permission of the Federal Register to incorporate by reference the manufacturer's SB identified in this document.

Issued in Burlington, Massachusetts, on February 27, 1986.

Robert E. Whittington,

Director, New England Region.

14 CFR Part 39

[Docket Number 85-ANE-31]

Airworthiness Directives: Rolls-Royce, Ltd. RB211-22B and -524 Series Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directives (AD) which would require the removal and retirement from service, in accordance with a Rolls-Royce, Mandatory service bulletin (SB), of certain intermediate pressure (IP) compressor rotor asssemblies and IP turbine disks on certain Rolls-Royce RB211 engines that have been oversped in excess of 115 percent IP rotational speed (N2). The affected disks and rotors may have suffered unacceptable damage when oversped which could lead to an uncontained disk burst.

DATE: Comments must be received on or before April 30, 1986.

ADDRESSES: Comments on the proposal may be mailed in duplicate to:

Federal Aviation Administration, New England Region, Office of the Regional Counsel, Attention: Rules Docket Number 85-ANE-31, 12 New England Executive Park, Burlington, Massachusetts 01803

VOL 51
ISS 47
MR 11
1986
UMI

or delivered in duplicate to Room Number 311 at the above address.

Comments delivered must be marked: Docket Number 85–ANE–31.

Comments may be inspected at the New England Regional Office, Office of the Regional Counsel, Room Number 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The applicable SB may be obtained from Rolls-Royce Limited, Technical Publications Department, P.O. Box 31, Derby DE2 8BJ, England. A copy of the SB is contained in Rules Docket Number 85–ANE–31 in the Office of the Regional Counsel, New England Region, and may be examined between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Chris Gavriel, Engine Certification Branch, ANE–141, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273–7084.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available for examination in the Rules Docket, both before and after the closing date for comments, at the address given above. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 85–ANE–31." The postcard will be date/time stamped and returned to the commenter.

The FAA has determined that certain IP compressor rotor assemblies and IP turbine disks have been oversped beyond 115 percent N2 and must be removed from service for inspection and possibly retired in accordance with the requirements of the compliance section of Rolls-Royce Mandatory SB RB211–72–5887, Revision 2, dated August 23, 1985. Though no failures of disks or rotors have occurred, testing and analysis has shown that it is possible to sustain unacceptable damage from such an overspeed. It is therefore deemed prudent to remove and inspect disks that have oversped beyond 115 percent N2 through and including 120 percent N2. Disks that have been oversped in excess of 120 percent N2, can not be returned to serviced and must be retired.

Conclusion

The FAA has determined that few, if any, small entities within the meaning of the Regulatory Flexibility Act will be affected since this proposed regulation affects only operators using Lockheed L–1011 and Boeing 747 aircraft in which the RB211 engines are installed, none of which are believed to be small entities. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291 as the total cost of this AD is estimated at $44,000 per year; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT**".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Engines, Incorporation by reference.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 39 of the Federal Aviation Regulation (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423, 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new AD:

Rolls-Royce Limited: Applies to Rolls-Royce RB211–22B and RB211–524 series turbofan engines.

Compliance is required as indicated, unless already accomplished.

To prevent IP compressor and IP turbine disk failures, as a result of overspeeding which can cause uncontained engine failures, accomplish the following in accordance with the compliance schedules of Rolls-Royce Mandatory SB RB.211–72–5887, Revision 2, dated August 23, 1985, or FAA approved equivalent:

(a) Remove IP compressor rotor assemblies and IP turbine disks that have been oversped beyond 115 percent N2 through and including 120 percent N2. Assemblies may be reinstalled after obtaining a satisfactory inspection as directed in the SB.

(b) Remove from service IP compressor rotor assemblies and IP turbine disks that have been oversped beyond 120 percent N2.

Aircraft may be ferried in accordance with the provision of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Engine Certification Office, New England Region, may adjust the compliance time specified in this AD.

The FAA will request the permission of the **Federal Register** to incorporate by reference the manufacturer's SB identified and described in this document.

Issued in Burlington, Massachusetts, on February 11, 1986.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 86–AGL–4]

Proposed Establishment of Transition Area—Paxton, IL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish the Paxton, Illinois transition area to accommodate a new VOR Runway 18 instrument approach procedure to Paxton Airport.

The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

DATE: Comments must be received on or before April 7, 1986.

ADDRESS: Send comments on the proposal in triplicate to:

Federal Aviation Administration,
Regional Counsel, AGL–7,
Attn: Rules Docket No. 86–AGL–4,
2300 East Devon Avenue,
Des Moines, Illinois 60018

The official docket may be examined in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Moines, Illinois.

An informal docket may also be examined during normal business hours at the Airspace, Procedures, and Automation Branch, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Moines, Illinois.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL–530, Federal Aviation Administration, 2300 East Devon Avenue, Des Moines, Illinois 60018, telephone (312) 694–7360.

SUPPLEMENTARY INFORMATION: The development of a new VOR Runway 18 instrument approach procedure requires that the FAA designate airspace to ensure that the procedure will be contained within controlled airspace.

The minimum descent altitudes for this procedure may be established below the floor of the 700-foot controlled airspace.

Aeronautical maps and charts will reflect the defined area which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86–AGL–4." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket, FAA, Great Lakes Region, Office of Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426–8058.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2, which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a transition airspace area near Paxton, Illinois.

Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6 dated January 2, 1985.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend Part 71 of the FAR (14 CFR 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. By amending § 71.181 as follows:

Paxton, IL

That airspace extending upward from 700 feet above the surface, within a 5 mile radius of Paxton Airport (lat. 40°26'55" N., long. 88°07'40" W.) and within 3 miles each side of the 106° radial of the Roberts VORTAC, extending from the 5 mile radius area to the Roberts VORTAC, excluding that portion which overlies the Gibson City, Illinois, transition area.

Issued in Des Plaines, Illinois, on February 21, 1986.

Kenneth C. Patterson,

Manager, Air Traffic Division.

BILLING CODE 4910-13-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 862 3006]

Albert Schneider; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, the President of Cellular Capital Corporation to cease making misrepresentations to induce consumers to purchase application preparation services for the cellular license lottery operated by the Federal Communications Commission. Additionally, respondent would be required to make two affirmative disclosures to prospective applicants: (1) That the purchase of a cellular application is a high-risk investment, and (2) that an operating cellular system is unlikely to return any profits to its owners in the first three years of operation.

DATE: Comments must be received on or before May 12, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: FTC/H–272, Michael McCarey, Washington, DC 20580. (202) 523–1415.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and Section 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Cellular lottery preparation services, Trade practices.

Commissioners: Terry Calvani, Acting Chairman; Patricia P. Bailey, Mary L. Azcuenaga.

In the Matter of Albert Schneider, Agreement Containing Consent Order to Cease and Desist; File No. 862–3006.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Albert Schneider and it now appearing that Albert Schneider is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed by Albert Schneider and counsel for the Federal Trade Commission that:

1. Albert Schneider is President of Cellular Capital Corporation, a corporation organized, existing, and doing business under the laws of the State of Ohio, with its principal office located at One Erieview Plaza, Eighth Floor, Cleveland, Ohio 44144. As such, he formulates, directs, and controls the acts and practices of said corporation, and his address is the same as that of said corporation.

2. Albert Schneider admits all the jurisdictional facts set forth in draft of complaint here attached.

3. Albert Schneider waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

(d) Any claim under the Equal Access to Justice Act, 28 U.S.C. 2412.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the complaint filed in the district court, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may withdraw its acceptance of this agreement and so notify the proposed respondent.

5. This agreement is for settlement purposes only and does not constitute an admission by Albert Schneider that the law has been violated as alleged in the draft of complaint here attached or that any statements alleged in such complaint are true.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to Albert Schneider, (1) issue its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to Albert Schneider's address as stated in this agreement shall constitute service. Albert Schneider waives any right he may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order. Upon issuance of the order, the Commission shall dismiss the complaint in the district court with prejudice as it relates to Albert Schneider, subject only to the right of the Commission to reopen the proceeding pursuant to the provisions of Paragraph IV of this Order.

7. Albert Schneider has read the order contemplated hereby. He understands that once the order has been issued, he will be required to file one or more compliance reports showing that he has fully complied with the order. Albert Schneider further understands that he may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered that Respondent Albert Schneider, his agents, representatives, brokers, and employees, and those persons in active concert or participation with them, who receive actual notice of this Order by personal service or otherwise, and each of them, directly or indirectly, in the promotion, offering for sale or sale of any non-wireline cellular telephone system application preparation service, do forthwith cease and desist from the following activities:

(1) Representing, directly or indirectly, that any applicant in the Federal Communications Commission ("FCC") non-wireline cellular telephone license lottery ("lottery") is certain or substantially certain to obtain all or part of a cellular telephone license ("license"), or otherwise misrepresenting the likelihood that an applicant will obtain all or part of a license;

(2) Representing, directly or indirectly, that past agreements to share licenses (settlement agreements) entered into by applicants in the second and third tiers of the FCC lottery provide a basis for concluding that future applicants in the FCC lottery are likely to receive an interest in a license through similar agreements;

(3) Misrepresenting, directly or indirectly, the value or profit potential of a license awarded through the FCC lottery. At the time of making any representation of value or profit potential, defendant must possess and rely upon a reasonable basis for the representation consisting of competent and reliable data;

(4) Misrepresenting, directly or indirectly, past or current profit performance of cellular telephone systems; or making any representation regarding past or current profit performance of cellular telephone systems unless at the time of making such representation defendant possesses and relies upon a reasonable basis consisting of competent and reliable data;

(5) Misrepresenting, directly or indirectly, any financing arrangements made for purchasers of defendant's application services;

(6) Misrepresenting, directly or indirectly, the nature of the services provided by the application preparers or the qualifications of those providing technical services;

(7) Misrepresenting, directly or indirectly, any material fact relevant to a customer's decision to purchase application preparation services for the FCC lottery; and

(8) Making any representations with respect to income tax benefits available to purchasers of defendant's products or services other than to refer the prospective applicant to their own tax accountant or attorney.

II

It is further ordered that Respondent Schneider, his agents, representatives, brokers and employees, and those persons in active concert or participation with them, who receive actual notice of this Order by personal service or otherwise and each of them, directly or indirectly, in the promotion, offering for sale or sale of any non-wireline cellular telephone system application preparation service are hereby enjoined from failing to disclose to prospective applicants statements (1) and (2) below in all sales brochures, in every oral presentation, and on the front page of all sales or service contracts or agreements with ultimate consumers:

(1) "The purchase of an application for the Federal Communication Commission's cellular telephone lottery is a high-risk investment. Do not purchase an application unless you can afford and are prepared to lose all the money invested."

(2) "An operating cellular system is unlikely to return any profits to its owners in at least the first three years of operation."

It is further ordered that the statements required above shall be set forth in a clear and conspicuous manner in print at least as large as the capitalized corporate name within the text of the brochure, contract or agreement then used by the defendant(s), but in no event smaller than 10 point type; that such disclosure shall be in 100% black ink against a light background, and boxed; that the copy of the foregoing statements set forth on the front page of each sales or service agreement or contract shall be preceded by the heading "RISK FACTORS YOU SHOULD CONSIDER PRIOR TO PURCHASE", and shall also include a signature line for the customer preceded by a declaration that the customer has read and understands the statement; and that no agreement or contract shall be deemed valid or complete unless the customer has signed and dated the required declaration.

III

It is further ordered that Respondent Schneider shall fully comply with the Paragraphs IV and VII of the Consent Decree and Permanent Injunction entered by the United States District Court for the Northern District of California in the case *Federal Trade Commission v. The Cellular Corporation, et al.* (Civ. No. C85–8231 WHO), which paragraphs are attached hereto and incorporated herein.

IV

It is further ordered that this settlement agreement is premised on the sworn financial statements of Respondent Schneider previously provided to the Commission. If the Commission finds any material misstatement or misrepresentation in the sworn financial statements, that finding shall cause this Order to be set aside and the Commission in that event shall be permitted to reopen this matter and proceed against Respondent Schneider to the full extent of any possible monetary liability he may have for the acts and practices alleged in the Commission's complaint in this matter in excess of the liability imposed herein. Prior to the making of any such motion, the Commission will notify Respondent Schneider of any alleged discrepancy and provide him with a reasonable opportunity to explain or justify the disputed entry.

V

It is further ordered that Respondent Schneider shall immediately provide a copy of this Order to each officer, employee, sales representative, or independent contractor engaged in the promotion or sale of respondent's non-wireline MSA cellular telephone system application preparation services.

VI

It is further ordered that Respondent Schneider shall, within sixty (60) days after the order is approved by the Commission, file with the Federal Trade Commission a report setting forth in detail the manner and form in which he has complied with this order.

Attachment

IV

It is further ordered that defendants TCC, CCC, Spectra, Wilson and Maerki shall contribute the sum of $400,000 to be used to complete the application process. Upon entry of this Order, $80,000 shall be deposited in a segregated account subject to the supervision of the Federal Trade Commission, which sum shall be earmarked for the final amounts required to be paid under this paragraph. The $400,000 sum obligated under this paragraph shall be used solely for necessary and proper expenses relating to the preparation, completion and filing of applications for the 5th tier of the FCC's cellular telephone license lottery, paid or accrued from December 1, 1985 through March 31, 1986, and cannot be used for payments, directly or indirectly, to defendants Wilson, Maerki or Schneider, whether in the form of salaries or otherwise. On or before April 15, 1986, the Defendants shall submit to the Federal Trade Commission a detailed account of all sums expended or accrued for this purpose from December 1, 1985 to date. Any difference between $400,000 and the amount actually expended or accrued for preparation, completion and filing of said applications from December 1, 1985, through March 31, 1986, as approved by the FTC, shall be paid to the Federal Trade Commission on or before June 1, 1986 to provide redress to consumers pursuant to a plan approved by the Commission. *Provided, however,* that the FTC shall have discretion to pay over the funds received to the United States Treasury, if the FTC determines in light of the administrative or distribution costs of redress that such action is in the public interest.

VII

It is further ordered that defendant TCC shall notify by mail all persons who are obligated to it for a portion of the purchase price for its lottery application services, pursuant to a limited recourse note or otherwise (the "Note"), advising them that the Note is due and payable only out of revenues from the operation of the cellular system and/or from the sale of his/her interest in the license and shall be enjoined from collecting or attempting to collect on the Notes in any manner inconsistent with this reformation. Nothing in this paragraph shall prevent defendants from discounting the Notes or preclude defendant TCC from assigning, hypothecating or otherwise disposing of any Note for such consideration as defendant TCC in its sole discretion deems appropriate; provided, however, that any taker of any Note from TCC shall be notified of and be bound by the reformation provisions contained in this paragraph.

VOL 51

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Albert Schneider, President of Cellular Capital Corporation.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received, and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint alleges that Albert Schneider has made misrepresentations of material facts to induce consumers to purchase application preparation services for the cellular license lottery operated by the Federal Communications Commission (FCC). The complaint futher alleges that, in light of the representations made, consumers are likely to be misled by Mr. Schneider's failures to disclose certain material facts, including the fact that the purchase of cellular application services is a high-risk investment.

The proposed consent order would prohibit Mr. Schneider, and persons in active concert or participation with him, from misrepresenting any fact "material to a customers's decision to purchase application services for the FCC lottery." In particular, he would be prohibited from making any representation that an applicant in the FCC lottery "is certain or substantially certain to obtain all or part of a cellular telephone license." He would also be required to make two affirmative disclosures to prospective applicants: (1) That the purchase of a cellular application is a high-risk investment and (2) that an operating cellular system is unlikely to return any profits to its owners in the first three years of operation.

Under the agreement, Mr. Schneider and certain individuals working with him would be required to spend up to $400,000 from December 1, 1985 to March 15, 1986 for the completion of the cellular applications that they have agreed to prepare. Any difference between $400,000 and the amount actually expended would be paid to the Federal Trade Commission.

Consumer redress would be provided by the reformation of the $10,000 limited recourse notes used by most of Mr. Schneider's customers to pay for a portion of the application price. The notes now provide that they are automatically due two years from the date that the applicant or the applicant's settlement group receives a construction permit from the FCC. They would be rewritten to provide that they are payable only out of revenues from the operation of the cellular system and/or from the sale of the applicant's interest in the cellular license.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 175

Solicitation of Public Comments Regarding Tariff Classification of Prefinished Hardboard Siding

AGENCY: Customs Service, Treasury.

ACTION: Solicitation of public comments.

SUMMARY: Customs is reviewing its position regarding the tariff classification of certain imported prefinished hardboard lap siding. The product in question is a plank of hardboard, 7/16-inch thick, and either 9 or 12 inches wide. Approximately 1-inch from the bottom, a hard plastic locking strip or "spline" is fixed into a groove in the back of each plank. The top edge of each plank is machined to form a groove or "rabbet", which fits the spline in the plank above. The planks are prefinished at the time of importation with acrylic latex paint. The current tariff classification was challenged administratively by the filing of a domestic interested party petition. That petition was denied by Customs. In the subsequent court proceeding contesting the denial by Customs, an alternative classification not previously considered was suggested. Customs has been directed by the court to consider the alternative classification, which we are publishing for public comments in order to make an administrative decision on the claim. The Court further directed Customs to communicate its administrative decision within 60 days from the date of the Court order, January 27, 1986.

DATE: Comments (preferably in triplicate) must be received on or before April 10, 1986.

ADDRESS: Comments may be submitted to and inspected at the Regulations Control Branch, U.S. Customs Service, Room 2426, 1301 Constitution Avenue NW., Washington, DC 20229 (202-566-8237).

FOR FURTHER INFORMATION CONTACT: Jeremy N. Baskin, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202-566-8181).

SUPPLEMENTARY INFORMATION:

Background

Customs is reviewing its position regarding the tariff classification of certain imported prefinished hardboard lap siding. The product in question is a plank or hardboard, 7/16-inch thick, and either 9 or 12 inches wide.

Approximately 1 inch from the bottom, a hard plastic locking strip or "spline" is fixed into a groove in the back of each plank. The top edge of each plank is machined to form a groove or "rabbet", which fits the spline in the plank above. The planks are prefinished at the time of importation with acrylic latex paint. The current tariff classification is under the tariff provision for "Other boards, of vegetable fibers (including wood fibers) . . .", in item 245.90, Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), a duty-free provision.

Customs published a notice in the **Federal Register** on March 22, 1982 (47 FR 12258), acknowledging receipt of a petition form a domestic interested party filed under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516). The notice solicited public comments on the merits of the petition. The deadline for receipt of comments was subsequently extended by a **Federal Register** notice published on May 27, 1982 (47 FR 23249). The petitioner claimed that the proper classification of the siding should be under the tariff provision for other hardboard in item 245.30, TSUS. The current duty rate under item 245.30, TSUS, is 7,5 percent ad valorem.

In accord with proper administration practice, by a ruling dated October 29, 1982, Customs informed the petitioner that the comments solicited by the March 22, 1982, notice had been considered and, upon review of the matter, it was decided to deny the petition and to continue to classify the imported siding in item 245.90, TSUS.

In response to the October 29, 1982, ruling, by letter of November 29, 1982, the petitioner filed notice of its intention to contest the decision in accordance with § 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.23, Customs Regulations (19 CFR 175.23).

By publication of T.D. 83-104 in the **Federal Register** on May 11, 1983 (48 FR 21231), Customs informed the public of the petitioner's desire to contest the decision, and gave a detailed account of the proceedings to that date together with a full explantion of the reason for denying the petition.

In the subsequent proceeding contesting the classification before the Court of International Trade, *American Hardboard Assocaition* v. *United States and MacMillan Blodel, Ltd.*, Party-in-Interest, Court No. 83-9-01301, a tariff classification not previously considered was suggested. On January 27, 1986, the Court remanded the case for decision on the correctness of the current tariff classification as opposed to the newly suggested alternative classification under the provisions for "Building boards. . . Laminated boards. . .", in tiem 245,80, TSUS. Materials classified under item 248.80, TSUS, are currently subject to a compound rate of duty of 1.4 cents per pound, plus 2.6 percent ad valorem.

Accordingly, in order to properly consider the issue Customs is requesting the views of the public on classification of the imported prefinished hardboard lap siding in item 245.80, TSUS, as opposed to classification in item 245.90, TSUS. A comment period of 30 days is being allowed in view of the short deadline imposed upon Customs by the Court to report on our decision.

Comments

Before making a determination on this matter, Customs will consider any written comments timely submitted. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), between 9:00 a.m. and 4:30 p.m. on normal business days, at the Regulations Control Branch, Room 2426, U.S. Customs Service Headquaters, 1301 Constitution Avenue NW., Washington, DC 20229.

Drafting Information

The principal author of this document was Larry L. Burton, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs office participated in its development.

Income Tax; Recapture of Overall Foreign Losses

Correction

In the document beginning on page 3193, in the issue of Friday, January 24, 1986, make the following corrections:

1. On page 3193, in the third column, in the last paragraph, in the eighth line, "904(d)(1)(EA)" should read "904(d)(1)(E)".

2. On page 3194, in the second column, in the first complete paragraph, in the eighteenth line, "§ 1.904 (f)-(d)" should read "§ 1.904 (f)-1(d)".

3. On page 3196, in the second column, in the first complete paragraph, in the nineteenth line, "national" should read "notional".

§ 1.904(f)-1 [Corrected]

4. On page 3197, in § 1.904(f)-1(a), in the second column, in the twelfth line from the top of the page, "904(d)(E)" should read "904(d)(1)(E)". In the same column, in paragraph (b), in the sixth line from the bottom of the paragraph, "Form 116" should read "Form 1116", and in the fourth line from the bottom, "blance is" should read "balance in".

5. On page 3198, in § 1.904(f)-1(d)(3)(ii)(A), in the first column, in the third line of paragraph (A), between "capital" and "loss" insert "gain net income reduced by the foreign source net capital".

6. On page 3199, in § 1.904(f)-1(f), in the first column, in the twentieth line from the top of the page, "904(d)(1)(e)" should read "904(d)(1)(E)".

§ 1.904(f)-2 [Corrected]

7. On page 3199, in the third column, in § 1.904(f)-2(c), in the second line, "mount" should read "amount".

8. On page 3200, in the first column, in Example (4), in the fifteenth line, "904(d)(1)(E)(B)" should read "904(d)(1)(B)".

9. On page 3201, in the first column, in § 1.904(f)-2(d)(4)(iii), in the second line, "of" should read "to".

§ 1.904(f)-3 [Corrected]

10. On page 3202, in the third column, § 1.904(f)-3(a), in the tenth line from the bottom of the page, "carryback" should read "carryover".

§ 1.1502-9 [Corrected]

11. On page 3206, in the first column, § 1.1502-9(a), in the eleventh line from the bottom of the page, "national" should read "notional". In the second column, in paragraph (iii), in the sixth line, "oveall" should read "overall".

12. On page 3208, in the third column, in the file line at the end of the document, the FR Doc. number should read "86-1463".

BILLING CODE 1505-01-M

FEDERAL COMMUNICATIONS COMMISSION

[MM Docket No. 85-349]

47 CFR Part 76

Amendment of the Rules Concerning Carriage of Television Broadcast Signals by Cable Television Systems; Extension of Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rules; Extension of reply comment period.

SUMMARY: Action taken herein extends the time for filing reply comments in response to the *Notice of Inquiry and Notice of Proposed Rule Making* in MM Docket No. 85-349. This *Notice* requested comments and specific rule proposals regarding matters concerning carriage of television broadcast stations by cable television systems. The National Association of Broadcasters and the National Cable Television Association requested the extension of time.

DATE: Reply comments are due March 21, 1986.

ADDRESS: Federal Communications Commission Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Alan Stillwell, Mass Media Bureau, (202) 632-6302.

SUPPLEMENTARY INFORMATION:

Order Granting Request for Extantion of Time To File Reply Comments

In the matter of Amendment of Part 76 of the Commission's Rules Concerning Carriage of Television Broadcast Signals by Cable Television System; MM Docket No. 85-349.

Adopted: February 28, 1986.

Released: March 3, 1986.

By the Acting Chief, Mass Media Bureau.

1. On November 14, 1985, the Commission adopted a combined *Notice of Inquiry and Notice of Proposed Rule Making* (*Notice*) in MM Docket No. 85–349, 50 FR 48232, to consider the matter of cable carriage of broadcast television signals. Reply comments in this proceeding are currently due March 4, 1986, pursuant to an *Order Extending Time for Filing Reply Comments* that was issued on February 21, 1986 (Mimeo No. 2767).

2. On February 27, 1986, the National Association of Broadcasters (NAB) and the National Cable Television Association (NCTA) submitted a joint motion to extend the date for filing reply comments in the proceeding referenced above until March 21, 1986. The parties state that they reached a compromise agreement on February 27, 1986, to recommend to the Commission new requirements for the carriage of local television broadcast signals by cable systems. The Television Operators Caucus (TOC) and the Independent Television Association (INTV) are also parties to the agreement. The NAB and NCTA indicate that the extension is necessary to permit the NCTA to obtain approval of its board of directors which is scheduled to meet on March 19, 1986. They also submit that they believe that it is important to file reply comments consistent with the compromise agreement.

3. As we stated in the *Notice*, we believe that it is important that the must carry proceeding be completed expeditiously. However, we also recognize the significance of this matter to broadcasters, cable operators, and the public. In this respect, we believe it is desirable to give consideration to the forthcoming must carry compromise agreement between broadcast and cable interests. Thus, we find that the requested 17-day extension is warranted to permit the necessary NCTA board approval and the filing of reply comments reflecting the results thereof.

4. Accordingly, It is ordered that the date for filing reply comments in response to the above-reference *Notice of Inquiry and Notice of Proposed Rule Making* is extended to March 21, 1986. This action is taken pursuant to authority provided in 4(i) of the Communications Act of 1934, as amended, and § 0.283 of the Commission's rules.

5. For further information concerning this proceeding, contact Alan Stillwell, Mass Media Bureau, (202) 632–6302.

Federal Communications Commission.

William H. Johnson,

Acting Chief, Mass Media Bureau.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Lindera Melissifolia (Pondberry)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: The Service reopens the comment period on the proposal to determine *Lindera melissifolia* (Walt.) Blume (pondberry) to be an endangered species under authority of the Endangered Species Act of 1973, as amended (Act). The Service seeks data and comments from the public on this proposal.

DATE: Comments from all interested parties must be received by April 10, 1986.

ADDRESSES: Comments and materials concerning this notice should be sent to Mr. V. Gary Henry, Acting Field Supervisor, Endangered Species Field Office, U.S. Fish and Wildlife Service, 100 Otis Street, Room 224, Asheville, North Carolina 28801. Comments and material received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Robert R. Currie at the above address, (704/259–0321 or FTS 672–0321).

SUPPLEMENTARY INFORMATION:

Background

In a proposed rule published in the Federal Register (50 FR 32581) the Service proposed that *Lindera melissifolia* (pondberry), a small wetland shrub limited to 18 locations in the Southeastern United States, be designated as an endangered species under the authority of the Endangered Species Act of 1973, as amemnded. *Lindera melissifolia* is endangered by land clearing operations, timber harvesting, drainage activities, and encroachment by competitor species. That proposal, if made final, would implement the protection provided by the Act for *Lindera melissifolia.*

The Act requires that a legal notice of proposed rules, such as the one for *Lindera melissifolia*, be published in local newspapers during the comment period for the proposed rule. Inadvertently, the Service did not publish a newspaper notice in a newspaper within the vicinity of the two Mississippi populations. The purpose of this action is to reopen the comment period for this proposed rule, publish newspaper notices in Mississippi, and thereby meet all public notification requirements of the Act. The appropriate Federal, State, and local officials, landowners, and other interested parties throughout the range of pondberry, including Mississippi, were informed of this proposal during the original comment period which extended from August 13, 1985, through September 27, 1985.

Author

The primary author of this notice is Mr. Robert R. Currie, Endangered Special Field Office, U.S. Fish and Wildlife Service, 100 Otis Street, Room 224, Asheville, North Carolina 28801 (704/259–0321 or FTS 672–0321).

Authority

The authority for this action is the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*; Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411).

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Economic Analysis (BEA)
Title: Unemployment Insurance Benefit Payments by County
Form number: Agency—N/A; OMB—0608–0038
Type of request: Extension of a currently approved collection
Burden: 28 respondents; 156 reporting hours
Needs and uses: BEA requests data directly from the responsible State agencies to produce county estimates of unemployment insurance benefit payments, part of county estimates of personal income.
Affected public: State or local governments
Frequency: Annually
Respondent's obligation: Voluntary
OMB desk officer: Timothy Sprehe, 395–4814

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–4217, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Timothy Sprehe, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

Dated: March 5, 1986.

Edward Michals,

Departmental Clearance Officer.

BILLING CODE 3510-CW-M

International Trade Administration

[A–549–502]

Antidumping Duty Order; Circular Welded Carbon Steel Pipes and Tubes From Thailand

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: In its investigation, the United States Department of Commerce determined that circular welded carbon steel pipes and tubes from Thailand were being sold at less than fair value within the meaning of the antidumping duty law. In a separate investigation, the United States International Trade Commission (the ITC) determined that circular welded carbon steel pipes and tubes from Thailand are materially injuring a United States industry. Additionally, the Department and the ITC found that "critical circumstances" do not exist with respect to circular welded carbon steel pipes and tubes from Thailand. Therefore, based on these findings, all unliquidated entries, or warehouse withdrawals, for consumption of Circular Welded Carbon Steel Pipes and Tubes from Thailand made on or after October 3, 1985, the date on which the Department published its "Preliminary Determination" notice in the **Federal Register**, will be liable for the possible assessment of antidumping duties. Further, a cash deposit of estimated antidumping duties must be made on all such entries, and withdrawals from warehouse, for consumption made on or after the date of publication of this antidumping duty order in the **Federal Register.**

EFFECTIVE DATE: March 11, 1986.

FOR FURTHER INFORMATION CONTACT: John J. Kenkel or Charles Wilson, Office of Investigations, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–5404 or (202) 377–5288.

SUPPLEMENTARY INFORMATION: The products under investigation are certain circular welded carbon steel pipes and tubes (referred to in this notice as "pipes and tubes"), also known as "standard pipe" or "structural tubing," which includes pipe and tube with an outside diameter of 0.375 inch or more but not over 16 inches of any wall thickness, as currently provided in items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258, and 610.4925 of the *Tariff Schedules of the United States Annotated* (TSUSA).

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b), on October 3, 1985, the Department published its preliminary determination that there was reason to believe or suspect that circular welded carbon steel pipes and tubes were being sold at less than fair value (50 FR 40427). On January 27, 1986, the Department published its final determination that these imports were being sold at less than fair value (51 FR 3384).

On February 21, 1986, in accordance with section 735(d) of the Act (19 U.S.C. 1673d(d)), the ITC notified the Department that such importations materially injure a United States industry.

Therefore, in accordance with section 736 of the Act (19 U.S.C. 1673e), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of pipes and tubes from Thailand. These antidumping duties will be assessed on all unliquidated entries of pipes and tubes entered, or withdrawn from warehouse, for consumption on or after October 3, 1985, the date on which the Department published its "Preliminary Determination" notice in the **Federal Register** (50 FR 40427).

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below:

MANUFACTURERS/PRODUCERS

Exporters	Weighted-average margins (pct)
Saha Thai Steel Pipe Co	15.69
Thai Steel Pipe Industry Co	15.60
All other manufacturers/producers	

VOL 51
ISS 47
MR 11
1986
UMI

MANUFACTURERS/PRODUCERS—Continued

Exporters	Weighted-average margins (pct)
Exporters	15.87

Article VI.5 of the General Agreement on Tariffs and Trade provides that "(n)o product . . . shall be subject to both antidumping and countervailing duties to compensate for the same situation of dumping or export subsidization." This provision is implemented by section 772(d)(1)(D) of the Act, which prohibits assessing dumping duties on the portion of the margin attribetable to export subisidies. In the final countervailing duty determination on certain circular welded carbon steel pipes and tubes from Thailand, we found export subsidies (50 FR 32751). Since dumping duties cannot be assessed on the portion of the margin attributable to export subsidies, there is no reason to require a cash deposit or bond for that amount. Thus, the amount of the expert subsidies will be subtracted for deposit or bonding purposes from the dumping margins.

This determination constitutes an antidumping order with respect to pipes and tubes from Thailand, pursuant to section 736 of the Act (19 U.S.C 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48). We have deleted from the Commerce Regulations, Annex I of 19 CFR Part 353, which listed antidumping findings and orders currently in effect. Instead, interested parties may contact the Office of Information Services, Import Administration, for copies of the updated list of orders currently in effect.

This notice is published in accordance with section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

March 4, 1986.

Amended Anitdumping Duty Order; Natural Bristle Paint Brushes and Brush Heads From the People's Republic of China (PRC)

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: On February 14, 1986, the United States Department of Commerce (the Department) published an antiumping duty order in the Federal Register stating that all unliquidated entries, or warehouse withdrawals, for consumption of this product made on or after February 14, 1986, the date of publication of the order, would be liable for the assessment of antidumping duties.

This amended order changes the effective date for the assessment of antidumping duties to February 8, 1986, the date of publication of the notice of an affirmative determination of threat of material injury by the International Trade Commission (ITC), in accordance with the "Special Rule" provision of section 736(b)(2) of the Tariff Act of 1930, as amended (the Act).

EFFECTIVE DATE: March 11, 1986.

[A-507-502]

Certain In-Shell Pistachios From Iran; Preliminary Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We have preliminarily determined that certain in-shell pistachios from Iran are being, or are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. We have directed the U.S. Customs service to suspend the liquidation of all entries of the subject merchandise as described in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make our final determination by May 19, 1986.

EFFECTIVE DATE: March 11, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, United States Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230: telephone: (202) 377-1769.

Preliminary Determination

We have preliminarily determined that certain in-shell pistachios from Iran are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1673b(b)) (the Act). We found that all sales during the period of investigation were at less than fair value. The weighted-average margin is 192.54 percent. We have preliminarily determined that "critical circumstances" exist with respect to pistachios from Iran.

Case History

On September 26, 1985, we received a petition from the California Pistachio Commission, Blackwell Land Co., California Pistachio Orchards, Keenan Farms, Inc., Kern Pistachio Hulling & Drying Co-op, Los Ranchos de Poco Pedro, Pistachio Producers of California, and T.M. Duché Nut Co., Inc. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of certain in-shell pistachios (pistachios) from Iran are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act and that these imports are materially injuring, or threaten material injury to, a United States industry. After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We notified the ITC of our action and initiated an investigation on October 15, 1985 (50 FR 42978). On November 12, 1985, the ITC determined that there was a reasonable indication that imports of pistachios from Iran were materially injuring, or threatening material injury to, a U.S. industry (US ITC Publication 1777).

On October 25, 1985, we presented a questionaire to the Rafsanjan Pistachio Cooperative since it was the only known seller of pistachios from Iran. We received a response on November 26, 1985 from the Government of the Islamic Republic of Iran through the Embassy of the Democratic and Popular Republic of Algeria. We requested additional information since the initial response was inadequate for use in a preliminary determination. On January 10, January 15, and January 24, 1986, we received additional responses to the initial October 25, 1985 questionaire. By

correspondence of January 30, 1986, the Department declared the combined additional responses of January 10, January 15, and January 24, 1986, to be inadequate for purposes of a preliminary determination since the respondent did not know the destination of the pistachios it sold. On January 30, 1986, the Department sent questionaires to the Rafsanjan Pistachio Cooperative to be forwarded to their customers who export the subject merchandise to the United States. If timely and complete responses are received from these customers, they will be used for our final determination.

Product Under Investigation

The product covered by this investigation is in-shell pistachio nuts from which the hulls have been removed, leaving the inner hard shells and the edible meat, as currently provided for under item number 145.26 of the *Tariff Schedule of the United States* (TSUS). The period of investigation is April 1, through September 30, 1985.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less then fair value, we compared the United States price, based on the best information available, with the foreign market value, also based on the best information available. We used the best information available as required by section 776(b) of the Act, because appropriate responses were not submitted.

United States Price

For purposes of our preliminary determination, we have not used sales data presented by respondents to calculate United States price since it did not contain data regarding specific quantities and prices for pistachios sold for export to the United States. We determined United States price on the basis of the average F.A.S. values for the six month period of investigation as derived from the IM 145 statistics compiled by the Bureau of Census.

Foreign Market Value

We have used price information provided in the petition, as the best information available, pursuant to section 776(b) of the Act since we did not have specific data respective to quantities and prices for pistachios sold in the home market. The price information used from the petition was the price for a representative grade in May 1985.

Preliminary Affirmative Critical Circumstances Determination

Petitioners have alleged that imports of certain in-shell pistachio nuts present "critical circumstances" within the meaning of section 733(e)(1) of the Act. Critical circumstances exist when the Department has a reasonable basis to believe or suspect that: (a) There is a history of dumping in the United States or elsewhere of the merchandise under investigation, or (b) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise under investigation at less than its fair value; and (c) there have been massive imports of the merchandise under investigation over a relatively short period. In determining whether there have been massive imports over a relatively short period, we normally consider the following factors: (1) The volume and value of the imports; (2) seasonal trends; and (3) the share of domestic consumption accounted for by the imports. Based on our analysis of the first two of these three factors, we have determined that imports from Iran have been massive.

In preliminarily determining whether there is a history of dumping pistachios from Iran in the United States or elsewhere, we reviewed past antidumping findings of the Department of the Treasury as well as past Department of Commerce antidumping duty orders. We also reviewed the antidumping actions of other countries made available through the Antidumping Code Committee established by the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade. We found no final determination on pistachios from Iran. Therefore, we did not find the requisite history of dumping of the class or kind of merchandise.

The second criterion is whether the importers knew, or should have known, that the experter was selling the merchandise at less than fair value. We normally consider margins of 25 percent or more to constitute constructive knowledge of sales at less than fair value. Since the margins in this case exceed this level, we find that knowledge of sales at less than fair value can be imputed to the importers.

For the reasons described above, we preliminarily determine that critical circumstances exist with respect to Pistachios from Iran.

Verification

If timely and complete submissions are provided, in accordance with section 776(a) of the Act, we will verify them for use in our final determination by using standard verification procedures, including examination of revelant sales, financial and cost records of the companies.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of certain in-shell pistachios from Iran. Liquidation shall be suspended on all unliquidated entries filed for consumption on or after December 11, 1985. The Customs Service shall require a cash deposit or the posting of a bond equal to the estimated amount by which the foreign market value of the merchandise subject to the investigation exceeds the United States price. In the case of in-shell pistachios the amount is 192.54%. This suspension of liquidation will remain in effect until further notice.

Article VI.5 of the General Agreement of Tariffs and Trade provides that "(n)o product . . . shall be subject to both antidumping and countervailing duties to compensate for the same situation of dumping or export subsidization." This provision is implemented by section 772(d)(1)(D) of the Act. Since the dumping duties cannot be assessed on the portion of the margin attributable to export subsidies, there is no reason to require a cash deposit or bond for that amount. Accordingly, the level of export subsidies as determined in the final affirmative countervailing duty determination on Pistachios from Iran will be subtracted from the dumping margin for deposit or bonding purposes.

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports are materially injuring, or are threatening material injury to, a U.S. industry before the later of 120 days after we make our preliminary affirmative determination or 45 days

after we make our final determination. In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested we will hold a public hearing to afford interested parties an opportunity to comment on these preliminary determinations at 2:00 p.m. on April 2, 1986, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary, Import Administration, Room B-099, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by March 25, 1986. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of publication of this notice, at the above address in at least 10 copies.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)).

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

March 5, 1986.

BILLING CODE 3510-DS-M

[C-507-501]

Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; In-Shell Pistachios From Iran

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that certain benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to growers, processors, or exporters in Iran of in-shell pistachios. The estimated net bounty or grant is 99.52 percent *ad valorem*.

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of in-shell pistachios from Iran that are entered, or withdrawn from warehouse, for consumption on or after December 30, 1985, and to require a cash deposit on entries of these products in the amount equal to the estimated net bounty or grant.

EFFECTIVE DATE: March 11, 1986.

FOR FURTHER INFORMATION CONTACT: Thomas Bombelles or Barbara Tillman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-3174 or (202) 377-2438.

SUPPLEMENTARY INFORMATION:

FINAL DETERMINATION

Based upon our investigation, we determine that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to growers, processors, or exporters in Iran of in-shell pistachios. For purposes of this investigation, the following programs are found to confer bounties or grants:

- Preferential Exchange Rate for Exporters.
- Foreign Exchange Retention Scheme.
- Price Support/Guaranteed Purchase of all Production.
- Preferential Provision of Fertilizer and Machinery.
- Credit on Terms Inconsistent with Commercial Considerations.
- Tax Exemptions.
- Preferential Provision of Water and Irrigation.
- Preferential Provision of Technical Support.

We determine the estimated net bounty or grant for in-shell pistachios to be 99.52 percent *ad valorem*.

Case History

On September 26, 1985, we received a petition in proper form filed by the California Pistachio Commission, Blackwell Land Company, California Pistachio Orchards, Keenan Farms Inc., Kern Pistachio Hulling and Drying Co-op, Los Ranchos de Poco Pedro, Pistachio Producers of California, and T. M. Duché Nut Company, Inc., on behalf of growers and processors in the U.S. pistachio nuts industry. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that growers, processors, and exporters in Iran of pistachios receive bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act).

Since Iran is not a "country under the Agreement" within the meaning of section 701(b) of the Act, sections 303(a)(1) and (b) of the Act apply to this investigation. Accordingly, the petitioners are not required to allege that, and that U.S. International Trade Commission is not required to determine whether, imports of this product materially injure, or threaten material injury to, a U.S. industry (19 U.S.C. 1303(a)(1), (b)).

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on October 16, 1985, we initiated such an investigation (50 FR 42960). We stated that we expected to issue a preliminary determination on or before December 20, 1985.

We presented a detailed questionnaire to the government of Algeria in Washington, DC on October 25, 1985, and requested that the Embassy forward the questionnaire to the appropriate Iranian authorities in its capacity as the protecting power for Iran in the United States. We requested a response to our questionnaire by November 25, 1985. On November 27, 1985, the Embassy of Algeria forwarded to the Department a message from the Iranian authorities requesting that the deadline for submitting a response be extended by two months. On December 6, 1985, we informed the Iranian authorities, through the Embassy of Algeria, that if we did not receive a response to our questionnaire by December 9, 1985, we might have to use the best information available for our preliminary determination. We did not receive a response on December 9, either from the government of Iran or the growers, processors, or exporters of the subject merchandise in Iran.

On December 20, 1985, we made our preliminary affirmative determination stating that benefits which constitute bounties or grants are being provided to growers, processors, or exporters in Iran of in-shell pistachios (50 FR 53178). Because we had not received a response from the respondents, we based our preliminary determination on the best information available, which was information supplied by the petitioners.

On December 30, 1985, the government of Iran filed an incomplete response to the Department's questionnaire. On January 3, 1986, the government of Iran requested that the deadline for a response be further extended. On January 17, 1986, we informed the government of Iran that we would consider for our final determination a complete response if submitted to us in proper form no later than January 24, 1986.

On January 27, 1986, two months after the original due date for a complete response, the government of Iran submitted a partial response to our questionnaire. We thoroughly reviewed

this partial response of the Iranian government and determined that none of the questions in the questionnaire was answered adequately. The response failed to provide even the most basic information requested in all countervailing duty questionnaires such as laws and regulations governing the alleged bounty or grant programs. The submission also did not include most of the official government documents and statistical reports requested, and omitted specific information pertaining to agricultural cooperatives, in particular the Rafsanjan Pistachio Producers Cooperative. The response also did not provide meaningful information regarding the Iranian financial system and lending practices. Such information is a necessary part of any response, because it provides the Department with the information to identify the normal commercial patterns of financial transactions in a given country. In relation to specific questions on the alleged programs, the response either denied outright the existence of the programs or stated that there was no preferential provision of benefits under the programs. Although we must consider each response in a given case individually, in this instance the omissions, particularly considering the late date of the submission, are of such a degree as to render the response inadequate.

On February 7, 1986, we informed the government of Iran, through the government of Algeria, that the December 30, 1985 and the January 27, 1986 responses were inadequate and that, therefore, our final determination would be based on the best information available, as required by § 355.39 of our regulations (19 CFR 355.39).

Scope of Investigation

The product covered by this investigation is in-shell pistachio nuts from which the hulls have been removed, leaving the inner hard shells and the edible meat, currently specifically provided for under item 145.26 of the *Tariff Schedules of the United States* (TSUS).

Analysis of Programs

Because we did not receive a sufficient response to our questionnaire, we are using the best information available as required under § 355.39 of our regulations (19 CFR 355.39), adversely inferring countervailability and receipt of benefits. The Department has no record of past countervailing duty investigations or administrative reviews involving Iran and, therefore, we are unable to include our own information in determining whether the benefits alleged in the petition are bounties or grants within the meaning of the countervailing duty law. In addition, we have been unable to obtain information from independent sources regarding the alleged bounties or grants that would supplement or replace that supplied by the petitioners. Therefore, as best information available, we are using petitioners' information, where provided, regarding the countervailability and level of benefits of the alleged bounty or grant programs.

For certain domestic programs, the petitioners did not provide a numerical estimate of the level of benefit, or information from which no calculate a benefit consistent with Department practice. For each of these alleged domestic bounties or grants, we are applying, as best information available, the *ad valorem* subsidy rate from that domestic program for which petitioners did supply information from which to calculate benefit. In addition, for the sales values used in calculating the *ad valorem* rates for the domestic bounties or grants, we are using, as baest information available, the total production values provided in the response. We are using these values because petitioners provided no information on total production values and we were unable to generate figures.

Programs Determined To Confer Bounties or Grants

I. We determine that bounties or grants are being provided to growers, processors or exporters in Iran of in-shell pistachios under the following programs.

A. Preferential Exchange Rate

Petitioners allege that exporters of pistachios in Iran are entitled to exchange foreign currency earned from export sales at a premium of 10 percent above the official rate and that this preferential rate is limited to exporters.

As best information available, we determine that the growers, processors, and exporters under investigation received an additional 10 percent above the official exchange rate on repatriated foreign exchange earned from export sales. On this basis, we determine an estimated net bounty or grant of 10.00 percent *ad valorem*.

B. Foreign Currency Retention Scheme

Petitioners allege that exporters of pistachios in Iran may benefit from retained foreign exchange earned from export sales. According to information submitted in the petition, exporters of pistachios in Iran may benefit from retained currency in two ways.

First, the exporter may use the extra foreign exchange gained as a result of the preferential exchange rate to import goods for resale in Iran at whatever price the market will bear. According to the petition, the free market price of imported goods is often five to six times higher than the price set by the government of Iran.

Second, a pistachio exporter may sell retained foreign exchange at the free market rate to any person in Iran with a need for foreign currency. According to the most recent International Monetary Fund statistics provided by the petitioners, there is a significant difference between the official and free market dollar/rial exchange rate.

Because we have not received an adequate response in this investigation, we have no information beyond that in the petition to use in analyzing this program. We have no way of knowing whether pistachio exporters in Iran do, in fact, have the ability to import goods and sell them, or foreign exchange gained from export sales at a premium over official prices or exchange rates, and whether this right would confer a countervailable benefit. Therefore, as best information available, we determine that this program confers a bounty or grant. To calculate the benefit, we assume that the exporters use both methods of foreign exchange retention, and we averaged the two estimates of benefits provided by the petitioners. On this basis, we determine an estimated net bounty or grant of 46.86 percent *ad valorem*.

C. Price Support/Guaranteed Purchase of all Production

Petitioners allege that pistachio growers in Iran may benefit from a government agricultural policy of guaranteeing the purchase of, and subsidizing prices for, certain major food commodities. Petitioners contend that the government of Iran gave the Rafsanjan Cooperative, the country's principal pistachio cooperative, a $100 million loan on terms inconsistent with commercial considerations to purchase and stockpile pistachios, as a means by which to implement government agricultural policy.

Because we did not receive an adequate response in this investigation we are assuming, as best information available, that this type of financing is limited to a specific enterprise, or industry or group of enterprises or industries, and that loan was extended on terms inconsistent with commercial considerations.

Peitioners have suggested that we treat this loan as a long-term, cost-free

VOL 51
ISS 47
MR 11
1986
UMI

loan and that the benefit be calculated consistent with the Department's methodology as outlined in the *Subsidies Appendix* for long-term loans (see, "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina," 49 FR 18006). We have assumed that the loan was given in 1983, when, according to information supplied by the petitioners, the Iranian banks still operated under a system of charging interest on loans. To determine a benchmark interest rate for loans in Iran, we are relying on information contained in the *Middle East Economic Digest*, submitted by the petitioners. This publication indicates that interest rates on bank loans in 1983 ranged from 12 to 18 percent. To quantify the benefit from this loan, we assumed the loan was given interest free and used 18 percent as our commercial benchmark rate. Because information in the record of this investigation indicates that the Rafsanjan Pistachio Producers Cooperative is the only pistachio cooperative in Iran, we divided the benefit received during the review period by the total value of pistachio production in the response and calculated an estimated net bounty or grant of 7.11 percent *ad valorem*.

D. Preferential Provision of Fertilizer and Machinery

Petitioners allege that agricultural cooperatives, such as the Rafsanjan Cooperative, can obtain fertilizer and machinery from the government at preferential prices.

According to the petition, the extent of the benefit varies with the crop produced. Petitioners further allege that these cooperatives, in turn, provide both fertilizer and machinery to their members on a preferential basis.

Because the respondents did not provide an adequate response in this case and the petitioners were unable to provide information as to whether and to what degree the pistachio industry receives countervailable benefits under this program, we are applying, as best information available, the highest benefit rate for a domestic bounty or grant program found in this case. On this basis, we determine an estimated net bounty or grant of 7.11 percent *ad valorem*.

E. Preferential Credit

Petitioner's allege that agricultural cooperatives in Iran make credit available on terms inconsistent with commercial considerations from funds provided by the government to their members. Petitioners argue that the Rafsanjan Cooperative is the principal cooperative for pistachios in Iran and that this organization may provide loans on terms inconsistent with commercial considerations to its members. Because the respondents did not provide an adequate response in this case and the peititoners were unable to provide information as to whether and to what degree the pistachio industry receives countervailable benefits under this program, we are applying, as best information available, the highest benefit rate for a domestic bounty or grant program found in this case. On this basis, we determine an estimated net bounty or grant of 7.11 percent *ad valorem*.

F. Tax Exemptions

Petitioners allege that pistachio farmers may benefit from legislation exempting farmers and livestock breeders from paying taxes, provided they follow government agricultural guidelines.

Because the respondents did not provide an adequate response in this case and the petitioners were unable to provide information as to whether and to what degree the pistachio industry receives countervailable benefits under this program, we are applying, as best information available, the highest benefit rate for a domestic bounty or grant program found in this case. We determine an estimated net bounty or grant of 7.11 percent *ad valorem*.

G. Preferential Provision of Water and Irrigation

Petitioners allege that pistachio growers in Iran may benefit from construction of soil dams, flood barriers, canals and other irrigation projects undertaken by the government to increase agricultural production.

Because the respondents did not provide an adequate response in this case and the petitioners were unable to provide information as to whether and to what degree the pistachio industry receives countervailable benefits under this program, we are applying, as best information available, the highest benefit rate for a domestic bounty or grant program found in this case. On this basis, we determine an estimated net bounty or grant of 7.11 percent *ad valorem*.

H. Preferential Provision of Technical Support

Petitioners allege that pistachio growers in Iran may receive technical support as part of the government's program to support agricultural development. Petitioners argue that technical support has included research projects to improve cultivation techniques, and assistance in harvesting, and marketing produce as well as the use of fertilizer. Because the respondents did not provide an adequate response in this case and the petitioners were unable to provide information as to whether and to what degree the pistachio industry receives countervailable benefits under this program, we are applying, as best information available, the highest benefit rate for a domestic bounty or grant program found in this case. On this basis, we determine an estimated net bounty or grant of 7.11 percent *ad valorem*.

Petitioners' Comments

Comment 1· Petitioners argue that the response filed by respondents should be disregarded in its entirety by the Department. Important issues raised in the questionnaire have gone unaddressed, and requested background explanations and documentation have not been provided. The response is non-responsive and therefore, the final determination should be based upon the best information available.

DOC Position: We agree. See the "Case History" and "Analysis of Programs" sections of this notice.

Comment 2: Petitioners urge the Department to use the best information available to quantify the benefit conferred by the nine billion rial loan extended to the Rafsanjan Pistachio Cooperative based on the assumption that the loan was provided cost-free. Petitioners argue that the Department has sufficient information from the peitition and a subsequent submission by petitioners to calculate the benefit from this loan.

DOC Position: We agree. See our determination on this loan in section I.C., above.

Comment 3: Petitioners contend that the section of the January 27, 1986 response regarding the Iranian financial system and interest rate structure is misleading and that borrowers in Iran may incur certain costs which are comparable to interest expenses. According to petitioners an "Islamic" banking system, which prohibits interest charges, has been in place only since March 1984. Prior to this time; which is in the period of investigation, Iranian banks operated according to standard banking practices.

DOC Position: We agree that the response inadequately explained the operation of the Iranian financial system and lending practices. As explained in our determination, however, we are assuming the loan to the Rafsanjan Pistachio Cooperative we received in 1983 and we are using a benchmark interest rate based on a period when,

according to information submitted by petitioners, Iranian banks charged interest according to standard banking practice. See section I.C. of this notice.

Comment 4: Petitioners allege that a currency retention program exists in Iran and that it confers a countervailable benefit on exports. Exporters are permitted to retain foreign exchange earned from export sales or to import goods independent of the government's control. Petitioners argue that these privileges are limited to exporters and thus confer a bounty or grant.

DOC Position: Because we did not receive an adequate response in this investigation, we used the information provided in the petition to analyze this program. See section I.B. of this notice for our determination.

Comment 5: Petitioners contend that there is a preferential exchange rate program for pistachio exports. The Central Bank of Iran Annual Report, filed with the response, confirms its existence.

DOC Position: Because we did not receive an adequate response in this investigation, we used the information included with the petition to analyze this program. See section I.A. of this notice for our determination.

Comment 6: Petitioners contend that based upon the information contained in the Central Bank of Iran Annual Report, it is clear that the government of Iran provides massive assistance to the agricultural sector. Thus, many of the domestic programs alleged to be bounties or grants in the petition are provided by the government of Iran.

DOC Position: We agree that the Central Bank report provides evidence of the existence of these programs but it provides no evidence on which to base a decision of whether these programs are countervailable. Therefore, as best information available, we have adversely inferred countervailability and applied the highest rate found for a domestic bounty or grant. See our determination on these domestic subsidy programs in section I.D—H. above.

Comments by Interested Party

Comment 1: Interested party asserts that there is no preferential rate of exchange in Iran. Sufficient information has not been provided to support the existence of this export subsidy. The reference to this program in the Central Bank of Iran Annual Report is general and refers to the purchase of non-oil export proceeds at unspecified "preferential" rates.

DOC Position: It is the obligation of respondents in an investigation to provide complete documentation and explanations regarding bounty or grant allegations. Because the information submitted on January 27, 1986 was incomplete and inadequate, we have determined that we must use best information available as the basis for our analysis of all the alleged bounty or grant programs.

Comment 2: Interested party denies the existence of a foreign currency retention scheme in Iran for exporters. Iranian exporters may return foreign exchange only at the official rate or return imported goods for sale at locations and on terms designated by the Production and Distribution Center (PDC).

DOC Position: See our response to comment 1, above.

Comment 3: Interested party argues that should the Department agree with petitioners that a preferential exchange rate and/or foreign currency retention scheme exists, the benefit calculated would have to be limited to the level of "legitimate" pistachio exports to the U.S. quoted in the response. No benefits could accrue to illegal exports or imports conducted without the knowledge of the government of Iran.

DOC Position: Because the response was inadequate, we did not verify the information submitted by the respondents and are relying on best information available. In addition, there is no information to suggest that simply because certain exports to the United States were not recorded by the government of Iran, that these exports would somehow not benefit from bounties or grants provided to pistachio producers.

Comment 4: Interested parties claims petitioners have failed to establish that any domestic subsidies are available to, or are received by, growers of pistachios or pistachio cooperatives in Iran. The status of pistachios as a luxury item makes it ineligible to receive the alleged preferential benefits available only to basic food commodities.

DOC Position: See our response to interested party comment 1, above.

Comment 5: Interested party contends that all agriculture in Iran is exempt from payment of land taxes. Therefore, any benefit to pistachio farmers is non-countervailable.

DOC Position: See our response to interested party comment 1, above.

Comment 6: Interested party claims the Rafsanjan Pistachio Producers Cooperative did not receive countervailable benefits via a nine-billion rial government loan. There is no government program to provide capital to certain companies or segments of the agricultural sector.

DOC Position: See our response to interested party comment 1, above.

Best Information Available

In accordance with 776(d) of the Act, we used the best information available in making our final determination.

Administrative Procedures

We afforded interested parties an opportunity to submit written views in accordance with section 355.34 of our regulations (19 CFR 355.34). Written comments were received from counsel for the petitioners on January 28 and February 4, 1986. Written comments were also filed on behalf of the Pistachio Group of the Association of Food Industries, an interested party to the proceedings, on February 5, 1986. We also afforded the parties to the proceeding an opportunity to present views orally before the Department at a public hearing in accordance with section 355.35 of our regulations (19 CFR 355.35). No hearing was requested.

Suspension of Liquidation

The suspension of liquidation ordered in our preliminary affirmative determination shall remain in effect until further notice (50 F.R. 53178). The estimated net bounty or grant for duty deposit purposes is 99.52 percent *ad valorem*. In accordance with section 706(a)(3) of the Act, we are directing the U.S. Customs Service to require cash deposit in the amount indicated above for each entry of in-shell pistachios from Iran which is entered or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, and to assess countervailing duties in accordance with sections 706(a)(1) and 751 of the Act.

This notice is published pursuant to section 705(a) of the Act [19 U.S.C. 1617(d)].

Paul Freedenberg,

Assistant Secretary for Trade Administration.

March 5, 1986.

Toy Balloons (Including Punchballs) and Playballs From Mexico; Preliminary Results of Administrative Review of Countervailing Duty Orders

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of countervailing duty orders.

VOL 51
ISS 47
MR 11
1986
UMI

SUMMARY: In response to a request from the exporter in each case, the Department of Commerce has conducted an administrative review of the countervailing duty orders on toy balloons (including punchballs) and playballs from Mexico. The review covers the period April 1, 1983 through December 31, 1983 and seven programs.

As a result of the review, the Department has preliminarily determined the bounty or grant to be 4.54 percent *ad valorem* for toy balloons (including punchballs) and 3.45 percent *ad valorem* for playballs for the period of review. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: March 10, 1986.

FOR FURTHER INFORMATION CONTACT: Paul Marselian or Stephen Nyschot, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On November 14, 1984, the Department of Commerce ("the Department") published in the **Federal Register** (49 FR 45038) the final results of its last administrative review of the countervailing duty orders on toy balloons (including punchballs) and playballs from Mexico (47 FR 57532, December 27, 1982). In accordance with § 355.10 of the Commerce Regulations, the exporter in each case requested on October 15, 1985, an administrative review of the orders. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of Mexican boy balloons (including punchballs) and playballs. Such merchandise is currently classifiable under items 735.0990 and 737.9536 of the *Tariff Schedules of the United States Annotated.*

The review covers the period April 1, 1983 through December 31, 1983 and seven programs: (1) FOMEX; (2) CEPROFI; (3) CEDI; (4) FONEI; (5) FOGAIN; (6) import duty reductions and exemptions; and (7) state tax incentives.

Analysis of Programs

(1) FOMEX

The Fund for the Promotion of Exports of Mexican Manufactured Products ("FOMEX") is a trust fund of the Mexican Treasury Department, with the National Bank of Foreign Trade acting as trustee for the program since August 1, 1983. The National Bank of Foreign Trade, through financial institutions, makes FOMEX loans available at preferential rates to manufacturers and exporters for two purposes: pre-export (production) financing and export financing. We consider both pre-export and export FOMEX loans to be export bounties or grants since those loans are given only on merchandise destined for export. We found that the annual interest rate that financial institutions charged borrowers for FOMEX pre-export financing, denominated in Mexican pesos, was 8 percent during the period of review. The annual interest rate for FOMEX export financing, denominated in the currency of the importing country, was 6 percent during the period of review.

Since we lacked information on effective FOMEX interest rates in this case, we chose nominal peso and dollar rates as our benchmarks. For peso-denominated loans, we used as a benchmark for the commercial interest rate in Mexico the average of the nominal interest rates published monthly by the Banco de Mexico in the *Indicadores Economicos*. For dollar-denominated loans, we used interest information obtained from the U.S. Federal Reserve Board.

Based on this information, we preliminarily determine that, during the period of review, comparable peso-denominated loans were available commercially at 64.34 percent and comparable dollar-denominated loans were available at 12.60 percent. We found the resulting interest differentials during the review period to be 56.34 percent for peso-denominated loans and 6.60 percent for dollar-denominated loans.

The one known exporter of toy balloons (including punchballs) to the United States used these programs during the period of review, as did the one known exporter of playballs to the United States. Since neither firm could tie its FOMEX pre-export loans to exports to specific countries, we used all of each firm's FOMEX pre-export loans and allocated the benefits over each firm's total exports. Since both firms were able to tie FOMEX export loans to exports to specific countries, we used only FOMEX export loans on U.S. shipments and allocated the benefits over only the value of U.S. shipments during the period of review.

On this basis, we preliminarily determine the benefit for toy balloons (including punchballs) from FOMEX pre-export loans to be 2.88 percent, and from FOMEX export loans to be 1.66 percent, for a total benefit of 4.54 percent *ad valorem*. In the case of Mexican playballs, we preliminarily determine the benefit from FOMEX pre-export loans to be 2.36 percent, and from FOMEX export loans to be 1.09 percent, for a total benefit of 3.45 percent *ad valorem.*

On September 2, 1985, the Mexican government raised the interest rate on FOMEX pre-export financing to 39.8 percent and on FOMEX export financing to 6.6 percent. The calculate the estimated duty cash deposit rate, we compared the new FOMEX interest to our most recent commericial benchmarks. The interest differential for peso-denominated loans is 28.17 percent, and for dollar-denominated loans, 6.28 percent. On this basis, we preliminarily find, for purposes of cash deposits of estimated countervailing duties, a FOMEX benefit of 2.92 percent *ad valorem* for toy balloons (including punchballs) and 1.98 percent *ad valorem* for playballs.

(2) Other Programs

We also examined the following programs and preliminarily find that exporters of toy balloons (including punchballs) and playballs did not use them during the review period.

(A) Certificates of Fiscal Promotion ("CEPROFI");

(B) Tax Rebate Certificates ("CEDI");

(C) Fund for Industrial Development ("FONEI");

(D) Guarantee and Development Fund for Medium and Small Industries ("FOGAIN");

(E) Import duty reductions and exemptions; and

(F) State tax incentives.

Preliminary Results of Review

As a result of our review, we preliminarily determine the bounty or grant to be 4.54 percent *ad valorem* for playballs.

The Department intends to instruct the Customs Service to assess countervailing duties of 4.54 percent of the f.o.b. invoice price on shipments of toy balloons (including punchballs), and 3.45 percent of the f.o.b. invoice price on shipments of playballs exported on or after April 1, 1983, and exported on or before December 31, 1983.

The Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, of 2.92 percent of the entered value on all shipments to toy balloons (including punchballs) and 1.98 percent of the entered value on all shipments of playballs entered, or withdrawn from warehouse, for consumption on or after the date of

publication of the final results of this administrative review. These deposit requirements shall remain in effect until publication of the final result of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 55 days after the date of publication or the first workday before. Any request for an administrative protective order must be made no later than five days after date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.10 of the Commerce Regulations (19 CFR 355.10; 50 FR 32556, August 13, 1985).

Dated: March 4, 1986.

John L. Evans,

Acting Deputy Assistant Secretary, Import Administration.

BILLING CODE 3510-DS-M

Transportation and Related Test Equipment Technical Advisory Committee; Partially Closed Meeting

A meeting of the Transportation and Related Test Equipment Technical Advisory Committee will be held April 2, 1986, 9:30 a.m., Herbert C. Hoover Building, Room B841, 14th Street and Constitution Avenue, NW., Washington, DC

The Committee advises the Office of Technology and Policy Analysis with respect to technical questions which affect the level of export controls applicable to transportation and related equipment or technology.

Agenda

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Progress on the TAC 1986 plan.
4. New business.

Executive Session

5. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The general session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on February 19, 1985, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5 (c) of the Government In The Sunshine Act, Pub. L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: (202) 377–4217. For further information or copies of the minutes call 202–377–2583.

Dated: March 6, 1986.

Margaret A. Cornejo,

Acting Director, Technical Support Staff, Office of Technology and Policy Analysis.

[FR Doc. 86–5247 Filed 3–10–86; 8:45 am]

BILLING CODE 3510-DT-M

National Oceanic and Atmospheric Administration

National Marine Fisheries Service, Marine Mammals, Fish Import Certification From Chile

Regulations established in accordance with the Marine Mammal Protection Act of 1972, 16 U.S.C. 1361 *et seq.* (50 CFR 216.24(e)) provide that a nation may certify that vessels fishing under its flag are (1) fishing in conformance with U.S. regulations, or (2) if not in conformance, were not fishing in a manner prohibited for U.S. fishermen under these regulations. This certification is necessary in order to permit the importation into the United States of certain of its fish and fish products.

The Assistant Administrator for Fisheries, National Marine Fisheries Service, has received and accepted a certification from the Government of Chile that vessels fishing for salmon under Chilean flag are fishing in conformance with U.S. regulations in regard to the taking of marine mammals incidental to commercial fishing operations. Therefore, salmon from Chile are hereby exempt from the provisions of 50 CFR 216.24(e)(3) and may be exported to the United States without an accompanying Standard Form 369–1 (Fisheries Certificate of Origin).

Copies of the certification are on file and available for review in the Office of the Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, DC.

Dated: March 6, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

[FR Doc. 86–5273 Filed 3–10–86; 8:45 am]

BILLING CODE 3510-22-M

Permits; Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of receipt of experimental fishing permit applications and request for comments.

SUMMARY: This notice acknowledges receipt of nine applications for experimental fishing permits (EFPs) to harvest sablefish and other groundfish with set nets in the Pacific Ocean north of 38° N. latitude in 1986. These applications were submitted in response to a notice announcing that applications would be accepted until January 30, 1986. If granted, these permits would allow fishing which otherwise would be prohibited by Federal regulations.

DATE: Comments on these EFP applications must be received by March 14, 1986.

ADDRESS: Send comments to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE, BIN C15700, Bldg. 1, Seattle, WA 98115.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten, 206–526–6150.

SUPPLEMENTARY INFORMATION: The Pacific Coast Groundfish Fishery Management Plan (FMP) and its implementing regulations at § 663.10 specify that EFPs may be issued to authorize fishing that would otherwise be prohibited by the FMP and regulations.

Section 663.28(c) prohibits fishing for groundfish using set nets (anchored gillnets) north of 38° N. latitude because the Pacific Fishery Management Council (Council) when developing the FMP was

VOL 51
ISS 47
MR 11
1986
UMI

concerned about (1) the potential for an unacceptably high incidental catch of salmon, (2) the lack of information on the potential incidental catch of other species such as halibut and protected groundfish species, (3) the ability of set nets to continue fishing indefinitely if lost or unattended, (4) the introduction of a new fishery when the stocks were already fully utilized by existing gear, and (5) the potential for conflict between fixed and mobile gear if used in the same area. This restriction on set nets is consistent with historic State groundfish regulations and on international understanding with Canada on ocean net fisheries.

Subsequent to implementation of the FMP, NMFS issued EFPs each year to obtain data on set nets and their use in harvesting sablefish and other incidentally taken groundfish species, and to determine whether such fishing gear can be incorporated into the FMP without undue negative impact on the resource or on other fishermen. One EFP was issued in 1982, three in 1983 and in 1984, and seventeen in 1985. NMFS observers accompanied the EFP vessels on over 30 percent of their trips to monitor the experiment and collect information. Most of this experimental fishing with set nets occurred in a small area in the deeper waters off the cost of northern Washington. Sablefish was the target species, although quantitites of lingcod and rockfish were also landed. Approximately 361, 572, and 704 metric tons of sablefish, lingcod, and rockfish were landed by EFP vessels in 1983, 1984, and 1985, respectively. Sablefish comprised 49 percent, 68 percent, and 40 percent of the landed catch in these three years. The incidental catch of salmon was negligible, as only five salmon were taken in over 500 sets observed during the three years. Further details are included in the annual reports on the experimental fishery which are available from the above address.

A notice in the **Federal Register** (50 FR 51279, December 16, 1985) announced that NMFS is considering issuing similar EFPs again in 1986 and would accept applications until January 30, 1986. The notice provided instructions to apply for an EFP and advised potential applicants that possibly no EFPs would be issued for 1986.

Nine applications were received by January 30, 1986. All but one of the applicants are previous participants in this experimental fishery and they all propose to fish experimentally with essentially the same gear and in the same manner as they did under the EFPs issued in 1985. All applicants chose the area off the coast of Washington, north of 47°30′ N. latitude, as their first choice. The target species are sablefish, lingcod, and rockfish. All applicants indicated they wanted to fish experimentally about the same time as last year, May 1 to October 31, using a maximum of 1800 fathoms of net with 5½- to 6-inch mesh size.

Advice on whether to approve or deny all or some of the applications will be sought from the Council at its March 10–13, 1986, meeting in Portland, Oregon. Considerations toward a decision will include a review of the information collected to date on use of this gear, recommendations of the Council, and comments received from the public. Since considerable information has been collected on the use of this gear, it may be adequate for evaluating this fishery and no further EFPs will be issued or, if issued, they may be restricted to the times and areas where further information is needed. The number of EFPs issued may be limited by the funds available to pay for observers to collect experimental data and monitor permit compliance. It is possible that no EFPs will be granted in 1986 because of resource and allocation concerns.

After a decision is made on how many, if any, EFPs will be issued in 1986, applicants will be selected, based on the proposals best suited to achieve the purpose of the EFP with regard to obtaining needed information. The evaluation will consider the applicants' experience and ability to comply with the conditions of the experiment which will be specified in their permits. Willingness to fish in any or all areas may improve an applicant's chance of being selected. If objective evaluation does not sufficiently limit the number to be selected, a random drawing may be used. If applicants do not voluntarily achieve an acceptable area distribution, area assignments may be imposed as conditions of the permits.

Copies of the applications are available for review at the address above.

(16 U.S.C. 1801 *et seq.*)

Dated: March 6, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries, Resource Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Permits; Foreign Fishing

This document publishes for public review a summary of applications received by the Secretary of State requesting permits for foreign vessels to fish in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act, 16 U.S.C. 1801 *et seq.*)

Send comments on applications to:

Fees, Permits and Regulations Division (F/M12), National Marine Fisheries Service, Department of Commerce, Washington, DC 20235

or send comments to the Fishery Management Council(s) which review the application(s), as specified below:

Douglas G. Marshall, Executive Director, New England Fishery Management Council, 5 Broadway (Route 1), Saugus, MA 01906, 617/231–0422

John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Federal Building, Room 2115, 300 South New Street, Dover, DE 19901, 301/674–2331

Robert K. Mahood, Executive Director, South Atlantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, SC 29407, 803/571–4366

Omar Munoz-Roure, Executive Director, Caribbean Fishery Management Council, Banco De Ponce Building, Suite 1108, Hato Rey, PR 00918, 809/753–4926

Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Blvd., Tampa, FL 33609, 813/228–2815

Joseph C. Greenley, Executive Director, Pacific Fishery Management Council, Metro Building, 2000 S.W. First Avenue, Portland, OR 97201 503/221–6352

Jim H. Branson, Executive Director, North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510 907/274–4563

Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council, 1164 Bishop Street, Room 1405, Honolulu, HI 96813, 808/523–1368.

For further information contact John D. Kelly or Shirley Whitted (Fees, Permits, and Regulations Division, 202–634–7432).

The Magnuson Act requires the Secretary of State to publish a notice of receipt of all applications for such permits summarizing the contents of the applications in the **Federal Register**. The National Marine Fisheries Service, under the authority granted in a memorandum of understanding with the Department of State effective November 29, 1983, issues the notice on behalf of the Secretary of State.

Individual vessel applications for fishing in 1986 have been received from the Governments shown below.

Dated: March 6, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

Fishery codes and designation of Regional Fishery Management Councils which review applications for individual fisheries are as follows:

Code	Fishery	Regional fishery management councils
ABS	Atlantic Billfishes and Sharks.	New England, Mid-Atlantic, South Atlantic, Gulf of Mexico, Caribbean.
BSA	Bering Sea and Aleutian Islands Groundfish.	North Pacific.
GOA	Gulf of Alaska	North Pacific.
NWA	Northwest Atlantic Ocean.	New England, Mid-Atlantic.
SNA	Snails (Bering Sea)	North Pacific.
WOC	Pacific Groundfish (Washington, Oregon and California).	Pacific.
PBS	Pacific Billfishes and Sharks.	Western Pacific.

Activity codes which specify categories of fishing operations applied for are as follows:

Activity code	Fishing operations
1	Catching, processing, and other support.
2	Processing and other support only.
3	Other support only.
*	Vessel(s) in support of U.S. vessels Joint Venture)

Nation, vessel name, and type	Application No.	Fishery	Activity
Government of Italy			
Giovanni C., medium stern trawler.	IT-86-0022.	NWA	1*
Government of Japan			
Reefer Beaver, cargo/transport vessel.	JA-86-1145.	BSA, GOA	3
Government of the Republic of Korea			
No. 1 Chil Bo San, cargo/transport vessel.	KS-86-0133.	BSA, GOA	3
Government of the Union of the Soviet Socialist Republics			
Kamenka, medium stern trawler.	UR-86-0791.	BSA, GOA	1*
Saluschi, medium stern trawler.	UR-86-0792.	BSA, GOA	1*

Joint Venture

Italy

The Italian vessel, GIOVANNI C., will participate in a joint venture with the IST Corporation, Cape May, NJ. Notice of receipt of that permit application for the joint venture was published December 6, 1985, 50 FR 50150.

Poland

The Government of Poland has submitted applications for joint venture activities in the WOC fisheries for 30,660 mt of Pacific whiting. Contract negotiations have not been concluded; therefore, an American partner was not designated on the application.

USSR

The USSR vessels listed will participate in the joint venture with Marine Resources Company, International (MRA), Seattle, WA. Notice was published December 2, 1985, 50 FR 49437.

[FR Doc. 86-5274 Filed 3-10-86 8:45 am]

BILLING CODE 3510-22-M

DEPARTMENT OF EDUCATION

National Council on Vocational Education; Public Meeting

AGENCY: National Council on Vocational Education.

ACTION: Notice of public meeting of the Council.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming Executive Committee Meeting of the National Council on Vocational Education. It also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act, and is intended to notify the general public of its opportunity to attend.

DATE: March 24, 1986.

ADDRESS: Fashion Institute of Technology, 227 West 27th Street, A Building, Room 802, New York, New York.

SUPPLEMENTARY INFORMATION: The National Council on Vocational Education is established under section 104 of the Vocational Education Amendments of 1968, Pub. L. 90–576. The Council is established to:

(A) Advise the President, the Congress, and the Secretary of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to Congress; and

(C) Conduct independent evalutions of programs carried out under this title and publish and distribute the results thereof.

Records are kept of the Council's proceedings, and are available for public inspection at the office of the National Council on Vocational Education from 9:00 AM to 5:00 PM, 2000 L Street, NW., Suite 580, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Carolyn J. Edwards, NCVE Staff at above address. Telephone (202) 634–6110.

Signed at Washington, DC, on March 3, 1986.

Dated: March 3, 1986.

Carolyn J. Edwards,

Executive Assistant.

[FR Doc. 86-5214 Filed 3-10-86; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Energy Information Administration

Nonresidential Buildings Energy Consumption Survey (NBECS) Forms

AGENCY: Energy Information Administration, DOE.

ACTION: Solicitation of comments on the 1986 NBECS survey forms.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy (DOE) is seeking comments on the proposed survey forms for the 1986 Nonresidential Buildings Energy Consumption Survey (NBECS). The NBECS is a general purpose statistical survey conducted for non-regulatory purposes. It is being designed to meet the needs of public and private data users in addition to meeting the legislative requirements of EIA as specified in section 52 of the Federal Energy Administration Act of 1974, Pub. L. 93–275. Section 52 requires the EIA to establish a National Energy Information System which ". . . shall contain such information as is required to provide a description of and facilitate analysis of energy supply and consumption within and affecting the United States on the basis of such geographic areas and economic sectors as may be appropriate. . . ."

The NBECS, which has been previously conducted in 1979 and 1983, is designed to provide limited basic information on energy consumption for benchmarking, forecasting, policy evaluation and planning.

VOL 51
ISS 47
MR 11
1986
UMI

In both the 1979 and the 1983 NBECS, representative samples of nonresidential buildings in the 48 contiguous States and the District of Columbia were selected. Data were collected at the individual building level on characteristics of the building's structure, activities inside the building, energy conservation measures, heating and air-conditioning equipment, and both the types and the end uses of energy consumed. Information concerning the building unit was collected by personal interviews with the building owner/manager in the 1979 NBECS and through telephone interviews in the 1983 NBECS. These interviews, conducted by trained professional interviewers, were voluntary. For the 1979 and 1983 surveys, data concerning actual energy consumption were obtained from fuel records maintained by each building's energy suppliers by means of a mandatory mail survey.

The EIA has built a new area probability sampling frame for the 1986 and subsequent surveys. The design of the 1986 NBECS is expected to yield national estimates based on 5,500 completed interviews. Present plans call for data to be collected that will be valid for the four Census regions (Northeast, South, North Central, and West). The 1986 NBECS building characteristics data will be gathered in the first quarter of 1987 through voluntary personal interviews with the owners/managers of commercial buildings. At the conclusion of the interview, the building owner/manager will be asked to sign a waiver authorizing the survey contractor to obtain fuel consumption records from the building's energy suppliers. Data on energy consumption and expenditures will be collected through a series of mandatory mail surveys to the energy suppliers for each of the sampled buildings.

ADDRESS: To obtain additional information or copies of the proposed forms, contact: Ms. Julia Oliver, Energy End Use Division, Energy Information Administration, Department of Energy, Mail Stop 1H-053, 1000 Independence Avenue SW., Washington, DC 20585, Telephone: (202-252-5744).

DATE: Written responses on the proposed forms should be submitted to Dr. Lynda T. Carlson, Director, Energy End Use Division at the above address within 30 days of the publication of this notice.

SUPPLEMENTARY INFORMATION:

I. Background
II. Current Actions
III. Written Comments

I. Background

The EIA solicited comments on the design of the 1986 NBECS through a Federal Register notice on January 31, 1985 (50 FR 4571). The proposed questionnaires have been developed using the knowledge gained by EIA through the public comments received in response to that notice, through discussions with NBECS data users and through discussions with industry representatives and trade associations.

II. Current Actions

In keeping with its mandated responsibility, EIA proposes to make changes, as described below, to the NBECS forms for the 1986 survey. Implementation of these changes, which will result in a net reduction of the reporting burden imposed on the public, will not impede EIA's ability to ensure that the potential needs of NBECS data users are met.

The proposed 1986 NBECS Building Interview form is a melding of the previous forms used on the 1979 and 1983 surveys. The major categories of data collected remain the same: building characteristic, heating and cooling equipment, fuels used and, conservations practices. However, within these categories, questions have been combined, reworded, reformatted, and in some cases droped altogether.

Major questions that have been dropped on the 1986 NBECS include: the Emergency Building Temperature Restrictions questions (1979 NBECS), detailed boiler characteristics questions (1983 NBECS), detailed insulation questions (1983 NBECS). Questions that have undergone major reformatting or rewording include the questions on heating and cooling, building activities, and conservations measures. Questions have been added on cogeneration, lighting, roof and wall construction materials, fuel switching, and measures of size for selected building uses. Two questions may also be added to the questionnaire for the Census Bureau—these would relate to expnditures for construction improvements and maintenance and repairs.

The Energy Supplier Forms for the 1986 NBECS are essentially the same as those used on previous surveys. Questions on data items which were not found useful have been deleted. As a result of our experiences in previous surveys, instructions have been clarified and some questions have been added to help clarify data responses. For example, an optional schedule has been added to the Energy Supplier Form (electricity) to help those electric utilities who maintain disaggregated records for a single building.

III. Written Comments

The following general guidelines are provided to assist in the preparation of comments. When providing comments, please indicate to which form the comment applies: (1) The personal interview with building owner/manager (Building Interview) or (2) the mail survey of the energy suppliers (Energy Supplier Forms).

As a potential data user:

A. Can you use data at the levels of detail indicated on the forms?

B. For what purpose would you use these data? Please be specific.

C. How could the forms be improved to better meet your specific data needs?

D. Are there alternative source of these data? What are they? Do you use them? What are their deficiencies?

As a potential respondent:

A. Are the instructions clear and sufficient?

B. How can the forms be improved?

C. Can the data be submitted using the definitions included in the instructions?

D. What is the estimated cost of completing the forms, including the direct and indirect costs associated with the data collection? Direct costs should include all costs directly attributable to providing the information (such as administrative costs).

E. Do you know of other Federal, State, or local agencies that collect similar data? If so, specify the agency and the means of collection.

In addition to receiving comments to the general questions listed above, the EIA would like to receive comments from electric utilities and steam suppliers on several specific questions that have been added to the Energy Supplier Forms.

1. *Energy Supplier Forms: Electricity Usage—Schedule A.* A number of users of the NBECs data would like to relate the NBECs building data to Standard Industrial Classification (SIC) codes. Discussions with industry representatives have led EIA to believe that some electric utilities assign SIC codes to commercial buildings. Does your electric assign SIC codes to commercial buildings? Is the information readily available from your records?

2. *Energy Supplier Forms: Electricity Usage—Disaggregated by end Use.* On previous surveys, the EIA discovered that some utilities meter customers separately for different end uses: for example, they have one meter for hearing and air-conditioning and a separate meter for lighting and other end uses. To alleviate the burden of having the respondent aggregate the consumption data, the EIA has developed a separate form for use by utilities that have separate end-use meters in buildings. Does your utility disaggregate electricity data by end use? What changes would you suggest to this form?

3. *Energy Supplier Forms: Individual Steam.* In order to correct inconsistencies observed in the data collected on buildings using steam, the EIA has added two questions. The first question determines if the building is a Powerplant while the second is designed to determine if the building is billed for steam piped into it. Is this information available from existing records without creating additional respondent burden?

The EIA is also interested in receiving comments from other persons regarding their views on the need for this information.

Comments or summaries of comments submitted in response to this notice will be included in the request for Office of Management and Budget approval of this data collection and will become a matter of public record.

Issued in Washington, DC, on March, 6, 1986.

L.A. Pettis,

Acting Deputy Administrator, Energy Information Administration.

[FR Doc. 86-5233 Filed 3-10-86; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER85-404-000 et al.]

Electric Rate and Corporate Regulation Filings; Commonwealth Edison Co. et al.

March 5, 1986.

Take notice that the following filings have been made with the Commission:

1. Commonwealth Edison Company

[Docket No. ER85-404-000]

Take notice that on February 28, 1986, Commonwealth Edison Company filed a compliance report pursuant to the Commission's February 5, 1986 letter order in the above referenced proceeding. In compliance with the Commission's order, Edison submitted copies of the following:

(1) Summary tabulations, showing revenues under prior filed and settlement rates; the revenue refunds; and the related interests;

(2) Tabulations for each wholesale customer showing the monthly billing determinants; revenue receipt dates; revenues under prior, filed and settlement rates; the monthly revenue refund; and the monthly interest;

(3) A copy of the December 28, 1985 "Updated List of Interest Rates to be Applied to Commission-Ordered Refunds";

(4) Photocopies of the transmittal letters and refund checks sent to the two Cities on February 14, 1984; and

(5) A notarized statement that the enclosed tabulations are accurate.

Comment date: March 19, 1986, in accordance with Standard Paragraph H at the end of this notice.

2. Central Illinois Public Service Company

[Docket No. ER86-327-000]

Take notice that on February 28, 1986, Central Illinois Public Service Company ("CIPS") tendered for filing a Power Supply Agreement, a Transmission Services Agreement and an Interim Agreement, each dated February 11, 1986, between CIPS, Soyland Power Cooperative, Inc. ("Soyland") and Western Illinois Power Cooperative, Inc. ("WIPCO"). The three interdependent agreements restructure the operational relationship between CIPS and the two cooperative customers.

Copies of the filing have been served on Soyland, WIPCO and the Illinois Commerce Commission. Copies of the transmittal letter have been served on CIPS' other wholesale customers.

Comment date: March 19, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. The Cincinnati Gas & Electric Company

[Docket No. ER86-305-000]

Take notice that The Cincinnati Gas & Electric Company (Cincinnati) tendered for filing on on February 28, 1986, new Service Agreements, between Cincinnati and the Village of Bethel (Bethel) dated January 10, 1986; between Cincinnati and the Village of Blanchester (Blanchester) dated January 27, 1986; between Cincinnati and the Village of Georgetown (Georgetown) dated January 22, 1986; between Cincinnati and the Village of Hamersville (Hamersville) dated January 20, 1986; and, between Cincinnati and the Village of Ripley (Ripley) dated January 22, 1986.

The new Service Agreements become effective April 1, 1986 and supersede existing Agreements with Bethel, Blanchester, Georgetown, Hamersville, and Ripley.

Cincinnati states that the Agreements are in the form as specified in the "Form of Service Agreements" included in and on file with the Commission as Original Sheet No. 11 of First Revised Volume No. 1. No rate change of any kind is contemplated by the Service Agreements until changed by an appropriate filing made in accordance with section 205(d) of the Federal Power Act.

A copy of the filing was served upon Bethel, Blanchester, Georgetown, Hamersville, and Ripley.

Comment date: March 18, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Illinois Power Company

[Docket No. ER85-130-000]

Take notice that on February 7, 1986, Illinois Power Company tendered for filing a Report of distribution of Refunds for all amounts plus interest collected from Soyland Power Cooperative, Inc. ("Soyland") an Western Illinois Power Cooperative, Inc. ("WIPCO") pursuant to paragraph five (5) of the Commission's letter order dated December 24, 1985 approving the Power Coordination Agreement between the parties.

The rate increase amounts being refunded to Soyland/WIPCO are those amounts collected in excess of the settlement rates for electricity consumed during the period from January 1, 1985 through October 31, 1985.

Interest has been applied to the amounts refunded in accordance with the Commission's Order Nos. 47 and 47-A and Section 35.19a of the Commission's Regulations. These refunds were made to Soyland/WIPCO on January 23, 1986.

Comment date: March 17, 1986, in accordance with Standard Paragraph H at the end of this notice.

5. Illinois Power Company

[Docket No. ER86-281-000]

Take notice that on February 27, 1986, Illinois Power Company tendered for filing a Facility Use Agreement and Appendix A to a Facility Use Agreement dated January, 1986 between Illinois Power Company ("Illinois Power") and Illinois Valley Electric Cooperative, Inc. ("Illinois Valley")

Illinois Power states that the purpose of the filing is to seek approval of a Facility Use Agreement between Illinois Power and Illinois Valley, and Appendix A thereto, covering a charge for the use of a 12 kv three phase electric service extension to serve customers of Illinois Valley in the Princeton, Illinois, area.

According to Illinois Power, copies of this filing have been mailed to Illinois Valley and the Illinois Commerce Commission, Springfield, Illinois.

VOL

Illinois Power requests an effective date of July 19, 1985 and therefore requests waiver of the Commission's notice requirements.

Comment date: March 18, 1986, in accordance with Standard Paragraph E at the end of this document.

6. Pacific Gas and Electric Company

[Docket No. ER86-328-000]

Take notice that on March 3, 1986, Pacific Gas and Electric Company (PGandE) tendered for filing changes to the rate schedules under the "Interconnection Agreement Between Pacific Gas and Electric Company and the City of Santa Clara" (Santa Clara Agreement) and the "Interconnection Agreement Between Pacific Gas and Electric Company and the Northern California Power Agency, City of Biggs, City of Gridey, City of Healdsburg, City of Lodi, City of Lompoc, City of Palo Alto, City of Roseville, City of Ukiah and Plumas Sierra Rural Electric Cooperative" (NCPA Interconnection Agreement) or (Interconnection Agreements).

The Santa Clara Agreement was filed initially under Docket No. ER 84-6-000 and was assigned FERC Rate Schedule No. 85. The NCPA Agreement was filed initially under Docket No. ER 83-683-000 and was assigned FERC Rate Schedule No. 84. The Interconnection Agreements provide for firm transmission service between points of Receipt and Points of Delivery. Under the provisions of existing letter agreements between PGandE and the Northern California Power Agency (NCPA) and between PGandE and the City of Santa Clara, certain points of Receipt and Delivery contained in NCPA's and Santa Clara's Exhibits A-4 will expire on May 1, 1986. Pursuant to these letter agreements, PGandE requests that the revised Exhibits A-4 contained in this filing become effective on May 2, 1986. No part of these letter agreements involves a change in the level of any rate, nor do the letter agreements amend the Interconnection Agreements.

Comment date: March 19, 1986, in accordance with Standard Paragraph E at the end of this notice.

7. Pacific Power & Light Company, an Assumed Business Name of PacifiCorp.

[Docket No. ER86-325-000]

Take Notice that Pacific Power & Light Company (Pacific), an assumed business name of PacifiCorp, on February 27, 1986, tendered for filing, in accordance with § 35.30 of the Commission's Regulations, Pacific's Revised Appendix 1 for the state of Oregon and Bonneville Power Administration's (Bonneville) Determination of Average System Cost (ASC) for the state of Oregon (Bonneville's Docket No. 5-A1-8502). The Revised Appendix 1 calculates the ASC for the state of Oregon applicable to the exchange of power between Bonneville and Pacific.

Pacific requests waiver of the Commission's notice requirements to permit this rate schedule to become effective July 1, 1985, which it claims is the date of commencement of service.

Copies of the filing were supplied to Bonneville, the Public Utility Commissioner of Oregon, and Bonneville's Direct Service Industrial Customers.

Comment date: March 18, 1986, in accordance with Standard Paragraph E at the end of this notice.

8. Portland General Electric Company

[Docket No. ER86-324-000]

Take notice that Portland General Electric Company (PGE) on February 27, 1986, tendered for filing a Second Revised Page 1 and a Second Revised Page 2 of its FERC Electric Service Tariff, Volume No. 1. PGE also tendered for filing on the same date a new service agreement with Sacramento Municipal Utility District.

PGE's letter of transmittal states that when the above tariff was originally accepted for filing, the Commission required a report of monthly sales under such tariff to be filed with the Commission. PGE states it is making the present filing and proposing the changes shown on second revised pages 1 and 2 to eliminate the monthly filing of sales requirement. In support of the filing, PGE has tendered certain cost data. PGE proposes elimination of the monthly reporting requirement upon acceptance of the filing by the Commission.

Portland General Electric Company requests an effective date of January 1, 1986, and therefore requests a waiver of the Commission's notice requirements.

Copies of the filing were served upon parties having service agreements with Portland General Electric Company, parties to the Intercompany Pool Agreement (revised), Intervenors in Docket ER 77-131 and the Oregon Public Utility Commissioner.

Comment date: March 18, 1986, in accordance with Standard Paragraph E at the end of this notice.

9. Public Service Company of New Hampshire

[Docket No. ER86-312-000]

Please take notice that on February 21, 1986 Public Service Company of New Hampshire (PSNH) filed rate schedule supplements and revision revising PSNH's fuel adjustment clause to include a provision allowing PSNH to recover the total cost of economic purchases through the fuel adjustment clause. These revisions are made pursuant to Commission Order No. 352, issued December 7, 1983 in Docket No. RM 83-62-000, which modified 18 CFR 35.14 to provide for such recovery.

The filing consists of supplements and revisions to the following rate schedules:

Customer	Rate schedule
Concord Electric Company.	FERC No. 24.
Town of Ashland, New Hamshire Electric Light Department.	FERC No. 28.
New Hampton Village Precinct.	FERC No. 29.
Exeter & Hampton Electric Company.	FERC No. 35.
New Hampshire Electric Cooperative, Inc..	FERC Nos. 50 and 71.
Town of Wolfeboro, New Hampshire.	FERC No. 72.
Citizens Utilities Company.	FERC No. 110.

The language in the "Fuel Adjustment" sections of the rate schedules listed above has been revised in the present filing to allow PSNH to recover the cost of any purchase of less than twelve months duration where the total cost of the purchase is less than PSNH's total avoided variable cost, and which is made solely to displace higher cost generation.

PSNH is making this filing in order to bring its wholesale fuel clause in line with its retail mechanism and with the current FERC regulations. PSNH requests waiver of the sixty day notice requirement in order to place this filing in effect on March 1, 1986. In the alternative, PSNH requests that this filing become effective on April 22, 1986, sixty days after the filing date.

PSNH has served each affected wholesale customer and pertinent State commissions with copies of its filing.

Comments date: March 18, 1986, in accordance with Standard Paragraph E at the end of this document.

10. UtiliCorp United Inc., d/b/a Missouri Public Service

[Docket No. ER86-323-000]

Take notice that UtiliCorp United Inc. d/b/a Missouri Public Service, on February 26, 1986, tendered for filing a proposed change in its FERC Electric Service Tariffs for wholesale firm power service to supersede and replace the contract rate schedule presently in effect and on file with the Commission which relates to the City of El Dorado Springs located in the State of Missouri. The proposed contract would supersede and replace FERC Rate Schedule Number 41. The proposed contract reflects changes in delivery voltage, substation capacity and extends the expiration date of the contract. The new contract does not change anticipated annual revenues.

The proposed delivery voltage and substation capacity changes are in compliance with a request received from the City of El Dorado Springs. The extension in the term of the contract is to assure a long-term source of power to the City of El Dorado Springs and to justify the additional expenditures required by the Company to provide the revised delivery voltage and increased capacity.

Copies of the filing were served upon the City of El Dorado Springs whose contract would be affected thereby, and upon the Pubic Service Commission of Missouri. The rates and charges would not be affected.

Comment date: March 18, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CP86-314-000, et al.]

Natural Gas Certificate Filing; K N Energy, et al.

March 5, 1986.

Take notice that the following filings have been made with the Commission:

1. K N Energy, Inc.

[Docket No. CP86-314-000]

Take notice that on February 10, K N Energy, Inc. (Applicant), P.O. Box 15265, Lakewood, Colorado 80215, filed in Docket No. CP86-314-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for permission and approval to abandon metering stations and appurtenant facilities for an service to certain direct sales customers, under the authorization issued in Docket No. CP83-140-000, *et al.*, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant proposes to abandon by removal the metering stations and appurtenant facilities which were installed to deliver natural gas for alfalfa dehydration purposes to the following direct sales customers:

Name of customer	Docket number authorizing service
Central Alfalfa, Inc.—Josselyn Plant	G-1180
Continental Grain, Inc.—Elm Creek Plant	G-1180
Western Alfalfa Corp.—Lexington Plant	G-1857

It is stated that the Applicant would only abandon service to Central Alfalfa, Inc., at those measurement facilities related to alfalfa dehydration. It is further stated that service to Central Alfalfa, Inc.'s elevator, grain dryer and other requirements would continue through existing separate measurement facilities.

It is stated that deliveries to the direct sales customers for alfalfa dehydration have ceased and that each customer has notified Applicant that the facilities at the respective delivery points are no longer needed for alfalfa dehydration and that each customer has consented to the abandonment of these facilities by the Applicant.

Comment date: April 21, 1986, in accordance with Standard Paragraph G at the end of this notice.

Northern Natural Gas Company Division of InterNorth, Inc.

[Docket No. CP86-307-000]

Take notice that on February 5, 1986, Northern Natural Gas Company Division of InterNorth, Inc. (Northern Natural), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP86-307-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for permission to abandon a small meter set by transferral from Peoples Natural Gas Company, a Division of Utilicorp United, Inc. (Peoples), to North Central Public Service Company (North Central) and to use the delivery point to serve natural gas to Oakwood Terrace Sub-Division in Sherburne County, Minnesota (Oakwood Terrace), under the authorization issued in Docket No. CP82-401-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

The Commission by order issued September 3, 1980, in Docket No. CP80-382-000, authorized Northern Natural to construct and operate a small meter set to serve natural gas to Peoples for resale to James E. Duemke (Duemke), a right-of-way grantor. It is explained that following construction of the meter set, Duemke declined service and Northern Natural did not place the facility in service. Northern Natural states that North Central determined the delivery point was located within its service area and proposed to use the delivery point to serve Oakwood.

By supplement to the application filed February 19, 1986, in Docket No. CP86-307-000, Northern Natural withdrew its request to abandon the Duemke meter set and instead requested prospective authority to operate such existing meter set for the delivery of natural gas to North Central for ultimate delivery and use of the residents of Oakwood Terrace, a residential subdivision. Northern Natural states further that Northern Natural agreed to assign the delivery point to North Central. Northern Natural asserts that in an effort to provide timely service for the 1985-86 winter heating season for the residential customers of Oakwood Terrace, Northern Natural's field employees, without prior regulatory approval, inadvertently performed a necessary change-out of the existing American 275 meter and replaced it with a Rockwell 415 meter and that the delivery point was then placed in service and deliveries of gas to North Central commenced September 16, 1985.

Northern Natural states that it estimates the deliveries of gas to North Central in the fifth year of operation would be 8.8 Mcf of gas on a peak day with annual deliveries of 920 Mcf of gas. Northern Natural indicates that the end-use of the gas would be for residential

VOL 51

MR 11
1986
UMI

space heating and that the volumes are within North Central's firm entitlement that was authorized by Commission order issued July 29, 1983, in Docket No. CP82-500-001.

Comment date: April 21, 1986, in accordance with Standard Paragraph G at the end of this notice.

3. Panhandle Eastern Pipe Line Company

[Docket No. CP86-313-000]

Take notice that on February 10, 1986, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP86-313-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing increases in sales of natural gas to certain existing small general service (SG) customers of Applicant, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that, pursuant to agreements between Applicant and certain of its existing SG customers, Applicant has agreed to increase the contract demand volumes for the following customers by a total of 24,536 Mcf per day, as follows:

Customer	Current (Mcf)	Requested (Mcf)	Increase (Mcf)
Kansas:			
Louisburg, city of	1,000	1,200	200
LaCygne, village of	800	1,600	800
Illinois:			
Auburn, city of	1,999	2,600	601
Bushnell, city of	2,300	3,150	850
Divernon, city of	1,000	2,000	1,000
Morton, village of	8,700	9,990	1,290
Pawnee, village of	1,500	1,900	400
Pleasant Hill, village of	950	1,000	50
Riverton, village of	1,800	1,900	100
Westville, village of	2,700	3,000	300
United Cities Gas Co. (Rurals)	1,600	3,200	1,600
United Cities Gas Co. (Towns)	5,600	9,999	4,399
Indiana:			
Bainbridge, town of	436	500	64
Montezuma, town of	1,500	3,000	1,500
Westfield Gas Corp	800	2,000	1,200
Missouri:			
Bowling Green Gas Co	2,650	3,000	350
Fulton, city of	8,900	9,999	1,099
Hermann, city of	3,160	5,160	2,000
Macon, city of	5,000	7,000	2,000
Monroe City, city of	2,600	3,000	400
Montgomery City, city of	1,800	2,700	900
Paris, city of	1,270	3,500	2,230
Perry, city of	750	1,550	800
Shelbina, city of	1,971	2,365	394
Total	60,726	85,262	24,536

Applicant states that it has sufficient capacity to provide these increased volumes and that the increased sales would have no significant affect on its gas supply.

Applicant additionally requests authorization to increase the delivery pressure from 100 psig to 200 psig for the City of Montgomery City.

Comment date: March 26, 1986, in accordance with Standard Paragraph F at the end of this notice.

4. Sea Robin Pipeline Company

[Docket Nos. CP73-162-006 & CP86-321-000]

Take notice that on February 7, 1986, Sea Robin Pipeline Company (Sea Robin), P.O. Box 1478, Houston, Texas 77001 filed in Docket Nos. CP73-162-006 and CP86-321-000 an application pursuant to section 7 of the Natural Gas Act for permission and approval to abandon one transportation service for Southern Natural Gas Company (Southern) and to amend the order issued April 5, 1974 in Docket No. CP73-162 so as to authorize an additional delivery point on another transportation service for Southern, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Sea Robin proposes to abandon the transportation service authorized in Docket No. CP85-412-000, wherein Sea Robin was authorized to transport up to 60,000 Mcf of natural gas per day for Southern from Block 248, East Cameron area, offshore Louisiana, to the terminus of Sea Robin's system in Erath, Louisiana. Sea Robin proposes to replace this transportation service by amending the transportation authorization in Docket No. CP73-162-000, wherein Sea Robin was authorized to transport up to 31,400 Mcf of gas per day for Southern from various offshore delivery points to Erath. Sea Robin proposes to amend the order of April 5, 1974 in CP73-162-000 by adding a delivery point at East Cameron Block 248. It is stated that the reason for the replacement of the one transportation service with another is that Southern's deliverability in the East Cameron area has declined. It is explained that no new facilities would be required to effect this change.

Comment date: March 26, 1986, in accordance with Standard Paragraph F at the end of this notice.

5. United Gas Pipe Line Company

[Docket No. CP86-331-000]

Take notice that on Febraury 14, 1986, United Gas Pipe Line Company (United), Post Office Box 1478, Houston, Texas 77001, filed in Docket No. CP86-331-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Courtaulds North America Inc. (Courtaulds) and for permission to abandon such services, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United states that Courtaulds owns a plant near the town of Axis in Mobile County, Alabama, that manufactures rayon staple fiber and that the plant uses up to 7,500 Mcf of gas per day as dryer fuel and boiler fuel. It is explained that Courtaulds has informed United that instead of relying on coal, Courtaulds secured a supply of natural gas by exploring for and developing its own reserves in Oklahoma at a cost of about $2.5 million. Courtaulds has advised that failure to utilize this supply of gas at the plant would result in an estimated annual cost of more than $3 million and that it is vital to its ability to compete in today's textile market that these costs be reduced.

United states that it has entered into a transportation agreement with Courtaulds dated February 11, 1986, pursuant to which United would transport on an interruptible basis up to 6,000 Mcf of gas per day from the existing interconnection between United and Arkla Energy Resources near Bistineau Bienville Parish, Louisiana, to the existing interconnection between United and Courtaulds' plant at meter No. 35-11-050 in Mobile County, Alabama.

United further states that it would charge Courtaulds an initial rate of 43.25 cents per Mcf, which is inclusive of United's fuel and company-used gas allowance and is equal to United's applicable mileage-based rate as shown on Sheet No. 4-E, Volume No. 1 of United's FERC Tariff. Transportation would continue for a primary term ending February 7, 1989, and would continue thereafter on a year-to-year basis. No facilities need to be installed.

Comment date: March 26, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-5258 Filed 3-10-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-334-000, et al.]

Natural Gas Certificate Filings; Transylvania Gas Pipeline Co., Inc.

March 4, 1986.

Take notice that the following filings have been made with the Commission:

1. Transylvania Gas Pipeline Company, Inc.

[Docket No. CP86-334-000]

Take notice that on February 14, 1986, Transylvania Gas Pipeline Company, (Applicant), P.O. Box 1398, Houston, Texas 77251, filed in Docket No. CP86-334-000 an application pursuant to section 7(c) of the Natural Gas Act and §284.221 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing transportation of natural gas on behalf of others, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it intends to transport natural gas on behalf of all shippers and elects to become a transporter under the terms and conditions of the Commission's Order No. 436, issued October 9, 1985, in Docket No. RM85-1-000. Applicant states that it accepts and would comply with the conditions in paragraph (c) of §284.221 of the Commission's Regulation. Applicant further states that it has filed its proposed transportation rates pursuant to Rate Schedules F and I of its Original Volume No. 1 of its FERC Gas Tariff, in Docket No. CP86-333-000.

Comment date: March 25, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Northern Natural Gas Company, Division of InterNorth, Inc.

[Docket No. CP86-327-000]

Take notice that on February 14, 1985, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP86-327-000, an application pursuant to section 7(b) of the Natural Gas Act, for permission to abandon and remove one 708 horsepower rental compressor unit located in Winkler County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern states that due to declining gas production, one 708 horsepower rental compressor unit is no longer needed at the Winkler County No. 1 gathering station. The remaining two compressor units have the capability to compress existing production, with additional horsepower remaining for any potential increased future ultilization or as back-up compression.

Northern further states that it proposes to return said compressor to the leasing agent.

Comment date: March 25, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Louisiana Intrastate Gas Corporation

[Docket No. CP85-923-000]

Take notice that on September 12, 1985, Lousiana Intrastate Gas Corporation (LIG), P.O. Box 90908, Lafayette, Louisiana 70509, an intrastate pipeline, filed in Docket No. CP85-923-000 an application pursuant to section 311(a)(2) of the Natural Gas Policy Act of 1978 and § 284.127 of the regulations under the Natural Gas Act (18 CFR 284.127) for authority to transport natural gas on behalf of Freeport Interstate Pipeline Company (Freeport Interstate) until April 30, 1987, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

LIG states that it has entered into a transportation agreement dated August 1, 1985, with Freeport Interstate whereby LIG would transport up to 300 million Btu's of natural gas per day for Freeport Interstate. It is further stated that Freeport Interstate would cause the natural gas to be delivered to LIG at a point of delivery located in St. Mary Parish, Louisiana. LIG indicates that it would transport and redeliver the natural gas to an interconnection point on its system with the facilities of another intrastate pipeline, Freeport Pipeline Company (Freeport Pipeline), in Jefferson Parish, Louisiana. It is stated that Freeport Pipeline has agreed to transport the natural gas on Freeport Interstate's behalf from the LIG-Freeport Pipeline interconnection point in Jefferson Parish to a point of interconnection with the facilities of Freeport Interstate in Jefferson Parish, Louisiana.

LIG states that it proposes to charge Freeport Interstate a fee of 29.8 cents per million Btu redelivered at the point of redelivery with Freeport Pipeline in Jefferson Parish, Louisiana.

Comment date: March 25, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

4. Consolidated Gas Transmission Corporation

[Docket No. CP86-319-000]

Take notice that on February 11, 1986, Consolidated Gas Transmission Corporation (Consolidated), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP86-319-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Consolidated to drill two new wells and to construct and operate related pipline facilities at its Sabinsville storage pool in Tioga

VOL 51
ISS 47
MR 11
1986
UMI

County, Pennsylvania, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Consolidated proposes to drill two new wells at its Sabinsville storage pool, to be known as Well Nos. N-2003-S and N-2004-S, and to construct and operate the pipeline facilities necessary to connect the wells to its storage pipeline system for injection and withdrawal use. Consolidated explains that the Sabinsville storage pool is developed from the depleted Oriskany Sand production field and is designed to provide a withdrawal rate at base gas conditions of 191,000 Mcf, at a pressure base of 14.73 psia. Consolidated explains that in recent years it has experienced a lower overall pool pressure than anticipated at minimum inventory conditions and has been unable to reach the expected late-season withdrawal rate. Consolidated states that the proposed new wells would be the most economical and efficient method of increasing the late-season withdrawal rate to the desired level.

Consolidated estimates that the proposed facilities would cost approximately $970,000, exclusive of filing fees, and states that the project would be financed from funds on hand or to be obtained from Consolidated's parent company, Consolidated Natural Gas Company. Consolidated would construct the proposed facilities in the spring of 1986 and estimates that the total project would take two months to complete. Consolidated proposes no new sales or services in connection with the proposed facilities.

Comment date: March 25, 1986, in accordance with Standard Paragraph F at the end of this notice.

5. Consolidated Gas Transmission Corporation

[Docket No. CP86-320-000]

Take notice that on February 11, 1986, Consolidated Gas Transmission Corporation (Consolidated), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP86-320-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Consolidated to drill three new wells and to construct and operate related pipeline facilities at its Greenlick storage pool in Clinton and Potter Counties, Pennsylvania, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Consolidated proposes to drill three new wells at its Greenlick storage pool, to be known as Well Nos. RW-67, -68, and -501, and to construct and operate the pipeline facilities necessary to connect the wells to its storage pipeline system for injection and withdrawal use. Consolidated explains that the Greenlick storage pool is developed from the depleted Orinskany Sand production field and is designed to provide a withdrawal rate at base gas conditions of 306,000 Mcf, at a pressure base of 14.73 psia. Consolidated explains that in recent years it has experienced a lower overall pool pressure than anticipated at minimum inventory conditions and has been unable to reach the expected late-season withdrawal rate. Consolidated states that the proposed new wells would be the most economical and efficient method of increasing the late-season withdrawal rate to the desired level.

Consolidated estimates that the proposed facilities would cost approximately $1,945,000, exclusive of filing fees, and states that the project would be financed from funds on hand or to be obtained from Consolidated's parent company, Consolidated Natural Gas Company. Consolidated would construct the proposed facilities in the spring of 1986 and estimates that the total project would take three months to complete. Consolidated proposes no new sales or services in connection with the proposed facilities.

Comment date: March 25, 1986, in accordance with Standard Paragraph F at the end of this notice.

6. Columbia Gas Transmission Corporation

[Docket No. CP86-332-000]

Take notice that on February 14, 1986, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP86-332-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain facilities and services, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Columbia proposes to abandon by sale to Union Light, Heat and Power Company (Union) approximately 10.7 miles of 24-inch pipeline and 0.8 mile of 20-inch pipeline and appurtenant facilities and to abandon 37 points of delivery to Union, all located in Campbell and Kenton Counties, Kentucky. Columbia also proposes to abandon service under an operating agreement between Columbia, Union and The Cincinnati Gas and Electric Company (CG&E), designated as Columbia's FERC Gas Traiff, Volume No. 2, Rate Schedule X-16, which is related to the operation of the facilities proposed for abandonment.

Columbia states that the proposed abandonments would not result in any change in the service provided by Columbia to its existing customers. It is explained that, as a result of the abandonments, Columbia would achieve a reduction in its operating expenses and Union would be able to obtain certain operating efficiencies on its system. It is further stated that Union has agreed to purchase the pipeline at its original cost less depreciation and retirements at the time of sale, which amount is estimated to be approximately $568,000.

Comment date: March 25, 1986, in accordance with Standard Paragraph F at the end of this notice.

7. Erie Pipeline System

[Docket No. CP86-330-000]

Take notice that on February 14, 1986, Erie Pipeline System (Applicant), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP86-330-000 an application pursuant to section 7(c) of the Natural Gas Act and § 284.221 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of others, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it intends to transport natural gas on behalf of all shippers and elects to become a transporter under the terms and conditions of the Commission's Order No. 436, issued October 9, 1985, in Docket No. RM85-1-000. Applicant states that it accepts and would comply with the conditions in paragraph (c) of § 284.221 of the Commission's Regulation. Applicant further states that it has filed its proposed transportation rates pursuant to Rate Schedules F and I of its Original Volume No. 1 of its FERC Gas Tariff, in Docket No. CP86-329-000.

Comment date: March 25, 1986, in accordance with Standard Paragraph F at the end of this notice.

8. Interstate Power Company

[Docket No. CP86-316-000]

Take notice that on February 11, 1986, Interstate Power Company (Petitioner), 1000 Main Street, Dubuque, Iowa 52001, filed in Docket No. CP86-316-000 a petition pursuant to Rule 207 of the Commission's Rules of Practice and Procedure requesting a declaratory order wherein the Commission declines to assert jurisdiction over the transportation of natural gas by Petitioner through its distribution system and waives the Commisson's Regulations to the extent necessary to permit such transportation, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Petitioner states that it is entirely dependent upon Natural Gas Pipeline Company of America (Natural) for its supply of natural gas to serve its residential, commercial and industrial customers in the communities and adjacent rural areas in northwestern Illinois and northeastern Iowa. Petitioner further states that it is a natural-gas company as defined in the Natural Gas Act by reason on its ownership of approximately 28 miles of pipeline and its use thereof for the transportation of the gas it purchases from Natural at Hooppole, Illinois, across the Mississippi River to Petitioner's gas distribution system in the Clinton, Iowa, area.

Petitioner states that it also operates a separate gas distribution system providing gas service for residential, commercial and industrial use in fourteen incorporated communities and adjacent rural areas in north central Iowa, western Illinois and southern Minnesota, and Petitioner further states it is entirely dependent upon Northern Natural Gas Company, Division of Inter-North, Inc. (Northern), for its supply of natural gas to serve these communities.

It is explained that Petitioner makes no gas sales for resale, all of its gas sales and transportation rates are regulated by the state utility agencies, and it operates only its own distribution system. Thus, Petitioner states that it is only engaged in the local distribution of gas, despite the fact that its facilities cross states lines and it is therefore subject to the Commission's jurisdiction.

Petitioner asks the Commission to treat it as a local distribution company, rather than an interstate pipeline, by declining to assert jurisdiction over one or more proposed transportation arrangements. Petitioner claims that its proposed transportation for large volume loads would cause a bifurcation of the ratemaking process, with retail gas sales and Iowa transportation rates set by the Iowa State Commerce Commission, and other rates set by the Commission, and that such bifurcation would cause serious problems. It is further stated that the policies of the Commission and the Natural Gas Act would be effectuated by granting the requested declaratory order and thereby affirming state control over key aspects of Petitioner's local distribution of natural gas.

Comment date: March 20, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Caplitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[FR Doc. 86-5259 Filed 3-10-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. QF86-514-000, et al.]

Small Power Production and Cogeneration Facilities; Qualifying Status Certificate Applications, etc.; ARS Group, Inc. et al.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

Take notice that the following filings have been made with the Commission.

1. ARS Group, Inc.

[Docket No. QF86-514-000]

March 5, 1986.

On February 5, 1986, ARS Group, Inc. (Applicant), of 15 Clark Road, Wellesley Hill, Massachusetts 02181 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Stratton, Maine. The facility will consist of a wood fired boiler and a steam turbine generator. The electric power production capacity of the facility will be approximately 40 MW.

2. Greenwood Ironworks

[Docket No. QF86-301-000]

March 4, 1986.

On November 19, 1985, Greenwood Ironworks (Applicant), of 420 Grove Avenue, Petersburg, Virginia 23803 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The 500 kilowatt hydroelectric facility is located on the Appomattox River near Ettrick and Petersburg in Chesterfield County, Virginia.

A separate application is required for a hydroelectric project license, preliminary permit or exemption from licensing. Comments on such applications are requested by separate public notice. Qualifying status serves only to establish eligibility for benefits provided by PURPA, as implemented by the Commission's regulations, 18 CFR Part 292. It does not relieve a facility of any other requirements of local, State or Federal law, including those regarding siting, construction, operation, licensing and pollution abatement.

3. Kaibab Industries

[Docket No. QF86-505-000]

March 5, 1986.

On January 28, 1986, Kaibab Industries (Applicant), of 4602 East Thomas Road, Phoenix, Arizona 85018 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's

VOL
51
ISS
47
MR
11
1986
UMI

regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Fredonia, Arizona. The facility will consist of a wood waste fired boiler and a condensing steam turbine generator. The next electric power production capacity of the facility will be 4,450 kW.

4. Texaco Producing Inc.

[Docket No QF86-524-000]

February 27, 1986.

On February 10, 1986, Texaco Producing Inc. (Applicant), of P.O. Box 10269, Bakersfield, California 93389 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in the South Belridge Field, Kern County, California. The facility will consist of three units each comprising of a combustion turbine-generator and a heat recovery steam generator (HRSG). The steam from the HRSG will be used for enhanced oil recovery. The electric power production capacity of the facility will be 11.2 MW. The primary energy source will be natural gas. The facility was scheduled for start-up in January 1986.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 285.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 86-5256 Filed 3-10-86; 8:45 am]

BILLING CODE 6717-01-M

Western Area Power Administration

Proposed Firm Power Allocations; Pick-Sloan Missouri Basin Program-Eastern Division

AGENCY: Western Area Power Administration, Energy.

ACTION: Notice of Proposed Firm Power Allocations to the Townsites of Fort Peck, Montana; Riverdale, North Dakota; and Pickstown, South Dakota.

SUMMARY: These three townsites are currently under the jurisdiction of the Corps of Engineers (Corps) and are presently receiving project-use power from Corps powerplants on the mainstem of the Missouri River. Pub. L. 99-88, enacted on August 15, 1985, authorizes the Secretary of the Army to transfer all rights, title, and interest of the United States in these townsites to newly formed municipal governments serving the inhabitants of the townsites. This legislation also authorized the Secretary of the Army to continue operational service (such as the supply of project-use electric power) to each municipality upon request for a period not to exceed 3 years after the transfer. By that time, these entities must have made their own arrangements to secure a source of electric power.

The Administrator of the Western Area Power Administration (Western) proposes to provide for the continuation of electric service by means of a firm power allocation to each of the newly formed municipalities (or other preference entitly who would be responsible for serving the municipal load). By publication of this notice in the **Federal Register**, a 30-day public comment period is hereby initiated for this proposed action. After due consideration of all public comments, a final decision will be made by the Administrator of Western pursuant to the authority delegated by the Secretary of Energy. The final decision and a discussion addressing major comments, criticisms, and alternatives offered during the comment period shall be published in the **Federal Register**. Additional information regarding this proposed allocation may be obtained at the **ADDRESS** below.

ADDRESS: Requests for further information should be submitted to the following address throughout the 30-day comment period. All written comments must be received at the following address no later than April 10, 1986:

Mr. James D. Davies, Area Manager,
Billings Area Office, Western Area
Power Administration, P.O. Box EGY,
Billings, MT 59101, (406) 657-6532.

SUPPLEMENTARY INFORMATION: While some variations have been made, the generally accepted minimum criteria for a municipality to be eligible for an allocation of firm power from Western's Billings Area Office require that it be within the marketing area of the Eastern Division of the Pick-Sloan Missouri Basin Program (P-SMBP), be incorporated, and own or lease its electric distribution system. All three of the townsites are within the established marketing boundaries of the Eastern Division. Two have completed incorporation proceedings and are making arrangements to acquire the electrical distribution system in their municipalities. The other entity, Fort Peck, Montana, is in the process of becoming incorporated and acquiring its electrical distribution system. As of this date, all three entities have formally requested an allocation of power from Western.

Western proposes to allocate to each entity an amount of power equal to the entity's maximum load in the summer 1985 season and the winter 1985-1986 season. Once those seasonal allocations have been set, they would remain fixed through the year 2000, the end of the existing marketing plan for the Eastern Division of P-SMBP. Any increase in load over and above those fixed allocations will have to come from an auxiliary supplier through arrangements made by the individual municipalities.

An allocation of firm power by Western to each of the municipalities (or other preference entity who would be responsible for serving the municipal load) in those amounts will not adversely affect other existing firm power customers. The loads were previously served from Corps powerplants as project use and the associated power and energy were not available to Western for marketing. The proposed arrangements will not change the resource that Western anticipated in the formulation of its most recent marketing plan, all of which is presently under contract to Western's other firm power customers.

Environmental Compliance

Western will conduct an analysis of this proposal pursuant to the National Environmental Policy Act of 1969 and Department of Energy Regulations published in the **Federal Register** on March 28, 1980 (45 FR 20694-20701), as amended on January 6, 1983 (48 FR 685-686), and on February 25, 1985 (50 FR 7629-7630).

Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601, *et seq.*) each agency, when required by 5 U.S.C. 553 to publish a proposed rule, is further required to prepare and make available for public comment an initial regulatory flexibility analysis to describe the impact of the proposed rule on small entities. In this instance, the proposal relates to nonregulatory services provided by Western. Under 5 U.S.C. 601(2), a proposal with particular applicability is not considered "a rule" within the meaning the Act. Since this proposal is of limited applicability and is being set in accordance with specific regulations and legislation under particular circumstances, Western believes that no flexibility analysis is required.

Determination Under Executive Order 12291

The Department of Energy has determined that this is not a major rule because it does not meet the criteria of section 1(b) of Executive Order 12291, 46 FR 13193 (February 19, 1981). Western has an exemption from sections 3, 4, and 7 of Executive Order 12291.

Issued at Golden, Colorado, February 24, 1986.

William H. Clagett,
Administrator.

[FR Doc. 86-4717 Filed 3-10-86; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OW-FRL-2981-3]

Management Advisory Group Meeting

Under Pub. L. 92-463, notice is hereby given that a one and a half day meeting of the Management Advisory Group to the EPA Construction Grant Program (MAG) will be held on March 26-27, 1986, in Washington, DC, at EPA Headquarters, 401 M Street SW., Washington, DC 20460. The meeting room will be Conference Room 2, at the EPA Washington Information Center located on the ground floor of the Waterside Mall area. The time of the meeting will be 9 a.m. to 5 p.m. on March 26, and 8 a.m. to 1 p.m. on March 27.

The principal agenda item will be work on a MAG report on compliance and operation and maintenance of publicly owned wastewater treatment works, specifically on recommendations to be made by MAG. The agenda will also include briefings and discussions on other topics of current or future interest to MAG. Any member of the public wishing to make comments is invited to submit them in writing to the Executive Secretary at the meeting.

The meeting will be open to the public. For additional information, contact Georgette Brown at (202) 382-5859.

Dated: March 5, 1986.

Edwin L. Johnson,
Assistant Administrator for Water.

[FR Doc. 86-5243 Filed 3-10-86; 8:45 am]

BILLING CODE 6560-50-M

[OW-FRL-2981-4]

Water Quality Criteria; Ambient Aquatic Life Water Quality Criteria Documents

AGENCY: Environmental Protection Agency.

ACTION: Notice of request for comments on ambient aquatic life water quality criteria documents.

SUMMARY: EPA announces the availability for public comment, and provides summaries of four ambient aquatic life water quality criteria documents. When published in final form after the review of public comments, these water quality criteria may form the basis for enforceable standards. These criteria are published pursuant to section 304(a)(1) of the Clean Water Act.

DATE: Written comments should be submitted to the person listed directly below by May 12, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. Frank Gostomski, Criteria and Standards Division (WH-585), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. (202) 245-3030.

Availability of Documents

This notice contains summaries of four documents containing proposed ambient water quality criteria for the protection of aquatic life and its uses. Copies of the complete criteria documents may be obtained upon request from the person listed above. These documents are also available for public inspection and copying during normal business hours at: Public Information Reference Unit, U.S. Environmental Protection Agency, Room 2404 (rear), 401 M St., SW., Washington, DC 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services. Copies of these documents are also available for review in the EPA Regional Office libraries. A list of the proposed documents is presented below:

1. Ambient Water Quality Criteria for Aluminum.
2. Ambient Water Quality Criteria for Chlorpyrifos.
3. Ambient Water Quality Criteria for Nickel.
4. Ambient Water Quality Criteria for Pentachlorophenol.

SUPPLEMENTARY INFORMATION:

Background

Section 304(a)(1) of the Clean Water Act (33 U.S.C. 1314(a)(1)) requires EPA to publish and periodically update ambient water quality criteria. These criteria are to reflect the latest scientific knowledge on the identifiable effects of pollutants on public health and welfare, aquatic life, and recreation.

EPA has periodically issued ambient water quality criteria beginning in 1973 with the publication of the "Blue Book" (Water Quality Criteria 1972). In 1976, the "Red Book" (Quality Criteria for Water) was published. On November 28, 1980 (45 FR 79318), EPA announced the publication of 64 individual ambient water quality criteria documents for pollutants listed as toxic under section 307(a)(1) of the Clean Water Act. A document addressing 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) was announced on February 15, 1984 (FR 49 5831) completing the coverage of the 65 priority pollutants listed in 307(a)(1). Nine ambient water quality documents, including revision of seven of the 1980 documents, were released on July 29, 1985 (50 FR 30784).

Today EPA is announcing the availability for comment four proposed individual ambient aquatic life water quality criteria documents. Two of the documents, nickel and pentachlorophenol, upon final publication, will update and revise appropriate sections of the 1980 criteria documents. The other two, aluminum and chlorpyrifos, will address chemicals which have not been covered before.

The documents announced today will not contain information on the effects of these pollutants on human health. EPA anticipates the release of water quality advisories on aluminum and chlorpyrifos to specifically address human health concerns. Advisories will also be issued to update the human health section of the 1980 ambient water quality criteria documents for nickel and pentachlorophenol if a review of the available information indicate that such a revision is necessary. Both the criteria documents announced today and the water quality advisories addressing human health may form the basis for enforceable standards, when published in final form.

Dated: February 18, 1986.

Edwin L. Johnson,

Acting Assistant Administrator for Water.

Summary of Proposed Water Quality Criteria

1. Aluminum

Freshwater Aquatic Life. Freshwater organisms and their uses should not be affected unacceptably, except possibly where a locally important species is very sensitive, when the pH is between 6.5 and 9.0, if the four-day average concentration of aluminum does not exceed 150 μg/L more than once every three years on the average and if the one-hour average concentration does not exceed 950 μg/L more than once every three years on the average. EPA recommends applying the criteria for metals using the total recoverable method until a protocol for the measurement of "acid-soluble" metals is approved.

The allowed average excursion frequency of three years is the Agency's best scientific judgment of the amount of time it will take an unstressed system to recover from a pollution event in which exposure to these pollutants exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific excursion frequencies may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state model for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life. EPA feels there is no significant need for a saltwater criterion for aluminum.

2. Chlorpyrifos

Freshwater Aquatic Life. Freshwater aquatic organisms and their uses should not be affected unacceptably, except possibly where a locally important species is very sensitive, if the four-day average concentration of chlorpyrifos does not exceed 0.033 μg/L more than once every three years on the average and if the one-hour average concentration does not exceed 0.083 μg/L more than once every three years on the average.

The allowed average excursion frequency of three years is the Agency's best scientific judgment of the amount of time it will take an unstressed system to recover from a pollution event in which exposure to these pollutants exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific excursion frequencies may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state model for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life. Saltwater aquatic organisms and their uses should not be affected unacceptably, except possibly where a local important species is very sensitive, if the four-day average concentration of chlorpyrifos does not exceed 0.0015 μg/L more than once every three years on the average, and if the one-hour average concentration does not exceed 0.0036 μg/L more than once every three years on the average.

The allowed average excursion frequency of three years is the Agency's best scientific judgement of the amount of time it will take an unstressed system to recover from a pollution even in which exposure to these pollutants exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific excursion frequencies may be established if adequate justification is provided.

Use of criteria for development water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state model for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Documents for Water Quality-Based Toxics Control (U.S. EPA, 1985).

3. Nickel

Freshwater Aquatic Life. Freshwater aquatic organisms and their uses should not be affected unacceptably, except possibly where a locally important species is very sensitive, if the four-day average concentration (in μg/L) of nickel does not exceed the numerical value given by ${}_{e}(0.8460[1n(hardness)]+1.1645)$ more than once every three years on the average, and if the one-hour average concentration (in μg/L) does not exceed the numerical value given by ${}_{e}(0.8460[1n\ (hardness)]+3.3612)$ more than once every three years on the average. For example, at hardnesses of 50, 100 and 200 mg/L as $CaCO_3$ the four-day average concentrations of nickel are 88, 160 and 280 μg/L, respectively, and the one-hour average concentrations are 790, 1400 and 2500 μg/L. EPA recommends applying the criteria for metals using the total recoverable method until a protocol for the measurement of "acid-soluble" metals is approved.

The allowed average excursion frequency of three years is the Agency's best scientific judgement of the amount of time it will take an unstressed system to recover from a pollution event in which exposure to these pollutants exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific excursion frequencies may be

established if adequate justifications is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state model for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life. Saltwater aquatic organisms and their uses should not be affected unacceptably, except possibly where a locally important species is very sensitive, if the four-day average concentration of nickel does not exceed 7.9 μg/L more than once every three years on the average, and if the one-hour average concentration of nickel does not exceed 71 μg/L more than once every three years on the average.

EPA recommends applying the criteria for metals using the total recoverable method until a protocol for the measurement of "acid-soluble" metals is approved.

The allowed average excursion frequency of three years is the Agency's best scientific judgement of the amount of time it will take an unstressed system to recover from a pollution event in which exposure to these pollutants exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific excursion frequencies may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state model for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

4. Pentachlorophenol

Freshwater Aquatic Life. Freshwater aquatic organisms and their uses should not be affected unacceptably, except possibly where a locally important species is very sensitive, if the four-day average concentration (in μg/L) of pentachlorophenol does not exceed the numerical value given by ${}_{e}(1.005[pH]-5.368)$ more than once every three years on the average, and if the one-hour average concentration (in μg/L) does not exceed the numerical value given by ${}_{e}(1.005[pH]-4.908)$ more than once every three years on the average. For example, at pH=6.5, 7.8, and 9.0, the four-day average concentrations of pentachlorophenol are 3.2, 12 and 40 μg/L, respectively, and the one-hour average concentrations are 5.1, 19 and 63 μg/L.

The allowed average excursion frequency of three years is the Agency's best scientific judgement of the amount of time it will take an unstressed system to recover from a pollution event in which exposure to these pollutants exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific excursion frequencies may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state model for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

Saltwater Aquatic Life. Saltwater aquatic organisms and their uses should not be affected unacceptably, except possibly where a locally important species is very sensitive, if the four-day average concentration of pentachlorophenol does not exceed 8.1 μg/L more than once every three years on the average, and if the one-hour average concentration does not exceed 13 μg/L more than once every three years on the average.

The allowed average excursion frequency of three years in the Agency's best scientific judgement of the amount of time it will take an unstressed system to recover from a pollution event in which exposure to these pollutants exceeds the criteria. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resilience of ecosystems and their ability to recover differ greatly, however, and site-specific excursion frequencies may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state model for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 1571]

Petitions for Reconsideration and Clarification and Applications for Review of Actions in Rulemaking Proceedings

March 5, 1986.

The following listings of petitions for reconsideration and clarification and applications for review filed in Commission rulemaking proceedings is published pursuant to CFR § 1.429(e). Oppositions to such petitions for reconsideration and clarifications and applications for review must be filed within 15 days after publication of this Public Notice in the **Federal Register**. Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

Subject: MTS and WATS Market Structure (CC Docket No. 78–72)
  Amendment of Part 67 of the Commission's Rules and Establishment of a Joint Board (CC Docket No. 80–286)
Field By: Richard C. Schramm, Daniel J. Whelan & David K. Hall, Attorneys for the Bell Atlantic Telephone Companies on 2–10–86 & 2–24–86.
  William A. Spratley, Bruce J. Weston, Victoria L. Mayhew & Barry Cohen, Attorneys for Office of the Consumers' Counsel, State of Ohio on 2–11–86.
  William C. Sullivan, Linda S. Leggg, Paul G. Lane & Edward L. Eckhart, Attorneys for Southwestern Bell Telephone Company on 2–12–86.
  Vincent L. Sgrosso & G. Thomas Abernathy, Jr., Attorneys for BellSouth Corporation on behalf of South Central Bell Telephone Company & Southern Bell Telephone and Telegraph Company on 2–21–86.
  Leon T. Knauer, Kenneth D. Patrick & Luisa L. Lancetti, Attorneys for Puerto Rico Telephone Company on 2–21–86.
  Saul Fisher, Melvin A. Cohen & Joseph DeBella, Attorneys for New York Telephone Company and New England Telephone and Telegraph Company on 2–21–86.
  David Cosson & Paul G. Daniel, Attorneys for National Telephone Cooperative Association on 2–20–85 & 2–24–86.
  Ronald T. LeMay, Vice President-General Counsel & James T. Roche, Attorney for United Telephone System, Inc., on 2–24–86.
  Robert L. Barada, Maya A. Mathews & Stanley J. Moore, Attorneys for Pacific Bell on 2–24–86.

Subject: Policy Regarding Character Qualifications In Broadcast Licensing. (Gen Docket No. 81–500)
  Amendment of Rules of Broadcast Practice and Procedure Relating to Written Responses to Commission Inquiries and the Making of Misrepresentations to the Commission by Permittees and Licensees. (BC Docket No. 78–108)
Filed By: Andrew J. Schwartzman & Henry Geller for The Office of Communication of the United Church of Christ and Telecommunications Research and Action Center on 2–13–86.
  Joseph DeFranco & Howard F. Jaeckel, Attorneys for CBS Inc., on 2–14–86.
  Jerome S. Boros, Attorney for Alden Television, Inc., & Alden Communications Corp on 2–24–86.
  Benito Gaguine & Heidi P. Sanchez, Attorneys for Kannapolis Television Company, A Joint Venture on 2–24–86.
  Richard L. Brown & David J. Kaufman, Attorneys for SPACE, The Satellite Television Industry Association, Inc. on 2–24–86.

Subject: Amendment of Part 97 of the Commission's Rules to Implement the Final Acts of the World Administrative Radio Conference, Geneva, 1979. (PR Docket No. 85–23)
Filed By: David B. Popkin on 2–18–86.

Subject: Amendment of Part 97 of the Commission's Rules to Permit Automatic Control of Amateur Radio Stations. (PR Docket No. 85–105, PM–4879)
Filed By: Walter E. Miller, (AJ6T) on 2–13–86.
  Donald Simon, (NI6A) on 2–14–86 & 2–20–86.
  S. E. Carlson, (KAERF) on 2–18–86.
  Edward Novak, (N6DAM) on 2–18–86.
  Robert T. Martin, (N6MZV) on 2–19–86.
  Robert F. Franklin, (K6TP) on 2–19–86.
  Alfred J. Dynarski, Jr., (WA6SYK) on 2–20–86.
  Karl Fraser, (KK1A) on 2–20–86.
  Robert J. Keller, (KY3R) on 2–21–86.
  Warren C. Struven (W6CB) on 2–21–86.
  Lawrence P. Kenney (WB9LOZ) on 2–24–86.
  William F. Dickson II, (N6BAH) on 2–24–86.
  William R. Danielson, (N6FQR) on 2–24–86.
  Eric C. Williams, (WD6CMU) on 2–24–86.
  John T. Smith, (KI4XO) on 2–24–86.
  Richard K. Whipkey, (AD6X) on 2–24–86.
  Donald M. McDougall, (W6OA) on 2–24–86.
  Thomas A. Clark, (WA7GKD), Director for Tucson Amateur Packet Radio on 2–24–86.
  Edward J. Ingber, (WA6AXX), President for Advanced Computer Controls, Inc., on 2–24–86.
  Christopher D. Imlay, Attorney for The American Radio Relay League, Incorporated on 2–24–86.

Application for Review

Subject: Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Reno, Nevada and Redding, California) (MM Docket No. 83–374, RM's 4293 & 4484)
Filed By: Robert B. Jacobi & J. Brian DeBoice, Attorneys for Sarkes Tarzian, Inc., on 2–10–86.

William J. Tricarico,
Secretary, Federal Communications Commission.

BILLING CODE 6712–01–M

[CC Docket No. 86–68, et al.]

Comex, Inc., et al.; Applications

In re application of Comex, Inc., to establish additional facilities for one-way Station KC1296 to operate on frequency 152.24 MHz in the Public Land Mobile Service at Nashua and Epsom, New Hampshire; CC Docket No. 86–68, File No. 23196–CD–P/L–1–85;

Ram Communications of Massachusetts, Inc., to establish an additional facility for one-way Station KSV956 to operate on frequency 152.24 MHz in the Public Land Mobile Service at Andover, Massachusetts; File No. 21859–CD–P/L–1–85.

Memorandum Opinion and Order

Adopted February 27, 1986. Released March 5, 1986.

By the Common Carrier Bureau.

1. By *Memorandum Opinion and Order Designating Applications for Hearing,* Mimeo No. 2823, released February 14, 1986 (Designation Order), the captioned applications were designated for a consolidated hearing.

2. It has subsequently been brought to the Commission's attention that the Designation Order failed to dispose of a Petition to Deny and various related pleadings which had been filed by the parties. Accordingly, pursuant to § 1.113 of the Commission's Rules, we will set aside the Designation Order on our own motion. Such action will enable the Bureau to consider and decide the issues presented in the numerous pleadings which have been filed.

3. Accordingly, it is ordered, that the *Memorandum Opinion and Order Designating Applications for Hearing,* Mimeo No. 2823, released February 14, 1986, is set aside.

Federal Communications Commission.

Michael Deuel Sullivan,
Chief, Mobile Services Division, Common Carrier Bureau.

BILLING CODE 6712–01–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federl Register** in which this notice appears. The requirements for comments are found in §572.603 of Title 46 of the Code of Federl Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 022–003930B–001.

Title: The Port Authority of New York and New Jersey and Universal Maritime Service Corp.

Parties:

The Port Authority of New York and New Jersey (Port)
Universal Maritime Service Corp. (Universal)

Synopsis: The proposed agreement supplements the parties' basic agreement providing for Universal's lease of the Red Hook Container Terminal, Brooklyn, New York. The purpose of Agreement No. 022–003930B–001 is to provide for the erection and installation of a second additional crane at a project cost of approximately $3,100,000. It also provides for the equipment rental payable to the Port for Universal's use of both the additional and the second additional crane. The parties have requested a shortened review period.

Agreement No.: 021–003964–001.

Title: City of Milwaukee and Tanco Terminals, Inc. Lease Agreement.

Parties:

City of Milwaukee (Port)
Tanco Terminals, Inc. (Tanco)

Synopsis: The proposed amendment would renew and extend the March 10, 1981 lease agreement with Tanco for an additional period of five (5) years commencing on March 1, 1986 and ending on February 28, 1991. Tanco would have tenant's rights to utilize the property for receipt, preparation, processing, handling, storage and/or shipping of liquid and other cargoes. The parties have requested a determination of subjectivity and a shortened review period.

Dated: March 6, 1986.

By Order of the Federal Maritime Commission.

John Robert Ewers,
Secretary.

BILLING CODE 6730–01–M

[Docket No. 86–6]

A/S Ivarans Rederi, v. Compahia de Navegacao Lloyd Brasileiro, et al.; Filing of Complaint and Assignment

Notice is given that a complaint filed by A/S Ivarans Rederi against Companhia de Navegacao Lloyd Brasileriro, Companhia de Navegacao Maritima Netumar, Empresa Lineas Maritimas Argentinas S.A., Van Nievelt Goudriaan & Co. B.V., A. Bottacchi S.A. de Navegacion C.F.I. e I. and United States Lines (S.A.) Inc. was served March 5, 1986. The complaint alleges violations of sections 5(a) 10(a) (2) and 10(a) (3) of the Shipping Act, 1984 arising as a result of conduct by Respondents contrary to an order of the Federal Maritime Commission and contrary to the written terms of a revenue pooling agreement (Agreement No. 10027–10) approved by the Commission under the Shipping Act, 1916 and in effect (as restated) under the Shipping Act, 1984.

This proceeding has been assigned to Administrative Law Judge Norman D. Kline. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502–61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502–61, the initial decision of the presiding officer in this proceeding shall be issued by March 5, 1987, and the final decision of the Commission shall be issued by July 6, 1987.

John Robert Ewers,
Secretary.

FEDERAL RESERVE SYSTEM

Independent American Banc Corp., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Fededal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than March 30, 1986.

A. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Independent American Banc Corp.,* Parma, Ohio; to become a bank holding company by acquiring 100 percent of the voting shares of American National Bank, Parma, Ohio. Comments on this application must be received not later than April 2, 1986.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Associated Banc-Corp.,* Green Bay, Wisconsin; to acquire 100 percent of the voting shares of Randall Bank, Madison, Wisconsin.

2. *Community Financial Corp.,* Avilla, Indiana; to become a bank holding company by acquiring 80 percent of the

Food and Drug Administration

[Docket No. 84D-0284]

Drug Stability of Liquid Feed Supplements; Availability of Guidelines

Correction

In FR Doc. 86-3504 beginning on page 6038 in the issue of Wednesday, February 19, 1986, make the following correction on page 6038 in the third column:

In the third complete paragraph, in the twelfth line, "§ 514.1(b)(x)" should read "§ 514.1(b)(5)(x)".

BILLING CODE 1505-01-M

National Institutes of Health

Consensus Development Conference on Preventing of Venous Thrombosis and Pulmonary Embolism; Meeting

Notice is hereby given of the NIH Consensus Development Conference on "Prevention of Venous Thrombosis and Pulmonary Embolism," sponsored by the National Heart, Lung, and Blood Institute; Division of Blood Diseases and Resources, and the NIH Office of Medical Applications of Research. The conference will be held March 24–26, 1986, in the Masur Auditorium of the Warren G. Magnuson Clinical Center (Building 10) at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

Deep venous thrombosis in the lower extremities is a common, age-related phenomenon. The importance of the problem lies not only in the significant morbidity associated with venous valve destruction and the postphlebitic syndrome, but also in the intimate but variable association between peripheral venous thrombosis and death from pulmonary embolism.

It has been estimated that venous thromboembolism accounts for some 300,000 hospitalizations per year and 50,000 deaths. It has long been recognized as one of the most important complications in medical and surgical patients. In addition, it is the most common cause of death in patients undergoing major orthopedic procedures, is the most frequent nonobstetrical cause of postpartum death, and is a major factor in the mortality of the large population of patients with chronic cardiac and pulmonary disease.

The high frequency of silent thrombosis and unpresaged embolism underlies the need for prophylaxis. Primary and secondary prevention are far superior to a policy based on treatment of clinical symptoms, and prevention should be the ultimate goal of the physician. In spite of the significance of the problem and the desirability of an aggressive approach to prophylaxis, however, prophylactic measures are not widely used by many physicians in their practice.

A number of high-risk groups of patients have been identified. This conference will assess the data concerning the relative risks in these groups and the various forms of prophylaxis that have been tested, including anticoagulants, antiplatelet agents, and mechanical methods. In this open forum, participants will evaluate the efficacy and safety of prophylaxis in the high-risk groups.

The key questions to be addressed at the conference include: What is the level of risk of venous thrombosis and embolism in various patient groups? What is the safety and efficacy of various forms of prophylaxis in these patient groups? What questions remain to be answered about prophylaxis of venous thromboembolism?

This consensus conference will bring together biomedical investigators, hematologists, surgeons, internists, epidemiologists, and representatives of the public. Following two days of presentations by medical experts and discussion by the audience, a Consensus Panel will weigh the scientific evidence and formulate a draft statement responding to the key conference questions. On the morning of the third day, Consensus Panel Chairman Harold Roberts, M.D., Professor of Medicine, University of North Carolina, will read this preliminary Consensus Statement before the conference audience and invite comments and questions.

Information on the program may be obtained from Michele Dillon, Prospect Associates, 2115 East Jefferson Street, Suite 401, Rockville, Maryland 20852, (301) 468-6555.

Dated March 4, 1986.

Betty Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

Establishment of the Interagency Committee on Learning Disabilities

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: As directed by section 9 of the Health Research Extension Act of 1985 (Pub. L. 99-158), the Director of the National Institutes of Health hereby establishes the Interagency Committee on Learning Disabilities (Committee). The Committee is to review and assess Federal research priorities, activities, and findings regarding learning disabilities.

The Committee is composed of representatives from the National Institute of Neurological and Communicative Disorders and Stroke, the National Institute of Child Health and Human Development, the National Institute of Allergy and Infectious Diseases, the National Eye Institute, the National Institute of Environmental Health Sciences, the Division of Research Resources of the National Institutes of Health, the Food and Drug Administration, the National Institute of Mental Health, the Department of Education, the Centers for Disease Control, the Environmental Protection Agency, the Health Resources and Services Administration, and the Office of Human Development Services. The Director of the NIH will chair the Committee. The National Institute of Child Health and Human Development is assigned operational responsibility for the Committee and its activities.

The Committee shall report to Congress on its activities including:

(1) Its estimate of the number of persons affected by learning disabilities and the demographic data which describe such persons;

(2) A description of the current research findings on the cause, diagnosis, treatment, and prevention of learning disabilities; and

(3) Recommendations for legislation and administrative actions to increase the effectiveness of research on learning disabilities and to improve the disseminaiton of the findings of such research; and respecting specific priorities for research in the cause, diagnosis, treatment, and prevention of learning disabilities. The Committee

shall terminate 90 days after the date of the submission of its report of Congress.

EFFECTIVE DATE: February 18, 1986.

FOR FURTHER INFORMATION CONTACT: James F. Kavanagh, Ph.D., Associate Director, Center for Research for Mothers and Children, National Institute of Child Health and Human Development, Room 7C-03 Landow Building, 7910 Woodmont Avenue, Betheada, Maryland 20892, (301) 496-5097.

Dated: March 3, 1986.

James B. Wyngaarden,

Director.

BILLING CODE 4140-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-86-1596]

Privacy Act of 1974; Proposed Amendment to System of Records

AGENCY: Department of Housing and Urban Development.

ACTION: Notice of proposed amendment to existing system of records.

SUMMARY: The Department is giving notice that it intends to amend the following Privacy Act System of Records: HUD/H-11 Multifamily Tenant Certification System.

EFFECTIVE DATE: This notice shall become effective March 11, 1986.

ADDRESS: Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Arthur L. Stokes, Department Privacy Act Officer, (202) 755-6374. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The Multifamily Tenant Certification System (HUD/H-11) contains information about individuals receiving housing assistance from the Department of Housing and Urban Development (HUD) under one of the following HUD programs: Section 8, Public/Indian Housing, Section 236 (including Section 236 RAP), Rent Supplement, Section 221(d)(3) BMIR, and Section 202/8. The system is used to improve the Department's capabilities to manage Housing Assistance Programs, to protect the Government's financial interest, and to assist in the verification of the accuracy of the tenant certification/recertification data furnished by the tenant. This amendment clarifies the categories of records in the system. It does not require the submission of a report of a new or amended system to the Congress or the Office of Management and Budget since there is no expansion in the types or categories of information maintained and no alteration in the purposes for which the information is maintained. The term "registration information" is substituted for the phrase "registration number or identification number." The notice is published below in its entirety, as amended. Previously, the system and a prefatory statement containing the general Routine Uses applicable to most of the Department's systems of record were published in the "Federal Register Privacy Act Issuances, 1984 Compilation, Volume II."

(5 U.S.C. 552a, 88 Stat. 1896; Section 7(d) Department of HUD Act (42 U.S.C. 3535(d))).

Issued at Washington, DC, February 25, 1986.

Judith L. Tardy,

Assistant Secretary for Administration.

HUD/H-11

SYSTEM NAME:

Multifamily Tenant Certification System.

SYSTEM LOCATION:

Headquarters and Field Offices. For a listing of Field Offices with addresses, see 24 CFR Part 16, Appendix A.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals receiving housing assistance from HUD under one of the following programs: Section 8, Pubic/Indian Housing, Section 236 (including Section 236 RAP), Rent Supplement, Section 221(d)3 BMIR, and Section 202/8.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system includes identification data such as name, Social Security Number (if available), alien registration information, address, and tenant unit number; financial data such as income and contract rent; tenant characteristics such as number in family, sex of family member and minority code; unit characteristics such as number of bedrooms; geographic data such as county code and census tract; and related information including information used to verify data in the system.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

United States Housing Act of 1937, as amended, 42 U.S.C. 1437 *et seq.*, and the Housing and Community Development Amendments of 1981, Pub. L. 97-35, 95 Stat. 408.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

See routine uses paragraph in prefatory statement. Other routine uses: Federal, State, and local agencies—to verify the accuracy and completeness of the data provided; to HUD contractor—for processing certifications/recertifications; to the Social Security Administration and the Immigration and Naturalization Service—to verify alien status.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders, magnetic tape/disk/drum.

RETRIEVABILITY:

Name of tenant, address, Social Security or other identification number.

SAFEGUARDS:

File folders, automated records kept in a secured area. Access restricted to authorized individuals.

RETENTION AND DISPOSAL:

Obsolete records are destroyed or sent to storage facility in accordance with HUD Handbook 2225.6, Records Disposition Management: HUD Records Schedules.

SYSTEM MANAGER AND ADDRESS:

Director, Housing Information and Statistics Division, Office of Managment, Housing, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC. 20410.

NOTIFICATION PROCEDURE:

For information, assistance, or inquiry about the existence of records, contact the Privacy Act Officer at the appropriate location, in accordance with in 24 CFR Part 16. A list of all locations is given in Appendix A.

RECORD ACCESS PROCEDURES:

The Department's rules for providing access to records to the individual concerned appear in 24 CFR Part 16. If additional information or assistance is required, contact the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A.

CONTESTING RECORD PROCEDURES:

The Department's rules for contesting the contents of records and appealing initial denials by the individual concerned appear in 24 CFR Part 16. If additional information or assistance is needed in relation to contesting the

VOL 51
ISS 47
MR 11
1986

[Docket No. N-86-1597]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: Robert Fishman, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410, telephone (202) 755-6050. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the name and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Evaluation of the Housing Voucher Demonstration
Office: Policy Development and Research
Form Number: None
Frequency of Submission: On Occasion
Affected Public: Individuals or Households and Non-Profit Institutions
Estimated Burden Hours: 14,076
Status: Revision
Contact: David Einhorn, HUD, (202) 755-5574; Robert Fishman, OMB, (202) 395-6880.

Authority: Sec: 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 13, 1986.

Proposal: Relocation Requirements—Section 312 Rehabilitation Loan and Urban Development Action Grant (UDAG) Programs
Office: Community Planning and Development
Form Number: None
Frequency of Submission: Recordkeeping
Affected Public: State or Local Governments
Estimated Burden Hours: 300
Status: New
Contact: Melvin J. Geffner, HUD, (202) 755-6336; Robert Fishman, OMB, (2020) 395-6880.

Authority: Sec: 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 13, 1986.

Proposal: Public Housing Program—Demolition or Disposition of Public Housing Projects Final Rule—24 CFR 970, Public Housing Demolition, Disposition and Conversion Handbook 7486.1
Office: Public and Indian Housing
Form Number: None
Frequency of Submission: On Occasion
Affected Public: Individuals or Households, State of Local Governments, Businesses or Other For-Profit, Non-Profit Institutions, and Small Businesses or Organizations
Estimated Burden Hours: 3,600
Status: Revision
Contact: Richard L. Rivard, HUD, (202) 755-6640; Robert Fishman, OMB, (202) 395-6880.

Authority: Sec: 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 10, 1986.

Proposal: Relocation Payment Claim Forms
Office: Community Planning and Development
Form Number: HUD-4000, 4001, 4002, 4003, 4004, and 4004A

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Migratory Bird Hunting; Meetings

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Meetings.

SUMMARY: This notice announces that representatives of the U.S. Fish and Wildlife Service (hereinafter the Service) will be in attendance at meetings of the Atlantic, Mississippi, Central, Pacific, and National Flyway Councils (Council) at the following times and locations:

DATES:

March 22, 1986—Pacific Flyway Council, 2:00 p.m.
March 23, 1986—Atlantic Flyway Council, 10:00 a.m.
—Mississippi Flyway Council, 9:00 a.m.
—Central Flyway Council, 8:30 a.m.
—National Waterfowl Council, 3:00 p.m.

ADDRESS: Council meetings will be held at The MGM Grand Hotel, Reno, Nevada as follows:

Atlantic Flyway Council, Metro Room B, Mezzanine Level
Mississippi Flyway Council, Capitol Room 1, Lobby Level
Central Flyway Council, Capitol Room 4, Lobby Level
Pacific Flyway Council, Palace Room, Mezzanine Level
National Waterfowl Council, Capitol Room 4, Lobby Level.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building—Room 536, Washington, DC 20240, telephone (202) 254-3207.

SUPPLEMENTARY INFORMATION: Flyway councils are organizations of State conservation agencies that share responsibility for migratory game bird management with the Service. The Council meetings noted above are scheduled in conjunction with the 51st North American Wildlife and Natural Resources Conference to be held March 21-26, 1986, at The MGM Grand Hotel, Reno, Nevada. The Service will be represented at the above meetings to facilitate discussions of various migratory game bird management and research programs, many of which are conducted jointly with the Service and with the Canadian Wildlife Service.

Dated: March 4, 1986.

Ronald E. Lambertson,

Acting Deputy Director, U.S. Fish and Wildlife Service.

BILLING CODE 4310-55-M

Bureau of Land Management

[N-43254]

Realty Action; Lease/Purchase for Recreation and Public Purposes, White Pine County, NV

The following described public land has been identified and examined and is hereby classified as suitable for lease/purchase under the Recreation and Public Purpose Act, as amended (43 U.S.C. 869 et seq.). The lands will not be offered for lease/purchase until at least 60 days after the date of publication of this notice in the **Federal Register.**

Mount Diablo Meridian, Nevada

T. 16 N., R. 62 E.,
 Sec. 35, E½;
 Sec. 36, all.
T. 16 N., R. 63 E.,
 Sec. 31, unsurveyed, all that portion lying west of Bothwick Road.

This land contains approximately 1,440 acres. The actual legal descriptions and acreages will be delineated by U.S. Government survey prior to conveyance.

The State of Nevada Division of State Lands intends to use the land for a maximum security prison for the Nevada Department of Prisons. The lease and/or patent, when issued, will be subject to the provisions of the Recreation and Public Purpose Act and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States pursuant to the Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

And will be subject to:

1. Those rights for electric transmission line purposes which have been granted to Mt. Wheeler Power, Inc. by Permit No. N-35513, under the Act of October 21, 1976, 90 Stat. 2776, 43 U.S.C. 1761.

2. Those rights acquired by White Pine County by construction of County Road No. 19, Bothwick Road, under R.S. 2477 (43 U.S.C. 932).

3. Those rights granted by oil and gas leases, N-18639 and N-18640, made under Section 29 of the Act of February 25, 1920, 41 Stat. 437 and the Act of March 4, 1933, 47 Stat. 1570. This patent is issued subject to the right of the prior permittees or lessees to use so much of

VOL 51 ISS 47 MR 11 1986 UMI

the surface of said land as is required for oil and gas exploration and development operations, without compensation to the lessee/patentee for damages resulting from proper oil and gas operations, for the duration of oil and gas leases, N-18639 and N-18640, and any authorized extension of that lease. Upon termination or relinquishment of said oil and gas lease, this reservation shall terminate.

The land is not required for any federal purpose. The lease/purchase is consistent with the Bureau's planning for this area.

Upon publication of this Notice of Realty Action in the Federal Register the above described public land will be segreated from all forms of appropriation under the public land laws and the general mining law, except for recreation and public purposes and leasing under the mineral leasing laws.

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Ely District, Star Route 5, Box 1, Ely, Nevada. A public meeting will be held on April 1, 1986, between the hours of 2:00 p.m. to 4:00 p.m. and 7:00 p.m. to 9:00 p.m. in the BLM Ely District Office conference room.

For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, Bureau of Land Management, Star Route 5, Box 1, Ely, Nevada 89301. In the absence of any objections, on the 60th day from the date of this publication, the classification will become effective and this notice of realty action will become the final determination of the Department of the Interior.

Dated: March 4, 1986.

Wayne M. Lowman,

Acting District Manager.

BILLING CODE 4310-HC-M

[W-63093]

Proposed Reinstatement of Terminated Oil and Gas Lease; Wyoming

Pursuant to the provisions of Pub. L. 97-451, 96 Stat. 2462-2466, and Regulation 43 CFR 3108.2-3 (a) and (b)(1), a petition for reinstatement of oil and gas lease W-63093 for lands in Sheridan County, Wyoming was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500.00 administrative fee and $106.25 to reimburse the Department for the cost of this Federal Register notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W-63093 effective June 1, 1985, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Dated: March 4, 1986.

Andrew L. Tarshis,

Chief, Leasing Section.

BILLING CODE 4310-22-M

Minerals Management Service

Development Operations Coordination Document

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Shell Offshore Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 1294, Block 62, South Pass Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on February 28, 1986.

ADDRESS: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838-0876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: March 3, 1986.

J. Rogers Pearcy,

Acting Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

National Park Service

San Antonio Missions Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the San Antonio Advisory Commission will be held at 1:00 p.m., Tuesday, April 1, 1986, at the San Jose Mission Parish Hall, 6710 San Jose, San Antonio, Texas.

The San Antonio Missions Advisory Commission was established pursuant to Pub. L. 95-629, Title II, November 10, 1978. The purpose of the commission is to advise the Secretary of the Interior or his designee on matters relating to the park and with respect to carrying out the provisions of the statute establishing the San Antonio Missions National Historical Park.

Matters to be discussed include:

—Minutes of previous meeting
—Park Operations Update
—Los Compadres Update
—Archdiocesan Report
—City Report
—County Report
—Open Discussion.

The meeting will be open to the public, however, facilities and space for accommodating members of the public will be limited and persons will be accommodated on a first-come, first-serve basis.

Any member of the public may file a written statement concerning the matters to be discussed with the Superintendent, San Antonio Missions National Historical Park.

Persons wishing further information regarding this meeting or who wish to submit a written statement may contact Jose A Cisneros, Superintendent, 727 E. Durango, Room A612, San Antonio, Texas 78206 (512) 229-6000.

Minutes of the meeting will be available for public review approximately four weeks after the meeting at the office of the San Antonio Missions National Historical Park.

Dated: February 28, 1986.

Robert I. Kerr,

Regional Director, Southwest Region.

BILLING CODE 4310-70-M

Environmental Statements for Wilderness Recommendations for National Park Service Units in Alaska

AGENCY: National Park Service, Interior.

ACTION: Notice of Intent to Prepare Environmental Impact Statements for Wilderness Recommendations for National Park Service Units in Alaska.

SUMMARY: The National Park Service (NPS) is beginning preparation of wilderness recommendations and environmental impact statements (EIS) for 14 national parks, preserves and monuments in the State of Alaska as mandated by the Alaska National Interest Lands Conservation Act (ANILCA), Pub. L. 96-487, section 1317 (16 U.S.C. 3205). The affected National Park System units are Aniakchak National Monument and Preserve, Bering Land Bridge National Preserve, Cape Krusenstern National Monument, Denali National Park and Preserve, Gates of the Arctic National Park and Preserve, Glacier Bay National Park and Preserve, Katmai National Park and Preserve, Kenai Fjords National Park, Klondike Gold Rush National Historical Park, Kobuk Valley National Park, Lake Clark National Park and Preserve, Noatak National Preserve, Wrangell-St. Elias National Park and Preserve and Yukon-Charley Rivers National Preserve. Lands being considered within these units include those areas which have been determined, in the draft general management plans for each unit, to have the characteristics of wilderness required by the Wilderness Act. In total approximately 17.8 million acres will be considered for designation as wilderness.

Interested and affected groups, organizations, and individuals will be kept informed of progress of the effort and proposals developed.

Scoping meetings will be held throughout Alaska and in some cities in the contiguous United States. Meetings will be advertised in local media. The purposes of scoping meetings are (1) to familiarize the public with wilderness management by the National Park Service, with emphasis on aspects that are, under ANILCA, unique to Alaska units; (2) to offer for consideration various options for additions to the National Wilderness Preservation System; and (3) to solicit ideas and information from the public about the socioeconomic and environmental impacts of the designations of additional wilderness in 14 National Park System units in Alaska. The public will also be encouraged to suggest additional alternative actions which have not been considered by NPS and to describe measures which could be taken to mitigate impacts of proposed actions, so that they may be considered in preparation of the environmental impact statements (EIS).

FOR FURTHER INFORMATION CONTACT: Linda Nebel, Cheif of Planning, National Park Service, 2525 Gambell St. #107, Anchorage, Alaska 99503, Telephone: (907) 271-2690.

Dated: February 26, 1986.

Boyd Evison,

Regional Director.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Garrison Diversion Unit, ND, Draft Supplemental Environmental Statement; Availability

[INT-DES 86-9]

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a draft supplemental environmental statement on the Garrison Diversion Unit.

This statement discusses impacts associated with modifications as proposed in the Garrison Diversion Unit Commission *Final Report* of December 20, 1984. Major modifications addressed in this draft supplemental environmental statement are (1) constructing and operating a 113,360-acre irrigation project; (2) developing lands for wildlife mitigation and enhancment; (3) restricting irrigation to lands that drain or can be drained into the Missouri River Basin; (4) deferring construction of Lonetree Reservior and building Sykeston Canal; (5) constructing Glover Reservior while preserving Kraft Slough; (6) providing water level control features for national wildlife refuges; and (7) providing for new and improved recreation areas. Written comments may be submitted to the Regional Director or Project Manager within 60 days after filing.

A public hearing will be held beginning at 9:30 a.m., CST, April 15, 1986, at the Doublewood Ramada Inn, Bismarck, North Dakota.

Copies are available at the following offices:

Director, Office of Environmental Affairs, Bureau of Reclamation, Room 7624, Department of the Interior, Washington, D.C. 20240, Telephone: (202) 343-4991
Director, Management Operations Center, Attn: Code 823, Engineering and Research Center, P.O. Box 25007—Federal Center, Denver, CO 80225, Telephone: (303) 236-6963
Regional Director, Bureau of Reclamation, P.O. Box 36900, Billings, MT 59107-6900, Telephone: (406) 657-6605
Project Manager, Missouri-Souris Projects Office, Bureau of Reclamation, P.O. Box 1017, Bismarck, ND 58502, Telephone: (701) 255-4011, Ext. 541

Copies will also be available for inspection in libraries within the project area.

Dated: March 6, 1986.

Bruce Blanchard,

Director, Office of Environmental Project Review.

BILLING CODE 4310-09-M

DEPARTMENT OF JUSTICE

Antitrust Division

National Cooperative Research Act of 1984; Software Productivity Consortium, Inc.

Notice is hereby given that pursuant to section 6(a) of the National Cooperative Research Act of 1984, Pub. L. No. 98-462 ("the Act"), Software Productivity Consortium, Inc., has filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing a change in the membership of Software Productivity Consortium, Inc., by the addition of Martin Marietta Corporation. The additional notification was filed for the purpose of extending the protections of the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to Software Productivity Consortium, Inc., and its general areas of planned activities are given below.

Software Productivity Consortium, Inc., with the addition of Martin Marietta Corporation, consists of the following firms: Allied Corporation; The Boeing Company; Ford Aerospace and Communications Corporation; General Dynamics Corporation; Grumman Aerospace Corporation; Harris Corporation; Lockheed Missile and Space Company, Inc.; McDonnell Douglas Corporation; Martin Marietta Corporation; Northrop Corporation; Science Applications International Corporation; TRW Inc., United Technologies Corporation; and Vitro Corporation. The purpose of the current effort is to undertake research and developmental engineering in advanced technologies relating to productivity tools and techniques to be used in the development of complex computer software.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Preliminary Planning Estimates for Program Year (PY) 1986 for Basic Labor Exchange Activities Under the Wagner-Peyser Act

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice announces the preliminary planning estimates for Program Year (PY) 1986 for basic labor exchange activities provided under the Wagner-Peyser Act.

FOR FURTHER INFORMATION CONTACT: Richard C. Gilliland, Director, United States Employment Service (Attention:TEES), 601 D Street, NW., Washington, DC 20213. Telephone: 202-376-6750.

SUPPLEMENTARY INFORMATION: In accord with section 6(b)(5) of the Wagner-Peyser Act the Employment and Training Administration is publishing preliminary estimates for each State's projected allotment for Program Year (PY) 1986 (July 1, 1986, through June 30, 1987). The total amount of funds currently available for distribution to States for public employment service activities is $744,135,000. This amount reflects a 4.2 percent reduction in the Fiscal Year (FY) 1986 appropriation mandated by the Balanced Budget and Emergency Deficit Control Act of 1985 (Pub. L. 99-177). An additional $14,000,000 is being withheld to finance postage costs associated with the conduct of employment service activities. Funds will be distributed in accord with formula criteria established in section 6(a) and (b) of the Wagner-Peyser Act. Civilian labor force and unemployment data for the twelve months ending September 1985 were used in making the formula calculations.

VOL 51
ISS 47
MR 11
1986
UMI

The Secretary reserved 3 percent of the total available funds as authorized under section 6(b)(4) of the Wagner-Peyser Act and announced two proposed funding methodologies in the **Federal Register** on January 17, 1986 for public comment. 51 FR 2589. After careful review of all public comment, the Department has determined to allocate the set-aside by the same methodology used since the Wagner-Peyser Act was amended by the Job Training Partnership Act (Pub. L. 97-300).

Under this method, $22,324,050 of the funds currently available is distributed to States whose share of resources decreased from their total allotment in PY 1985 to the PY 1986 basic formula amount.

Signed at Washington, DC on March 7, 1986.

Roger D. Semerad,

Assistant Secretary of Labor for Employment and Training.

BILLING CODE 4510-30-C

VOL 51 ISS 47 MR 11 1986 UMI

Mine Safety and Health Administration

[Docket No. M-86-4-C]

Petition for Modification of Application of Mandatory Safety Standard; Badger Coal Co.

Badger Coal Company, 145 Sago Road, Buckhannon, West Virginia 26201 has filed a petition to modify the application of 30 CFR 75.505 (mines classed gassy; use and maintenance of permissible electric face equipment) to its Grand Badger No. 1 Mine (I.D. No. 46-04819) located in Upshur County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the use of a locked padlock to secure battery receptacles on permissible, battery-powered machines.
2. As an alternate method, petitioner propose to use a spring-loaded pin in lieu of padlocks. The pin is permanently attached and eliminates the possibility of locks and keys being lost as well as mechanical failure of the lock due to dust and moisture in the mine atmosphere.
3. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 10, 1986. Copies of the petition are available for inspection at that address.

Dated: March 3, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-5181 Filed 3-10-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-85-201-C]

Petition for Modification of Application of Mandatory Safety Standard; Consolidation Coal Co.

Consolidation Coal Company, Consol Plaza, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Shoemaker Mine (I.D. No. 46-01436) located in Marshall County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that return air courses be examined in their entirety on a weekly basis.
2. The conditions in the return air course in the DuPont Shaft Entries have deteriorated, resulting in adverse roof conditions which have made the return air course hazardous to travel and examine. Rehabilitation of the affected area would expose miners to hazardous working conditions.
3. As an alternate method, petitioner proposes to establish three monitoring stations where the air leaves the affected areas. Certified persons will take air and gas measurements when making weekly examinations of the affected return air course and record the results.
4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards; Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 10, 1986. Copies of the petition are available for inspection at that address.

BILLING CODE 4510-43-M

[Docket No. M-85-209-C]

Petition for Modification of Application of Mandatory Safety Standard; D. & K. Coal Co., Inc.

D. & K. Coal Company, Inc., P.O. Box 418, Summersville, West Virginia 26651 has filed a petition to modify the application of 30 CFR 75.503 (electric face equipment; maintenance) to its No. 4 Mine (I.D. No. 46-06115) located in Braxton County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the use of a locked padlock to secure battery plugs to machine-mounted battery receptacles on permissible; mobile, battery-powered machines.
2. As an alternate method, petitioner proposes to use metal locking devices, each consisting of a fabricated metal bracket and a metal locking device in lieu of padlocks. The metal locking devices will be designed, installed and used to prevent the threaded rings form unintentionally lossening and will be attached to prevent accidental loss. In addition, the fabricated metal brackets will be securely attached to the battery receptacles to prevent accidental loss of the brackets.
3. Petitioner states that the spring-loaded metal locking devices will be easier to maintain than padlocks because there are no keys to be lost and dirt cannot get into the workings as with a padlock.
4. Operators of permissible, mobile, battery-powered machines affected by this modification will be trained in the proper use of the locking device, the hazards of breaking battery-plug connections under load, and the hazards of breaking battery-plug connections in areas of the mine where electric equipment is required to be permissible.
5. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. [FR Doc. 86-5183 Filed 3-10-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-86-3-C]

Petition for Modification of Application of Mandatory Safety Standard; Eastern Associated Coal Corp.

Eastern Associated Coal Corp., One PPG Place, Pittsburgh, Pennsylvania 15222 has filed a petition to modify the application of 30 CFR 77.216-5 (water, sediment or slurry impoundment and impounding structures; abandonment) to its Joanne Mine (I.D. No. 46-01430) located in Marion County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a plan for abandonment of an impoundment be submitted prior to abandonment.
2. As an alternate method, petitioner proposes to leave the impounding structure in its present condition and allow the present owner to be responsible for maintenance.
3. Eastern sold and conveyed the water impoundment to the Joanne Sportman's Club in 1976 and thereafter utilized the pond water for its cleaning plant. In June 1985, petitioner closed the mine, ceased taking water from the pond and currently has no control over the subject site. The impoundment is now inactive for coal mining purposes.
4. The present owner submitted a plan to MSHA and the West Virginia Department of Natural Resources Dam Control Section on May 12, 1983 showing their capability to maintain and monitor the pond.
5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

BILLING CODE 4510-43-M

[Docket No. M-85-174-C]

Petition for Modification of Application, of Mandatory Safety Standard; H & B Coal Company, Inc.

H & B Coal Company, P.O. Box 6, Regina, Kentucky 41559 has filed a petition to modify the application of 30 CFR 75.1710 (cabs and canopies) to its No. 1 Mine (I.D. No. 15-06807) located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that cabs or canopies be installed on the mine's electic face equipment.
2. The mine is in the No. 1 Elkhorn Seam ranging from 41 to 48 inches in height, with ascending and descending grades creating dips in the coal bed.
3. Petitioner states that the use of a canopy on the mine's equipment would result in a diminution of safety for the miners affected because the canopy would restrict and cramp the operator's seating position and limit his or her field of vision, increasing the chances of an accident.
4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. BILLING CODE 4510-43-M

[Docket No. M-86-3-M]

Petition for Modification of Application of Mandatory Safety Standard; Homestake Mining Co.

Homestake Mining Company, P.O. Box 875, Lead, South Dakota 57754 has filed a petition to modify the application of 30 CFR 57.14029 (machinery repairs and maintenance) to its Homestake Gold Mine (I.D. No. 39-00055) located in Lawrence County, South Dakota. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that repairs or maintenance on equipment not be performed until the power is off and the machinery is blocked against motion.
2. As an alternate method, petitioner proposes to replace worn out brushes on the generators of the Ross and Yates Hoist MG sets while the power is off but the armatures are rotating.
3. Petitioner states that the commutator is smooth and there are no protruding objects to strike a person or catch his or her clothing.
4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. [FR Doc. 86-5186 Filed 3-10-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-86-9-C]

Petition for Modification of Application of Mandatory Safety Standard; International Anthracite Corp.

International Anthracite Corporation, Box 546, Valley View, Pennsylvania 17983 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entries) to its B and M Tunnel (I.D. No. 36-01761) located in Schuylkill County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that entries used as intake and return air courses be separted from belt haulage entries.
2. The mine is currently being ventilated on a blowing system. The intake air splits and ventilates the belt tunnel, east gangway and west gangway. Intake air ventilating the east/west gangway maintains a positive pressure against the abandoned shuttle entries, ventilates active shuttle entries and exhausts out the return at the Lucas Slope in the east or ventilation/haulage drifts in the west.
3. Petitioner states that thirty-five to forty thousand cubic feet of air (235-270 FPM) passes through the gangway which is enough to dilute any gases, provide an adequate supply of oxygen and keep air velocities down (+/-250 FPM). With only one tunnel driven it is not possible to have a separate return or belt entry.

VOL 51
ISS 47
MR 11
1986
UMI

nor are the normal hazards associated with flat lying bituminous seams present with the tunnel in rock behind the pitching seam.

4. In further support of this request, petitioner proposes to install regulators to increase the differential pressure between the intake and return airways, increase the capabilities of the ventilating system to dilute and carry away harmful gases and contaminants, and insure improved ventilation of the working faces.

5. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203.

All comments must be postmarked or received in that office on or before April 10, 1986. Copies of the petition are available for inspection at that address.

Dated: March 3, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-5187 Filed 3-10-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-86-8-C]

Petition for Modification of Application of Mandatory Safety Standard; Kaiser Coal Corp.

Kaiser Coal Corporation, 102 South Tejon Street, Suite 800 P.O. Box 2679, Colorado Springs, Colorado 80901-2679 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entries) to its York Canyon Mine (I.D. No. 29-00095) located in Colfax County, New Mexico. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that intake and return aircourses be separated from belt haulage entries.

2. Petitioner states that the use of a two-entry development system for longwall mining of blocks of coal is necessary for safety due to constant changes in roof conditions, roof composition and occurrence of numerous slips and faulting. Utilization of a three-entry system would introduce significantly greater roof exposure, increased roof falls, excessive chain pillar loading and rib roll hazards.

3. As an alternate method, petitioner proposes to use two-entry systems for development of retreating longwall panels. A computerized remote monitoring system for carbon monoxide and methane and a fire detection system will be installed.

Additional measures regarding ventilation, construction of stoppings and overcasts, roof support, communication and other precautions will be implemented.

4. For these reasons, petitioner requests a modification of the standard.

Requests for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 10, 1986. Copies of the petition are available for inspection at that address.

Dated: March 3, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-5190 Filed 3-10-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-86-10-C]

Petition for Modification of Application of Mandatory Safety Standard; International Anthracite Corp.

International Anthracite Corporation, Box 546, Valley View, Pennsylvania 17983 has filed a petition to modify the application of 30 CFR 75.1103-4 (automatic fire sensor and warning device systems; installation; minimum requirements) to its B and M Tunnel (I.D. No. 36-01781) located in Schuylkill County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that automatic fire sensor and warning device systems provide identification of fire within each belt flight.

2. As an alternate method, petitioner proposes to install a continuous carbon monoxide(CO) detection system in all belt haulage entries used to ventilate the working places. The system will be capable of identifying any activated sensor so that a map can be used to pinpoint the potential problem area.

3. The monitors will be located in by each transfer point, at intervals along the belt not to exceed 2,500 feet and in the immediate return. Monitors will be visually examined once every twenty-four hours when belts are operating, inspected weekly by a qualified person and calibrated monthly. CO monitors are set to indicate a warning at 20.00 ppm and danger at 40.00 ppm. The methane monitors are set to indicate a warning at 1.00 volume percentum and danger at 2.00 volume percentum.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 10, 1986. Copies of the petition are available for inspection at that address.

Dated: March 3, 1986.

BILLING CODE 4510-43-M

[Docket No. M-86-11-C]

Petition for Modification of Application of Mandatory Safety Standard; International Anthracite Corp.

International Anthracite Corporation, Box 546, Valley View, Pennsylvania 17983 has filed a petiton to modify the application of 30 CFR 75.1105 (housing of underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps) to its B and M Tunnel (I.D. No. 36-01781) located in Schuylkill County, Pennslyvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that air currents used to ventilate structures or areas enclosing electrical installations be coursed directly into the return.

2. The section power center is located in the gangway outby the working faces in the mouth of a shuttle entry and there is no nearby return for the ventilating air.

3. As an alternative method, petitioner proposes to ventilate the working faces

and section power center with belt haulage air. In support of this request, petitioner proposes to install a continuous monitoring system for carbon monoxide and methane.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virgina 22203. All comments must be postmarked or received in that office on or before April 10, 1986.

Copies of the petition are available for inspection at that address.

Dated: March 3, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-86-5-C]

Petition for Modification of Application of Mandatory Safety Standard; Mid-Continent Resources, Inc.

Mid-Continent Resources, Inc., 1058 Road 100, P.O. Box 158, Carbondale, Colorado 81623 has filed a petition to modify the application of 30 CFR 75.1105 (housing of underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps) to its Dutch Creek No. 1 Mine (I.D. No. 05-00301) and its Dutch Creek No. 2 Mine (I.D. No. 05-00469) both located in Pitkin County, Colorado. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that air currents used to ventilate structures or areas enclosing electrical installations be coursed directly into the return.

2. As an alternate method, petitioner proposes that whenever the configuration of intake air entries does not permit an underground transformer station to be ventilated by intake air that is coursed directly into a return air course, the station will be housed in a fireproof structure equipped with fireproof doors and a fire suppression system. When the temperature within the fireproof structure reaches a temperature of not more than 200 degrees Fahrenheit, the fireproof doors will close, incoming power to the structure will be deenergized, and an alarm will be activated.

3. The return air coursed from such an installation will be coursed and maintained separate and apart from the intake air escapeway.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 10, 1986. Copies of the petition are available for inspection at that address.

Dated: March 3, 1986.

BILLING CODE 4510-43-M

[Docket No. M-86-13-C]

Petition for Modification of Application of Mandatory Safety Standard; Quarto Mining Co.

Quarto Mining Company, Box 231, Clarington, Oho 43915 has filed a petition to modify the application of 30 CFR 75.503 (permissible electric face equipment; maintenance) to its Powhatan No. 4 Mine (I.D. No. 33-01157) located in Monroe County, Ohio. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the use of a locked padlock to secure battery plugs to machine-mounted battery receptacles on permissible, mobile, battery-powered machines.

2. As an alternate method, petitioner proposes to use metal locking devices, each consisting of a fabricated metal bracket and a metal locking device in lieu of padlocks. The metal locking devices will be designed, installed and used to prevent the threaded rings from unintentionally loosening and will be attached to prevent accidental loss. In addition, the fabricated metal brackets will be securely attached to the battery receptacles to prevent accidental loss of the brackets.

3. Petitioner states that the spring-loaded metal locking devices will be easier to maintain than padlocks because there are no keys to be lost and dirt cannot get into the workings as with a padlocked.

4. Operators of permissible, mobile, battery-powered machines affected by this modifications will be trained in the proper use of the locking device, the hazards of breaking battery-plug connections under loads, and the hazards of breaking battery-plug connections in areas of the mine where electric equipment is required to be permissible.

5. For these reasons, petitioner requests a modification of the standard.

Request for Comments

BILLING CODE 4510-43-M

[Docket No. M-85-199-C]

Petition for Modification of Application of Mandatory Safety Standard; Skidmore Coal Co.

Skidmore Coal Company, 123 Main Street, Joliett, Pennsylvania 17981 has filed a petition to modify the application of 30 CFR 75.301 (air quality, quantity, and velocity) to its Skidmore Slope (I.D. No. 36-07461) located in Schuylkill County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that the minimum quantity of air reaching the last open crosscut in any pair or set of rooms be 9,000 cubic feet a minute, and the minimum quantity of air reaching the intake end of a pillar line be 9,000 cubic feet a minute. The minimum quantity of air in any coal mine reaching each working face must be 3,000 cubic feet a minute.

2. Air sample analysis history reveals that harmful quantities of methane are nonexistent in the mine, which also has no history of an ignition, explosion, mine fire or harmful quantities of carbon dioxide and other noxious or poisonous gases.

3. Mine dust sampling programs have revealed extremely low concentrations of respirable dust.

4. Extremely high velocities in small cross sectional areas of airways and manways required in friable Anthracite veins for control purposes, particularly in steeply pitching mines, present a very dangerous flying object hazard to the miners and cause extremely uncomfortable damp and cold conditions in the mine.

5. As an alternate method, petitioner proposes that:

a. The minimum quantity of air reaching each working face be 1,500 cubic feet per minute;

b. The minimum quantity of air reaching the last open crosscut in any pair or set of developing entries be 5,000 cubic feet per minute; and

c. The minimum quantity of air reaching the intake end of a pillar line be 5,000 cubic feet per minute, and/or whatever additional quantity of air that may be required in any of these areas to maintain a safe and healthful mine atmosphere.

6. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

BILLING CODE 4510-43-M

[Docket No. M-86-2-M]

Petition for Modification of Application of Mandatory Safety Standard; Southwestern Portland Cement Co.

Southwestern Portland Cement Company, P.O. Box 1547, Odessa, Texas 79760 has filed a petition to modify the application of 30 CFR 56.13020 (compressed air) to its Odessa Plant (I.D. No. 41-00060) located in Ector County, Texas. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that compressed air not be directed toward a person.

2. As an alternate method, petitioner proposes to install blow-off stations for the purpose of removing cement dust from clothing to prevent skin irritation and discomfort.

3. In support of this request petitioner states:

a. Safety glasses or goggles will be worn by persons at blow-off stations whenever they are in use;

b. Persons will be forbidden to direct air at lacerations or other unhealed skin injuries or at any person's eyes or face; and

c. Signs will be posted at each station reminding employees to wear safety glasses, not to direct air toward eyes or face, or toward cuts, scratches or other skin openings.

4. For these reasons petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. Dated: March 3, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-5195 Filed 3-10-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-85-29-M]

Petition for Modification of Application of Mandatory Safety Standard; Stauffer Chemical Co.

Stauffer Chemical Company, P.O. Box 513, Green River, Wyoming 82935 has filed a petition to modify the application of 30 CFR 57.21097 (general requirements for blasting) to its Big Island Mine (I.D. No. 48-00154) located in Sweetwater County, Wyoming. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that permissible blasting units of capacity suitable for the number of holes in a round to be blasted are to used unless the round is fired from the surface when all persons are out of the mine.

2. The mine is a trona mine and methane gas is not generated by trona itself. At present, there is no permissible blasting machine of sufficient capacity available. The small capacity permissible machines available would introduce the hazard of misfires and poorly broken faces by having too much

resistance for the capacity of the machine, or not having sufficient holes per round to adequately break the trona.

3. As an alternate method, petitioner proposes to use nonpermissible blasting machines. Each shotfirer would check for methane before entering a working face and before shooting the face. The shotfirer would visually inspect the face area and muck pile after shooting. Each machine operator would independently check for methane gas before entering a face area.

4. For these reasons, petitioner requests a modification of the standard.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-5197 Filed 3-10-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-85-20-M]

Petition for Modification of Application of Mandatory Safety Standard; Tri-Con Mining Inc.

Tri-Con Mining Incorporated, P.O. Box 83730, Fairbanks, Alaska 99708 has filed a petition to modify the application of 30 CFR 57.4560 (mine entrances) to its Grant Mine Project (I.D. No. 50-01314) located in Yukon River County, Alaska. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that timber used for ground support in exhaust openings that are designated as escapeways be provided with a fire suppression system, covered with shotcrete or gunite, or coated with fire-retardant paint for a distance of at least 200 feet inside the portal or collar.

2. Petitioner states that during spring and summer all the shaft timbers are water soaked from surface runoff and melting of frost and during fall and winter the shaft timber becomes coated with frost and ice. Both conditions make the shaft fire resistant.

3. Dry chemical fire extinguishers are located at the top and bottom of the shaft. The 200 foot is the only working level. There is an alternate escapeway located 250 feet from the shaft and additional escape exits from the 200 foot level will be completed in several months.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. Pension and Welfare Benefits Administration

Advisory Council on Employee Welfare and Pension Benefit Plans; Meeting

Pursuant to section 512 of the Employee Retirement Income Security Act of 1974 (ERISA) 29 U.S.C. 1142, a public meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9:30 a.m., on Tuesday, April 1, 1986 in Conference Room N-3437D, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC.

The purpose of the meeting is to discuss the following items on the Agenda summarized below:

1. ERISA Administration—Update.
2. Pension and Welfare Benefits Administration Priorities.
3. Role of the ERISA Advisory Council.
4. Establishment of Council Work Groups.

Individuals or organizations wishing to submit written statements pertaining to the items on the Agenda or any other aspects of ERISA, should send 20 copies to Edward F. Lyszczek, Executive Secretary, ERISA Advisory Council, U.S.

BILLING CODE 4510-29-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 86-17]

NASA Advisory Council, Aeronautics Advisory Committee (AAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee and the Aerospace Research and Technology Informal Subcommittee.

DATES: Date and time: April 9, 1986, 8:30 a.m. to 5:00 p.m.; April 10, 1986, 8:30 a.m. to 4:30 p.m.

ADDRESS: National Aeronautics and Space Administration, Langley Research Center, Activities Building, Hampton, Virginia 23665.

FOR FURTHER INFORMATION CONTACT: Ms. Joanne O. Teague, Code R, National Aeronautics and Space Administration, Washington, DC 20546; Telephone: (Area Code 202/453-2727).

SUPPLEMENTARY INFORMATION: The Aeronautics Advisory Committee (AAC) was established to provide overall guidance and direction to the aeronautics research and technology activities in the Office of Aeronautics and Space Technology (OAST).

The Aerospace Research and Technology Informal Subcommittee was formed to provide technical support for the AAC and the Space Sytems and Technology Advisory Committee (SSTAC) and to conduct ad hoc interdisciplinary studies and assessments. The Committee, chaired by Mr. Robert B. Ormsby, is comprised of 23 members. Total anticipated attendance is 75 members. The meeting will be open to the public up to the seating capacity of the room (approximately 100 persons including the Subcommittee members and other participants).

Type of meeting: Open.

Agenda

April 9, l1986

8:30 a.m.—Chairperson's Remarks.
9 a.m.—NASA/OAST Overview.
9:45 a.m.—Aeronautics Overview.
11 a.m.—Parallel Program Review Sessions.
5:00 p.m.—Adjourn.

April 10, 1986

8:30 a.m.—Continuation of Parallel Program Review Sessions.
3 a.m.—Summary Session.
4:30 p.m.—Adjourn.

Richard L. Daniels,

Deputy Director, Logistics Management and Information Programs Division, Office of Management.

March 3, 1986.

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON ARTS AND HUMANITIES

National Endowment for the Arts; Theater Advisory Panel; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Theater Advisory Panel (Professional Companies Section) to the National Council on the Arts will be held on March 25-29, 1986 from 8:30 a.m. to 5:30 p.m., Room M-07 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW, Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

March 3, 1986.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Agency Policy and Procedures for Differing Professonal Opinions

The Nuclear Regulatory Commission (NRC) has made some revisions to its policy and procedures concerning Differing Professional Opinions. The basic policy has remained the same, but certain procedures have been added to increase timeliness and to strengthen the process. The policy of the Nuclear Regulatory Commission is to maintain a working environment that encourages employees to make known their best professional judgments even though they may differ from a prevailing staff view, disagree with a management decision or policy position, or take issue with proposed or established agency practices. Each differing professional opinion of an NRC employee will be evaluated on its own merit. Further, each differing professional opinion will be pursued to resolution and the employee's statement of differing professional opinon, together with the agency's final response, will be made available to the public to ensure the opennesss of NRC decisions that may affect the public.

It is not only the right but the duty of all NRC employees to make known their best professional judgments on any matter relating to the mission of the agency. Moreover, both the general public and the Nuclear Regulatory Commission benefit when the agency seriously considers NRC employees' differing professional opinions that concern matters related to the Agency's mission. This policy is intended to assure all employees the opportunity to express differing professional opinions in good faith, to have these opinons heard and considered by NRC management, and to be protected against retaliation in any form.

The original policy and procedures for Differing Professional Opinions were issued as an NRC Manual Chapter in September of 1980. After several years of use as well as reviews by a Special Review Panel and the NRC Office of Inspector and Auditor, the Manual Chapter was revised and reissued. It is Manual Chapter NRC—4125 dated July 23, 1985.

During the process of revision, both the Commission and the Executive Director for Operations reaffirmed their continued full support for the Differing Professional Opinion policy and procedures.

Single copies of Manual Chapter 4125 can be obtained by writing to the U.S. Nuclear Regulatory Commission, Office of Resource Management, Washington, DC 20555. In addition, a single copy of the proposed policy and procedures is available, and may be inspected and copied in the Commission's Public Document Room at 1717 H Street NW., Washington, DC. For further information contact Richard A. Hartfield, telephone 301-492-7834.

Dated at Bethesda, Maryland, this 25th day of February 1986.

For the Nuclear Regulatory Commission.

Ronald Scroggins,

Director, Office of Resource Management.

BILLING CODE 7590-01-M

Intent To Establish a Federally Funded Research and Development Center

ACTION: Notice of intent.

SUMMARY: The Nuclear Regulatory Commission (NRC) announces that it is considering the establishment and sponsorship of a Federally Funded Research and Development Center (FFRDC) for waste management technical assistance and research as a potential solution to problems of conflict of interest and continutiy of technical assistance. A draft of certain elements of the solicitation package is available for public comment. The package includes a draft statement of work for operating the Center, draft proposal instructions and evaluation criteria, and mandatory requirements. The Commission is also requesting comments on specific questions included in this package. The Commission has not made a commitment to sponsor the FFRDC. Final approval by the Commission will be subject to review of the responses to this Notice and to finding a highly qualified contractor to manage and operate the FFRDC.

DATE: Comment period expires April 24, 1986.

ADDRESSES: A draft of certain elements of the solicitation package is available for public inspection and copying at the U.S. Nuclear Regulatory Commission, Public Document Room, 1717 H Street NW., Washington, DC 20555, telephone 202/634-3273. Copies can also be obtained from the Division of Contracts, Room 2223, 4550 Montgomery Avenue, Bethesda, MD 20814; or will be mailed upon written request to the Division of Contracts, U.S. Nuclear Regulatory Commission, Washington, DC 20555, ATTN: Ms. Mary Mace, Contract Negotiator. Comments should be submitted to the address immediately above.

FOR FURTHER INFORMATION CONTACT: Ms. Mary Mace, Contract Negotiator, Division of Contracts, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301/492-4282).

SUPPLEMENTARY INFORMATION:

Background

Under the Nuclear Waste Policy Act of 1982 (NWPA), the U.S. Nuclear Regulatory Commission (NRC) is responsible for licensing the construction, operation, and closure of facilities required for a high-level radioactive waste disposal system, which are to be designed, constructed, operated, and closed by the U.S. Department of Energy (DOE). The facilities of the DOE waste disposal system will include mined geologic repositories; monitored retrievable storage (MRS) facilities or other interim storage measures; and transportation vehicles, casks and handling equipment.

NRC's high-level waste licensing program currently faces two critical problems with respect to contracted technical assistance and research. First, the continued use of contractors who also have a contractual relationship with DOE's high-level waste program, or with any other party who might be a participant in NRC's high-level waste licensing hearings, may give rise to an organizational conflict of interest situation, and may draw into question the independence and freedom from bias af the contractors' work and, consequently, of NRC's licensing decisions. According to the definition in 41 CFR 20-1.54, an "organizational conflict of interest" means that:

> " . . . A relationship exists whereby a contractor or prospective contractor has present or planned interests related to the work to be performed under an NRC contract which (1) may diminish its capacity to give impartial, technically sound, objective assistance and advice or may otherwise result in a biased work product, or (2) may result in its being given an unfair competitive advantage."

Second, the long-term continuity of NRC's waste management technical assistance and research program over the next twenty years or more is threatened as a result of efforts to avoid organizational conflict of interest situations (contractors are required to choose between doing work for NRC's program or for DOE's much larger program) and by the possible recompetition of technical work. The loss of contractor expertise has a significant impact to NRC's technical program because of its evolving nature and NRC's need for contractor experts to appear as expert witnesses at adjudicatory hearings.

In light of the problems discussed above, the NRC belives that the long-term contractual support offered by a Federally Funded Research and Devlopment Center (FFRDC) for waste management technical assistance and research is a potential solution for providing the special long-term contractual relationship needed by NRC in order to alleviate potential conflict of interest situations and provide long-term continuity.

Notice of Intent

This Notice of Intent indicates that NRC is considering the establishment and sponsorship of an FFRDC for waste management technical assistance and research as a solution to the problems of conflict of interest and long-term continuity. The FFRDC would be entitled, "The Center for Nuclear Waste Regulatory Analyses" (hereinafter referred to as the "Center"). The publication of this Notice of Intent, however, is not a commitment on the part of NRC to establish and sponsor an FFRDC. Any final decision to do so must be approved by the Commission and be in compliance with Office of Federal Procurement Policy (OFPP) Letter No. 84-1, "Federally Funded Research and Development Centers" (April 4, 1984).

Technical assistance and research tasks to be performed by the Center would encompass the following general areas: (1) Waste systems engineering and integration; (2) long-term performance of a geologic setting; (3) long-term performance of an engineered barrier system; (4) performance of an MRS and repository during opertion; (5) special analytical evaluations; and (6) transportation, environmental impacts, and other areas related to the Nuclear Waste Policy Act.

The period of performance for the Center would extend throughout the duration of NRC's high-level waste licensing responsibilitities estimated to be twenty years or more). The period of performance for the contract to manage and operate the Center would be for five years (to be renewed every five years, subject to comprehensive review by the NRC). The level of effort for the first five

BEST COPY AVAILABLE

VOL 51 ISS 47 MR 11 1986 UMI

years would build up from about 20–25 staff years during the first year to about 50 staff years durig the fifth year and may increase by up to 50%, depending on program development and appropriations availability. ("Staff years" includes direct staff plus support staff.)

The NRC screening criteria for the Center are: (1) No conflict of interest with the high-level waste program; (2) operation of the Center as a not-for-profit organization free of control by any organization whose affiliations could give rise to conflict of interest; (3) capability to provide long-term continuity in resources to NRC throughout the duration of its high-level waste program under NWPA (e.g., 20 years or more); (4) multi-disciplined staff; (5) access to existing equipment and facilities (e.g., computational and experimental laboratories); (6) expertise in the areas of technical assistance and research identified above; and (7) capability to provide testimony by expert staff during NRC adjudicatory hearings.

A draft of certain elements of the solicitation package is available for public comment. The package includes a draft statement of work for operting the Center, draft proposal instructions and evaluation criteria, and mandatory requirements. The Commission is also requesting comments on specific questions included in this package. Final Commission approval to issue a solicitation package will be subject to review of the public comments on this draft solicitation package. Final Commission approval to establish and sponsor the Center will be subject to finding a highly qualified contractor to manage and operate the Center.

Dated at Bethesda, Maryland, this 6th day of March, 1986.

For the Nuclear Regulatory Commission.

Victor Stello, Jr.,

Acting Executive Director for Operations.

[FR Doc. 86-5266 Filed 3-10-86; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-352]

Philadelphia Electric Co., Limerick Generating Station Unit 1; Exemption

I

The Philadelphia Electric Company (PECo./the licensee) is the holder of Facility Operating License No. NPF–39 which authorizes operation of the Limerick Generating Station, Unit 1 at a power level not in excess of 3293 megawatts thermal for each unit. The facility is a boiling water reactor located at the licensee's site in Montgomery County, Pennsylvania. The license provides, among other things, that the facility is subject to all rules, regulations and orders of the Commission now or hereafter in effect.

II

Paragraphs III.C.3 and III.D.3 of Appendix J to 10 CFR Part 50 require that containment isolation valves which may provide a pathway for leakage of containment atmosphere are required, on at least a 24 month frequency, to have their leakage measured for comparison with the limiting value of 0.6 L_a for Type B and Type C tests.

The Philadelphia Electric Company proposed a one-time extension to the Surveillance Requirements for Technical Specification 4.6.1.2 which would allow the 24 month interval for conducting Type C tests with gas on 27 isolation valves to be extended by 12 weeks until May 26, 1986. The staff has found that approval of the proposed extension is warranted and is authorized by the granting of this one-time exemption so that Unit 1 may continue to operate until a shutdown is required on May 26, 1986 to perform other extensive surveillance and maintenance activities.

III

The NRC staff has evaluated the licensee's basis for requesting the extension in the surveillance interval and finds that not granting this exemption would require the licensee to shut down the plant on March 3, 1986 for a period of about two weeks to conduct the testing. Granting of this exemption is likely to result in a negligible reduction in containment integrity during the 12 week extension period. In evaluating the changes to the Technical Specifications and the associated exemption, the staff reviewed the licensee's technical justifications for the requested extension. The staff reviewed the licensee's position that these tests cannot be conducted during power operations and that therefore a shutdown would be required to perform the tests. The staff reviewed the types of valves involved to ascertain that these are not the types of valves used in boiling water reactors which have a greater propensity to require intensive maintenance to maintain their leaktight integrity. The staff considered the uses of these valves to ascertain that they are not used during normal plant operations in the relatively more demanding applications such as modulating valves to continuously control flow rates or pressure. The staff reviewed available data provided by the licensee on similar valves used elsewhere in the industry which supports the licensee's position that these valves have traditionally good maintenance histories in the industry. The staff also reviewed previous leakage test results on the specific valves subject to the exemption request and has found that there is substantial margin between the valves previously measured and the limiting values in Appendix J and the Technical Specifications to accommodate any additional degradation likely to occur during the period of the extension. The details of the above described review are discussed in the attached Safety Evaluation. Based on the information provided by the licensee, the staff's evaluation of the licensee's submittals, the NRC staff concludes that the licensee has provided an adequate basis for the conclusion that postponing the subject local leak rate tests until May 26, 1986 is likely to have little or no effect on containment integrity.

The Commission has amended its regulations, effective on January 13, 1986, in 10 CFR 50.12 (50 FR 50764–50778) to modify the criteria for granting exemptions from its regulations. The amended regulations in 10 CFR 50.12 state that the Commission will not consider granting an exemption unless special circumstances are present. In its letter of February 25, 1986 the licensee has addressed two of those special circumstances which are applicable to this exemption request.

The licensee states that the special circumstances of 10 CFR 50.12(a)(2)(ii) are present in that application of the regulation in 10 CFR Part 50, Appendix J for the Type C leakage testing of 27 containment isolation valves within 24 months, i.e. by March 3, 1986, of their initial tests versus the requested one-time extension until May 26, 1986 is not necessary to achieve the underlying purpose of the rule. Appendix J states that a purpose of the tests is to assure that leakage through the primary reactor containment and systems and components penetrating primary containment shall not exceed allowable leakage rate values as specified in the technical specifications or associated bases.

The licensee has provided various bases for its conclusion that the requested delay of 12 weeks is not likely to result in a situation wherein the measured leakage from these valves would cause the limitations of the technical specifications to be exceeded. These bases, which are discussed in more detail in the enclosed Safety Evaluation and the licensee's submittals, include the licensee's characterization of these valves as being of the type which

traditionally have good maintenance histories, are not used in the relatively more demanding applications and which have shown in their initial leakage tests that they do not contribute an undue proportion of either the total measured containment leakage or the technical specification allowable leakage values. On these bases the staff agrees that it is unlikely that the delay in the testing of the subject 27 valves would result in measured leakage that would cause the allowable technical specification values to be exceeded. Thus the NRC staff concludes that the underlying purpose of Appendix J in this regard, to provide assurance that leakage shall not exceed technical specification allowable values, will be met with this one-time extension of the test schedule.

The licensee also states that the special circumstances of 10 CFR 50.12(a)(2)(v) are present in that the exemption would provide only temporary relief from the applicable regulation and the licensee has made good faith efforts to comply with the regulation.

The exemption is temporary since it provides relief from the requirement to conduct the subject tests only from March 3, 1986 until during a shutdown which shall begin no later than May 26, 1986. The licensee submits that it has made a good faith effort to comply with the requirements of the regulation in that it has tested al but 27 valves out of a total population of over 200 valves subject to such testing by the date initially required by Appendix J and the technical specifications. The licensee also describes its attempts to minimize the number of valves which would require the schedular relief by proceeding with the tests of all valves necessary to permit operations until May 26, 1986 which could be tested without requiring the shutdown of the plant. This effort was undertaken following the delay between the completion of low power testing activities and issuance of the full power license. Thus the NRC staff concludes that the requested exemption meets the criterion of providing only temporary relief and has been accompanied by a good faith effort to comply with the regulation.

Based upon the staff's findings that postponing the local leak rate tests from March 3 until May 26, 1986 is likely to have little or no effect on containment integrity and the staff's assessment of the special circumstances associated with this request for an exemption the NRC staff finds that operation of Limerick Unit 1 during the proposed extension period is acceptable. Therefore, the staff finds that the proposed temporary exemption from 10 CFR 50, Appendix J, Paragraph III.D.3 is acceptable.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the exemption is authorized by law, will not endanger life or property or the common defense and security and is otherwise in the public interest. Therefore, the Commission hereby grants the exemption as follows:

> An exemption is granted from the requirement to conduct Type C testing on containment isolation valves at an interval no greater than 24 months as stated in 10 CFR 50, Appendix J, Paragraph III.D.3. This exemption is granted for the period specified in the licensee's December 18, 1985 request for exemption (from March 3, 1986 until May 26, 1986) and is only applicable to 27 valves in Limerick Unit 1 as indicated in the modified Technical Specification Table 3.6.3–1 accompanying the issuance of Amendment No. 2 to License No. NPF–39.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of the exemption will have no significant impact on the environment (51 FR 7344, March 3, 1986).

A copy of the Commission's Safety Evaluation dated March 3, 1986 related to this action is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC and the Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

This Exemption is effective upon issuance and is to expire at midnight on May 26, 1986.

Dated at Bethesda, Maryland this 3rd day of March 1986.

For the Nuclear Regulatory Commission.

Robert Bernero,

Director, Division of BWR Licensing.

[FR Doc. 86-5268 Filed 3-10-86; 8:45 am]

BILLING CODE 7590-01-M

Sequoyah Fuels Corp. (Sequoyah Facility); Memorandum and Order; Notice of Informal Hearing and Opportunity To Become a Party

[Docket No. 40-8027-MLA-2, ASLBP No. 86-524-01-MLA-2]

March 5, 1986.

I. Introduction

Please take notice that, on February 20, 1986, the Nuclear Regulatory Commission issued an Order instituting an informal hearing in this matter. Pursuant to the Commission's Order, the undersigned was designated presiding officer for this matter on February 25, 1986.

The Commission instituted this proceeding in response to petitions for a hearing filed by the Native Americans for a Clean Environment Client Council (NACE), the National Water Center (NWC), the Arkansas Peace Center (APC), Morton Newmark, Marjorie A. Spees, and Earth First! Austin (EFA). The hearing will concern Sequoyah Fuels Corporation's (SFC) application under 10 CFR 20.302(a) for disposal of floride sludge and contaminated noncombustible material and storage of raffinate sludge on site at its Sequoyah Facility near Gore, Oklahoma. By October 1, 1986, SFC is to propose a plan to dispose of, rather than store, the raffinate sludge.

II. How To Participate

The Commission's Order directed the presiding officer to request from NACE, NWC, APC, Newmark, Spees and EFA, filings detailing their standing to participate and their complaints concerning the license amendment. The Order also directed the presiding officer to provide a similar opportunity to petition to be heard by other interested persons. The Order authorised the presiding officer: (1) To request, at his discretion, written submissions and documents; (2) to set schedules; (3) to entertain statements from those who do not desire to become parties or cannot satisfy the requirements for party status, and (4) to hear oral presentations if necessary.

The Commission directed that those who wish to become parties (other than the NRC Staff and SFC) must set forth with particularity and in writing:

1. Their interest in the proceeding;
2. How their interest may be affected by the results of the proceeding, including a statement of the reasons why they should be made parties that makes particular reference to:
   a. Their right under the Atomic Energy Act to be made a party;
   b. The nature and extent of their property, financial, or other interest in the proceeding; and
   c. The possible effect of any order that may be entered in the proceeding on their interest; and
3. The specific aspect or aspects of the subject matter of the proceeding on which they wish to be heard.

Each of the foregoing points shall be addressed in separate paragraphs concisely stated. (Petitioners who are parties to the proceeding on SFC's application concerning the UF_6 to UF_4

VOL 51
ISS 47
MR 11
1986
UMI

conversion facility may refer to their petition in that proceeding to the extent that information remains valid.)

In submitting the information called for in item 3 above, petitioners are to describe the matters raised in the application which they plan to address with specific complaints.

A determination that petitioners have standing to participate as parties to the proceeding will be governed by existing agency precedents pursuant to 10 CFR 2.714(d). See the Commission's Order and *Rockwell Internatonal Corp.* (Energy Systems Group Special Nuclear Materials License No. SNM-21), LBP-83-65, 18 NRC 774 (1983). The *Rockwell* case relied on *Nuclear Engineering* (Sheffield, Illinois Low Level Radioactive Waste Disposal Site) ALAB-473, 7 NRC 737 (1978), and stated at page 3 that:

> . . . The practical tests are that the petition must show (1) that the petitioner will or might be injured in fact by one or more of the possible outcomes of the proceeding, and (2) that the asserted interest of the petitioner in achieving a particular result is at least arguably within the zone of interests protected by the statute involved.

If the presiding officer finds that the hearing petitions or any intervention petition should be denied *in toto* for lack of standing or any other reason, that determination, which must be in writing, will become the final agency action within thirty days unless the Commission, on its own initiative, undertakes a review of that decision.

In furnishing the information called for above, petitioners may also respond to the March 3 letter to the presiding officer from counsel for SFC. Specifically, petitioners may respond to SFC's position stated in that letter that: (1) This proceeding should not be consolidated with the existing proceeding concerning the proposed UF_6 to UF_4 conversion facility, and (2) this proceeding should be deferred. If it so desires, NRC Staff may also respond.

Staff counsel has advised that Staff's review of the application pertaining to disposal of materials other than raffinate sludge is still in its early stages and might be impacted by the forthcoming application to dispose of raffinate sludge. The latter application is to be submitted by October 1, 1986. Staff is requested to provide bimonthly reports on the progress of its review to SFC, petitioners and the presiding officer.

In view of this, petitioners will not be required to submit their detailed complaints with regard to the application at this time. The dates for the submission of specific complaints and for Staff to indiate whether it wishes to be a party will be set after considering petitioners' and SFC's views on whether their proceeding should be consolidated with the proceeding concerning the UF_6 to UF_4 conversion facility and whether this proceeding should be deferred. At this time, petitioners must submit only the information called for above. This will permit a ruling on their standing to become parties.

Those petitioners who are admitted as parties will, in the future, be required to describe specifically any deficiencies in the application, cite particular sections or portions of the application which relate to the deficiency, and state in detail the reasons why a particular section or portion of the application is deficient. This material is to be submitted under oath or affirmation and shall state the relief sought with respect to such deficiency complaint. Petitioners must also submit all data and material in their possession which supports or illustrates each of the deficiencies complained of. Data and material from generally availabale publications may be cited rather than furnished. Petitioners must also state what relief they seek with respect to each of their complaints. A broad statement requesting denial or recision of the license or its amendment without stating why such extreme relief is appropriate will not satisfy the requirement to state the relief sought.

On or before April 10, 1986, NACE, APC, Newmark, Spees, EFA, and anyone else, including governmental entities, who wishes to become a party shall file the information called for in items 1 to 3, above.

III. How and Where To File

A. Information Called for by This Notice and Order

The original and two copies of information called for by this Notice and Order is to be filed with the Docketing and Service Branch of the Office of the Secretary, U.S. Nuclear Regulatory Commission, 1717 H Street, NW., Washington, DC 20555. Single copies of such filings shall also be served on SFC, Stephen H. Lewis, Assistant Chief Hearing Counsel, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and the presiding officer by either personally delivering it or mailing it, properly addressed and stamped, by April 10, 1096.

B. Other Written Submissions

The original and two copies of all other written submissions made by a party shall also be filed with Docketing and Service Branch with single copies mailed or personally delivered to the presiding officer, SFC, Mr. Lewis, and all other parties on or before the due date. Attorneys representing a party or petitioner must file the orignial and two copies of their notice of appearance with the Docketing and Service Branch, with service on all other parties, upon being retained.

C. Service List

In the Memorandum and Order identifying the parties to this proceeding, the presiding officer will establish an official service list of parties who are to receive copies of written submissions in this proceeding.

IV. Duty of the Applicant

In order to permit petitioners to comply wtih the 30-day deadline to submit the information required, SFC must ensure that, to the extent not already provided, the application, the license sought to be amended, and all correspondence pertaining to its application, are immediately upon receipt of this Notice and Order: (1) Made available to petitioners for inspection and copying, and (2) forwarded to the presiding officer. This materal shall be made available at a convenient location in the vicinity of the SFC facility and at such other locations as may be indicated by requests. The material shall be available for inspection and copying during business hours and during reasonable periods evenings and weekends. This material, together with the material submitted by petitioners, and any other material called for by the persiding officer, will form the Hearing File on which the presiding officer will base his decision.

V. Presiding Officer's Initial Ruling

Upon receipt of petitioner's submissions, the presiding officer will evaluate the material in the Hearing File. The presiding officer will then rule on each petitioner's rithts to become a party to this proceeding. When submitted, the presiding officer will also review petitioners' complaints and supporting material. Im making this review, the presiding officer may rule that the petitioners's complaints: (1) Are admissible for consideration; (2) are beyond the scope of this proceeding; (3) constitute requests for relief which the presiding officer lacks the power to grant; (4) are too vague to permit consideration; or (5) are otherwise

inadmissible. If necessary, the presiding officer will call for additional submissions prior to making the rulings contemplated by this paragraph. In the absence of such a request, no further submissions are to be made.

Petitioners are hereby put on notice that the presiding officer may rule on the merits of the entire matter based on the initial submission of complaints.

VI. Informal Hearing

To the extent the presiding officer finds petitioners complaints admissible, he either may order additional submissions from the parties, or schedule an oral presentation, or both. If an oral presentation is scheduled, it will take place in the vicinity of the SFC facility. The parties will be permitted to present testimony and argument, but cross-examination will not be permitted. The parties may, however, suggest questions to the presiding officer to be posed by him. Discovery is not permitted.

If the NRC Staff does not elect to participate as a party to this proceeding, the presiding officer may seek information from the Staff directly. In that event, any information received will be served on the parties to the proceeding by the presiding officer.

VII. Limited Appearances

Those who do not wish to become parties but wish to submit a statement to the presiding officer may do so by mailing their statement to the Commission's Secretary, properly addressed and stamped, on or before April 10, 1986. Should the presiding officer determine that a petitioner may not be a party to this proceeding, the material submitted by that petitioner will be treated as such a limited appearance statement. Limited appearance statements are not part of the Hearing File.

VIII. Schedule for Decision

The presiding officer intends to issue a decision in this proceeding as promptly as feasible following receipt of petitioners' complaints, with a goal of 120 days if additional submissions are required following receipt of the complaints. No petition for review will be entertained by the Commission regarding the presiding officer's decision. However, the Commission may review the decision on its own initiative.

Order

For all the foregoing reasons and upon consideration of the entire record in this matter, it is, this 5th day of March 1986, Ordered:

1. That on or before April 10, 1986, the Native Americans for a Clean Environment Client Council, the National Water Center, the Arkansas Peace Center, Morton Newmark, Marjorie A. Spees, and Earth First! Austin shall file a petition to participate as described in the foregoing memorandum;
2. That any other person wishing to participate shall file a similar petition by the same date;
3. That this informal hearing shall be conducted in accordance with the procedures described in the foregoing memorandum.

John H. Frye, III,
Administrative Judge.

March 5, 1986.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35-24042; 70-7095]

Consolidated Natural Gas Co.; Proposed Issuance of Common Stock for Long-Term Incentive Plan

March 5, 1986.

Consolidated Natural Gas Company ("Consolidated"), Four Gateway Center, Pittsburgh, Pennsylvania 15222, a registered holding company, has filed a post-effective amendment to its declaration with this Commission pursuant to sections 6(a) and 7, of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(5) thereunder.

Consolidated proposes to issue, subject to stockholder approval, up to 4,000,000 shares of its common stock, $2.75 par value, or double (pursuant to a stock split) the 2,000,000 shares, $4 par value, authorized for issuance in the Commission's order of June 21, 1985 (HCAR No. 23738) for funding of its Long-Term Incentive Plan.

The post-effective amendment to the declaration and any further amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 31, 1986, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the amended declaration, as filed or as it may be further amended, may be permitted to become effective.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,
Secretary.

BILLING CODE 8010-01-M

[Release No. IC-14968; File No. 812-6240]

Investment Trust of Boston; Renoticing of Application

March 5, 1986.

A second notice is hereby given that on December 6, 1985, a notice (Investment Company Act Release No. 14832) was issued on an application filed on October 30, 1985, by Investment Trust of Boston ("IBT") and Moseley Capital Management Inc. ("MCM"), both at 60 State Street, Boston, Massachusetts 02109; ITB High Income Plus Fund, Inc., ITB—Massachusetts Tax Free Income Fund, and The Empire Builder Tax Free Bond Fund, all at P.O. Box One, 60 State Street, Boston, Massachusetts 02101 (collectively, with ITB, the "Funds"); Warlick & Baker, Inc. ("W&B"), 163 Washington Street, Morristown, New Jersey 07960; and Empire Group, Inc. ("Empire"), 6 East 43rd Street, New York, New York 10017 (the Funds, MCM, W&B and Empire collectively, "Applicants") for an order of the Commission, pursuant to section 6(c) of the Investment Company Act of 1940 ("Act") exempting Applicants from the provisions of section 15(a) of the Act to the extent necessary to permit the implementation, without prior shareholder approval, of certain new investment advisory and sub-advisory agreements. On January 29, 1986 Applicants filed an amendment to the application which, in general, concerns certain interim fees to be paid by the Funds for advisory services. All interested persons are referred to the application and amendment on file with the Commission for a statement of the representations contained therein, which are summarized below and in the above release, and to the Act and rules thereunder for the text of the applicable provisions thereof.

Applicants state that each of the Funds is registered under the Act as an open-end, management investment company. Applicants further state that

VOL 51
ISS 47
MR 11
1986
UMI

MCM is registered under the Investment Advisers Act of 1940 and is a wholly-owned subsidiary of Moseley, Hallgarten, Estabrook & Weeden Holding Corporation ("Holding"), whose principal operating subsidiary is Moseley, Hallgarten, Estabrook & Weeden, Inc. ("Moseley"), a New York Stock Exchange member firm. Under the new advisory agreements ("New Advisory Agreements"), MCM acts as investment adviser to ITB and Massachusetts Tax Free Income Fund and, subject to the granting of the relief requested herein, acts as investment adviser to High Income Plus Fund and the Empire Builder Fund, and furnishes a continuing investment program for the Funds and makes investment decisions on their behalf. W&B is also registered under the Investment Advisers Act of 1940, and, subject to the granting of the relief requested herein and at the direction and control of MCM, it may provide certain sub-advisory services to High Income Plus Fund pursuant to the interim sub-advisory arrangement ("Interim Sub-Advisory Arrangement") with MCM. On November 28, 1985, MCM owned 50% of the outstanding voting securities of W&B. Subject to the granting of the relief requested herein, Empire acts as sub-adviser to Empire Builder Fund pursuant to the new Empire sub-advisory agreement ("New Empire Sub-Advisory Agreement") with MCM. On November 28, 1985 Empire was 33⅓% owned by Moseley.

At the October 1985 meetings of the Boards of each of the Funds, the Director or Trustees who are not "interested persons", as that term is defined in the Act, reviewed the performance of MCM, W&B and Empire under the Former Advisory Agreements and the Former Sub-Advisory Agreements (collectively, Former Agreements), and approved new advisory and sub-advisory agreements in anticipation of a sale transaction possibly resulting in an assignment and termination. Thereafter, on December 9, 1985, MCM assumed direct responsibility for providing portfolio management services to High Income Plus Fund, and adopted its Interim Sub-Advisory Arrangement with W&B with respect to that Fund, pursuant to which W&B's modified sub-advisory services will be terminated on February 9, 1986.

On October 4, 1985, Holding and Amwal American Investment Limited ("Amwal") entered into a stock purchase agreement ("Purchase Agreement") pursuant to which Amwal agreed to purchase up to 1,200,000 shares of Series B Preferred Stock ("Preferred Stock") of Holding, resulting in an injection of additional capital for Holding. Amwal has acquired all 1,200,000 shares of Preferred Stock. Until July 31, 1986, each share of Preferred Stock is entitled to five votes and is entitled to vote together with Holding's common stock on all matters submitted to the common stockholders. On or before July 31, 1986, holders of Preferred Stock may convert all, but not less than all, such shares into shares of common stock. The 1,200,000 shares of Preferred Stock owned by Amwal represents approximately 39% of the voting power of all outstanding voting securities of Holding and if converted to common stock, would represent between 33% and 39% of the outstanding common stock. In addition, three representatives of Amwal have been elected to the eleven member Board of Directors of Holding, two of whom have been appointed officers of Holding or its subsidiaries (but not MCM). Thus, completion of the sale transaction under the Purchase Agreement may have resulted in a presumptive change of control of Holding and its subsidiaries and affiliated companies, including MCM, W&B and Empire, as "control" is defined in the Act. In such event, an assignment of each of the Former Advisory Agreements may have occurred under section 2(a)(4) of the Act, according to the application and, if such assignments have occurred, the application states that the Former Agreements would have terminated.

In view of the foregoing, Applicants determined to take the following steps: The Directors or Trustees of each of the Funds considered and approved the applicable New Advisory Agreements and the New Sub-Advisory Agreements, which are identical to the respective Former Agreements (except for modification to change the periods during which the New Agreements are to be in effect), and considered and accepted MCM's Interim Sub-Advisory Arrangement with W&B, which provides that MCM pay W&B a fee for the interim period that is possibly greater than that provided for in its Former Sub-Advisory Agreement. This interim arrangement will involve no additional expense to the Fund.

Applicants state that the shareholders of each of the Funds have been or will be provided with an opportunity, at their next regularly scheduled meeting, to approve the applicable New Advisory Agreements and the New Empire Sub-Advisory Agreement. Each Fund's proxy materials have made or will make clear that shareholder approval of the applicable New Advisory Agreement and the New Empire Sub-Advisory Agreement would result in approval of the terms and conditions thereunder (including the fees to be paid pursuant thereto) over the period from November 28, 1985 until the date of the shareholders meeting. All fees to be paid under each New Advisory Agreement, each of the New Sub-Advisory Agreements, and Interim Sub-Advisory Arrangement will be accrued by the respective Funds and paid only upon shareholder approval of the respective New Advisory Agreements and the New Empire Sub-Advisory Agreement. Until the applicable shareholders meeting, Moseley has undertaken to receive as compensation under each new advisory contract the lower of its costs of providing services thereunder or the fees accrued under the applicable contract. MCM's costs in this respect will include its obligation to pay sub-advisory fees to W&B and Empire; and the fees payable to Empire will not exceed materially its costs of providing services to MCM.

Applicants request relief from the provisions of section 15(a) of the Act so that the Directors or Trustees of each of the Funds may approve, and the Funds may enter into, the respective New Advisory Agreements and New Sub-Advisory Agreements as of November 28, 1985, and Interim Sub-Advisory Arrangements as of December 9, 1985 without shareholder approval prior to or at those times. The New Advisory Agreements and the New Empire Sub-Advisory Agreement will continue until they are approved, disapproved or replaced by alternative arrangements by action of the shareholders of each of the Funds at the next shareholders' meeting. The shareholders of ITB and Massachusetts Tax Free Income Fund have approved the applicable New Advisory Agreement. The next shareholders' meeting of High Income Plus Fund and Empire Builder Fund will be held no later than 240 days after the completion of the sale transaction.

In authorizing the original filing of the application in October 1985, Applicants state that the Directors or Trustees of each of the Funds determined that it was in the best interests of the respective Funds and their shareholders to continue the then-existing relationships with MCM, W&B and Empire after the completion of the sale transaction. Thereafter, on December 9, 1985, MCM assumed direct responsibility for providing portfolio management services to High Income Plus Fund, and adopted its Interim Sub-Advisory Arrangement with W&B with respect to that fund, pursuant to which W&B's modified sub-advisory services will be terminated on February 9, 1986. Applicants assert that the Directors' or Trustees' determinations as to the advisability of entering into the New Agreements complied with the requirements of section 15(c) of the Act.

MCM and Empire represent that for the period between the completion of the sale transaction and the next shareholders' meetings of each of the Funds (except High Income Plus Fund) there has not been, and with respect to Empire Builder Fund, there will not be any material change from the Former Agreements in the nature or substance of the services provided to the Funds or in the fees charged therefor, or in the persons providing such services or in their supervision. The Funds have been advised that they will not bear any of the costs of the preparation or filing of this application or of the consideration by shareholders of the New Advisory Agreements and New Empire Sub-Advisory Agreement, except to the extent that such costs also relate to the holding of shareholders' meetings for the purpose of obtaining approvals unrelated to the approval of the New Agreements.

For the following reasons, Applicants submit that the exemptions requested are consistent with the standards set forth in section 6(c) of the Act and should be granted: (1) No changes in the management or services rendered will result; (2) Board and shareholder approval will be obtained promptly; (3) the exemption would be consistent with the policies of Rule 15a–4 even though Applicants cannot avail themselves of this Rule; (4) the exemption would avoid certain adverse effects on the Funds not intended by the Act. Applicants submit that the exemption requested is consistent with the public interest and with the interest and protection of investors and the purposes fairly intended by the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicants at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

[Release No. IC-14969; File No. 811-4326]

Lehman Institutional Funds Trust; Application for an Order Declaring That Applicant Has Ceased To Be an Investment Company

March 5, 1986.

Notice is hereby given that Lehman Institutional Funds Trust ("Applicant"), 55 Water Street, New York, New York 10041, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, filed an application on October 8, 1985, for an order of the Commission, pursuant to section 8(f) of the Act, declaring that Applicant has ceased to be an investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the applicable provisions thereof.

Applicant states that it was established as a business trust under the laws of the Commonwealth of Massachusetts on June 7, 1985. Applicant further states that it filed a registration statement pursuant to section 8(b) of the Act on June 13, 1985; its registration statement did not become effective and the initial public offering of its shares was never commenced. Applicant also states that it does not have any shareholders; it does not have any assets or liabilities; it is not a party to any litigation or administrative proceeding and it does not propose to engage in any business activities other than those necessary for the winding-up of its affairs.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon the Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 35-24043; 70-7202]

New England Electric System et al.; Proposal To Provide Equity Funds to Subsidiary and of Permanent Financing of Construction Expenditures; Exception From Competitive Bidding

March 5, 1986.

New England Electric System ("NEES"), 25 Research Drive, Westborough, Massachusetts 01504, a registered holding company, and its electric utility subsidiary, New England Electric Transmission Corporation ("NEET"), 4 Park Street, Concord, New Hampshire 03301, have filed with this Commission an application-declaration pursuant to sections 6(a), 7, 9, 10, and 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42, 45, 46, and 50(a)(5) thereunder.

By order dated June 10, 1983 (HCAR No. 22971), the Commission authorized NEET to enter into a credit agreement ("Credit Agreement") with a group of banks, providing for up to $120 million for construction, operation, and ownership of certain transmission facilities ("NEET Project") to constitute part of a major transmission interconnection ("Interconnections") between the electric utility systems comprising the New England Power Pool and Hydro-Quebec, the provincial electric utility of the Province of Quebec. NEET's obligations under the Credit Agreement are secured in part by an assignment to the banks of its rights under a Phase I Terminal Facility Support Agreement ("Support Agreement") executed with NEET by the members of the New England Power Pool participating in the Interconnection ("Participants"), including New England Power Company, Inc., the systems generating subsidiary. The Support Agreement obligates each Participant, beginning on the earlier of November 1, 1987, or commercial operation of the NEET Project, to pay to NEET a monthly

VOL
51
ISS
47
MR
11
1986
UMI

support charge equal to that Participant's share of the total cost of service of the NEET Project.

In order to meet its commitment to, among other things, finance the NEET Project, NEET proposes to execute with NEES an Equity Funding Agreement whereby NEES will provide NEET with equity funding not to exceed $20,000,000, through capital contributions or through the purchase of NEET's common stock.

Additionally, NEET proposes to replace the Credit Agreement on the completion of the NEET Project, and fund the total amount of the construction debt, with permanent financing. It is expected that these permanent arrangements will include an infusion of equity by NEES, some form of long-term debt financing, and some short-term debt financing. The total amount of debt financing will range from $70 to $98 million. As in the case of the construction financing, the principal security for the permanent debt financing will be the assignment to the lenders of NEET's rights under the Support Agreement. NEET may also grant a first lien and security interest on the facility to the lenders. NEES and NEET have stated that development of favorable permanent financing arrangements will involve, to an unusual degree, a process of informing and educating lenders concerning NEET's circumstances, and negotiating mutually acceptable terms and conditions for the financing. NEET has requested permission, and is authorized, to commence negotiating the terms and conditions of the permanent financing pursuant to an exception from competitive bidding requirements of Rule 50 (b) and (c). After agreement has been reached on the terms and conditions of the permanent financing documentation of the loan and other arrangements will be provided by amendment to this filing and subject to Commission authorisation.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 31, 1986, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the applicants-declarants at the addresses specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

DEPARTMENT OF STATE

[CM-8/945]

Shipping Coordinating Committee; Subcommittee on the Safety of Life at Sea (SOLAS); Working Group on Lifesaving Appliances. 18th Session of the Lifesaving Appliances Subcommittee; Meeting

The Working Group on Lifesaving Appliances, SOLAS Subcommittee of the Shipping Coordination Committee will conduct an open meeting at 10:00 AM on March 18, 1986 in Room 1103 at Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC.

The purpose of the meeting is to finalize preparations for the 18th Session of the Lifesaving Appliances Subcommittee (LSA) of the International Maritime Organization (IMO) which is scheduled for June 23-27, 1986 in London. In particular, the working group will discuss development of U.S. positions dealing with, inter alia, the following topics:

—Clarification and interpretation of 1983 Amendments to the 1974 Safety of Life at Sea Convention (SOLAS).

—Revision of the lifesaving appliance and equipment requirements of Chapter 10 of the Mobile Offshore Drilling Unit (MODU) Code.

—Amendments to the Code of Safety for Special Purpose Ships in respect of survival craft on sail training ships.

—Symbols for emergency and operational purposes on board ships.

—Review of the forms of the Passenger Ship Safety Certificate and the Cargo Ship Safety Equipment Certificate under the harmonised system of survey and certification.

—Review of the lifesaving requirements of other IMO conventions, codes, and recommendations in respect of the 1983 SOLAS Amendments.

Members of the public may attend up to the seating capacity of the room.

For further information contact Mr. Robert Markle, Office of Merchant Marine Safety (G-MVI-3), Room 1404, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593. Telephone: (202) [illegible]. Normal office hours are between 7:30 AM and 4:00 PM, Monday through Friday, except holidays.

Dated: February 28, 1986.

Richard C. Scissors,

Chairman, Shipping Coordinating Committee.

BILLING CODE 4710-07-M

DEPARTMENT OF TRANSPORTATION

Application of Air Transport International, Inc.; for Certificate Authority Under Subpart Q

AGENCY: Department of Transportation.

ACTION: Notice of Order to Show Cause (Order 86-3-12), Docket 43022.

SUMMARY: The Department is directing all interested persons to show cause why it should not issue an order finding Air Transport International fit and awarding it a certificate of public convenience and necessity to engage in scheduled interstate and overseas air transportation.

DATES: Persons wishing to file objections shall do so no later than March 25, 1986; answers to objections shall be filed no later than April 4, 1986.

ADDRESSES: Objections and answers to objections should be filed in Docket 43022 and addressed to the Documentary Services Division, U.S. Department of Transportation, 400 Seventh Street, SW., Room 4107, Washington, DC 20590, and should be served upon the persons listed in Attachment A to the order.

FOR FURTHER INFORMATION CONTACT: Steven B. Farbman, Office of Aviation Enforcement and Proceedings, U.S. Department of Transportation, 400 Seventh Street, SW., Room 4116, Washington, DC 20590, (202) 426-7631.

Dated: March 4, 1986.

BILLING CODE 4910-62-M

[Order 86-3-17]

Department Findings in Employee Protection Program Cases

AGENCY: Department of Transportation.

ACTION: Notice of order finding major contractions at certificated air carriers (Order 86-3-17).

SUMMARY: The Department of Transportation has found that several airlines experienced major contractions in employment levels during the period from mid-1983 to September 1985. The Department's findings, in eleven cases triggered by employee applications for benefits, update those last made by the Civil Aeronautics Board before its sunset. The Department found that the following carriers experienced major contractions in the stated periods:

(a) Air New England in each of the twenty-one months from January 1982 through September 1983;

(b) Braniff Airways in each of the thirteen months from June 1982 through June 1983;

(c) Pan American World Airways in each of the six months from April 1985 through September 1985;

(d) Republic Airlines in the months of May 1982, December 1984 and February 1985;

(e) Trans World Airlines in the months of January 1983, March 1983, October 1983, November 1983, December 1983, March 1984 and April 1984; and

(f) Western Airlines in each of the five months from November 1984 through March 1985.

The findings are part of the Department's investigations to make threshold determinations regarding assistance for airline employees under the Employee Protection Program, section 43 of the Airline Deregulation Act, 49 U.S.C. 1552.

FOR FURTHER INFORMATION CONTACT: Bernard F. Diederich, Office of General Counsel (C-10, Room 10102), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 472-5580.

SUPPLEMENTARY INFORMATION: The complete text of Order 86-3-17 is available for inspection from our Documentary Services Division at the above address.

Dated: March 5, 1986.

Matthew V. Scocozza,

Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910-62-M

Federal Aviation Administration

Advisory Circular; Static Strength Substantiation of Attachment Points for Occupant Restraint System Installations

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Draft advisory circular (AC) availability and request for comments.

SUMMARY: This AC provides information and guidance regarding an acceptable means of compliance with Part 23 of the Federal Aviation Regulations (FAR) applicable to static strength substantiation of the attachment points for occupant restraint system installation which have a safety belt and shoulder harness.

DATE: Commenters must identify File AC 23-4X; Subject: Static Strength Substantiation of Attachment Points for Occupant Restraint System Installations, and comments must be received on or before May 12, 1986.

ADDRESS: Send all comments on the proposed draft AC to: Federal Aviation Administration, ATTN: Regulations and Policy Office (ACE-110), 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Joseph W. Burress, Aerospace Engineer, Regulations and Policy Office (ACE-110), Aircraft Certification Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106; commercial telephone (816) 374-6941, or FTS 758-6941.

SUPPLEMENTARY INFORMATION: Any person may obtain a copy of this proposed draft AC by writing to: Federal Aviation Administration, Aircraft Certification Division, Regulations and Policy Office (ACE-110), 601 East 12th Street, Kansas City, Missouri 64106.

Comments Invited

Interested parties are invited to submit comments on the proposed draft AC. The proposed draft AC and comments received may be inspected at the offices of the Regulations and Policy Office (ACE-110), Room 1656, Federal Office Building, 601 East 12th Street, Kansas City, Missouri, between the hours of 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

Background

Sections 23.785, 23.625(d), and 23.1413 require that the rated strength of safety belts and shoulder harnesses be no less than the loads resulting from applying the ultimate inertia forces specified in § 23.561(b). For small airplanes, amendment 23-32 of § 23.785 requires that each seat be equipped with a safety belt and shoulder harness. Procedures for approving safety belts are provided in TSO-C22f and performance standards for seats with safety belts only are provided in TSO-C39a. However, methods of demonstrating compliance with the installation strength requirements of attachment points for combined safety belt and shoulder harness installations have not been addressed in the Technical Standard Orders (TSOs).

Issued in Kansas City, Missouri, February 25, 1986.

Barry D. Clements,

Manager, Aircraft Certification Division.
